NOTE

Symbols of United Nations documents are composed of capital letters combined with figures.

General disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation "country or area" appears in this publication, it covers countries, territories, cities or areas. In previous issues of this publication, where the designation "country" appears in the headings of tables, it should be interpreted to cover countries, territories, cities or areas.

In some tables, the designation "developed" or "developing" economies is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country or area in the development process.

NOTE

Les cotes des documents de l'Organisation des Nations Unies se composent de lettres majuscules et de chiffres.

Déni de responsabilité

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

L'appellation "pays ou zone", figurant dans cette publication, désigne des pays, des territoires, des villes ou des zones. L'appellation "pays" figurant dans certaines rubriques des tableaux de numéros antérieurs de cette publication doit être interprétée comme désignant des pays, des territoires, des villes ou des zones.

L'appellation économie "développée" ou économie "en voie de développement" qui figure dans certains tableaux est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays ou une zone donnée.

ABBREVIATIONS AND COUNTRY NOMENCLATURE

Names of some countries or groups of countries and of some commodities or groups of commodities have been abbreviated. Exact titles and the composition of groups of countries will be found in the following publications referred to in the introduction:

(i) United Nations Standard Country Code (Annex II, Country classification for international trade statistics)

(ii) United Nations Standard Country or Area Code for Statistical Use, (Revision 1)

(iii) Standard Country or Area Codes for Statistical Use, (Revision 2)

(iv) Standard Country or Area Codes for Statistical Use, (Revision 3)

(v) Standard International Trade Classification, Revised (SITC, Revised)

(vi) Standard International Trade Classification, Revision 2, (SITC, Revision 2)

(vii) Classification by Broad Economic Categories (BEC)

(viii) Classification of Commodities by Industrial Origin

(ix) International Standard Industrial Classification of all Economic Activities (ISIC)

1. Data relating to the People's Republic of China generally include those for Taiwan Province in the field of statistics relating to population, area, natural resources, natural conditions such as climate, etc. In other fields of statistics, they do not include Taiwan Province unless otherwise stated. Therefore, in this publication the data published under the heading China exclude those for Taiwan Province. Figures representing the trade with Taiwan Province which may have been reported by any reporting country or area are included in the grouping Asia. Pursuant to a Joint Declaration signed on 19 December 1984, the United Kingdom restored Hong Kong to the People's Republic of China with effect from 1 July 1997; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date. For statistical purposes, the data for China do not include those for Hong Kong Special Administrative Region.

2. On 22 May 1990 Democratic Yemen and Yemen merged to form a single State. Since that date they have been represented as one Member with the name "Yemen". All data shown in this publication relating to the period prior to 1990 refer to the former Democratic Yemen and the former Yemen.

3. Through accession of the German Democratic Republic to the Federal Republic of Germany with effect from 3 October 1990, the two German States have united to form one sovereign State. As from the date of unification, the Federal Republic of Germany acts in the United Nations under

the designation of "Germany". All data shown which pertain to Germany prior to 3 October 1990 are indicated separately for the Federal Republic of Germany and the former German Democratic Republic based on their respective territories at the time indicated. Where data for united Germany (subsequent to 3 October 1990) are not available, they are shown separately and pertain to the territorial boundaries prior to 3 October 1990.

4. In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent countries (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). From 1992 onwards data are shown for the individual countries. Prior to 1992 data are shown for the former USSR.

5. Unless otherwise indicated, data provided for Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia which was composed of six republics, whereas data provided for Yugoslavia after that date refer to the Federal Republic of Yugoslavia which is composed of two republics (Serbia and Montenegro).

6. Data for the Czech Republic and Slovakia, where available, are shown separately under the appropriate country name. For periods prior to 1 January 1993, where no separate data are available for the Czech Republic and Slovakia, unless otherwise indicated, data for the former Czechoslovakia are shown under the country name "former Czechoslovakia".

7. Beginning 1 January 1997, the overseas departments of France were included in the statistical territory of France for the purposes of international trade statistics. Values on this basis have been provided by France for 1996 also, and values are published on that basis in this publication.

ABREVIATIONS ET CODES DES PAYS.

