3 □ 1994

Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Die zweite Publikationsart, die Veröffentlichungen, wenden sich an eine ganz

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in Videotext databases.

To help the user focus his research, Eurostat has created 'themes' i.e. a subject classification. The statistical documents and publications are listed by series, e.g. yearbooks, short-term trends or methodology, in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission des Communautés européennes a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type videotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Achtung

Ab dem 15. März benutzt Eurostat für die Konjunkturindikatoren nicht mehr die Datenbank Cronos, sondern eine neue eigene Datenbank namens LINDA. Auf Grund dieses Wechsels der Datenbank ändern sich verschiedene Berechnungsverfahren der Indikatoren, insbesondere für die Indizes EUR 12. Somit können die Daten dieser Veröffentlichungen deutliche Abweichungen zu früheren Veröffentlichungen aufweisen.

Please note

From 15 March onwards Eurostat will no longer be using the Cronos databank for its short-term economic indicators but its own new databank called LINDA. Since this change of databank will also entail changes in some of the procedures used to calculate the indicators, particularly those for EUR 12 indices, the data in this publication may diverge substantially from those in previous publications.

Avertissement

Depuis le 15 mars, Eurostat n'utilise plus la base de données Cronos pour les indicateurs conjoncturels, mais une nouvelle base de données spécifique appelée LINDA. À la suite de ce changement, plusieurs procédures de calcul des indicateurs, notamment les indices EUR 12, ont été modifiées. Il est donc possible que les données contenues dans cette publication présentent des écarts importants par rapport à celles des publications passées.

 Die Angaben in diesem Monatsheft wurden der Datenbank LINDA entnommen, die über verschiedene „Hosts“ (Anbieter der Datenbank) zugänglich ist. Für alle Auskünfte bezüglich dieser Hosts wenden Sie sich bitte an Eurostat, Luxemburg (Tel. 43 01-34567).

To obtain specifications of the principal characteristics of the series contained in this bulletin contact Eurostat, Luxembourg (Tel. 43 01-33408 or 43 01-34401).
 The information included in this bulletin has been taken from the LINDA databank, which is accessible via the different host companies. For all information about these host companies contact Eurostat, Luxembourg (Tel. 43 01-34567).

Pour obtenir des précisions sur les caractéristiques principales des séries contenues dans ce bulletin, s'adresser à Eurostat, Luxembourg (tél. 43 01-33408 ou 43 01-34401).

Les informations reprises dans ce bulletin sont extraites de la banque de données LINDA, qui est accessible via différents serveurs. Pour toute information concernant ces serveurs, s'adresser à Eurostat, Luxembourg (tél. 43 01-34567).

KOMMENTAR

Grundstoffgüterindustrie als Vorreiter des Aufschwungs

Die Industrieproduktion in der Europäischen Union (EU) zeigt Zeichen eines Umschwungs, d.h. die deutliche Schrumpfung des industriellen Output ist zum Stillstand gekommen. Dabei zeigt die Grundstoffgüterindustrie schon klare Wachstumsraten, während die Investitionsgüterindustrie (noch) stagniert.

In der EU betrug die Veränderungsrate des arbeitstäglich bereinigten **Produktionsindex der Industrie** gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Dezember 1993 +0,8 %, für die Grundstoffindustrie +3,2 %.

Betrachtet man das vierte Quartal 1993, so beläuft sich für die EU die Veränderungsrate des **saisonbereinigten Produktionsindex** gegenüber dem Herbstquartal auf +0,4 %. für die Grundstoffgüterindustrie beträgt der entsprechende Wert +2,0.

In Japan beträgt die entsprechende Veränderungsrate für die Industrieproduktion -3,2 %, die Rezession wird also tiefer; während in den USA mit +1,6 eine Festigung der Aufwärtsbewegung zu beobachten ist.

Für die **einzelnen Mitgliedstaaten** der Europäischen Union ergeben sich, soweit vorhanden - für die saisonbereinigte Industrieproduktion folgende Veränderungsraten Oktober bis Dezember gegenüber den drei Vormonaten (in Klammern: entsprechende Veränderungsrate für die Grundstoffgüterindustrie): Vereinigtes Königreich +1,3 % (+2,3 %), Italien +0,5 % (+1,2 %), Frankreich +0,4 % (+2,0 %), Spanien -1,1 % (geschätzt) (+0,3 %), West-Deutschland -0,4 % (+0,8 %), Belgien -0,9 % (-1,2 %) (geschätzt), Dänemark -0,8 % (+1,6 %), Griechenland -1,9 % (+0,1 %), Niederlande -1,8 % (4,4 %). Das Konjunkturbild ist also eher heterogen, in der Regel zeigt die Grundstoffgüterindustrie ermutigende Zeichen eines Aufschwungs.

