NOTE

Symbols of United Nations documents are composed of capital letters combined with figures.

General disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation "country or area" appears in this publication, it covers countries, territories, cities or areas. In previous issues of this publication, where the designation "country" appears in this headings of tables, it should be interpreted to cover countries, territories, cities or areas.

In some tables, the designation "developed" or "developing" economies is intended for statistical convenience and does not necessarily express a judgment about the stage reached by a particular country or area in the development process.

NOTE

Les cotes des documents de l'Organisation des Nations Unies se composent de lettres majuscules et de chiffres.

Déni de responsabilité

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

L'appellation "pays ou zone", figurant dans cette publication, désigne des pays, des territoires, des villes ou des zones. L'appellation "pays" figurant dans certaines rubriques des tableaux de numéros antérieurs de cette publication doit être interprétée comme désignant des pays, des territoires, des villes ou des zones.

L'appellation économie "développée" ou économie "en voie de développement" qui figure dans certains tableaux est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays ou une zone donné.

ABBREVIATIONS AND COUNTRY NOMENCLATURE

Names of some countries or groups of countries and of some commodities or groups of commodities have been abbreviated. Exact titles will be found in the following publications referred to in the introduction:

(i) United Nations Standard Country Code (Annex II, Country classification for international trade statistics),

(ii) United Nations Standard Country or Area Code for Statistical Use,

(iii) Standard Country or Area Codes for Statistical Use,

(iv) Standard Country or Area Codes for Statistical Use, Interim List

(v) Standard International Trade Classification, Revised (SITC, Revised),

(vi) Standard International Trade Classification, Revision 2, (SITC, Revision 2),

(vii) Classification by Broad Economic Categories (BEC),

(viii) Classification of Commodities by Industrial Origin and

(ix) International Standard Industrial Classification of all Economic Activities (ISIC).

1. Data relating to the People's Republic of China generally include those for Taiwan Province in the field of statistics relating to population, area, natural resources, natural conditions such as climate, etc. In other fields of statistics, they do not include Taiwan Province unless otherwise stated. Therefore, in this publication the data published under the heading China exclude those for Taiwan Province. Figures representing the trade with Taiwan Province which may have been reported by any reporting country or area are included in the grouping Asia.

2. On 22 May 1990 Democratic Yemen and Yemen merged to form a single State. Since that date they have been represented as one Member with the name "Yemen". All data shown in this publication relating to the period prior to 1990 refer to the former Democratic Yemen and the former Yemen.

3. Through accession of the German Democratic Republic to the Federal Republic of Germany with effect from 3 October 1990, the two German States have united to form one sovereign State. As from the date of unification, the Federal Republic of Germany acts in the United Nations under the designation of "Germany". All data shown which pertain to Germany prior to 3 October 1990 are indicated separately for the Federal Republic of Germany and the former German Democratic Republic based on their respective territories at the time indicated. Where data for united Germany (subsequent to 3 October 1990) are not available, they are shown separately and pertain to the territorial boundaries prior to 3 October 1990.

4. Unless otherwise indicated, data provided for Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia which was composed of six republics, whereas data provided for Yugoslavia after that date refer to the Federal Republic of Yugoslavia which is composed of two republics (Serbia and Montenegro).

5. Data for the Czech Republic and Slovakia, where available, are shown separately under the appropriate country name. For periods prior to 1 January 1993, where no separate data are available for the Czech Republic and Slovakia, unless otherwise indicated, data for the former Czechoslovakia are shown under the country name "former Czechoslovakia".

6. In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent republics (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). From 1992 onwards data are shown for the individual republics. Prior to 1992 data are shown for the former USSR.

ABREVIATIONS ET CODES PAYS.

Les noms de certains pays ou groupes de pays et de certains produits ou groupes de produits ont dû être abrégés. On trouvera les intitulés exacts de ces noms dans les publications suivantes qui figurent dans l'Introduction:

(i) United Nations Standard Country Code (Annex V, 'Standardized Abbreviated French Country Names'),
(ii) United Nations Standard Country or Area Code for Statistical Use,
(iii) Standard Country or Area Codes for Statistical Use
(iv) Standard Country or Area Codes for Statistical Use, Interim List
(v) Classification type pour le commerce international révisée, (CTCI révisée),
(vi) Classification type pour le commerce international (deuxième version révisée) (CTCI, Révision 2),
(vii) Classification par grandes catégories economiques (CGCE)
(viii) Classification des marchandises par origine industrielle et
(ix) Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI).

1. Les données relatives à la République populaire de Chine comprennent en général les données relatives à la province de Taïwan lorsqu'il s'agit de statistiques concernant la population, la superficie, les ressources naturelles, les conditions naturelles tel que le climat, etc. Dans les statistiques relevant d'autres domaines, la province de Taïwan n'est pas comprise, sauf indication contraire. C'est le cas dans cet Annuaire où les données pour la Chine ne comprennent pas celles de la province de Taïwan. Lorsque des pays partenaires ont déclaré des échanges avec Taïwan ceux-ci sont inclus dans Asie.

2. Le Yémen et le Yémen démocratique ont fusionné le 22 mai 1990 pour ne plus former qu'un seul Etat, qui est depuis lors représenté comme tel à l'Organisation, sous le nom 'Yémen'. Toutes les données présentées dans cet Annuaire qui se rapportent à la période antérieure à l'année 1990 se réfèrent aux anciens Yémen démocratique et Yémen.

3. En vertu de l'adhésion de la République démocratique allemande à la République fédérale d'Allemagne, prenant effet le 3 octobre 1990, les deux Etats allemands se sont unis pour former un seul Etat souverain. A compter de la date de l'unification, la République fédérale d'Allemagne est désignée à l'ONU sous le nom 'Allemagne'. Toutes les données se rapportant à l'Allemagne avant le 3 octobre 1990 figurent dans deux rubriques séparées, basées sur les territoires respectifs de la République fédérale d'Allemagne et l'ancienne République démocratique allemande selon la période

indiquée. En l'absence de données pour l'Allemagne unifiée (à compter du 3 octobre 1990), les données sont fournies séparément sous les rubriques Allemagne (République fédérale d') et Allemagne (ancienne République démocratique) et se rapportent aux limites territoriales antérieures au 3 octobre 1990 lorsqu'elles sont disponibles.

4. Sauf indication contraire, les données fournies pour la Yougoslavie avant le 1er janvier 1992 se rapportent à la République fédérative socialiste de Yougoslavie, qui était composée de six républiques; les données fournies pour la Yousgoslavie après cette date se rapportent à la République fédérative de Yougoslavie, qui est composée de deux républiques (Serbie et Monténégro).

5. Les données relatives à la République tchèque, et à la Slovaquie, lorsqu'elles sont disponibles, sont présentées séparément sous le nom de chacun des pays. En ce qui concerne la période antérieure au 1er janvier 1993, pour laquelle on ne possède pas de données séparées pour les deux Républiques, les données relatives à l'ancienne Tchécoslovaquie sont, sauf indication contraire, présentées sous le titre 'ancienne Tchécoslovaquie'.

6. En 1991, l'ex Union Soviétique a été scindée officiellement en quinze républiques indépendantes (Arménie, Azerbaïdjan, Bélarus, Estonie, Fédération de Russie, Géorgie, Kazakstan, Kirghizistan, Lettonie, Lituanie, Ouzbékistan, République de Moldova, Tadjikistan, Turkménistan et Ukraine). A partir de 1992 les données sont indiquées pour chaque république individuellement. Avant 1992, les données sont indiquées pour l'ancienne URSS.

MAGNETIC TAPES AND DISKETTES

External trade data, for the majority of countries from 1962 to the latest year, are available in machine readable form. Detailed information on coverage and price is available, on request, from the United Nations Statistical Division, New York, N.Y. 10017, USA. The data cover annual periods but, for certain countries, cumulative quarterly data are available in the SITC Classification supplied by the reporting country.

BANDES MAGNETIQUES ET DISQUES

Les données du commerce extérieur pour la majorité des pays de 1962 à la dernière année écoulée sont disponibles sous forme de supports magnétiques. Les informations détaillées sur la nature, le volume, les dates et les prix de ces supports magnétiques peuvent être obtenues auprès Division de Statistique des Nations Unies, New York, N.Y. 10017, Etats Unis. Les données sont annuelles mais, pour certains pays, seules les données trimestrielles cumulées sont disponibles dans la classification CTCI soumise par le pays concerné.

INTRODUCTION

The forty-third edition of the International Trade Statistics Yearbook provides the basic information for individual countries' external trade performances in terms of the overall trends in current value, as well as in volume and price, the importance of trading partners and the significance of individual commodities imported and exported. This edition shows annual statistics for 182 countries or reporting customs areas. It is published in two volumes.

VOLUME I

Volume I contains detailed data for individual countries. For each country the following tables usually appear:

(a) Table 1, showing ten series, five for imports and five for exports. The five are: total merchandise trade and trade in gold (generally in national currency, but in US dollars for some countries), conversion factors for converting total merchandise trade from national currency into United States dollars, quantum index numbers and unit value index numbers for total imports and exports.

(b) Table 2, showing for the years 1988 to the latest year available, percentage breakdowns of imports by broad economic categories of end use and of exports by industrial origin. Data for the years 1970 to 1987 were shown in previous issues of this Yearbook. The analysis for imports is based on the Classification by Broad Economic Categories 1/ and for exports on the Classification of Commodities by Industrial Origin 2/. Reclassification of foreign trade according to broad economic categories or industrial origin requires statistical information at the five-digit level of the Standard International Trade Classification, Revised. (For history and background of the SITC, see pages xxi-xxiii). When such details are not available, approximate allocations are made, using the three-digit level of the SITC Revised. In comparing statistics of international trade with statistics of production, problems of limitation exist in addition to those of classification. Exports of products which are obviously not produced in the reporting countries (e.g., exports of tea and cocoa from the Netherlands or the United Kingdom) have been allocated to the industrial origin in which they would have been classified in the producing countries; in the case of tea and cocoa: Agriculture. The industrial origin in the reporting country of these exports is, in fact, the wholesale trade. In the Classification of Commodities by Industrial Origin, SITC, Revised

headings are subdivided to correspond, roughly, to groups of the International Standard Industrial Classification of All Economic Activities, (Revision 1) 3/. The breakdown of exports by industrial origin is derived as much as possible from national or special exports.

(c) Table 3, showing up to the most recent five years available, the value in United States dollars of import and export trade analyzed by the principal countries or areas and regions of provenance and destination. The analysis is made according to the United Nations Standard Country or Area Codes for Statistical Use 4/. In some instances, owing to the nature of the national country classification, the conversion to the United Nations country classification could not be done precisely. A maximum of 50 trading partners are shown in order of magnitude, based on the sum of the values over the years included in the table, with imports and exports ranked separately. Below the value table is a listing showing the percentage breakdown of trade by regions and the percent of trade accounted for by each of the first ten trading partners for the latest available ten years.

(d) Tables 4 and 5, showing up to the most recent four years available, the quantity and the value in United States dollars of imports and exports analyzed by commodities. Data for a commodity will appear if the value in any year is greater than or equal to 0.3 per cent of the total trade for that year. The commodities are shown in terms of SITC headings (abbreviated). An asterisk (*) preceding the description indicates that these are the only codes belonging to the next higher level of the SITC, and the next higher level is therefore not shown.

In some instances the figures shown in United States dollars in the tables indicated under (c) and (d) above may not correspond to those in United States dollars in the table described under (a) above or to those in national currency in that table after the application of the currency conversion factors. These discrepancies arise in large part from revisions to the more recent data at the total level where such revisions were not broken down for the more detailed data by commodity and partner; it was felt that a partial revision of the tables referred to under (c) and (d) above to make the totals consistent with those in (a) should not be made.

For all countries, the analysis of imports and exports by commodity is made according to the Standard International Trade Classification (SITC) 5/ as follows:

i) SITC, Revised for countries reporting according to that revision or according to the original SITC for the latest four years.

ii) SITC, Revised for countries that have begun reporting according to the SITC, Revision 2, but with less than four years of data in that nomenclature.

iii) SITC, Revision 2 for countries reporting according to that revision for the latest four years.

iv) SITC, Revision 2 for countries reporting data according to the SITC, Revision 3 or the Harmonized Commodity Description and Coding System (HS). The data so reported for these countries, in volumes I and II, were converted from SITC, Revision 3 to SITC Revision 2 and are footnoted in the tables. In a few cases because of the difficulties of converting data from SITC, Revision 3 to SITC, Revision 2 this resulted in data which are not comparable with data for earlier years reported in terms of SITC, Revision 2 to a very significant extent.

In a few cases, the conversion to SITC from the national commodity classification system could not be done precisely and, therefore, some of the SITC codes are not exact in their coverage.

When available, more detailed data by commodity and partner country are published according to the SITC, Revised, Revision 2 or Revision 3 in Commodity Trade Statistics 6/ and are also available on microfiches.

VOLUME II

Volume II contains commodity tables showing the total trade of certain commodities analyzed by regions and countries.

Commodity tables. These tables show imports and exports of commodities at the group (3-digit) level of the SITC, Revision 2 (all groups except for 351 and 688). The years covered are the five years 1990 to 1994. The values are in U.S. dollars and both imports and exports are analyzed by regions and principal trading countries. A maximum of 50 countries are shown in order of magnitude, based on the sum of the values over the years 1991, 1992 and 1993 included in the table, with imports and exports ranked separately. The systems of trade applicable to these countries are the same as those indicated under tables 4 and 5 in the country tables section of this publication. No quantity data are shown. In preparing these tables, in many cases estimates were made for countries whose data were not yet available. Notes on these estimates appear on pages 1 of Volume II.