Les noms de certains pays ou groupes de pays et de certains produits ou groupes de produits ont dû être abrégés. On trouvera les intitulés exacts de ces noms dans les publications suivantes qui figurent dans l'Introduction:

(i) United Nations Standard Country Code (Annex V, 'Standardized Abbreviated French Country Names')

(ii) United Nations Standard Country or Area Code for Statistical Use, (Révision 1)

(iii) Standard Country or Area Codes for Statistical Use, (Révision 2)

(iv) Codes standard des pays et des zones à usage statistique, (Révision 3)

(v) Classification type pour le commerce international révisée, (CTCI révisée)

(vi) Classification type pour le commerce international (deuxième version révisée), (CTCI, Révision 2)

(vii) Classification par grandes catégories économiques (CGCE)

(viii) Classification des marchandises par origine industrielle

(ix) Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI)

1. Les données relatives à la République populaire de Chine comprennent en général les données relatives à la province de Taïwan lorsqu'il s'agit de statistiques concernant la population, la superficie, les ressources naturelles, les conditions naturelles tel que le climat, etc. Dans les statistiques relevant d'autres domaines, la province de Taïwan n'est pas comprise, sauf indication contraire. C'est le cas dans cet Annuaire où les données pour la Chine ne comprennent pas celles de la province de Taïwan. Lorsque des pays partenaires ont déclaré des échanges avec Taïwan ceux-ci sont inclus dans Asie. Conformément à une Déclaration commune signée le 19 décembre 1984, le Royaume-Uni a rétrocédé Hong-kong à la République populaire de Chine, avec effet au 1er juillet 1997; la souveraineté de la République populaire de Chine s'exerce à nouveau sur le territoire à compter de cette date. Pour les statistiques, les données de la Chine ne comprennent pas celles de la région administrative spéciale de Hong Kong.

2. Le Yémen et le Yémen démocratique ont fusionné le 22 mai 1990 pour ne plus former qu'un seul Etat, qui est depuis lors représenté comme tel à l'Organisation, sous le nom 'Yémen'. Toutes les données présentées dans cet Annuaire qui se rapportent à la période antérieure à l'année 1990 se réfèrent aux anciens Yémen démocratique et Yémen.

3. En vertu de l'adhésion de la République démocratique allemande à la République fédérale d'Allemagne, prenant effet le 3 octobre 1990, les deux Etats allemands se sont unis pour former un seul Etat souverain. A compter de la date de l'unification, la République fédérale d'Allemagne est désignée à l'ONU sous le nom 'Allemagne'. Toutes les données se rapportant à l'Allemagne avant le 3 octobre 1990 figurent dans deux rubriques séparées, basées sur les territoires respectifs de la République fédérale d'Allemagne et l'ancienne République démocratique allemande selon la période indiquée. En l'absence de données pour l'Allemagne unifiée (à compter du 3 octobre 1990), les données sont fournies séparément sous les rubriques Allemagne (République fédérale d') et Allemagne (ancienne République démocratique) et se rapportent aux limites territoriales antérieures au 3 octobre 1990 lorsqu'elles sont disponibles.

4. En 1991, l'ex Union Soviétique a été scindée officiellement en quinze républiques indépendantes (Arménie, Azerbaïdjan, Bélarus, Estonie, Fédération de Russie, Géorgie, Kazakstan, Kirghizistan, Lettonie, Lituanie, Ouzbékistan, République de Moldova, Tadjikistan, Turkménistan et Ukraine). A partir de 1992 les données sont indiquées pour chaque république individuellement. Avant 1992, les données sont indiquées pour l'ancienne URSS.

5. Sauf indication contraire, les données fournies pour la Yougoslavie avant le 1er janvier 1992 se rapportent à la République fédérative socialiste de Yougoslavie, qui était composée de six républiques; les données fournies pour la Yougoslavie après cette date se rapportent à la République fédérative de Yougoslavie, qui est composée de deux républiques (Serbie et Monténégro).

6. Les données relatives à la République tchèque, et à la Slovaquie, lorsqu'elles sont disponibles, sont présentées séparément sous le nom de chacun des pays. En ce qui concerne la période antérieure au 1er janvier 1993, pour laquelle on ne possède pas de données séparées pour les deux Républiques, les données relatives à l'ancienne Tchécoslovaquie sont, sauf indication contraire, présentées sous le titre 'ancienne Tchécoslovaquie'.