Die Preisentwicklung der Industrieproduktion war 1993 der Rezession angepaßt: in der Europäischen Union stiegen die Preise noch um 1,5 % gegenüber 1992 (1992 gegenüber 1991: 1,5 %), in den Mitgliedstaaten war in der Regel die Inflationsrate niedriger als im Vorjahr, in 6 Mitgliedstaaten sogar negativ:

Belgien -1,0 % (0,2 %), Dänemark -0,9 % (-1,2 %), Deutschland -0,1 % (1,3 %), Griechenland +11,5 % (11,9 %); Spanien +2,4 % (1,4 %), Frankreich -0,2 % (1,0 %), Irland +2,3 % (2,1 %), Italien +3,8 % (1,9 %), Luxemburg -1,3 % (-2,6 %), Niederlande -1,2 % (0,5 %), Vereinigtes Königreich +3,3 % (2,0 %), USA +1,5 % (0,6 %); Japan -1,6 % (-1,0 %).

Luxemburg, den 14.03.1994

HINWEISE

1. SYSTEMATIK DER INDUSTRIEZWEIGE

Die in der vorliegenden Veröffentlichung ausgedruckten Indizes beziehen sich auf die Industriezweige gemäß der harmonisierten Systematik der Wirtschaftszweige in den Europäischen Gemeinschaften (NACE - Fassung von 1970) - Abteilung 1 bis 4. Im letzten Teil der Veröffentlichung befinden sich auch einige Indikatoren zu der NACE-Abteilung 5 "Baugewerbe". (Ein Auszug der Abteilungen 1 bis 4 ist als Teil des Glossars veröffentlicht.)

2. PRODUKTIONSSINDIZES

2.a Der Produktionsindex misst die mengenmäßige Entwicklung der Bruttowertschöpfung (d.h. die Entwicklung zu konstanten Preisen) in der Industrie, wobei zu bedenken ist, daß die Zusammenfassung der Produktionsbereiche bei der Indexbildung (ebenso wie die Zusammenfassung für einen bestimmten Industriezweig auf Gemeinschaftsebene) durch Gewichtung mit Hilfe der Bruttowertschöpfung erfolgt (im Prinzip zu Faktorkosten). Die Indizes werden in zwei Etappen berichtigt: eine erste Berichtigung wird unter Berücksichtigung der ungleichen Zahl der Arbeitstage pro Monat durchgeführt (ausgenommen Spanien und Japan). Daran anschließend erfolgt für EUR 12 und neun der Mitgliedsstaaten eine Saisonbereinigung aufgrund eines EUROSTAT-Verfahrens. Für Deutschland, Irland und das Vereinigte Königreich werden die Indizes durch das nationale statistische Amt saisonbereinigt.

2.b Bedeutung von %A und %B:

Arbeitstäglich bereinigte Produktionsindizes:

- %A: die letzten 12 Monate gegenüber den vorhergehenden 12 Monaten;
- %B: letzte 3 Monate gegenüber dem entsprechenden Vorjahreszeitraum.

Saisonbereinigte Produktionsindizes:

- %A: die letzten 3 Monate gegenüber den vorhergehenden 3 Monaten;
- %B: der letzte Monat gegenüber dem Vormonat.

2.c Die Ausführungen zu 2.a und 2.b gelten auch für die Produktionsindizes des Baugewerbes.

2.d Die Produktionsindizes von Drittländern (USA und Japan) entstammen OECD-Quellen.

3. ARBEITSTÄGLICHE BEREINIGUNG

Im Gegensatz zum Produktionsindex (siehe 2.a) werden die übrigen Indizes (Umsatz, Auftragseingang, Ein- und Ausfuhr, abhängig Beschäftigte, Bruttolöhne und -gehälter) vor Saisonbereinigung nicht in bezug auf die ungleiche Zahl der Arbeitstage berichtet.