Volume II also contains special tables showing, inter alia, (a) the contribution of the trade of each country to the trade of its region and of the world, (b) the flow of trade between countries and regions and (c) the fluctuations of the prices at

which goods moved internationally. The special tables are:

(a) Total imports and exports by regions and countries or areas;
(b) World exports by commodity classes and by regions;
(c) Growth of world exports by commodity classes and by regions;
(d) Structure of world exports by commodity classes and by regions;
(e) Total imports and exports: index numbers by countries or areas;
(f) Total exports and imports: index numbers of quantum, unit value and terms of trade by regions;
(g) Manufactured goods exports;
(h) Fuel imports: developed economies;
(i) Some indicators on fuel imports: developed economies;
(j) Export price index of machinery and transport equipment for selected countries;
(k) Export price index numbers of primary commodities and non-ferrous base metals.

Special Tables

The economic and geographic groupings in all the special tables are in accordance with those of Special Table A in this issue, although Special Table A sometimes includes more detailed geographic sub-groups. (See Special Table A for the details).

(A) Total imports and exports by regions and countries or areas. The regional, economic and world totals have been adjusted: (a) to include estimates for countries or areas for which full data are not available; (b) to include insurance and freight for imports valued f.o.b.; (c) to include countries or areas not listed separately; (d) to approximate special trade; (e) to approximate calendar years; and (f) where possible, to eliminate incomparabilities owing to geographical changes, by adjusting the figures for periods before the change to be comparable to those for periods after the change, for example, the European Community and the European Free Trade Association. The figures shown for individual countries correspond to the national currency figures which appear and are described in table 1 of the country tables. The letters in the first and last columns of the table indicate the system of trade used: G: General trade; S: Special trade. For footnotes see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

(B) World exports by commodity classes and by regions. For the general note and footnotes, see the end of the table.

(C) Growth of world exports by commodity classes and by regions.

The annual average rates of change in percentage terms given in this table have been uniformly calculated by the use of the compound interest formula:

$$r = \left(\sqrt[t]{\frac{Vn}{Vo}} - 1 \right) 100$$

r = Annual average rate of change in percentage terms
Vn = Value of exports during the last year of the period
Vo = Value of exports during the first year of the period
t = Number of years in period

For the general note and footnotes, see the end of Special Table D.

(D) Structure of world exports by commodity classes and by regions. The figures shown under the heading 'Origin of Exports' refer to the exports of the region or country appearing in the 'Area' column; those shown under the heading 'Destination of Exports' refer to the exports of the world to the region or country appearing in the 'Area' column. For the general note and footnotes, see the end of the table.

(E) Total imports and exports: index numbers by countries or areas. Unless otherwise stated in the footnotes, the unit value indices are in terms of national currencies. For the general note and footnotes, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

(F) Total exports and imports: index numbers of quantum, unit value and terms of trade by regions. For the footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(G) Manufactured goods exports. For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(H) Fuel imports: developed economies. For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(I) Some indicators on fuel imports: developed economies. This table shows the share of fuel imports in the total value of imports and in the total value of exports, and the ratio of unit value indices of manufactured goods exports to those of fuel imports. For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(J) Export price index of machinery and transport equipment for selected countries. For general note, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(K) Export price index numbers of primary commodities and non-ferrous base metals. For the general note and footnote, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

SOURCES AND PRESENTATION

The figures for Volumes I and II are obtained from national published sources, from data supplied by the Governments for use in this publication and the following United Nations publications: Commodity Trade Statistics, Monthly Bulletin of Statistics and Statistical Yearbook, and from publications specially prepared by other United Nations agencies. Estimates for some missing data are made by the United Nations Statistics Division.

The country and regional names used by various countries are not uniform for their trade statistics. Also, where former geographical entities commonly referred to in national statistics have changed, countries may introduce the corresponding changes in their statistics at different times. Wherever possible, however, parts of the world have been designated by the names they currently bear.

The country aggregates shown throughout this publication are based on those set forth in the United Nations Standard Country or Area Codes for Statistical Use 4/, except where indicated.

NATIONAL INDEX NUMBERS

National index numbers of unit value in national currencies or United States dollars and of quantum are shown in table 1. They

are the official indices which show the changes in the volume, (quantum index) and the average price (unit value index) of the aggregate merchandise imports or exports. Each index number represents a change between the period to which the number refers, called the current period, and a fixed period, called the publication base, in which the index is represented by the percentage 100. In order to facilitate comparison, the indices shown have been adjusted, where possible, so that the calendar year 1990 is the publication base. When changes are made in the coverage, formula or base period of an index, the two series are linked together if they have an overlapping period and are sufficiently comparable.

Quarterly and monthly figures in these index series appear in the United Nations Monthly Bulletin of Statistics and a more detailed description of their compilation is given in the 1977 Supplement to the Statistical Yearbook and the Monthly Bulletin of Statistics 7/.

TRANSITION COUNTRIES

For the period covered by this Yearbook, countries formerly classified for statistical purposes as centrally planned economies had systems of official rates between their currencies and other currencies, all consistent with rates of 0.90 new roubles to the United States dollar prior to 24 December 1971 and 0.829 new roubles to the United States dollar until February 1973; since then these rates have been fluctuating. They generally used these rates when it was necessary to convert foreign into domestic currencies for the purpose of compiling external trade statistics. The resulting data are for comparison with the external transactions of the rest of the world rather than with domestic monetary transactions.

The trade statistics of these countries had definitions somewhat different from those which exist in other countries. Differences in definition contribute to the discrepancies which can be observed between statistical records referring to the same flow of goods but kept by two trading partners having different economic systems. The trade among these countries was carried out on a basis not comparable to that governing trade with other countries. The concept of transaction value, for instance, as applied outside those countries is based on the existence of a market between exporters and importers in which the interaction of supply and demand has more effect than it can be assumed to have had in those countries; in the absence of data on the unit values of specific commodities entering the trade of those countries with one another, it is difficult to assess the possible effects on the trade statistics of this kind of incomparability.

GENERAL STATEMENTS 8/

1. Territory. The statistics reported by a country refer to the customs area of the country. In most cases this coincides with the geographical area of the country. Where it does not, the fact is indicated in country notes. Changes in customs areas are also noted in country notes. Unless otherwise stated, the combination of two territories, formerly separate, results in the elimination from the statistics of their trade with each other. The separation of two territories, formerly together, results in the appearance of their trade with each other in the statistics for each territory.

2. System of trade. Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded:

(a) Special trade: special imports are the combined total of imports for direct domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods (nationalized goods are goods which, having been included in special imports, are then exported without transformation).

(b) General trade: general imports are the combined total of imports for direct domestic consumption and imports into bonded warehouses or free zones. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouses or free zones without having been transformed.

Direct transit trade, i.e., goods merely being trans-shipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.

Each of the tables indicates in its heading the system of trade to which the figures relate. More details are, where necessary, available in country notes.

3. Valuation. At its fifteenth session, in 1953, the Economic and Social Council, taking the view that trade statistics must reflect economic realities, recommended that the Governments of Member States of the United Nations, wherever possible, use transaction values in the compilation of their national statistics of external trade or, when national practices are based on other values, endeavour to provide supplementary statistical data based on transaction values (Economic and Social Council resolution 469 B (XV)). In the case of imports, the transaction value is the value at which the goods were purchased by the importer plus the cost of

transportation and insurance to the frontier of the importing country (a c.i.f. valuation). In the case of exports, the transaction value is the value at which the goods were sold by the exporter, including the cost of transportation and insurance, to bring the goods onto the transporting vehicle at the frontier of the exporting country (a f.o.b. valuation).

4. Currency conversion. For data in this publication, conversion of values from national currencies into United States dollars is done by means of currency conversion factors based on official exchange rates. Values in currencies subject to fluctuation (such currencies increased in number beginning December 1971) are converted into United States dollars using weighted average exchange rates specially calculated for this purpose. The weighted average exchange rate for a given currency for a given year is the component monthly factors, mostly furnished by the International Monetary Fund, weighted by the value of the relevant trade in each month. A monthly factor is the exchange rate (or the simple average rate) in effect during that month. These factors are applicable to total imports and exports respectively, but not necessarily to trade in individual commodities or with individual countries.

5. Merchandise. In order that external trade statistics shall be suited to the measurement of the influence of national economies upon one another, merchandise trade is defined to include, as far as possible, all goods which add to or subtract from the material resources of a country as a result of their movements into or out of the country. Unless, therefore, statements to the contrary are made in country notes or in footnotes to the country tables, the treatment of the classes of goods listed below are as indicated:

(a) Gold. Gold traded internationally is usually defined as encompassing the three following types:

i) Gold coins (issued and unissued) and bullion, including banking and monetary gold;
ii) Unrefined gold, including gold ores and concentrates;
iii) Partly-worked gold in which the value of the gold is 80 per cent or more of the total value, including scrap, jewellers' sweepings, dust, primary shapes (such as rods, wire and gold leaf) and gold alloys (crude or in primary shapes).

Of the types of gold listed above, those belonging to the category of monetary gold are excluded from merchandise trade, and those classified as non-monetary gold are included, except as

indicated below. Any gold shipment received by the central monetary authority of a country is treated as monetary gold. All other gold shipments (whether to commercial banks or to individuals), on the other hand, are considered non-monetary. SITC, Revised, treated all types of gold as non-merchandise trade. In compliance with the SITC, Revised, as well as for practical reasons, all types of gold listed above are in general excluded from the merchandise trade statistics compiled under this version of the classification. However, data compiled under SITC, Revision 2 and Revision 3, include non-monetary gold.

(b) Silver ore, concentrates, bullion, unissued coin (see (c) below), scrap and partly-worked and manufactured silver are all included in merchandise trade statistics.

(c) Currency and titles of ownership which have been issued into circulation, e.g., issued silver and base metal coins, bank notes, other paper currency and securities, are excluded from merchandise trade statistics. Unissued currency and titles of ownership are included at their intrinsic value as stamped metal or printed paper rather than at face value.

(d) Trade on government account is included as merchandise trade. Movements under government foreign aid programmes (civil and military), war reparations and restitutions and military goods 9/ moving internationally are therefore included. When goods are destined for use of national agencies (including embassies and military forces) stationed abroad they are, however, not considered to have moved in external trade and are excluded.

(e) Temporary imports and exports. Tourists' and travellers' effects not acquired abroad (including vehicles), goods for exhibitions or study, animals admitted to a country temporarily, merely for racing or breeding, returnable containers, etc., the movements of all of which are expected to be reversed within a limited time, are excluded.

(f) Improvement and repair trade. Countries sending goods abroad for improvement or repair and return are said to be engaging in the passive improvement and repair trade; countries receiving goods from other countries for improvement or repair and eventual return engage in the active improvement and repair trade. Inward and outward movement in this trade are generally excluded from imports and exports.

(g) Postal trade is included in merchandise trade.

(h) Trade in fish, etc. Fish and salvage sold abroad or to foreign vessels off national vessels, and fish and salvage landed from foreign vessels in national ports are excluded from merchandise trade statistics.

(i) Trade in ships and aircraft. New ships and aircraft bought and sold are included. Second-hand ships and aircraft entering or leaving the registers of the reporting country as a result of transfer of ownership are excluded.

(j) Bunkers and stores for ships and aircraft. In general, bunkers and stores should be included in aggregate merchandise exports.

6. Partner country. The following terms describe methods that may be used by reporting countries in determining, for each shipment of goods, the partner country under whose name it should be recorded: (a) for imports: country of origin or production, country of consignment, country of purchase or country of provenance; (b) for exports: country of consumption or consignment, or country of sale.

7. Trade analyzed by commodity. Analysis is according to the Standard International Trade Classification.

THE STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC)

In July 1950, the United Nations Economic and Social Council, on the advice of its Statistical Commission, recommended that Governments compile trade by commodity statistics according to the original SITC 5/ in order to have available data in internationally comparable categories suitable for the economic analysis of trade. The original SITC had been prepared by the United Nations Secretariat with the assistance of expert consultants and in co-operation with Member Governments and interested international organizations.

In May 1960, the Statistical Commission approved a revision, similarly prepared, of the original SITC, known as the SITC, Revised, designed to take account of the changes in the pattern of trade since 1950 and to simplify the relation between the SITC and internationally agreed customs tariff nomenclatures 5/. The SITC, Revised, is a rearrangement into statistical order of the items of the 1955 Tariff Nomenclature (CCCN) of the Customs Co-operation Council.

The relation between the original SITC and the SITC, Revised is discussed in the introductions to certain issues of Commodity Trade Statistics, notably those for January-December 1960 and 1961.

The SITC, Revised, is based on 625 subgroups (identified by code numbers of four digits), most of which correspond to items of the original SITC. A number of subgroups are further subdivided either to distinguish commodities of statistical importance or to permit exact correspondence with the CCCN; this results in a basic (5-digit code) level for the SITC, Revised, consisting of 1,312

items. The subgroups are combined, progressively, into 177 groups, 56 divisions and 10 sections.

The headings of the SITC, Revised, are fully determined by their code numbers. The precise composition of each number is defined in the SITC, Revised, itself. In comparing data according to the SITC, Revised, with data according to a national commodity classification it must be remembered that the same brief description may refer to aggregates differing somewhat in composition.