7. A partir de 1er janvier 1997, pour les statistiques du commerce international, le territoire statistique de la France comprend les départements d'outre-mer. Les valeurs ont été fournies aussi sur cette base par la France pour 1996, et sont publiées dans cet annuaire.

TRADE DATA IN ELECTRONIC FORM

External trade data, for the majority of countries from 1962 to the latest year, are available in electronic form and can be transmitted on magnetic tape, diskette, CD-ROM or by electronic mail. Detailed information on coverage and price is available, on request, from the United Nations Statistics Division, New York, N.Y. 10017, USA; tel. (212) 963-6170; fax (212) 963-9851 and e-mail tradestat@un.org.

DONNEES DU COMMERCE EXTERIEUR SOUS FORME ELECTRONIQUE

Les données du commerce extérieur pour la majorité des pays de 1962 à la dernière année écoulée sont disponibles sous forme électronique et peuvent être envoyées sur bande magnétique, sur disquette, sur CD-ROM, ou par message électronique. Les informations détaillées sur la nature, le volume, les dates et les prix de ces supports magnétiques peuvent être obtenues auprès de la Division de Statistique des Nations Unies, New York, N.Y. 10017, Etats Unis; tel. (212) 963-6170; fax (212) 963-9851 and e-mail tradestat@un.org.

INTRODUCTION

1. The forty-sixth edition of the International Trade Statistics Yearbook provides the basic information for individual countries' external trade performances in terms of the overall trends in current value, as well as in volume and price, the importance of trading partners and the significance of individual commodities imported and exported. This edition shows annual statistics for 168 countries or reporting customs areas. It is published in two volumes.

VOLUME I

2. Volume I contains detailed data for individual countries. For each country the following tables usually appear:

(a) Table 1, showing ten series, five for imports and five for exports. The five are: total merchandise trade and trade in gold (generally in national currency, but in US dollars for some countries), conversion factors for converting total merchandise trade from national currency into United States dollars, quantum index numbers and unit value index numbers for total imports and exports.

(b) Table 2, showing up to the most recent seven years available, percentage breakdowns of imports by broad economic categories and of exports by industrial origin. Data for earlier years generally were shown in previous issues of this Yearbook. The analysis for imports is based on the Classification by Broad Economic Categories[1/] and for exports on the Classification of Commodities by Industrial Origin [2/]. Reclassification of foreign trade according to broad economic categories or industrial origin requires statistical information at the five-digit level of the Standard International Trade Classification, Revised. (For history and background of the SITC, see pages xx-xxii). When such details are not available, approximate allocations are made, using the three-digit level of the SITC Revised. In comparing statistics of international trade with statistics of production, problems of limitation exist in addition to those of classification. Exports of products which are obviously not produced in the reporting countries (e.g., exports of tea and cocoa from the Netherlands or the United Kingdom) have been allocated to the industrial origin in which they would have been classified in the producing countries; in the case of tea and cocoa: Agriculture. The industrial origin in the reporting country of these exports is, in fact, the wholesale trade. In the Classification of Commodities by Industrial Origin, SITC, Revised headings are subdivided to correspond, roughly, to groups of the International Standard Industrial Classification of All Economic Activities, (Revision 1)[3/]. The breakdown of exports by industrial origin is derived as much as possible from national or special exports.

(c) Table 3, showing up to the most recent five years available, the value in United States dollars of import and export trade analyzed by the principal countries or

areas and regions of provenance and destination. The analysis is made according to the United Nations Standard Country or Area Codes for Statistical Use[4/]. In some instances, owing to the nature of the national country classification, the conversion to the United Nations country classification could not be done precisely. A maximum of 40 trading partners are shown, in order of magnitude, based on the sum of the values over the years included in the table, with imports and exports ranked separately. Below the value table is a listing showing the percentage breakdown of trade by regions and the percent of trade accounted for by each of the first ten trading partners for the latest available ten years. The line for the European Union (EU) is calculated for all years on the basis of the current membership (fifteen countries). The lines for the Asian part of the former USSR (Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan) and the European part of the former USSR (Belarus, Estonia, Latvia, Lithuania, Republic of Moldova, Russian Federation and Ukraine) are calculated as the sum of the appropriate independent countries from 1992 to date. For years prior to 1992 this was not possible and the line for the European part of the former USSR includes the entire former USSR for those years. Eastern Europe comprises Albania, Bulgaria, Czech Republic, Hungary, Poland, Romania and Slovakia. Regional totals are calculated only if the available partner detail exceeds 80% of the reported total imports or exports.