4. UMSATZ- UND AUFRAGSEINGANGSINDIZES

Diese Indizes erfassen die Entwicklung des Umsatzes (Gesamtumsatz einschließlich Exportabsatz) bzw. des Auftragseingangs zu laufenden Werten. Für Griechenland, Spanien und Portugal werden zur Zeit keine Umsatzindizes geliefert. Der Auftragseingangsindex wird darüber hinaus auch von Frankreich nicht berechnet.

5. EIN- UND AUSFUHRINDIZES NACH INDUSTRIEZWEIGEN

Für die Ein- und Ausfuhrindizes wurden Außenhandelsdaten industrieller Erzeugnisse (gemäß der Systematik des Harmonisierten Systems) den NACE-Industriezweigen zugeordnet. Bei dieser Zuordnung sind gewisse Ungenauigkeiten unvermeidlich, die die Vergleichbarkeit der Ein- und Ausfuhrindizes mit den anderen Indikatoren begrenzen.

Alle Außenhandelsindikatoren sind von Eurostat saisonbereinigt. Die Indizes für EUR 12 geben ausschließlich den außergemeinschaftlichen Handel wieder, die Indizes der Mitgliedsstaaten auch den Außenhandel mit anderen EG Staaten.

6. ERZEUGERPREISINDEX DER INDUSTRIELLEN PRODUKTION

Dieser Index erfaßt (in der Landeswährung der einzelnen Staaten) die Entwicklung der Verkaufspreise ab Werk für alle Erzeugnisse, die auf den Inlandsmärkten der Mitgliedsstaaten verkauft werden. Die Indizes für die Gemeinschaft (EUR 11, Portugal verfügt zur Zeit über keine Erzeugerpreisindizes) beziehen sich auf die gewichtete Gesamtheit dieser Preisentwicklung.

Die Erzeugerpreisindizes für die einzelnen Mitgliedsstaaten (und die Gemeinschaft) werden auch in ECU angegeben. Hierzu werden die nationalen Indizes mit dem jeweiligen für diesen Monat geltenden Wechselkurs gegenüber dem ECU multipliziert und neu auf 1985 = 100 umbasiert.

7. INDIZES DER ABHÄNGIG BESCHÄFTIGTEN SOWIE DER BRUTTOLÖHNE UND -GEHÄLTER

Die Beschäftigtenzahlen umfassen sämtliche beschäftigte Personen (auf der Lohnliste stehende Arbeiter und Angestellte). Die Bruttolöhne und -gehälter umfassen die Zahlungen an alle Arbeitslohnempfänger einschließlich der auf die Beschäftigten entfallenden und vom Arbeitgeber einbehalteten Steuern und Sozialabgaben, jedoch ohne die Arbeitgeberbeiträge zur Sozialversicherung sowie sonstige vom Arbeitgeber zu zahlende Beiträge.

8. SCHAUBILDER

Die Schaubilder zeigen jeweils elektronisch errechnete Trends, d.h. stark geglättete saisonbereinigte Werte, um Extremwerte zu unterdrücken; die vierteljährlichen Beschäftigungsindizes werden mit Hilfe linearer Interpolation auf Monatsbasis umgerechnet. Der Maßstab der Schaubilder ist halb-logarithmisch.

9. WEITERE METHODISCHE ERLÄUTERUNGEN

Genauere Angaben bezüglich der Definitionen einzelner Indikatoren und der angewandten Methodologie können einer aktualisierten Fassung der "Methodologie der Konjunkturindikatoren" von 1991 entnommen werden.

10. ZEICHEN UND ANMERKUNGEN:

COMMENTS

Intermediate goods industry leads recovery

Industrial production in the European Union (EU) is showing signs of being at a turning point, i.e. the steep downturn in industrial output has come to a halt, with the raw materials industry already showing clear growth rates, while the capital goods industry is (still) stagnating.

The rate of change in the industrial production index, adjusted for the number of working days, was 0.8% up for the EU in December 1993 compared with the corresponding month of the previous year (+3.2% for the intermediate goods industry).

For the fourth quarter of 1993, the rate of change in the seasonally adjusted production index for the EU was 0.4% up on the previous quarter (+2.0% for the intermediate goods industry).

In Japan, the corresponding rate of change for industrial production was -3.2%, indicating a deepening of the recession, while the figure of +1.6% in the USA indicates a consolidation of the upward trend.