Although the SITC, Revised, of 1960 represented a great improvement on the original SITC, basically the same reasons which led to the creation of the SITC and its first revision were found, in the late nineteen-sixties, to be once more valid. Since 1960 the volume of trade had increased rapidly and its geographic and commodity patterns had changed fundamentally. Consequently, a second revision of the SITC was undertaken. In October 1974 the Statistical Commission approved of this revision, known as SITC, Revision 2 5/, and in May 1975 the Economic and Social Council recommended that Member States of the United Nations should report data on external trade according to the SITC, Revision 2, as far and as soon as possible. Starting with data for 1976, some countries began reporting trade statistics based on the SITC, Revision 2.

The basic headings of the SITC, Revision 2 had a one-to-one correspondence with the subdivisions of the Customs Co-operation Council Nomenclature (CCCN). However, there were a number of users who found the subdivisions of CCCN (and thus SITC, Revision 2) insufficient for their needs 10/. There was also an expressed need for the harmonization of economic classifications 11/. Partly to satisfy these needs, the Customs Co-operation Council in May 1973 undertook responsibility for the development and completion of the Harmonized Commodity Description and Coding System (HS). The work resulted in the revision of CCCN and the expansion of its four-digit categories into HS comprising 5,019 six-digit headings 12/.

At its twenty-first session, in January 1981, the Statistical Commission had taken note of the fact that a third revision of SITC would have to be made available when both the revised CCCN and HS came into force 13/. Accordingly, later that year, the United Nations Secretariat commenced work on the revision of SITC, Revision 2, based on the principle that every effort should be made to maintain its general character and structure but taking into account the need for its harmonization with the revised CCCN, the International Standard Industrial Classification (ISIC) Revision 3 14/ and a Central Product Classification 15/ which was developed jointly by the United Nations Statistics Division and the Statistical Office of the European Communities.

The final draft was revised and approved by the Statistical Commission at its twenty-third session, in February 1985, and a resolution was adopted by the Economic and Social Council on 28 May 1985 (resolution 1985/7) which, inter alia, recommended that Member States should report internationally data on external trade statistics according to the Standard International Trade Classification, Revision 3, as far and as soon as possible, it being understood that Member States may not wish to make the change until they would in any case be reviewing their customs nomenclature.

1/ Classification by Broad Economic Categories (in terms of the SITC Revised), Statistical Papers, Series M No.53, (United Nations publication, Sales No. 71.XVII.12).

2/ Classification of Commodities by Industrial Origin (Relationship of the Standard International Trade Classification Revised to the International Standard Industrial Classification of All Economic Activities, Revision 1), Statistical Papers, Series M No.43, (United Nations publication, Sales No. 66.XVII.7).

3/ International Standard Industrial Classification of All Economic Activities (Revision 1), Statistical Papers, Series M No. 4, Rev. 1, (United Nations publication, Sales No. 58.XVII.7).

4/ United Nations Standard Country Codes, Statistical Papers, Series M No. 49 (United Nations publication, Sales No. E.70.XVII.13).

United Nations Standard Country or Area Codes for Statistical Use, Statistical Papers, Series M No. 49, Rev. 1, (United Nations publication, Sales No. E.75.XVII.8).

Standard Country or Area Codes for Statistical Use, Statistical Papers, Series M No. 49, Rev.2, (United Nations publication, Sales No. E.82.XVII.8).

Standard Country or Area Codes for Statistical Use, Interim List (United Nations Statistical Division).

INTRODUCTION

La quarante troisième édition de l' annuaire statistique du commerce international présente les informations nécessaires à l'étude des échanges de chaque pays, en termes de valeur courante, de volume et de prix ainsi que l'importance des différents pays partenaires et des principaux produits importés et exportés. Cette édition présente des données annuelles pour 182 pays ou zones douanières déclarants. L'annuaire est publié en deux volumes.

Volume I

Le Volume I fournit des renseignements détaillés sur chaque pays au sujet duquel on trouvera généralement les tableaux suivants:

a) Tableau 1, donnant 10 séries, 5 à l'importation, 5 à l'exportation. Ces cinq séries sont: échanges de marchandises et échanges portant sur l'or (généralement en monnaie nationale mais pour quelques pays, en dollars des Etats-Unis), facteurs pour convertir les monnaies nationales en dollars des Etats-Unis, indices du quantum et de la valeur unitaire pour les importations et exportations totales.

b) Tableau 2, présentant de l'année 1988 jusqu'à la dernière année disponible, les pourcentages par rapport au commerce total des importations par grandes catégories économiques et les exportations par branches d'origine. Les pourcentages pour 1970 à 1987 ont été publiés dans les éditions précédentes de cet Annuaire. L'analyse pour les importations est basée sur la Classification par grandes catégories économiques 1/; pour les exportations sur la Classification des marchandises par origine industrielle.2/ Toute reclassification du commerce extérieur par grandes catégories économiques ou par origine industrielle nécessite le détail au niveau des 5 chiffres de la CTCI, révisée. (Se référer aux pages xxxv à xxxvi pour l'histoire et le fond de la CTCI). Lorsque les statistiques n'étaient pas disponibles à ce niveau on a utilisé les données au niveau des trois chiffres de la CTCI, révisée. En comparant des statistiques du commerce extérieur avec des statistiques de production on se heurte à certaines incohérences qui s'ajoutent aux problèmes de classification. Les exportations de marchandises qui de toute évidence n'ont pas été produites dans les pays exportateurs (exportation de thé et de cacao des Pays-Bas ou du Royaume-Uni) ont été classées dans la branche où elles auraient été classées dans le pays d'origine; dans le cas du thé et du cacao : l'agriculture. La branche dans le pays déclarant est en fait dans ce cas le commerce de gros.

Pour obtenir la Classification des marchandises par origine industrielle, les postes de la CTCI, révisée sont regroupés afin de correspondre approximativement aux groupes de la Classification international type, par industrie, de toutes les branches

d'activité économique (révisée) (CITI, Révision 1) 3/. Dans toute la mesure du possible les exportations nationales ou spéciales ont été utilisées.

c) Tableau 3, présentant jusqu'aux cinq années les plus récentes la valeur en dollars des Etats-Unis des importations et des exportations selon les principaux pays ou zones et régions d'origine et de destination. La distribution géographique est faite selon le Standard Country or Area Codes for Statistical Use 4/ des Nations Unies. Parfois, étant donné la nature des codes géographiques nationaux, la conversion des données selon le code des Nations Unies n'a pu être effectuée que moyennant quelques imprécisions. Dans ces tableaux figurent les 50 pays partenaires les plus importants classés par ordre d'importance selon la somme des valeurs sur les années comprises dans le tableau. Une classification différente est effectuée pour les importations et les exportations. La ventilation en pourcentage est également indiquée pour les zones d'origine et de destination et pour les 10 premiers pays partenaires pour les dix plus récentes années.

d) Tableaux 4 et 5, présentant les quantités et les valeurs en dollars des Etats-Unis des importations et des exportations par marchandises jusqu'aux quatre plus récentes années. Les chiffres sont publiés pour une marchandise donnée si sa valeur pour une année donnée est égale ou supérieure à 0,3 pour cent de la valeur totale pour ladite année. Les marchandises sont présentées selon les titres de la CTCI (en abrégé); lorsque les descriptions sont précédées d'un astérique (*) cela indique que les chiffres donnés sont égaux à ceux du niveau de la CTCI immédiatement supérieur qui dans ce cas n'est pas publié.

Parfois les données en dollars des tableaux décrits en (c) et (d) ci-dessus peuvent ne pas correspondre à celles en dollars des Etats Unis du tableau décrit en (a) ou à celles en monnaies nationales de ce tableau après l'application des facteurs de conversion. Les différences sont dues pour la plupart à des révisions au niveau du total du commerce qui parfois ne sont pas disponibles à un plus grand niveau de détail par produit et partenaire et qui n'ont donc pas été apportées aux tableaux décrits en (c) et (d).

Les importations et les exportations par produit sont présentés pour tous les pays selon la Classification type pour le commerce international (CTCI) 5/ de la façon suivante:

i) En CTCI, révisée pour les pays qui ont utilisé cette révision ou la CTCI originale pour les quatre dernières années;

ii) En CTCI, révisée pour les pays qui ont commencé à utiliser la CTCI, Révision 2 mais pour lesquels les quatre dernières années ne sont pas disponibles en CTCI, Révision 2;

iii) En CTCI, Révision 2 pour les pays qui ont utilisé cette révision pour les quatre dernières années disponibles;

iv) En CTCI, Révision 2 pour les pays qui rapportent les données en Révision 3 ou selon le système harmonisé de désignation et de codification des marchandises (SH). Dans les Volumes I et II, les données ainsi rapportées par ces pays ont été converties, de CTCI, Révision 3 en CTCI, Révision 2 et font l'objet d'une note en fin de tableau. Dans certains cas, à cause de difficultés de conversion des données de CTCI, Révision 3 en CTCI, Révision 2, on obtient des données qui, de façon très substantielle, ne sont pas comparables à celles des années précédantes rapportées sous forme de CTCI, Révision 2.

Dans quelques cas, la conversion en CTCI à partir des nomenclatures nationales n'ayant pu se faire avec suffisante précision, certains codes de la CTCI ne couvrent pas exactement les échanges qui devraient leur être imputables.

Lorsqu'elles sont disponibles, des données plus détaillées par produit et pays partenaire du commerce extérieur, en CTCI, révisée, en CTCI, Révision 2 ou en CTCI, Révision 3 sont publiées dans Commodity Trade Statistics 6/ et le sont également sous forme de microfiches.

Volume II

Le Volume II présente un chapitre sur le commerce de certains produits analysé par pays et par régions ainsi que des matrices des échanges.

Tableaux par produits. Ces tableaux comprennent les importations et les exportations au niveau du groupe à 3 chiffres de la CTCI, Révision 2, (tous les groupes à l'exception de 351 et 688). Les années couvertes sont les cinq années de 1990 à 1994. Les valeurs sont exprimées en dollars des Etats-Unis et les échanges sont analysés par pays et régions. Dans ces tableaux figurent les 50 pays les plus importants classés selon la somme des valeurs sur les années 1991, 1992 et 1993 inclus dans la tableau. Une classification différente est effectuée pour les importations et les exportations. Le système du commerce appliqué par les pays déclarants est le même que celui indiqué aux tableaux 4 et 5 des chapitres par pays de cet Annuaire. Les quantités ne figurent pas dans ces tableaux. Dans bien des cas des estimations ont été effectuées pour compléter les données non encore disponibles. On trouvera à la page 1 du Volume II des notes explicatives sur ces estimations.

Le Volume II aussi fournit des tableaux spéciaux où est indiquée la contribution des échanges de chaque pays et région dans le commerce international. Les titres des tableaux spéciaux sont:

(a) Importations et exportations totales par régions et pays ou zones;

(b) Exportations mondiales par classes de marchandises et par régions;
(c) Croissance des exportations mondiales par catégories de marchandises et par régions;
(d) Structure des exportations mondiales par catégories de marchandises et par régions;
(e) Importations et exportations totales: indices par pays ou zones;
(f) Exportations et importations totales: indices du quantum, de la valeur unitaire et des termes de l'échange par régions;
(g) Exportations des produits manufacturés;
(h) Importations des produits énergétiques: pays à économies développées;
(i) Quelques indicateurs sur les importations des produits énergétiques: pays à économies développées;
(j) Indices des prix des exportations de machines et materiel de transport pour certains pays;
(k) Indices des prix des exportations des matières premières et des métaux non-ferreux;

Tableaux spéciaux.

Les groupes économiques et géographiques dans tous les tableaux spéciaux sont conformes aux groupes de pays ou zones sont présentés dans le Tableau Special A de ce numéro, bien que le Tableau Special A comprenne quelquefois plus de details en ce qui concerne les sous-groupes géographiques. (Voir le Tableau Special A pour les détails).

(A) Importations et exportations totales par régions et pays ou zones. Les totaux régionaux, économiques et mondiaux, ont été ajustés: a) pour y inclure des estimations pour les données non disponibles; b) pour transformer le cas échéant les importations f.o.b. en importations c.a.f.; c) pour y inclure les pays ou zones pour lesquels il n'existe pas de liste séparée; d) pour ramener les données au commerce spécial; e) pour ramener les données à l'année civile; et f) autant que possible, éliminer les incompatibilités dues à des modifications géographiques pour obtenir des séries comparables par example, la Communauté économique européenne et l'Association européenne de libre-échange. Les données pour chaque pays correspondent aux données en monnaie nationale sont présentés dans le tableau 1 des tableaux par pays. Les lettres des premières et dernières colonnes de ce tableau indiquent le système du commerce utilisé: G: Commerce général; S: Commerce spécial; Voir la fin du tableau pour les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

(B) Exportations mondiales par classes de marchandises et par régions. Voir la fin du tableau pour la remarque générale et les notes.

(C) Croissance des exportations mondiales par catégories de marchandises et par régions. Les taux annuels de croissance ont tous été calculés à l'aide de la formule des intérêts composés:

$$r = \left(\sqrt[t]{\frac{Vn}{Vo}} - 1 \right) 100$$

r = Le taux annuel de croissance en pourcentage.
Vn = La valeur des exportations durant la dernière année de la période.
Vo = La valeur des exportations durant la première année de la période.
t = Le nombre d'années.

Voir la fin du Tableau Special D pour la remarque générale et les notes.

(D) Structure des exportations mondiales par catégories de marchandises et par régions. Les chiffres publiés sous le titre 'Origine des exportations' se réfèrent aux exportations de la région ou du pays indiqués dans la colonne zone. Il en est de même pour les 'Destinations des exportations'. Voir la fin du tableau pour la remarque générale et les notes.