(d) Tables 4 and 5, showing up to the most recent four years available, the quantity and the value in United States dollars of imports and exports analyzed by commodities. Data for a commodity will appear if the value in any year is greater than or equal to 0.3 per cent of the total trade for that year. The commodities are shown in terms of SITC headings (abbreviated). An asterisk (*) preceding the description indicates that these are the only codes belonging to the next higher level of the SITC, and the next higher level is, therefore, not shown.

3. In some instances the figures shown in United States dollars in the tables indicated under (c) and (d) above may not correspond to those in United States dollars in the table described under (a) above or to those in national currency in that table after the application of the currency conversion factors. These discrepancies arise in part from revisions to the more recent data at the total level and these revisions were not broken down for the more detailed data by commodity and partner. In some cases the differences may be due to differences in coverage/definitions of the data. It was felt, however, that a partial revision of the tables referred to under (c) and (d) above to make the totals consistent with those in (a) should not be made.

4. For all countries, the data in Tables 4 and 5 are presented according to the Standard International Trade Classification (SITC)[5/] Revision 2. Many countries report data according to the SITC, Revision 3 or the Harmonized Commodity Description and Coding System (HS). The data so reported for these countries, were converted to SITC Revision 2. This is a difficult conversion and results in data for some SITC Revision 2 codes which are not comparable with data reported in terms of SITC, Revision 2 to a very significant extent. In a few cases, countries reported data using a national commodity classification related to SITC Revision 1; conversion to SITC Revision 2 could not be done precisely and,

therefore, in these cases some of the SITC Revision 2 codes are not exact in their coverage (Bahamas 1988 and 1991; Bahrain 1989 to 1993; Belize 1988 to 1990; Bermuda 1988 to 1993; Malta 1988 and 1989; Myanmar 1991; Netherlands Antilles 1988 to 1992 and 1995; Sudan 1992 to 1994; United Republic of Tanzania 1987; and Tonga 1987 to 1995).

5. When available, more detailed data by commodity and partner country according to the HS96, HS88, SITC Revision 3, Revision 2 or Revised are published in the Commodity Trade Statistics[6/] on microfiches.

6. Detailed descriptions of the current concepts and definitions applied by countries are available in the United Nations mimeograph "National Reporting Practices in International Merchandise Trade Statistics" (ST/ESA/STAT/112), issued February 1996 and available from the United Nations Statistics Division.

VOLUME II

7. Volume II contains commodity tables showing the total trade of certain commodities analyzed by regions and countries. The regional structure is identical to that which is used in Volume I.

8. Commodity tables. These tables show imports and exports of commodities at the group (3-digit) level of the SITC, Revision 2. All groups are covered except for 286, Ores and concentrates of uranium and thorium; the exports of 333, Petroleum oils, crude, and crude oils obtained from bituminous minerals; 351, Electric current; 675, Hoops and strip, of iron or steel, hot-rolled or cold-rolled; 688, Uranium depleted in U235 and thorium, and their alloys, unwrought or wrought, and articles thereof; n.e.s.; waste and scrap of uranium depleted in U235 and of thorium; 911, Postal packages not classified according to kind; 961, Coin (other than gold coin), not being legal tender (for an explanation, see paragraph 9 below) and 971, Gold, non-monetary (excluding gold ores and concentrates). The years covered are the five years 1993 to 1997. The values are in U.S. dollars and both imports and exports are analyzed by regions and principal trading countries. A maximum of 40 countries are shown in order of magnitude, based on the sum of the values over the years 1994, 1995 and 1996 included in the table, with imports and exports ranked separately. No quantity data are shown.