For the Individual Member States of the European Union, the seasonally adjusted figures for industrial production, where available, show the following rates of change for October-December compared with the previous three months (the figures in brackets show the corresponding rates of change for the intermediate goods industry): United Kingdom +1.3% (+2.3%), Italy +0.5% (+1.2%), France +0.4% (+2.0%), Spain -1.1% (+0.3%) (estimate), West Germany -0.4% (+0.8%), Belgium -0.9% (-1.2%) (estimate), Denmark -0.8% (+1.6%), Greece -1.9% (+0.1%) and the Netherlands -1.8% (+4.4%). The economic picture is thus rather a mixed one, with the raw materials industry generally showing encouraging signs of an upturn.

Price trends of industrial production in 1993 were in line with the recession: in the European Union prices rose by 1.5% compared with 1992 (1992 compared with 1991: 1.5%). In the Member States the inflation rate was generally lower than in the previous year and in six Member States it was even negative:

Belgium -1.0% (+0.2%), Denmark -0.9% (-1.2%), Germany -0.1% (+1.3%), Greece +11.5% (+11.9%), Spain +2.4% (+1.4%), France -0.2% (+1.0%), Ireland +2.3% (+2.1%), Italy +3.8% (+1.9%), Luxembourg -1.3% (-2.6%), Netherlands -1.2% (+0.5%), United Kingdom +3.3% (+2.0%), USA +1.5% (+0.6%), and Japan -1.6% (-1.0%).

Luxembourg, 14.03.1994

NOTES

1. CLASSIFICATION OF INDUSTRIAL ACTIVITIES

The indices in this bulletin cover industry as it is defined in Divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE - 1970 version). In the last part of the bulletin there are also some indicators relating to NACE Division 5, "Building and civil engineering". (Divisions 1 to 4 of the NACE have been reproduced as part of the glossary.)

2. INDICES OF PRODUCTION

2.a The index of production measures changes in the volume (at constant prices) of the gross value added created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighing according to gross value added (in principle, at factor cost). The indices are adjusted in two stages: firstly to take account of the varying number of working days in the month (except for Spain and Japan) and secondly by seasonal adjustment according to Eurostat's own method for EUR 12 and nine of the Member States. For Germany, Ireland and the United Kingdom, the indices are adjusted by the national statistical office.

2.b Meaning of %A and %B:

Indices of production adjusted by the number of working days:

- %A: the last twelve months as compared with the preceding twelve months;
- %B: the last three months as compared with the corresponding months of the previous year.

Seasonally adjusted indices of production:

- %A: the last three months as compared with the preceding three months;
- %B: the last month as compared with the month before that.

2.c The descriptions and definitions in 2.a and 2.b above also apply to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (the United States and Japan) are taken from OECD sources.

3. ADJUSTMENT FOR NUMBER OF WORKING DAYS

Unlike the index of production (see 2.a above), the other indices (turnover, orders received, imports, exports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. No turnover indices are supplied at present for Greece, Spain or Portugal, and France does not calculate any index of orders received.

5. INDICES OF IMPORTS AND EXPORTS BY INDUSTRIAL BRANCH

For the indices of imports and exports, foreign trade data of industrial products (following the nomenclature of the Harmonized System) were grouped according to the industrial NACE-branch to which they belong. This grouping of products causes inevitably certain inaccuracies, so that the comparability of the indices of imports and exports with other indicators is limited.

All foreign trade indices are seasonally adjusted by Eurostat. The indices for EUR 12 refer only to extra-Community trade, the indices for Member States reflect also intra-Community trade.

6. INDEX OF PRODUCER PRICES OF INDUSTRIAL PRODUCTION

This index shows (in the national currency of the Member State in question) changes in the ex-works selling prices of all products sold on the domestic markets of the various countries. The Community indices (EUR 11, since there are no producer price indices for Portugal) refer to overall weighted price changes.

The producer price indices for the individual Member States (and the Community) are shown in ecus as well. The national indices are multiplied by the exchange rate for the national currency against the euro for the month in question and rebased to 1985 = 100.

7. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

Figures showing the number of employees include all persons employed by the firm (manual workers and salaried employees on the firm's payroll). Gross wages and salaries cover all payments to persons employed by the firm in remuneration for the work they do, including taxes and social security contributions payable by employees and deducted by the employer, but excluding social security and other contributions payable by the employer.

8. GRAPHS

The graphs show electronically derived trends, i.e. strongly smoothed seasonally adjusted series in order to offset extreme values; in the case of quarterly employment, a monthly series is obtained by linear interpolation. The graphs are on a semi-logarithmic scale.