(E) Importations et exportations totales: indices par pays ou zones. Sauf indication contraire, les indices de la valeur unitaire sont exprimés en monnaie nationale. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

(F) Exportations et importations totales: indices du quantum, de la valeur unitaire et des termes de l'échange par régions. Voir la fin du tableau pour les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(G) Exportations des produits manufacturés. Voir la fin du tableau pour la remarque gènèrale et les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(H) Importations des produits énergétiques: pays à économies développées. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(I) Quelques indicateurs sur les importations des produits énergétiques: pays à économies développées. Ce tableau indique la part des importations de combustibles dans la valeur totale des importations et des exportations ainsi que le rapport de l'indice de la valeur unitaire des produits manufacturés qu'ils exportent et de l'indice de la valeur unitaire des combustibles qu'ils importent. Voir la fin du tableau pour la remarque générale et les notes.

(J) Indices des prix des exportations de machines et matériel de transport pour certain pays. Voir la fin du tableau pour la remarque générale.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(K) Indices des prix des exportations des matières et des métaux non-ferreux: économies de marché. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

SOURCE ET PRESENTATION

Les données pour les Volumes I et II sont obtenues à partir de publications nationales, d'états soumis par les gouvernements pour cet ouvrage et autres publications des Nations Unies telles que: Commodity Trade Statistics, Bulletin Mensuel de Statistique et parfois de publications préparées par certaines agences spécialisées des Nations Unies. Des estimations pour quelques données faisant défaut sont préparées par la Division de Statistique des Nations Unies.

Les noms de pays et régions utilisés par divers pays pour leurs statistiques du commerce extérieur ne sont pas uniformes. Aussi, lorsque d'anciennes entités geographiques généralement indiquées dans les statistiques nationales ont changé, les pays peuvent avoir introduit les changements correspondants dans leurs statistiques à différentes époques. Dans la mesure du possible toutefois, les pays ou zones ont été désignés par leur nom actuel.

Sauf indication contraire, les groupements de pays sont conformes à ceux du Standard Country or Area Code for Statistical Use 4/ des Nations Unies.

INDICES NATIONAUX

Les indices nationaux, exprimés en monnaies nationales, ou en dollars des Etat Unis sont présentés dans le tableau 1. Ils indiquent les modifications dans le quantum et dans les prix (valeur unitaire) des agrégats des importations et des exportations. Chaque indice représente une modification entre la

période à laquelle l'indice se réfère, la période courante, et une période fixe, la base de publication pour laquelle l'indice est représenté par 100. Pour faciliter les comparaisons, chaque fois qu'il était possible de le faire, les indices ont été ramenés à la base de publication 1990. Lorsque des modifications sont faites dans la couverture, la formule ou la période de base d'un indice, si cela est techniquement possible les deux séries s'enchaînent.

Les indices mensuels et trimestriels sont publiés dans le Bulletin Mensuel de Statistique des Nations Unies. On trouvera également dans le Supplément de 1977 à l'Annuaire Statistique et au Bulletin Mensuel de Statistique 7/ des notes plus détaillées sur les méthodes de calcul des indices nationaux.

PAYS EN TRANSITION

Pour la période couverte par l'Annuaire les pays classifiés antérieurement pour des raisons statistiques à économies planifiées centralement avaient un système de taux de change officiel entre leurs monnaies et celles des pays extérieurs consistant avec le taux de 0,90 nouveau roubles pour 1 dollar des Etats-Unis avant le 24 décembre 1971 et 0,829 jusqu'à février 1973; depuis cette date le taux a fluctué. Les pays d'Europe orientale utilisaient généralement ces taux lorsqu'il était nécessaire de convertir des devises en monnaie nationale pour préparer les statistiques du commerce extérieur. Les données qui en résultent permettent davantage une comparaison avec les transactions des autres pays qu'une comparaison avec les transactions monétaires intérieures.

Les statistiques du commerce extérieur de ces pays ont des définitions différentes de celles qui peuvent exister dans les autres pays. Les différentes définitions peuvent être la source des divergences observées pour le même flux de marchandise enregistré par deux pays partenaires ayant un système économique différent. Les échanges entre ces pays peuvent être conduits sur une base différente de celle qui régit les échanges entre autres pays. Le concept de la valeur de transaction, par example, est basé sur l'existence d'un prix de marché entre l'importateur et l'exportateur sur lequel les variations de l'offre et de la demande ont plus d'influence qu'ils ne peuvent en avoir dans les échanges de ces pays. Faute de données précises sur les valeurs unitaires des produits de base échangés entre ces pays, il est difficile de connaître les effets possibles de ces différences sur les statistiques du commerce extérieur.

NOTE GENERALE 8/

1. Territoire. Les statistiques rapportées par un pays s'appliquent au territoire douanier de cet état. Généralement territoire douanier et territoire statistique coïncident, le cas contraire étant indiqué dans les notes par pays. Les modifications dans le territoire douanier sont également

indiquées dans les notes par pays. Sauf information contraire, l'unification de deux territoires séparés auparavant donne lieu à l'élimination des échanges entre ces deux territoires. Dans le cas d'une séparation d'un territoire en deux, les échanges entre ces deux territoires viennent à apparaître.

2. Système du commerce. Deux systèmes sont généralement utilisés ne différant que par la façon dont le commerce d'entrepôt et les réexportations sont enregistrés.

a) Commerce spécial. Les importations spéciales comprennent les marchandises entrées directement pour la consommation (y compris les transformations et réparations) et les marchandises sorties des entrepôts douaniers ou des zones franches pour être mises à la consommation. Les exportations spéciales comprennent les exportations de produits nationaux, c'est-à-dire les marchandises entièrement ou partiellement produites ou fabriquées dans le pays, ainsi que les exportations nationalisées (ces dernières sont des biens qui ayant été inclus dans les importations spéciales sont réexportés en l'état.)

b) Commerce général. Les importations générales comprennent les importations pour la consommation et les importations en entrepôt douanier ou en zone franche. Les exportations générales comprennent les exportations de produits nationaux et les réexportations. Ces dernières, dans le système du commerce général, comprennent les exportations nationalisées et les marchandises exportées des entrepôts douaniers et des zones franches sans avoir été transformées depuis leur importation.

Le transit direct, c'est-à-dire les marchandises uniquement transbordées ou traversant le pays pour des raisons de transport, est exclu du commerce général aussi bien que du commerce spécial.

Les titres de chaque tableau indiquent le système du commerce auquel se réfèrent les données. Des notes plus détaillées figurent, si nécessaire dans les notes par pays.

3. Evaluation. Lors de sa quinzième session en 1953, le Conseil Economique et Social, tenant compte du fait que les statistiques du commerce extérieur doivent refléter la réalité économique, a recommandé que les gouvernements des pays membres des Nations Unies utilisent, dans la mesure du possible, les valeurs de transaction en préparant leurs statistiques du commerce international ou qu'ils fournissent des informations supplémentaires basées sur les valeurs de transaction quand les politiques nationales font état d'autres valeurs (Résolution 469 B (XV) du Conseil Economique et Social). La valeur de transaction à l'importation est la valeur à laquelle les marchandises ont été achetées par l'importateur plus le coût de l'assurance et du frêt jusqu'à la frontière des pays importateurs (valeur c.a.f.). A l'exportation, la valeur de transaction représente la valeur à laquelle les marchandises ont été vendues

par l'exportateur y compris le coût de l'assurance du transport pour amener les marchandises à la frontière des pays exportateurs (valeur f.o.b.).

4. Conversion des monnaies. Pour les données dans cet Annuaire la conversion des valeurs nationales en dollars des Etats-Unis est effectuée au moyen de taux de conversion basés sur les taux de change officiels. Pour les monnaies sujette~ à de larges marges de fluctuations par rapport au dollar, dont le nombre s'est accru considérablement depuis 1971, on utilise des moyennes pondérées des taux de change calculées spécialement dans ce but. La moyenne pondérée est le résultat des taux de change mensuels, généralement fournis par le Fonds Monétaire International, pondérés par les valeurs des importations et des exportations correspondantes. Les facteurs de conversion s'appliquent aux totaux des échanges mais pas nécessairement aux importations ou à l'exportation d'une marchandise donnée.

5. Marchandises. Dans la définition du commerce extérieur on entend par marchandises tous les biens dont l'importation ou l'exportation contribue à l'accroissement ou à la diminution du stock des ressources matérielles dans un pays. Sauf information contraire dans les notes par pays, le traitement des catégories de marchandises suit les règles énoncées ci-dessous:

a) Or. L'or dans le commerce international se présente sous trois formes:

i) Pièces d'or et lingots y compris l'or monétaire;
ii) Or non raffiné y compris les minerais et les concentrés;
iii) Or semi ouvré dont la valeur de l'or représente au moins 80% de la valeur totale, y compris la limaille et les poussières et les formes primaires telles que feuilles et barres et les alliages d'or.

De ces différents types d'or, l'or monétaire est exclu du commerce des marchandises tandis que les autres types sont inclus, à l'exception de ceux indiqués ci-dessous. Tout transfert d'or entre les autorités monétaires doit être traité comme échange d'or monétaire, les autres échanges portant sur l'or sont classés comme or non-monétaire. A la différence de la CTCI, révisée, la CTCI, Révision 2 et Révision 3 incluent l'or non- monétaire.

b) Minerai d'argent. Concentrés, lingots, pièces non émises, limailles et argent ouvré ou semi ouvré sont tous inclus dans les échanges de marchandises.

c) Monnaie et titres de propriété. Pièces de monnaie d'argent et de métal, billets de banque et titres en circulation

sont exclus du commerce. Les pièces, billets et titres non en circulation sont inclus à la valeur intrinsèque du papier ou du métal frappé.

d) Le commerce pour le compte de l'Etat. Il est inclus dans le commerce des marchandises. Les échanges au titre des programmes d'aide civile et militaire, les réparations de guerre et les équipements militaires 9/ sont donc inclus. Quand les marchandises sont destinées à des institutions nationales (ambassades ou forces armées) stationnées à l'étranger, elles ne sont pas comprises dans les statistiques.

e) Importations et exportations temporaires. Les effets des touristes et des voyageurs (y compris les véhicules) qui n'ont pas été acquis à l'étranger, les objets pour expositions ou études, les animaux pour la course ou la reproduction, les échantillons et les emballages en retour qui sont considérés comme devant être retournés dans un intervalle de temps assez court sont exclus.

f) Trafic de perfectionnement et de réparation. Les pays qui envoient à l'étranger temporairement des marchandises pour réparation ou complément d'ouvraison effectuent un trafic passif de réparation. Les pays recevant des marchandises dans les mêmes conditions effectuent un trafic actif de réparation. Les mouvements d'entrée et de sortie sont généralement exclus des importations et des exportations.

g) Commerce par poste. Il est inclus dans le commerce des marchandises.

h) Poisson. Le poisson et les épaves débarqués dans des ports étrangers par des navires nationaux et ceux débarqués dans des ports du pays par des navires étrangers sont exclus des statistiques.

i) Vente et achat de navires et d'aéronefs. La vente et l'achat de navires et d'aéronefs neufs sont inclus. Les navires et les aéronefs d'occasion inscrits sur le registre d'immatriculation du pays ou radiés de ce registre sont exclus du commerce quand ces mouvements sont dûs à un transfert de propriété.

j) Avitaillement des navires et des avions. Ils doivent etre généralement inclus dans les exportations de marchandises.

6. Pays Partenaire. Les pays partenaires peuvent être distingués : a) à l'importation, suivant : l'origine ou la production, la consignation ou la provenance ou l'achat; b) à l'exportation, suivant : la consommation, la dernière destination connue ou la vente.

7. Echanges par produits. L'analyse est selon la Classification Type pour le Commerce International.

CLASSIFICATION TYPE POUR LE COMMERCE INTERNATIONAL (CTCI)

En juillet 1950, le Conseil Economique et Social des Nations Unies, sur avis de la Commission de Statistique, a recommandé aux pays de rassembler leurs statistiques des échanges par produits selon la CTCI originale 5/ afin de disposer au niveau mondial de données comparables pour l'analyse du commerce extérieur. La CTCI originale a été préparée par le Secrétariat des Nations Unies avec l'aide d'experts et en coopération avec les gouvernements et les organisations internationales concernées.

En mai 1960 la Commission de Statistique a approuvé une révision de la CTCI appelée la CTCI, révisée, qui tenait compte des modifications dans les courants commerciaux intervenus depuis 1950 et qui permettait un passage plus facile entre la CTCI et les nomenclatures internationales. 5/ La CTCI, révisée présentait selon une classification statistique les positions de la nomenclature tarifaire NCCD du Conseil de Coopération Douanière.

La relation entre la CTCI originale et la CTCI, révisée est décrite dans l'introduction de certains fascicules de Commodity Trade Statistics en particulier ceux de janvier - décembre 1960 et 1961.

La CTCI, révisée comprend 625 sous-groupes (identifiés par un code à quatre chiffres) qui correspondent pour l'essentiel aux postes de la CTCI originale. Un certain nombre de sous-groupes ont été subdivisés soit pour obtenir des détails supplémentaires soit pour assurer une concordance exacte avec la NCCD. La CTCI, révisée comporte donc 1312 rubriques de base (niveau des 5 chiffres de la CTCI). Les sous-groupes sont rassemblés en 177 groupes, 56 divisions et 10 sections.