9. In preparing these tables, in many cases estimates were made for countries whose data were not yet available and these are shown with an 'x'. In some cases, estimates were made for particular countries, and they were considered adequate to include in regional and world totals but not sufficiently explained to be published separately for the country; consequently, they have been suppressed and only an 'x' appears in the table. The commodity groups mentioned in paragraph 8 above, (286, the exports of 333, 351, 675, 688, 911, 961 and 971) are suppressed from publication because they were poorly reported and contain many estimates which are not sufficiently explainable. Strictly speaking, an 'x' should appear against a regional or world total that contains estimates. However, virtually

all the regional and world totals include estimates and the 'x's have been omitted for cosmetic purposes.

10. The procedure for estimating trade data for a given year and a given country takes some reported ('true') data as a starting point. The minimum of required reported input data are the import and export totals of a country. Sometimes other aggregated commodity information is also available and is taken into account; this may include some 3-digit or other commodity totals reported by the country. The estimation procedure then takes the available reported data and initial estimates which may be either (1) the 3-digit commodity totals of the country for an adjacent (reported) year or (2) the 3-digit commodity totals for the country as reported by all its trading partners combined, for the given year. Thereafter, these initial estimates are scaled in such a way that at every level of the commodity classification the total of the commodity estimates and any reported data add up to the reported ("true") totals at the higher level and ultimately to the totals of the imports and exports.

11. Volume II also contains special tables showing, inter alia, (a) the contribution of the trade of each country to the trade of its region and of the world, (b) the flow of trade between countries and regions and (c) the fluctuations of the prices at which goods moved internationally. The special tables are:

A. Total imports and exports by regions and countries and areas;
B. World exports by commodity classes and by regions;
C. Growth of world exports by commodity classes and by regions;
D. Structure of world exports by commodity classes and by regions;
E. Total imports and exports: index numbers by countries or areas, terms of trade, and purchasing power of exports;
F. Total exports and imports: index numbers of quantum, unit value and terms of trade by regions;
G. Manufactured goods exports;
H. Fuel imports: developed economies;
I. Some indicators on fuel imports: developed economies;
J. Export price index numbers of primary commodities and non-ferrous base metals.

Special Tables

12. The economic and geographic groupings in all the special tables are in accordance with those of Special Table A in this issue, although Special Table A sometimes includes more detailed geographic sub-groups. (See Special Table A for the details.)

(A) Total imports and exports by regions and countries or areas. The regional, economic and world totals have been adjusted: (a) to include estimates for countries or areas for which full data are not available; (b) to include insurance and freight for imports valued f.o.b.; (c) to include countries or areas not listed separately; (d) to

approximate special trade; (e) to approximate calendar years; and (f) where possible, to eliminate incomparabilities owing to geographical changes, by adjusting the figures for periods before the change to be comparable to those for periods after the change, for example, the European Union and the European Free Trade Association. The figures shown for individual countries correspond to the figures which appear and are described in table 1 of the country tables. For footnotes see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

(B) World exports by commodity classes and by regions. For the general note and footnotes, see the end of the table.

(C) Growth of world exports by commodity classes and by regions. The annual average rates of change in percentage terms given in this table have been uniformly calculated by the use of the compound interest formula:

$$r = \left(\sqrt[t]{\frac{Vn}{Vo}} - 1 \right) 100$$

r = Annual average rate of change in percentage terms.
Vn = Value of exports during the last year of the period.
Vo = Value of exports during the first year of the period.
t = Number of years in period.

For the general note and footnotes, see the end of Special Table D.

(D) Structure of world exports by commodity classes and by regions. The figures shown under the heading 'Origin of Exports' refer to the exports of the region or country appearing in the 'Area' column; those shown under the heading 'Destination of Exports' refer to the exports of the world to the region or country appearing in the 'Area' column. For the general note and footnotes, see the end of the table.

(E) Total imports and exports: index numbers by countries or areas, terms of trade, and purchasing power of exports. Unless otherwise stated in the footnotes, the unit value indices are in terms of national currencies. For the general note and footnotes, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics for the quantum and unit value indexes.

(F) Total exports and imports: index numbers of quantum, unit value and terms of trade by regions. For the footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(G) Manufactured goods exports. For the general note and footnotes, see the end of Table I.

Quarterly data appear in the Monthly Bulletin of Statistics.

(H) Fuel imports: developed economies. For the general note and footnotes, see the end of Table I.