9. FURTHER EXPLANATIONS ON METHODOLOGY

Further details on the definitions of the various indicators and the methodology used are given in the updated version of the "Methodology of Short-Term Indicators" 1991.

COMMENTAIRE

L'industrie des produits de base, secteur à la pointe de la relance

La production industrielle de l'Union européenne (UE) montre des indices de reprise dans la mesure où le net recul de la production industrielle est désormais stoppé. A cet égard, seule l'industrie des produits de base affiche déjà des signes manifestes de croissance tandis que celle des biens d'équipement stagne (encore).

Dans l'UE, le taux de variation de l'indice de production industrielle corrigé du nombre de jours ouvrables a progressé de + 0,8% en décembre 1993 par rapport à la période correspondante de l'année précédente et de + 3,2% pour l'industrie des produits de base.

Si l'on considère le quatrième trimestre de 1993, le taux de variation de l'indice de production industrielle corrigé des variations saisonnières de l'UE a progressé de + 0,4% par rapport au trimestre automnal et de + 2,0% pour l'industrie des produits de base.

Au Japon, le taux correspondant de variation de la production industrielle a reculé de - 3,2%, ce qui signifie que la récession s'amplifie, tandis qu'aux États-Unis on constate une consolidation de la tendance à la reprise avec + 1,6%.

En ce qui concerne les divers États membres de l'Union européenne et dans la mesure où les données sont disponibles, les taux de variation de l'indice de production industrielle corrigé des variations saisonnières des mois d'octobre à décembre ont évolué comme suit par rapport aux trois mois précédents (entre parenthèses: taux de variation relatif à l'industrie des produits de base): Royaume-Uni + 1,3% (+2,3%), Italie + 0,5% (+1,2%), France + 0,4% (+2,0%). Espagne - 1,1% (estimation) (+1,3%), Allemagne de l'Ouest - 0,4% (+ 0,8%), Belgique - 0,9% (-1,2%) (estimation), Danemark - 0,8% (+1,6%), Grèce - 1,9% (+0,1%), Pays-Bas - 1,8% (4,4%). Le panorama conjoncturel est donc assez hétérogène bien que, dans l'ensemble, l'industrie des produits de base affiche des signes encourageants de reprise.

La courbe des prix de la production industrielle a suivi en 1993 une allure calquée sur la récession dans la mesure où, dans l'Union européenne, les prix ont progressé de 1,5% par rapport à 1992 (1992 par rapport à 1991: 1,5%). En ce qui concerne le taux d'inflation, on a généralement observé dans les États membres un recul par rapport à l'année précédente. 6 pays réalisant même des taux négatifs:

Belgique - 1,0% (0,2%), Danemark - 0,9% (-1,2%), Allemagne - 0,1% (1,3%), Grèce + 11,5% (11,9%), Espagne + 2,4% (1,4%), France - 0,2% (1,0%), Irlande + 2,3% (2,1%), Italie + 3,8% (1,9%), Luxembourg - 1,3% (-2,6%), Pays-Bas - 1,2% (0,5%), Royaume-Uni + 3,3% (2,0%), Etats-Unis + 1,5% (0,6%), Japon - 1,6% (-1,0%).

NOTES

1. NOMENCLATURE D'ACTIVITES INDUSTRIELLES

Les indices repris dans la présente publication portent sur les activités industrielles telles que définies dans la Nomenclature générale des activités économiques dans les Communautés européennes (NACE - version de 1970) aux divisions 1 à 4. Dans la dernière partie de la présente publication, on trouvera également quelques indicateurs relatifs à la division 5 "Bâtiment et génie civil" de la NACE (un extrait de la NACE 1 à 4 est repris dans le glossarium).

2. INDICES DE PRODUCTION

2.a L'indice de production mesure l'évolution en volume (à prix constants) de la valeur ajoutée brute générée dans l'industrie, l'agrégation des indices de branches (comme l'agrégation au niveau communautaire pour une branche donnée) étant effectuée par pondération à l'aide de la valeur ajoutée brute (en principe au coût des facteurs). Les indices sont corrigés en deux étapes. Une première correction est effectuée pour tenir compte des différences en matière de nombre de jours ouvrables par mois (sauf pour l'Espagne et le Japon). La deuxième étape consiste, selon une méthode propre à Eurostat, à corriger des variations saisonnières les séries pour EUR 12 et pour neuf des Etats membres. Pour l'Allemagne, l'Irlande et le Royaume-Uni, les indices sont désaisonnalisés par les offices statistiques nationaux.