Les positions de la CTCI sont individualisées par leur numéro de code. Le contenu précis de chaque code est défini dans la CTCI, révisée. Si l'on compare les données selon la CTCI, révisée avec des données classées selon une nomenclature nationale, il faut tenir compte de ce que la même description, généralement abrégée, peut s'appliquer à des groupes de marchandises légèrement différents.

La révision de 1960 représentait par rapport à la CTCI initiale une amélioration considérable. Néanmoins vers la fin des années 1960 on a constaté que, pour l'essentiel, les raisons qui avaient conduit à l'établissement de la CTCI puis à sa première révision, se retrouvaient à nouveau valables. Depuis 1960 le volume des échanges commerciaux s'est accru rapidement tandis que leur répartition géographique et leur composition par produits se modifiaient radicalement. Une nouvelle révision de la CTCI fut donc entreprise. En octobre 1974, la Commission

Statistique a approuvé cette révision, la désignation de la nouvelle révision est CTCI, Révision 2. 5/ En mai 1975 le Conseil Economique et Social a recommandé aux Etats membres des Nations Unies de communiquer les données sur les statistiques du commerce extérieur en se conformant autant que possible et le plus tôt possible à la CTCI, Révision 2. A partir des données pour 1976, certains pays ont commencé à communiquer leurs données selon la CTCI, Révision 2.

Il y avait entre les titres de base de la Classification type pour le commerce international, Révision 2 et les subdivisions de la Nomenclature du Conseil de Coopération Douanière une correspondance biunivoque. Toutefois, un certain nombre d'utilisateurs ont estimé que les subdivisions des positions de la NCCD (et par conséquent celles de la CTCI, Révision 2) ne suffisaient pas à leurs besoins 10/. La nécessité d'une harmonisation des classifications économiques a également été signalée 11/. En partie pour répondre à ces besoins, le Conseil de coopération douanière a assumé en mai 1973 la responsabilité d'élaborer et de mettre au point un système harmonisé de désignation et de codification des marchandises (SH). Ce travail a abouti à la révision de la NCCD et à l'extension de ses numéros de position (à 4 chiffres) en 5019 codes à 6 chiffres qui constituent le SH 12/.

A sa vingt et unième session, en janvier 1981, la Commission de statistique a pris note du fait qu'une troisième révision de la CTCI devait être disponible lorsque la NCCD révisée et le SH entreraient tous deux en vigueur 13/. En conséquence, dans le courant de la même année, le Secrétariat de l'ONU a commencé à travailler à la révision de la CTCI, Révision 2 en partant du principe que le maximum devait être fait pour en conserver le caractère général et la structure, tout en tenant compte de la nécessité de son harmonisation avec la NCCD révisée, avec la Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI), Révision 3 14/ et avec une Classification des produits centrale (CPC) 15/ dont l'élaboration était menée conjointement par la Division de statistique des Nations Unies et l'Office statistique des Communautés européennes.

Le projet final a été révisé et approuvé par la Commission de statistique à sa vingt-troisième session, en février 1985, et une résolution a été adoptée par le Conseil économique et social le 28 mai 1985 (résolution 1985/7) qui, inter-alia, a recommandé aux Etats Membres de communiquer des données sur les statistiques du commerce extérieur aux institutions internationales en se conformant autant que possible et le plus rapidement possible à la Classification type pour le commerce international (troisième version révisée) étant entendu que les Etats Membres peuvent juger bon de ne faire cette substitution qu'au moment où il leur faudra, de toute façon, réviser leur nomenclature douanière.

1/ Classification par grandes catégories économiques, (selon les définitions de la CTCI, révisée), Etudes statistiques, série M No. 53, (publication des Nations Unies, numéro de vente 71.XVII.12).

2/ Classification des marchandises par origine industrielle (Relation entre la Classification type pour le commerce international et la Classification internationale type, par industrie, de toutes les branches d'activité économique), Etudes statistiques, série M No. 43, (publication des Nations Unies, numéro de vente 66.XVII.7).

3/ Classification internationale type, par industrie, de toutes les branches d'activité économique (révisée), Etudes statistiques, série M No. 4, Rév. 1. (publication des Nations Unies, numéro de vente 58.XVII.7).

4/ United Nations Standard Country Code, Statistical Papers, Series M No. 49, (United Nations publication, Sales No. E.70.XVII.13).

5/ United Nations Standard Country or Area Code for Statistical Use, Statistical Papers, Series M No. 49, Rev. 1, (United Nations publication, Sales No. E.75.XVII.8).

Standard Country or Area Codes for Statistical Use, Statistical Papers Series M No. 49, Rev.2, (United Nations publication, Sales No. E.82.XVII.8).

Standard Country or Area Codes for Statistical Use, Interim List (United Nations Statistical Division).

5/ Classification type pour le commerce international, Etudes statistiques, série M No. 10, 2ème édition, (publication des Nations Unies, numéro de vente 51.XVII.1).

Classification type pour le commerce international révisée, Etudes statistiques, série M. No. 34, (publication des Nations Unies, numéro de vente 61.XVII.6).

Classification type pour le commerce international, (deuxième version revisée), Etudes statistiques, série M No. 34/Rév. 2, (publication des Nations Unies, numéro de vente F.75.XVII.6).

Classification type pour le commerce international (troisième version révisée), Etudes statistiques, serie M No.34/Rév. 3, (publication des Nations Unies, numéro de vente F.86.XVII.12).

6/ Commodity Trade Statistics, Statistical papers, Séries D, présentent annuellement les échanges par origine et destination pour un grand nombre de positions de la CTCI, révisée, de la CTCI, Révision 2 et CTCI, Révision 3. Les données annuelles sont disponibles sur microfiches.

7/ Supplément de 1977 à l'Annuaire Statistique et au Bulletin mensuel de statistique, ST/ESA/STAT/SER.S/SUPPL.2, ST/ESA/STAT/SER.Q/SUPPL.2, (publication des Nations Unies, numéro de vente F.78.XVII.10).

8/ Le traitement des articles 1 à 7 est dérivé principalement de Statistiques du commerce international concepts et définitions, Etudes statistiques, série M No. 52 Révision 1, (publication des Nations Unies, numéro de vente F.82.XVII.14).

9/ Les pays qui excluent l'équipement militaire utilisent des définitions différentes pour cette catégorie de marchandise, pour la majorité des pays cependant, armes et munitions constituent la plupart de l'équipement militaire exclu des statistiques.

10/ Groupe de travail commun Division de statistique de l'ONU - Office statistique des Communautés européennes sur les nomenclatures au niveau mondial, "Système harmonisé de désignation et de codification des marchandises pour les besoins du commerce international" (UNSO/SOEC/1/2).

11/ Secrétariat de l'ONU, "L'harmonisation des classifications statistiques : compte rendu d'une réunion d'un groupe d'experts" (ST/ESA/STAT/78).

12/ Conseil de coopération douanière, "Système harmonisé de désignation et de codification des marchandises", 1985.

13/ Documents officiels du Conseil économique et social, 1981, Supplément No. 2. (E/1981/12).

14/ Classification International Type, par industrie, de toutes les branches d'activité économique, Etudes statistiques, série M No. 4, Révision 3 (publication des Nations Unies, numéro de vente F.90.XVII.11).

15/ Classification centrale de produits (CPC) provisoire, Etudes statistiques, série M No. 77 (publication des Nations Unies, numéro de vente F.91.XVII.7).

Total Imports and Exports by Regions and Countries and Areas
Importations et Exportations Totales par Regions et Pays ou Zones

Imports C.I.F. - Exports F.O.B. - Balance / Importations C.I.F. - Exportations F.O.B. - Balance

(continued / suite)

General Note: System: G=General Trade; S=Special Trade.
World imports and exports are the sum of imports and exports of Developed economies, Developing economies and Other. The regional totals for exports and imports have been adjusted to exclude the re-exports of countries or areas comprising each region. Estimates for certain countries or areas not shown separately as well as for those shown separately but for which no data are yet available are included in the regional and world totals. Regional totals containing estimated data are printed in bold italics.
Export and Import values in terms of U.S. dollars for the following countries or areas are derived by United Nations Statistics Division (UNSD) from data published by the International Monetary Fund (IMF) in International Financial Statistics in national currency; the derivation uses external trade conversion factors calculated by UNSD: Antigua and Barbuda, Aruba, Australia, Austria, Bahamas, Bahrain, Bangladesh, Barbados, Belgium/Lux., Belize, Burkina Faso, Burundi, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Comoros, Congo, Cote D'Ivoire, Cyprus, Czech. Republic, Denmark, Djibouti, Dominica, Egypt, France, Gabon, Gambia, Ghana, Greece, Grenada, Guinea Bissau, Guyana, Haiti, Iceland, India, Iran (Islamic Rep. of), Ireland, Italy, Jamaica, Japan, Jordan, Kenya, Rep. of Korea, Kuwait, Liberia, Libyan Arab Jaham., Madagascar, Malawi, Malaysia, Mali, Malta, Mauritania, Mauritius, Morocco, Myanmar, Nepal, Neth. Antilles, New Zealand, Niger, Norway, Oman, Papua N. Guinea, Paraguay, Portugal, Qatar, St. Kitts & Nevis, St. Lucia, St. Vincent & The Grenadines, Samoa, Saudi Arabia, Senegal, Seychelles, Sierra Leone, Singapore, Solomon Islands, Somalia, South Africa, Spain, Sudan, Sweden, Switzerland, Syria, Tanzania, Thailand, Togo, Tonga, Trinidad & Tobago, Tunisia, United Arab Emirates, United Kingdom, Vanuatu and Zimbabwe.
Export and Import values in terms of U.S. dollars for the following countries or areas are as published by the IMF: Afghanistan, Argentina, Bermuda, Bolivia, Brazil, Chile, Colombia, Costa Rica, Dominican Rep., Ecuador, Equatorial Guinea, Guatemala, Honduras, Hong Kong, Indonesia, Israel, Maldives, Mozambique, Nicaragua, Peru, United States, Uruguay.

1 United States, Canada, Developed Economies of Europe, Israel, Japan, Australia, New Zealand and South African Customs Union.

2 This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

3 Algeria, Ecuador, Gabon, Indonesia, Iran (Islamic Rep. of), Iraq, Kuwait, Libyan Arab Jamahiriya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates and Venezuela.

4 The least developed countries are Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Cape Verde, Central African Republic, Chad, Comoros, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea-Bissau, Haiti, Kiribati, Lao P.D.R., Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Sierra Leone, Solomon Islands, Somalia, Sudan, Togo, Tuvalu, Uganda, United Republic of Tanzania, Vanuatu, Yemen, Zaire and Zambia.

5 Prior to January 1992 includes Eastern Europe and the former USSR. Beginning January 1992, includes Eastern Europe and the European countries of the former USSR.

6 Latin American Integration Association. Formerly Latin American Free Trade Association.

7 Imports F.O.B.

8 Central American Common Market.

9 Prior to 1986, includes Aruba.

10 Excluding trade of the Free Zone of Colon.

11 Prior to January 1991, includes trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Repulic.

12 Prior to January 1991, excludes trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic.

13 Prior to 1983, general trade.

14 Including monetary gold.

15 Data prior to January 1991, pertain to the territorial boundaries of the Federal Republic of Germany prior to 3 October, 1990.

16 Beginning 1992, data refer to Bosnia and Herzegovina, Croatia, Slovenia, TFYR Macedonia, and the Federal Republic of Yugoslavia. Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia.

17 Beginning January 1992, data refer to the Federal Republic of Yugoslavia. Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia.

18 Beginning 1985, data are not comparable to those shown for prior periods due to revisions of the koruna to U.S. dollar exchange rate.

19 Beginning 1989, data are not comparable to those shown for prior periods due to revisions of the mark to the U.S. dollar exchange rate.

20 For 1991, data for the former USSR are converted to U.S. dollars using commercial exchange rate of rouble and are not comparable to those shown for prior periods.

21 Excluding inter-trade among countries of the region, except for Estonia, Latvia and Lithuania.

22 Excluding exports of gold bullion and gold coin.

23 The South African Customs Union comprising Botswana, Lesotho, Namibia, South Africa and Swaziland. Trade between the component countries is excluded.

24 Import figures exclude petroleum imported without stated value.

25 Excluding exports of camels to Egypt.

26 Customs and Economic Union of Central Africa.

27 Inter-trade among the members of Customs and Economic Union of Central Africa is excluded.

28 Economic Community of West African States

29 Imports and exports net of returned goods. The figures also exclude Judea and Samaria and the Gaza area.

30 Excluding military imports.

31 Prior to January 1992, excludes Armenia, Azerbaijan, Georgia, Kazakstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Total Developing Asia re-calculated for all periods shown in the table according to the the current composition.

32 Data refer to total exports less petroleum exports of Asia Middle East countries where petroleum, in this case, is the sum of SITC groups 333, 334 and 335.

33 Year ending 20 December of the year stated.

34 Comprises trade of the former Democratic Yemen and former Yemen Arab Republic including any intertrade between them.

35 Includes Peoples Democratic Republic of Korea.

36 Year beginning 21 March of the year stated.

37 Prior to 1981, special trade.

Remarque Generale: Systeme: G=Commerce Generale; S=Commerce Special.

Les importations et les exportations totales pour le monde se composent des importations et exportations des Economies développées, des Economies en voie de développement et des Autres. Les totaux régionaux pour importations et exportations ont été ajustés pour exclure les re-exportations des pays ou zones qui comprennent la région. Les totaux régionaux et mondiaux comprennent des estimations pour certains pays ou zones ne figurant pas séparément mais pour lesquels les données ne sont pas encore disponibles. Les totaux régionaux contenant des données estimées sont imprimés en caractères gras et italique.