Quarterly data appear in the Monthly Bulletin of Statistics.

(I) Some indicators on fuel imports: developed economies. This table shows the share of fuel imports in the total value of imports and in the total value of exports, and the ratio of unit value indices of manufactured goods exports to those of fuel imports. For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(J) Export price index numbers of primary commodities and non-ferrous base metals. For the general note and footnote, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

SOURCES AND PRESENTATION

13. The figures for Volumes I and II are obtained from national published sources, from data supplied by the Governments for use in this publication, and the United Nations publications: Monthly Bulletin of Statistics, and Statistical Yearbook. Estimates for some missing data are made by the United Nations Statistics Division.

14. The country and regional names used by various countries are not uniform for their trade statistics. Also, where former geographical entities commonly referred to in national statistics have changed, countries may introduce the corresponding changes in their statistics at different times. Wherever possible, however, parts of the world have been designated by the names they currently bear. To satisfy the needs of some users for analytical data over time, the ability to reconstruct some former geographic/political entities has been maintained e.g. data relating to the former USSR.

15. The regional aggregates shown throughout this publication are based on those set forth in the United Nations Standard Country or Area Codes for Statistical Use[4/], except where indicated.

16. Generally, data refer to calendar years; however, for those countries which report according to some other reference year, the data are presented in the year which covers the majority of the reference year used by the country.

NATIONAL INDEX NUMBERS

17. National index numbers of unit value in national currencies or United States dollars and of quantum are shown in Table 1. They are the official indices which show the changes in the volume, (quantum index) and the average price (unit value index) of the aggregate merchandise imports or exports. Each index number represents a change between the period to which the number refers, called the current period, and a fixed period, called the publication base, in which the index is represented by the percentage 100. In order to facilitate comparison, the indices shown have been adjusted, where possible, so that the calendar year 1990 is the publication base. When changes are made in the coverage, formula or base period of an index, the two series are linked together if they have an overlapping period and are sufficiently comparable.

18. Quarterly and monthly figures for these index series appear in the United Nations Monthly Bulletin of Statistics and a more detailed description of their compilation is given in the 1977 Supplement to the Statistical Yearbook and the Monthly Bulletin of Statistics[7].

TRANSITION COUNTRIES

19. For the period covered by this Yearbook, countries formerly classified for statistical purposes as centrally planned economies had systems of official rates between their currencies and other currencies, all consistent with rates of 0.90 new roubles to the United States dollar prior to 24 December 1971 and 0.829 new roubles to the United States dollar until February 1973; since then these rates have been fluctuating. They generally used these rates when it was necessary to convert foreign into domestic currencies for the purpose of compiling external trade statistics. The resulting data are for comparison with the external transactions of the rest of the world rather than with domestic monetary transactions.

20. The trade statistics of these countries had definitions somewhat different from those which exist in other countries. Differences in definition contribute to the discrepancies which can be observed between statistical records referring to the same flow of goods but kept by two trading partners having different economic systems. The trade among these countries was carried out on a basis not comparable to that governing trade with other countries. The concept of transaction value, for instance, as applied outside those countries is based on the existence of a market between exporters and importers in which the interaction of supply and demand has more effect than it can be assumed to have had in those countries; in the absence of data on the unit values of specific commodities entering the trade of those countries with one another, it is difficult to assess the possible effects on the trade statistics of this kind of incomparability. Increasingly since 1992, the transition countries have adopted similar concepts and definitions for international trade statistics as are in effect in other countries.

GENERAL STATEMENTS

21. The statistics in this Yearbook have been compiled by national statistical authorities largely consistent with the United Nations recommended International Trade Statistics

Concepts and Definitions, Revision 1.[8/] In 1998 the United Nations issued a further revision of this publication;[8/] countries have been requested to commence introduction of the new concepts and definitions with data for 1999. The main elements of the concepts and definitions (Revision 1) are:

1. Territory. The statistics reported by a country generally refer to the customs area of the country. In most cases this coincides with the geographical area of the country. Unless otherwise stated, the combination of two territories, formerly separate, results in the elimination from the statistics of their trade with each other. The separation of two territories, formerly together, results in the appearance of their trade with each other in the statistics for each territory.