2.b Signification des %A et des %B

Indices de production après correction pour jours ouvrables:

- %A: les 12 derniers mois par rapport aux 12 mois précédents;
- %B: les 3 derniers mois par rapport aux mois correspondants de l'année précédente.

Indices de production désaisonnalisés:

- %A: les 3 derniers mois par rapport aux 3 mois précédents;
- %B: le dernier mois par rapport au mois précédent.

2.c Les explications données sous 2.a et 2.b ci-dessus s'appliquent également aux indices de production pour le bâtiment et le génie civil.

2.d Les indices de production de pays tiers (Etats-Unis et Japon) proviennent de source OCDE.

3. CORRECTION POUR JOURS OUVRABLES

Contrairement à l'indice de production (voir 2.a), les autres indices (chiffre d'affaires, entrées de commande, importations et exportations, nombre de salariés, salaires et traitement bruts) ne subissent pas - avant la désaisonnalisation - de corrections pour les différences constatées en matière de nombre de jours ouvrables.

4. INDICES DU CHIFFRE D'AFFAIRES ET DES ENTREES DE COMMANDES

Ces indices rendent compte de l'évolution du chiffre d'affaires (ventes totales, y compris les ventes à l'exportation) et des entrées de commandes en valeur courante. Aucun indice du chiffre d'affaires n'est disponible actuellement pour la Grèce, l'Espagne et le Portugal. La France ne calcule pas non plus cet indice.

5. INDICES DES IMPORTATIONS ET EXPORTATIONS PAR BRANCHES INDUSTRIELLES

Pour les indices d'importations et d'exportations, les produits industriels (selon la nomenclature du Système Harmonisé) ont été classés selon leur appartenance aux branches industrielles de la NACE. Ce regroupement des produits cause inévitablement des imprécisions; la comparabilité des indices d'importations et d'exportations avec les autres indicateurs reste donc limitée.

Tous les indices du commerce extérieur sont désaisonnalisés par Eurostat. Les indices EUR 12 montrent seulement le commerce extra-communautaire, tandis que les indices des Etats membres reflètent aussi le commerce intra CE.

6. INDICE DES PRIX A LA PRODUCTION INDUSTRIELLE

Cet indice rend compte (dans la monnaie nationale de l'Etat membre concerné) de l'évolution des prix de vente départ-usine de tous les produits qui sont vendus sur les marchés intérieurs des Etats membres. L'indice communautaire (EUR 11, le Portugal ne calculant pas actuellement d'indices des prix à la production) est une moyenne pondérée des différents indices nationaux.

Les indices des prix à la production des différents Etats membres (et de la Communauté) sont également indiqués en écus. A cet effet, les indices nationaux sont multipliés chaque mois par le taux de change de la monnaie nationale vis-à-vis de l'écu et convertis en base 1985 = 100.

7. INDICES DU NOMBRE DE SALARIES ET DES SALAIRES ET TRAITEMENTS BRUTS

Le nombre de salariés inclut l'ensemble des personnes occupées (ouvriers et employés) figurant sur la feuille de paie. Les salaires et traitements bruts portent sur les sommes versées à tous les salariés en rémunération de leur travail, y compris les impôts et cotisations de sécurité sociale dus par ceux-ci et retenus par l'employeur, mais à l'exclusion des cotisations de sécurité sociale et autres supportées par l'employeur.

8. GRAPHIQUES

Les graphiques présentent toujours des tendances calculées par moyen électronique, c'est-à-dire des séries désaisonnalisées fortement lissées, pour éliminer les valeurs extrêmes. Les indices de l'emploi - dont la fréquence est trimestrielle - sont mensualisés par interpolation linéaire. Les échelles des graphiques sont semi-logarithmiques.

9. AUTRES EXPLICATIONS METHODOLOGIQUES

Des informations plus détaillées au sujet des définitions des différents indicateurs et de la méthodologie appliquée peuvent être obtenues dans la version actualisée (1991) de la "Méthodologie des indicateurs conjoncturels".

10. SIGNES ET ABREVIATIONS

**Regelmäßig herausgegebene Eurostat-Veröffentlichungen
zum Thema Industrie**

- Industriekonjunktur – Monatliche Statistiken und Beilagen

Diese Veröffentlichung enthält die Indizes von industrieller Produktion, Umsatz, Auftragseingang, abhängig Beschäftigten, Löhnen und Gehältern, nach Industriezweigen, ferner Indizes des Werts von Ein- und Ausführen. Ein separates kurzes Kapitel ist den Konjunkturindikatoren für das Baugewerbe vorbehalten.