Les valeurs en dollars des E.U. des exportations et des impoprtations pour les pays ou zones suivants ont été dérivées par la Division de statistique des Nations Unies (DSNU) des données, exprimées en unités monétaires nationales, que le Fonds Monétaire International publie dans ses Statistiques Financières Internationales; la méthode de dérivation utilisée des facteurs de conversion du commerce extérieur calculés par DSNU: Afrique du Sud, Antigua-et-Barbuda, Antilles Neerl., Arabie saoudite, Aruba, Australie, Autriche, Bahamas, Bahrein, Bangladesh, Barbade, Belgique/Lux., Belize, Burkina Faso, Burundi, Cameroun, Canada, Cap-Vert, Chypre, Comores, Congo, Côte d'Ivoire, Danemark, Djibouti, Dominique, Egypte, Emirates arabes unis, Espagne, France, Gabon, Gambie, Ghana, Grèce, Grenade, Guinée-Bissau, Guyana, Haiti, Iles Salomon, Inde, Iran (Rep. islamique d'), Irlande, Islande, Italie, Jamah. arabe libyenne, Jamaïque, Japon, Jordanie, Kenya, Koweït, Libéria, Madagascar, Malaisie, Malawi, Mali, Malte, Maroc, Maurice, Mauritanie, Myanmar, Népal, Niger, Norvège, Nouvelle-Zélande, Oman, Papouasie-Nouvelle-Guinée, Paraguay, Portugal, Qatar, Rép. arabe syrienne, Rép. centrafricaine, Rép. de Corée, Rép. tchèque, Rép.-Unie de Tanzanie, Royaume-Uni, St. Kitts et Nevis, St. Lucie, St. Vincent-Grenadines, Samoa, Sénégal, Seychelles, Sierra Leone, Singapour, Somalie, Soudan, Suède, Suisse, Tchad, Thallande, Togo, Tonga, Trinité-et-Tobago, Tunisie, Vanuatu et Zimbabwe.

Les valeurs en dollars des E.U. des exportations et des importations pour les pays ou zones suivants sont identiques à celles publiées par le Fonds Monétaire International: Afghanistan, Argentine, Bermudes, Bolivie, Brésil, Chili, Colombie, Costa Rica, Equateur, Etats-Unis d'Amérique, Guatemala, Guinée équatoriale, Honduras, Hong-kong, Indonésie, Israël, Maldives, Mozambique, Nicaragua, Pérou, Rép. dominicaine et Uruguay.

[1] Etats-Unis, Canada, pays a économie développés d'Europe, Israël, Japon, Australie, Nouvelle Zélande et l'union douanière de l'Afrique du Sud.

[2] Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

[3] Algérie, Equateur, Gabon, Indonésie, Iran (Rép. islamique d'), Iraq, Koweït, Jamahiriya arabe libyenne, Nigéria, Qatar, Arabie saoudite, Emirates arabes unis et Venezuela.

[4] Les pays les moins avancés sont: Afghanistan, Angola, Bangladesh, Bénin, Bhoutan, Burkina Faso, Burundi, Cambodge, Cap Vert, Comores, Djibouti, Eritrea, Ethiopie, Gambie, Guinée, Guinée Bissau, Guinée equatoriale, Haiti, Iles Solomon, Kiribati, Lesotho, Liberia, Madagascar, Malawi, Maldives, Mali, Mauritanie, Mozambique, Myanmar, Népal, Niger, Ouganda, Rép. centrafricaine, Rép. dem. pop. lao, Rép.-Unie de Tanzanie, Rwanda, Samoa, Sao Tomé et Principe, Sierra Léone, Somalie, Soudan, Tchad, Togo, Tuvalu, Vanuatu, Yémen, Zaïre et Zambie.

[5] Avant janvier 1992, y compris l'Europe de l'Est et l'ancienne URSS. A partir de janvier 1992 y compris de l'Europe l'Est et les pays européennes de l'anciennce URSS.

[6] Association Latino-Américaine d'Intégration. Antérieurement Association Latino-Américaine de Libre-Echange.

[7] Importations F.O.B.

[8] Marché Commun de l'Amérique Central.

[9] Avant 1986, comprend Aruba.

[10] Non compris le commerce de la Zone Libre de Colon.

[11] Avant janvier 1991, y compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République Fédérale d'Allemagne et l'ancienne République Démocratique Allemande.

[12] Avant janvier 1991, non compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République Fédérale d'Allemagne et l'ancienne République Démocratique Allemande.

[13] Avant 1983, commerce general.

[14] Y compris l'or monetaire.

[15] Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la Rébublique Fédérale d'Allemagne antérieur au 3 october 1990.

[16] A partir de janvier 1992, les données se rapportent à Bosnie-Herzegovine, Croatie, Slovénie, TARY Macédonie, et la République Fédérative de Yougoslavie. Avant 1992, les données se rapportent à la République Fédérative Socialiste de Yougoslavie.

[17] A partir de janvier 1992, les données se rapportent à la République Fédérative de Yougoslavie. Avant 1992 les données se rapportent à la République Fédérative Socialiste de Yougoslavie.

[18] A partir de l'année 1985 les données ne sont pas comparables aux données des périodes antérieures à cause de révisions de taux de change de koruna au dollar des E.U.

[19] A partir de l'année 1989 les données ne sont pas comparables aux données des périodes antérieures à cause de révisions de taux de change de mark au dollar des E.U.

[20] Les données de 1991 de l'ancienne URSS sont converties en dollar des E.U. en utilisant le taux de change commercial de rouble et ne sont pas comparables aux données des périodes antérieures.

[21] Non compris le commerce avec les autres pays de la région, excepté pour Estonie, Lettonie et Lituanie.

[22] Non compris les exportations de lingots et pieces d'or.

[23] L'union douaniere de l'afrique meridionale comprend Botswana, Lesotho, Namibie, Afrique du Sud et Swaziland. Non compris le commerce entre ces pays.

[24] Non compris le petrole brut dont la valeur a l'importation n'est pas stipulee.

[25] Non compris les exportations des chaneaux en Egypte.

[26] L'union douanière et économique de l'Afrique centrale.

[27] Non compris le commerce entre les pays membres du UDEAC.

[28] Communauté économique des états de l'Afrique de l'Ouest.

[29] Importations et exportations nets. Ne comprenant pas les marchandises retuournees. Sont egalement exclues les données de la Judee et de Samaria et ainsu que la zone de Gaza.

[30] Non compris les importations des economats militaires.

[31] Avant janvier 1992 non compris Arménie, Azerbaïdjan, Georgie, Kazakstan, Kirghizistan, Tadjikistan, Turkménistan et Ouzbékistan. Total Asie en voie de développement avait été recalculé pour toutes les périodes données au tableau suivant la composition présente.

Total Imports and Exports by Regions and Countries and Areas

SPECIAL TABLE: B

World exports by commodity classes and by regions (continued)

General note

The purpose of this table is to provide data on the network of flows of broad groups of commodities within and between important economic and geographic areas of the world.

The regional analysis in this table is in accordance with that of Special Table A in this issue. For the treatment of data on Germany see the general note on page vi.

Export data in this table are largely comparable to that shown in Special Table A except that Special Table A contains revised data for total exports which are not incorporated into this table if the corresponding revised data at the commodity/destination level are not available. Also, the regional totals shown in Special Table A have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by commodity and by destination.

The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 2, for 1980 through 1987 except for countries which report trade data only in terms of the SITC, Revised. Beginning 1988 the commodity classification is in accordance with the SITC, Revision 3, except for countries which report trade data only in terms of the SITC, Revision 2, or the SITC, Revised.

The data approximate total exports of all countries and areas of the world with the exception of the inter-trade between China, the Democratic People's Republic of Korea, Mongolia and Viet Nam in 1980 and trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in Table 1 for each country in this volume. Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted

(a) to approximate the commodity groupings of the SITC and

(b) to approximate calendar years.

The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination. Approximately 1 1/2 per cent of total exports are not distributed. All data are generally in accordance with the special trade system.

1/ Excluding the inter-trade between China, the Democratic People's Republic of Korea, Mongolia and Viet Nam in 1980. The figures shown for other years are based on the import statistics of China.

2/ Excluding the trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany (FRG) and the former German Democratic Republic (GDR). Data reported by FRG are as follows:

Value in million United States dollars

	1980	1990
FRG to GDR	2911	13379
FRG from GDR	3073	5129

3/ Exports of the former USSR for which country of destination is not available are included in the totals for the World, the 'Developed economies', the 'Developing economies' and 'Eastern Europe and the former USSR' but are excluded from the regional components of these groupings. For 1991, data for the former USSR are converted to U.S. dollars using the commercial exchange rate of the rouble and are not comparable to those shown for prior periods.

4/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

5/ Beginning 1992, data refer to the Federal Republic of Yugoslavia, Croatia and Slovenia. Beginning 1993, data refer to the Federal Republic of Yugoslavia, Croatia, Slovenia, Bosnia and Herzegovina, and the former Yugoslav republic of Macedonia. Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia.

6/ Section 9 of the SITC, which comprises commodities and transactions not classified elsewhere, is included in the total trade but is not shown separately in this table.

7/ Beginning 1992, includes Eastern Europe and the European countries of the former USSR.

8/ Includes Belarus, Estonia, Latvia, Lithuania, Republic of Moldova, the Russian Federation, and Ukraine. Data exclude inter-trade among countries of the former USSR, except for Estonia, Latvia and Lithuania.

9/ Beginning 1992, includes Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Data for these countries exclude inter-trade among countries of the former USSR, except for Estonia, Latvia and Lithuania.

10/ Prior to 1992, data refer to the former USSR. Beginning 1992, data refer to the European countries of the former USSR, and exclude inter-trade among countries of the former USSR, except for Estonia, Latvia and Lithuania.

Exportations mondiales par classes de marchandises et par régions (suite)

Remarque générale

Le but de ce tableau est de fournir un apercu du courant des marchandises entre les régions importantes économiques et géographiques du monde et de leur commerce intérieur.

L'analyse régionale dans ce tableau est conforme à celle du Tableau Spécial A du présent numéro. Pour le traitement des données de l'Allemagne voir la remarque générale à la page vi.

Les données des exportations dans ce tableau sont en générale comparables aux chiffres qui sont inclus dans le Tableau Spécial A, exceptées que celles du Tableau Spécial A comportent des revisions aux exportations totales qui ne sont pas inclus dans ce tableau si les revisions des données correspondantes au niveau de marchandise/destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau Spécial A ont été ajustés pour exclure les re-exportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des re-exportations ne sont pas disponibles fréquemment par marchandise et par destination.

La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI), Revision 2, des Nations Unies, pour les années allant de 1980 à 1987 en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revisée. A partir de 1988 la classification par marchandise utilisée est en accord avec la CTCI, Revision 3, en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revision 2, ou la CTCI, Revisée.

Les données approchées des exportations totales de tous pays et régions du monde a l'exclusion des échanges entre la Chine, la République populaire démocratique de Corée, la Mongolie et le Viet Nam en 1980 et le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République fédérale d'Allemagne et l'ancienne République démocratique allemande. Elles sont basées sur les chiffres des exportations officielles nationales convertis en dollars E.-U. selon les facteurs de conversion publiés dans le Tableau 1 pour chaque pays dans ce tome. Quand les chiffres officiels ne sont pas disponibles on a recours a des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées

(a) qu'elles correspondent aux groups des marchandises de la CTCI et
(b) qu'elles correspondent aux années civiles.

Les données comprises les exportations de 'special category' (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination. Approximativement 1 1/2 pourcent des exportations totales ne sont pas distribuées. En générale, toutes les données correspondent au commerce spécial.

1/ Non compris le commerce entre la Chine, la République populaire démocratique de Corée, la Mongolie et le Viet Nam en 1980. Les chiffres indiqués pour les autres années sont bases sur les statistiques d'importations de la Chine.

2/ Non compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République fédérale d'Allemagne (RfA) et l'ancienne République démocratique allemande (Rda). Les données fournies par RfA sont les suivantes:

Valeur en millions de dollars des E.-U.

	1980	1990
de RfA vers Rda	2911	13379
de RfA en prov. de Rda	3073	5129

3/ Les exportations en provenance de l'ancienne URSS dont les pays de destination ne sont pas disponibles sont comprises dans les totaux du Monde, des 'Economies développées', des 'Economies en voie de développement' et de 'Europe de l'Est et l'ancienne URSS', mais ils ne sont pas comprises dans chaque partie composant ces régions. Les données relatives à l'année 1991 de l'ancienne URSS sont converties en dollar des E.U. en utilisant le taux de change commercial de rouble et ils ne sont pas comparables aux données des périodes antérieures.

4/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

5/ A partir de l'année 1992, les données se rapportent à la République fédérative de Yougoslavie, Croatie et Slovénie. A partir de l'année 1993, les données se rapportent à la République fédérative de Yougoslavie, Croatie, Slovénie, Bosnie-Herzégovine et l'ancienne République yougoslave de Macédoine. Avant l'année 1992, les données se rapportent à la République socialiste fédérative de Yougoslavie.

6/ Section 9 de la CTCI, qui représente les articles et transactions non classes ailleurs est comprise dans le commerce total mais n'est pas présentée séparément dans ce tableau.

7/ A partir de janvier 1992, y compris de l'Europe de l'est et les pays européens de l'ancienne URSS.

8/ Y compris Bélarus, Estonie, Lettonie, Lituanie, République de Moldova, Fédération de Russie, et Ukraine. Les données ne comprennent pas le commerce avec les pays de l'ancienne URSS, excepté pour Estonie, Lettonie et Lituanie.