2. System of trade. Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded:

(a) Special trade: special imports are the combined total of imports declared directly from abroad for home use or inward processing and withdrawals from bonded warehouses or free zones for home use. Special exports comprise exports of goods of national origin, namely, goods wholly or partly produced or manufactured in the country, including goods exported after inward processing, and re-exports of imported goods that have been in free circulation.

(b) General trade: general imports are the combined total of imports declared directly from abroad for home use or inward processing, and imports into bonded warehouses or free zones. General exports comprise exports of goods of national origin, including goods exported after inward processing, re-exports of imported goods that have been in free circulation and re-exports of goods from bonded warehouses or free zones.

Direct transit trade, i.e., goods merely being trans-shipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.

Each of the tables indicates in its heading the system of trade to which the figures relate.

3. Valuation. At its fifteenth session, in 1953, the Economic and Social Council, taking the view that trade statistics must reflect economic realities, recommended that the Governments of Member States of the United Nations, wherever possible, use transaction values in the compilation of their national statistics of external trade or, when national practices are based on other values, endeavour to provide supplementary statistical data based on transaction values (Economic and Social Council resolution 469 B (XV)). In the case of imports, the transaction value is the value at which the goods were purchased by the importer plus the cost of transportation and insurance to the frontier of the importing country (a c.i.f. valuation). In the case of exports, the transaction value is the value at which the goods were sold by the exporter, including the cost of transportation and insurance, to

bring the goods onto the transporting vehicle at the frontier of the exporting country (a f.o.b. valuation).

4. Currency conversion. For data in this publication, conversion of values from national currencies into United States dollars is done by means of currency conversion factors based on official exchange rates. Values in currencies subject to fluctuation (such currencies increased in number beginning December 1971) are converted into United States dollars using weighted average exchange rates specially calculated for this purpose. The weighted average exchange rate for a given currency for a given year is the component monthly factors, mostly furnished by the International Monetary Fund, weighted by the value of the relevant trade in each month; a monthly factor is the exchange rate (or the simple average rate) in effect during that month. These factors are applicable to total imports and exports respectively, but not necessarily to trade in individual commodities or with individual countries.

5. Merchandise. In order that external trade statistics shall be suited to the measurement of the influence of national economies upon one another, merchandise trade is defined to include, as far as possible, all goods which add to or subtract from the material resources of a country as a result of their movements into or out of the country. Unless, therefore, statements to the contrary are made in footnotes to the country tables, the treatment of the classes of goods listed below is as indicated:

(a) Gold. Gold traded internationally is usually defined as encompassing the three following types:

i) Gold coins (issued and unissued) and bullion, including banking and monetary gold;
ii) Unrefined gold, including gold ores and concentrates;
iii) Partly-worked gold in which the value of the gold is 80 per cent or more of the total value, including scrap, jewellers' sweepings, dust, primary shapes (such as rods, wire and gold leaf) and gold alloys (crude or in primary shapes).

Of the types of gold listed above, those belonging to the category of monetary gold are excluded from merchandise trade, and those classified as non-monetary gold are included, except as indicated below. Any gold shipment received by the central monetary authority of a country is treated as monetary gold. All other gold shipments (whether to commercial banks or to individuals), on the other hand, are considered non-monetary.

(b) Silver ore, concentrates, bullion, unissued coin (as noted below), scrap and partly-worked and manufactured silver are all included in merchandise trade statistics.

(c) Currency and titles of ownership which have been issued into circulation, e.g., issued silver and base metal coins, bank notes, other paper currency and securities, are excluded from merchandise trade statistics. Unissued currency and titles of ownership are included at their intrinsic value as stamped metal or printed paper rather than at face value.

(d) Trade on government account is included as merchandise trade. Movements under government foreign aid programmes (civil and military), war reparations and restitutions and military goods[9/] moving internationally are therefore included. When goods are destined for use of national agencies (including embassies and military forces) stationed abroad they are, however, not considered to have moved in external trade and are excluded.

(e) Temporary imports and exports. Goods for exhibitions or study, animals admitted to a country temporarily, merely for racing or breeding, returnable containers, etc., the movements of all of which are expected to be reversed within a limited time, are excluded.