Beilagen mit Angaben zur Methodik und/oder mit retrospektiven Reihen vervollständigen die laufende Veröffentlichung.
Abonnement (VUI): ECU 91

- Panorama der EG-Industrie – zweimonatlich

Konjunktur-Beilage mit aktuellen Informationen über die Industrie in der EG.
Abonnement (VPA): ECU 50

- Struktur und Tätigkeit der Industrie – Jahreserhebung – Wichtigste Ergebnisse

Diese Veröffentlichung enthält die wichtigsten Ergebnisse der von den Mitgliedstaaten in Übereinstimmung mit einer Richtlinie des Rates vom 6. Juni 1972 durchgeföhrten koordinierten Jahreserhebung über die Tätigkeit der Industrie. Sie weist jährlich die Angaben über die wichtigsten wirtschaftlichen Tatbestände dieser Erhebung (Beschäftigung, Produktionswert, Wertschöpfung usw.) aus.

Preis: ECU 30

- Struktur und Tätigkeit der Industrie – Ergebnisse nach Unternehmensgröße

Dieser Band, der alle zwei Jahre herausgegeben wird, enthält die Ergebnisse der koordinierten Jahreserhebung über die Tätigkeit der Industrie für die fünf wichtigsten Tatbestände, gegliedert nach drei Größenklassen von Unternehmen.
Preis: ECU 20

BESTELLSCHEIN

Zu senden an: Amt für amtliche Veröffentlichungen

Die aufgeführten Veröffentlichungen sind auch bei den auf der dritten Umschlagseite aufgeführten Vertriebsbüros erhältlich.

The periodicals of the Statistical Office on industry

Industrial trends – Monthly statistics and supplements

This publication contains the indices of industrial production, turnover, orders received, number of employees, gross wages and salaries by branch of industry as well as indices of the value of imports and exports. A special chapter is devoted to indicators for the building and civil engineering sector.

Supplements on methodology and/or containing retrospective series complete the ordinary publication.
Subscription (VUI): ECU 91

Panorama of the EC Industry – bimonthly

Short-term supplement with the latest information on EC industry.
Subscription (VPA): ECU 50

Structure and activity of industry – Annual inquiry – Main results

This publication contains the main results of the coordinated annual inquiry into industrial activity, carried out by the Member States pursuant to a Council Directive of 6 June 1972. It gives annually the results for the most important economic variables of this inquiry: employment, production value, value-added, etc.
Price: ECU 30

Structure and activity of industry – Data by size of enterprise

This volume, which is published every two years, gives the results of the coordinated annual inquiry into industry for the five most important variables by three classes of size of enterprise.
Price: ECU 20

ORDER FORM

To send to: Office for Official Publications

Les périodiques de l'Office statistique sur l'industrie

Conjoncture industrielle — Statistiques mensuelles et suppléments

Cette publication contient les indices de production industrielle, chiffres d'affaires, entrées de commandes des personnes employées, des salaires et des traitements par branche industrielle ainsi que des indices de valeur des importations et des exportations. Un bref chapitre est réservé aux indicateurs conjoncturels du secteur du bâtiment et du génie civil.

Des suppléments de caractère méthodologique et/ou contenant des séries rétrospectives complètent la publication courante.
Abonnement (VUI): ECU 91

Panorama de l'industrie communautaire (bimestriel)

Supplément conjoncturel avec les dernières informations sur l'industrie communautaire.
Abonnement (VPA): ECU 50

Structure et activité de l'industrie — Enquête annuelle — Principaux résultats

Cette publication comporte les principaux résultats de l'enquête annuelle coordonnée sur l'activité industrielle, exécutée par les États membres en conformité avec une directive du Conseil du 6 juin 1972. Elle donne annuellement les résultats pour les variables économiques les plus importantes de cette enquête: emploi, valeur de la production, valeur ajoutée, etc.
Prix: ECU 30

Structure et activité de l'industrie — Données selon la taille des entreprises

Dans ce volume qui paraît à un rythme bisannuel, les résultats de l'enquête annuelle coordonnée sur l'activité de l'industrie sont ventilés pour cinq variables importantes, selon trois classes de taille des entreprises.
Prix: ECU 20