9/ A partir de l'année 1992, y compris Azerbaïdjan, Arménie, Géorgie, Kazakhstan, Kirghizistan, Tadjikistan, Turkménistan, et Ouzbékistan. Les données relatives à ces pays ne comprennent pas le commerce avec les pays de l'ancienne URSS, excepté pour Estonie, Lettonie et Lituanie.

10/ Avant l'année 1992, les données se rapportent à l'ancienne URSS. A partir de l'année 1992, les données se rapportent aux pays européens de l'ancienne URSS, et ils ne comprennent pas le commerce avec les pays de l'ancienne URSS, excepté pour Estonie, Lettonie et Lituanie.

SPECIAL TABLE: D

Structure of world exports by commodity classes and by regions (continued)
Structure des exportations mondiales par catégories de marchandises et par régions (suite)

General note

The regional analysis in this table and Special Table C is in accordance with Special Table A of this issue.

The figures in this table and table C are derived from the data in Special Table B. For the treatment of data on Germany see the general note on page vi.

The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 2, for 1980 through 1987 except for countries which report trade data only in terms of the SITC, Revised. Beginning 1988 the commodity classification is in accordance with the SITC, Revision 3, except for countries which report trade data only in terms of the SITC, Revision 2, or the SITC, Revised.

The data approximate total exports of all countries and areas of the world with the exception of the inter-trade between China, the Democratic People's Republic of Korea, Mongolia and Viet Nam in 1980 and trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in Table 1 for each country in this volume. Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted

(a) to approximate the commodity groupings of the SITC and
(b) to approximate calendar years.

The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination. For 'all commodities' approximately 1 1/2 per cent of total exports are not distributed. All data are generally in accordance with the special trade system.

1/ Excluding the inter-trade between China, the Democratic People's Republic of Korea, Mongolia and Viet Nam in 1980. The figures shown for other years are based on the import statistics of China.

2/ Excluding the trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and former the German Democratic Republic.

3/ Exports of the former USSR for which country of destination is not available are included in the totals for the World, the 'Developed economies', the 'Developing economies' and 'Eastern Europe and the former USSR' but are excluded from the regional components of these groupings.

4/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

5/ Section 9 of the SITC, which comprises commodities and transactions not classified elsewhere, is included in the total trade but is not shown separately in this table.

6/ Beginning 1992, includes Eastern Europe and the European countries of the former USSR.

7/ Prior to 1992, data refer to the former USSR. Beginning 1992, data refer to the European countries of the former USSR - Belarus Estonia, Latvia, Lithuania, Republic of Moldova, the Russian Federation, and Ukraine.

8/ Beginning 1992, includes Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan.

Remarque générale

L'analyse régionale dans ce tableau et le Tableau Spécial C est conforme au Tableau Spécial A de ce numéro.

Les données de ce tableau et le tableau C sont dérivées de celles publiées dans le Tableau Spécial B. Pour le traitement des données de l'Allemagne voir la remarque générale à la page vi.

La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI), Revision 2, des Nations Unies, pour les années allant de 1980 à 1987 en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revisée. A partir de 1988 la classification par marchandise utilisée est en accord avec la CTCI, Revision 3, en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revision 2, ou la CTCI, Revisée.

Les données approchées des exportations totales de tous pays et régions du monde a l'exclusion des échanges entre la Chine, la République populaire démocratique de Corée, la Mongolie et le Viet Nam en 1980 et le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République fédérale d'Allemagne et l'ancienne République démocratique allemande. Elles sont basées sur les chiffres des exportations officielles nationales convertis en dollars E.-U. selon les facteurs de conversion publiés dans le Tableau 1 pour chaque pays dans ce tome. Quand les chiffres officiels ne sont pas disponibles on a recours a des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées

(a) qu'elles correspondent aux groups des marchandises de la CTCI et
(b) qu'elles correspondent aux années civiles.

Les données comprises les exportations de 'special category' (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas compnses dans les régions de destination. Pour 'tous produits' approximativement 1 1/2 pourcent des exportations totales ne sont pas distribuées. En générale, toutes les données correspondent au commerce spécial.

1/ Non compris le commerce entre la Chine, la République populaire démocratique de Corée, la Mongolie et le Viet Nam en 1980. Les chiffres indiqués pour les autres années sont bases sur les statistiques d'importations de la Chine.

2/ Non compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République fédérale d'Allemagne et l'ancienne République démocratique allemande.

3/ Les exportations en provenance de l'ancienne URSS dont les pays de destination ne sont pas disponibles sont comprises dans les totaux du Monde, des 'Economies développées', des 'Economies en voie de développement' et de 'Europe de l'Est et l'ancienne URSS', mais ils ne sont pas comprises dans chaque partie composant ces régions.

4/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

5/ Section 9 de la CTCI, qui représente les articles et transactions non classes ailleurs est comprise dans le commerce total mais n'est pas présentée séparément dans ce tableau.

6/ A partir de janvier 1992, y compris de l'Europe de l'est et les pays européens de l'ancienne URSS.

7/ Avant l'année 1992, les données se rapportent à l'ancienne URSS. A partir de l'année 1992, les données se rapportent aux pays européens de l'ancienne URSS - Bélarus, Estonie, Lettonie, Lituanie, République de Moldova, Fédération de Russie, et Ukraine.

8/ A partir de l'année 1992, y compris Azerbaidjan, Arménie, Géorgie, Kazakhstan, Kirghizistan, Tadjikistan, Turkménistan, et Ouzbékistan.

General note: These index numbers show the changes in the volume (quantum index) and the average price (unit value index) of total imports and exports. The terms of trade figures are calculated by dividing export unit value indices by the corresponding import unit value indices. The product of the net terms of trade and the quantum index of exports is called the index of the purchasing power of exports. The footnotes to countries appearing in Special Table:A of this volume also apply to the index numbers in this table.

[1] Calculated in terms of U. S. dollars.
[2] Price index numbers; For Australia beginning 1981, for the United States, beginning 1989.
[3] Excludes military exports.
[4] Domestic exports only.
[5] Excluding ships.
[6] Index numbers cannot yet be rebased because of the unavailability of data for 1990.
[7] Data prior to January 1991 pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October 1990 (See explanatory notes on data pertaining to Germany on page v)
[8] Beginning January 1992, data refer to the Federal Republic of Yugoslavia. Prior to that date, data refer to the Socialist Federal Republic of Yugoslavia.

Remarque generale: Ces indices indiquent les variations des quantités (indice du quantum) et des prix moyens (indice de la valeur unitaire) des importations ou exportations totales. Les indices des termes de l'échange sont obtenus en divisant les indices de la valeur unitaire à l'exportation par ceux à l'importation. L'indice du pouvoir d'achat des exportations est obtenu en multipliant l'indice des termes de l'échange par l'indice du quantum des exportations. Les notes se rapportant aux pays qui apparaissent dans le Tableau Special:A de ce tome s'appliquent aussi aux indices de ce tableau.

[1] Calculés en dollars des Etats–unis.
[2] Indices des prix; Pour l'Australie à partir de 1981, pour les Etats–unis à partir de 1989.
[3] Non compris les exportations militaires.
[4] Seulement exportations domestiques.
[5] Non compris les navires.
[6] Les indices ne peuvent pas encore être rebasés du fait que les renseignements de1990 ne sont pas encore disponibles.
[7] Les données relatives à la période précedant janvier 1991 correspondent aux limites territorales de la Republique fédérale d'Allemagne et l'ancienne Republique demoratique allemande antérieur au 3 octobre 1990. (Voir les notes explicatives sur les données concernant l'Allemagne à la page vii).
[8] A partir de janvier 1992, les données se rapportent à la République fédérative de Yougoslavie. Avant cette date les données se rapportent à la République fédérative socialiste de Yugoslavie.

Total exports and imports: index numbers of quantum, unit value and terms of trade by regions
Exportations et importations totales: indices du quantum, de la valeur unitaire et des termes de l'échange par régions

Europe /6	100	90	98	99	99	100	...	...	...	...	Europe /6

1/ The regional analysis in this table is in accordance with the groupings of countries or areas specified in Special Table A of this issue.

2/ Based on the value of trade, in U.S. dollars, in 1980.

3/ Quantum indices are derived from value data and unit value indices. They are base period weighted.

4/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

5/ South African Customs Union.

6/ Socialist Federal Republic of Yugoslavia.

7/ Regional aggregates are current period weighted.

8/ Indices, except those for Europe, are based on estimates prepared by the International Monetary Fund.

9/ Unit value index of exports divided by unit value index of imports.

1/ L'analyse régionale dans ce tableau est conforme aux groupes des pays ou zones paraissant dans le Tableau Spécial A.

2/ Calculée d'après la valeur du commerce en 1980, en dollars E.-U.

3/ Les indices du quantum sont calculés à partir des chiffres de la valeur et des indices de la valeur unitaire. Ils sont à coéfficients de pondération correspondant à la période en base.

4/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

5/ L'Union Douanière d'Afrique Méridionale.

6/ La République socialiste fédérative de Yougoslavie.

7/ Les totaux régionaux sont a coéfficients de pondération correspondant à la période en cours.

8/ Le calcul des indices, sauf ceux pour l'Europe, sont basés sur les estimations preparées par le Fonds monétaire international.

9/ Indice de la valeur unitaire des exportations divisé par l'indice de la valeur unitaire des importations.

General note

Manufactured goods are here defined to comprise sections 5 through 8 of the Standard International Trade Classification. These sections are: chemicals and related products, manufactured goods classified chiefly by material, machinery and transport equipment and miscellaneous manufactured articles. The economic and geographic groupings in this table are in accordance with those of Special Table A in this issue, although Special Table A includes more detailed geographic sub-groups which make up the groupings 'Other developed economies' and 'Developing economies' of this table. In 1980 the exports of manufactured goods by all 'Developed' and 'Developing' economies accounted for approximately 93 percent of world exports of manufactured goods.

The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistical Division compiles using their quantity and value figures. For countries that do not compile indices for manufactured goods exports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC sections 5-8. Unit value indices obtained from national indices are rebased, where necessary, so that 1990 = 100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted.

The indices in SDRs are calculated by multiplying the equivalent aggregate indices in U.S. dollars by conversion factors obtained by dividing the SDR/$US exchange rate in the current period by the rate in the base period.

The quantum indices are derived from the value data and the unit value indices. All aggregate quantum indices are base period weighted.

1/ Excludes trade of the countries of Eastern Europe and the former USSR.

2/ Includes the Socialist Federal Republic of Yugoslavia for the years 1970-1979.

3/ Beginning 1989 derived from price indices; national unit value index discontinued.

4/ Excludes Portugal and Spain for the years 1970-1979.

5/ Derived from sub-indices using current weights. Indices for Belgium, beginning 1988, and for Switzerland, beginning 1987, are calculated by the United Nations Statistical Division.

6/ Data prior to January 1991 pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October 1990 (See explanatory notes on data pertaning to Germany on page vi).

7/ Indices are calculated by the United Nations Statistical Division for the years beginning 1981.

8/ Includes Portugal for the years 1970-1979.

9/ Series linked at 1988 by a factor calculated by the United Nations Statistical Division.

10/ Includes the Socialist Federal Republic of Yugoslavia for the years beginning 1980.

Remarque générale

Les produits manufacturés comprennent les sections 5 à 8 de la Classification type pour le commerce international. Ces sections sont: produits chimiques et produits connexes, articles manufacturés classés principalement d'après la matière première, machines et matériel de transport et articles manufacturés divers. Les groupes économiques et géographiques de ce tableau sont conformes aux groupes des pays ou zones qui paraissent dans le Tableau Spécial A de ce numéro, bien que le Tableau Spécial A comprend plus de détails en ce qui concerne les sous-groupes géographiques lesquels comprennent les groupes des 'Autres économies développées' et 'Economies en voie de développement' de ce tableau. En 1980, les exportations des produits manufacturés par tous les 'Economies développées' et les 'Economies en voie développement' representaient approximativement 93 pourcent de l'ensemble des exportations mondiales des produits manufacturés.

Les indices de la valeur unitaire sont obtenus de sources nationales, à l'exception de quelques pays pour lesquels la Division de Statistiques des Nations Unies calcule ces indices en utilisant les chiffres de la valeur et du volume fournis par ces pays. Pour les pays ne calculant pas leurs indices des exportations des produits manufacturés selon la definition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche les sections 5 à 8 de la CTCI. Les indices qui sont obtenus à partir des indices nationaux sont ramenés, quand nécessaire, à l'année de base 1990 = 100. Les indices en monnaie nationale sont convertis en dollars des E.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérée, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire sont à coefficients de pondération correspondant à la période indiquée.

Les indices en DTS sont calculés en multipliant les indices totaux equivalents en dollars E.-U. par un facteur de conversion obtenu en divisant le taux de change courant du DTS/$E-U d'une monnaie donnée par celui de la période de base.

Les indices du quantum sont calculés à partir des chiffres de la valeur et les indices de la valeur unitaire. Tous les agrégés des indices du quantum sont à coefficients de pondération correspondant à la période en base.

1/ Non compris le commerce des pays de l'Europe de l'Est et l'ancienne URSS.

2/ Y compris la République socialiste fédérative de Yougoslavie pour les années 1970-1979.

3/ A partir de 1989 calculés à partir des indices des prix; l'indice de la valeur unitaire nationale est discontinué.

4/ Non compris le Portugal et l'Espagne pour les années 1970-1979.

5/ Calculés à partir de sous-indices à coefficients de pondération correspondant à la période en cours. Les indices pour la Belgique, à partir de 1988, et pour la Suisse, à partir de 1987, sont calculés par la Division de Statistique des Nations Unies.

6/ Les Données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République fédérale d'Allemagne et l'ancienne République democratique allemande antérieur au 3 octobre 1990 (Voir les notes explicatives sur les données concernant l'Allemagne à la page vi).

7/ Les indices sont calculés par la Division de Statistique des Nations Unies pour les années à partir 1981.

8/ Y compris le Portugal pour les années 1970-1979.

9/ Les séries sont enchainées à 1988 par un facteur calculé par la Division de Statistique des Nations Unies.

10/ Y compris la République socialiste fédérative de Yougoslavie pour les années à partir de 1980.

General note

Fuels are here defined to comprise all the products in section 3 of the Standard International Trade Classification. These products are: coal, coke and briquettes, petroleum, petroleum products and related materials, gas and electric current. The economic and geographic groupings in this table are in accordance with those of Special Table A in this issue, although Special Table A includes more detailed geographic sub-groups which make up the grouping 'Other developed economies' of this table. In 1980 fuel imports by the developed economies amounted to approximately 27 percent of their total imports.

The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistical Division compiles using their quantity and value figures. For countries that do not compile indices for fuel imports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC section 3. Unit value indices obtained from national indices are rebased, where necessary, so that 1990 = 100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted.

The quantum indices are derived from the value data and the unit value indices. All aggregate quantum indices are base period weighted.

1/ Includes the Socialist Federal Republic of Yugoslavia for the years 1970-1979.

2/ Beginning 1989 derived from price indices; national unit value index discontinued.

3/ Excludes Portugal and Spain for the years 1970-1979.

4/ Indices are calculated by the United Nations Statistical Division for the years beginning 1981.

5/ Data prior to January 1991 pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October 1990 (See explanatory notes on data pertaining to Germany on page vi).

6/ Derived from sub-indices using current weights. Indices for the Netherlands, beginning 1988, and for Switzerland, beginning 1987, are calculated by the United Nations Statistical Division.

7/ Includes Portugal in for the years 1970-1979.

8/ Series linked at 1988 by a factor calculated by the United Nations Statistical Division.

Remarque générale

Les produits énergétiques comprennent tous les produits appartenant à la section 3 de la Classification type pour le commerce international. Ces produits sont: houilles, cokes et briquettes, pétrole, produits dérivés du pétrole et produits connexes, gaz et énergie électrique. Les groupes économiques et géographiques dans ce tableau sont conformes aux groupes des pays ou zones qui paraissent dans le Tableau Spécial A de ce numéro, bien que le Tableau Spécial A comprend plus de détails en ce qui concerne les sous-groupes géographiques lesquels comprennent le groupe des 'Autres économies développées' de ce tableau. En 1980, les importations des produits énergétiques de ces pays representaient approximativement 27 pourcent de leurs importations totales.

Les indices de la valeur unitaire sont obtenus de sources nationales, à l'exception de quelques pays pour lesquels la Division de Statistiques des Nations Unies calcule ces indices en utilisant les chiffres de la valeur et du volume fournis par ces pays. Pour les pays ne calculant pas leurs indices des importations des produits énergétiques selon la definition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche à la section 3 de la CTCI. Les indices qui sont obtenus à partir des indices nationaux sont ramenés, quand nécessaire, à l'année de base 1990 = 100. Les indices en monnaie nationale sont convertis en dollars des E.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérée, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire sont à coefficients de pondération correspondant à la période indiquée.

Les indices du quantum sont calculés à partir des chiffres de la valeur et des indices de la valeur unitaire. Tous les agrégés des indices du quantum sont à coefficients de pondération correspondant à la période en base.

1/ Y compris la République socialiste fédérative de Yougoslavie pour les années 1970-1979.

2/ A partir de 1989 calculés à partir des indices des prix; l'indice de la valeur unitaire nationale est discontinué.

3/ Non compris le Portugal et l'Espagne pour les années 1970-1979.

4/ Les indices sont calculés par la Division de Statistique des Nations Unies pour les années à partir de 1981.

5/ Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République fédérale d'Allemagne et l'ancienne République democratique allemande antérieur au 3 octobre 1990 (Voir les notes explicatives sur les données concernant l'Allemagne à la page vi).

6/ Calculés à partir de sous-indices à coefficients de pondération correspondant à la période en cours. Les indices pour les Pays-Bas, à partir de 1988, et pour la Suisse, à partir de 1987, sont calculés par la Division de Statistique des Nations Unies.

7/ Y compris le Portugal pour les années 1970-1979.

8/ Les séries sont enchainées à 1988 par un facteur calculé par la Division de Statistique des Nations Unies.

General note

The figures in this table are calculated from those prepared for Special Tables G and H. Total imports and exports used in the calculations are, in general, those published in the United Nations 'Commodity Trade Statistics', Series D.

1/ Includes the Federal Socialist Republic of Yugoslavia for the years 1970-1979.

2/ Excludes Portugal and Spain for the years 1970-1979.

3/ Data prior to January 1991 pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October 1990 (See explanatory notes on data pertaning to Germany on page vi).

4/ Includes Portugal for the years 1970-1979.

Remarque générale

Les chiffres dans ce tableau sont calculés selon les données preparées pour les tableaux spéciaux G et H. Les totales des importations et exportations utilisées dans les calculs sont, en générale, celles publiées dans les documents des Nations Unies intitulés 'Commodity Trade Statistics', Series D.

1/ Y compris la République socialiste fédérative de Yougoslavie pour les années 1970-1979.

2/ Non compris le Portugal et l'Espagne pour les années 1970-1979.

3/ Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République fédérale d'Allemagne et l'ancienne République démocratique allemande antérieur au 3 octobre 1990 (Voir les notes explicatives sur les données concernant l'Allemagne à la page vi).

4/ Y compris le Portugal pour les années 1970-1979.

GENERAL NOTE. THESE INDEXES ARE OF THE LASPEYRES TYPE (BASE WEIGHTED) SHIFTED WHEN NECESSARY SO THAT 1990=100. THEY ARE CONVERTED FROM NATIONAL CURRENCIES INTO U.S. DOLLARS USING CONVERSION FACTORS OBTAINED BY DIVIDING THE CURRENT EXCHANGE RATE OF A GIVEN CURRENCY BY ITS EXCHANGE RATE IN THE BASE PERIOD.

THE TOTALS SHOWN FOR EACH HEADING ARE THE WEIGHTED AVERAGES OF THE INDEXES FOR THE COUNTRIES LISTED WITHIN EACH SPECIFIC HEADING; WEIGHTS BEING THE EXPORTS IN 1990. THE EXPORTS OF THE SELECTED COUNTRIES REPRESENTED IN 1990 BETWEEN 50 AND 60 PERCENT OF THE TOTAL EXPORTS OF ALL HEADINGS SHOWN.

THESE INDEXES, BEING EXPRESSED IN TERMS OF U.S. DOLLARS REFLECT NOT ONLY CHANGES IN PRICES BUT ALSO CHANGES IN THE PARITY BETWEEN NATIONAL CURRENCIES AND THE DOLLAR. THE CATEGORIES OF GOODS ENCOMPASS A BROAD VARIETY OF PRODUCTS; HENCE DIFFERENT TRENDS IN COUNTRY INDEXES OCCUR WITHIN THE SAME HEADING. FOR EXAMPLE, SINCE JAPAN'S EXPORTS OF TRANSPORT EQUIPMENT INCLUDE LARGE VALUES FOR SHIPS, THE TREND OF JAPAN'S INDEX FOR THIS PARTICULAR CATEGORY DEPENDS TO A MUCH GREATER EXTENT UPON THE PRICE OF THESE PRODUCTS AS COMPARED TO OTHER COUNTRIES.

REMARQUE GENERALE. LES INDICES SONT DE TYPE LASPEYRES, LA PERIODE DE BASE ETANT RAMENEE SI NECESSAIRE A L'ANNEE 1990. ILS SONT EXPRIMES EN DOLLARS DES ETATS-UNIS A L'AIDE D'UN FACTEUR DE CONVERSION OBTENU EN DIVISANT POUR UNE MONNAIE DONNEE LE TAUX DE CHANGE DE LA PERIODE COURANTE PAR CELUI DE LA PERIODE DE BASE.

LE TOTAL INDIQUE POUR CHACUNE DES CATEGORIES DE PRODUITS REPRESENTE LA MOYENNE PONDEREE DES INDICES NATIONAUX; LES PONDERATIONS SE RAPPORTANT AUX EXPORTATIONS DE 1990, LES EXPORTATIONS DONT LES INDICES SONT PUBLIES CI-DESSUS ONT REPRESENTE EN 1990 ENTRE 50 ET 60 POUR CENT DES EXPORTATIONS MONDIALES DES DIFFERENTES CATEGORIES DE BIENS D'EQUIPEMENT.

CES INDICES,ETANT EXPRIMES EN DOLLARS,REFLETENT NON SEULEMENT DES MODIFICATIONS DANS LES PRIX MAIS AUSSI LES VARIATIONS DES TAUX DE CHANGE ENTRE LES MONNAIES NATIONALES ET LE DOLLAR. LES CATEGORIES DE BIENS DONT LES INDICES SONT PUBLIES CI-DESSUS INCLUENT UNE GRANDE VARIETE DE PRODUITS CE QUI PEUT SE TRADUIRE, POUR UN MEME TITRE, PAR UNE EVOLUTION DIFFERENTE DES INDICES NATIONAUX. PAR EXEMPLE, LES EXPORTATIONS JAPONAISES DE MATERIEL DE TRANSPORT DEPENDENT LARGEMENT DES EXPORTATIONS DE NAVIRES DONT LA TENDANCE DES PRIX A L'EXPORTATIONS PEUT DIFFERER DE L'EVOLUTION DES PRIX DES AUTRES MATERIELS DE TRANSPORT.

General note

The indexes for primary commodities and non-ferrous base metals and their sub-indexes are weighted averages of price indexes of individual commodities, each of which is based on specific price quotations for representative grades of that commodity in countries that are major traders of the commodity. The weights are determined by the patterns of primary commodities exports in the base year 1980. All indexes are calculated in terms of United States dollars. The indexes are computed using various categories of prices such as export prices f.o.b., import prices c.i.f., wholesale prices, commodity exchange prices, producer's prices and auction prices. For more details and comparable historical series see the United Nations' "Methods Used in Compiling the United Nations Price Indexes for External Trade", Volume 1, Statistical Papers Series M No. 82.

This table does not cover trade of countries of Eastern Europe and the former USSR.

1/ This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

Remarque générale

Les indices des matières premières et des métaux communs non férreux ainsi que les indices de groupes et de sous-groupes représentent les moyennes pondérées des indices des prix individuels, l'indice de chaque marchandise étant fondé sur des cotations déterminées pour des variétés ou qualités représentatives de la marchandise en question dans les pays qui jouent un role important dans le commerce mondial de la dite marchandise. Les coéfficients de pondération sont déterminés par la structure des exportations de produits primaires dans l'année de référence 1980. Tous les indices sont calculés par rapport au dollars des Etats-Unis. Les indices sont calculés à partir de diverses catégories de prix: prix à l'exportation f.a.b., prix à l'importation c.a.f., prix de gros, prix pratiqués par les bourses de marchandises, prix à la production et prix des ventes aux enchères. Pour de plus amples détails et les séries historiques comparables, voir le document du Nations Unies intitulé "Méthodes Utilisées par les Nations Unis pour Etablir les Indices des Prix des Produits de Base Entrant dans le Commerce International", Tome 1, Etudes Statistiques Série M No. 82.

Ce tableau ne concerne pas le commerce des pays de l'Europe de l'Est et de l'ancienne URSS.

1/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

كيفية الحصول على منشورات الأمم المتحدة

يمكن الحصول على منشورات الأمم المتحدة من المكتبات ودور التوزيع في جميع أنحاء العالم . استعلم عنها من المكتبة التي تتعامل معها أو اكتب إلى : الأمم المتحدة ، قسم البيع في نيويورك أو في جنيف .

如何购取联合国出版物

联合国出版物在全世界各地的书店和经售处均有发售。请向书店询问或写信到纽约或日内瓦的联合国销售组。

HOW TO OBTAIN UNITED NATIONS PUBLICATIONS

United Nations publications may be obtained from bookstores and distributors throughout the world. Consult your bookstore or write to: United Nations, Sales Section, New York or Geneva.

COMMENT SE PROCURER LES PUBLICATIONS DES NATIONS UNIES

Les publications des Nations Unies sont en vente dans les librairies et les agences dépositaires du monde entier. Informez-vous auprès de votre libraire ou adressez-vous à : Nations Unies, Section des ventes, New York ou Genève.

КАК ПОЛУЧИТЬ ИЗДАНИЯ ОРГАНИЗАЦИИ ОБЪЕДИНЕННЫХ НАЦИЙ

Издания Организации Объединенных Наций можно купить в книжных магазинах и агентствах во всех районах мира. Наводите справки об изданиях в вашем книжном магазине или пишите по адресу: Организация Объединенных Наций, Секция по продаже изданий, Нью-Йорк или Женева.

COMO CONSEGUIR PUBLICACIONES DE LAS NACIONES UNIDAS

Las publicaciones de las Naciones Unidas están en venta en librerías y casas distribuidoras en todas partes del mundo. Consulte a su librero o diríjase a: Naciones Unidas, Sección de Ventas, Nueva York o Ginebra.