(f) Improvement and repair trade. Countries sending goods abroad for improvement or repair and later returned are said to be engaging in the passive improvement and repair trade; countries receiving goods from other countries for improvement or repair and eventual return engage in the active improvement and repair trade. Inward and outward movement in this trade are generally excluded from imports and exports.

(g) Postal trade is included in merchandise trade.

(h) Trade in fish, etc. Fish and salvage sold abroad or to foreign vessels off national vessels, and fish and salvage landed from foreign vessels in national ports are excluded from merchandise trade statistics.

(i) Trade in ships and aircraft. Ships and aircraft bought and sold should be included.

(j) Bunkers and stores for ships and aircraft. In general, bunkers and stores should be included in aggregate merchandise exports.

6. Partner country. The following terms describe methods that may be used by reporting countries in determining, for each shipment of goods, the partner country under whose name it should be recorded: (a) for imports: country of origin or production, country of consignment, country of purchase or country of provenance; (b) for exports: country of consumption or consignment, or country of sale.

7. Trade analyzed by commodity. Analysis is according to the Standard International Trade Classification.

THE STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) AND THE HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM (HS)

22. In July 1950, the United Nations Economic and Social Council, on the advice of its Statistical Commission, recommended that Governments compile trade by commodity

statistics according to the original SITC[5/] in order to have available data in internationally comparable categories suitable for the economic analysis of trade. The original SITC had been prepared by the United Nations Secretariat with the assistance of expert consultants and in co-operation with Member Governments and interested international organizations.

23. In May 1960, the Statistical Commission approved a revision, similarly prepared, of the original SITC, known as the SITC, Revised, designed to take account of the changes in the pattern of trade since 1950 and to simplify the relation between the SITC and internationally agreed customs tariff nomenclatures. The SITC, Revised, is a rearrangement into statistical order of the items of the 1955 Tariff Nomenclature (CCCN) of the Customs Co-operation Council.

24. The SITC, Revised, is based on 625 subgroups (identified by code numbers of four digits), most of which correspond to items of the original SITC. A number of subgroups are further subdivided either to distinguish commodities of statistical importance or to permit exact correspondence with the CCCN; this results in a basic (5-digit code) level for the SITC, Revised, consisting of 1,312 items. The subgroups are combined, progressively, into 177 groups, 56 divisions and 10 sections.

25. The headings of the SITC, Revised, are fully determined by their code numbers. The precise composition of each number is defined in the SITC, Revised, itself. In comparing data according to the SITC, Revised, with data according to a national commodity classification it must be remembered that the same brief description may refer to aggregates differing somewhat in composition.

26. Although the SITC, Revised, of 1960 represented a great improvement on the original SITC, basically the same reasons which led to the creation of the SITC and its first revision were found, in the late nineteen-sixties, to be once more valid. Since 1960 the volume of trade had increased rapidly and its geographic and commodity patterns had changed fundamentally. Consequently, a second revision of the SITC was undertaken. In October 1974 the Statistical Commission approved of this revision, known as SITC, Revision 2[5/], and in May 1975 the Economic and Social Council recommended that Member States of the United Nations should report data on external trade according to the SITC, Revision 2, as far and as soon as possible. Starting with data for 1976, some countries began reporting trade statistics based on the SITC, Revision 2.

27. The basic headings of the SITC, Revision 2 had a one-to-one correspondence with the subdivisions of the Customs Co-operation Council Nomenclature (CCCN). However, there were a number of users who found the subdivisions of CCCN (and thus SITC, Revision 2) insufficient for their needs[10/]. There was also an expressed need for the harmonization of economic classifications[11/]. Partly to satisfy these needs, the Customs Co-operation Council in May 1973 undertook responsibility for the development and completion of the Harmonized Commodity Description and Coding System (HS)[12/].

28. At its twenty-first session, in January 1981, the Statistical Commission had taken

note of the fact that a third revision of SITC would have to be made available when both the revised CCCN and HS came into force[13]. Accordingly, later that year, the United Nations Secretariat commenced work on the revision of SITC, Revision 2, based on the principle that every effort should be made to maintain its general character and structure but taking into account the need for its harmonization with the revised CCCN, the International Standard Industrial Classification (ISIC) Revision 3[14] and a Central Product Classification[15] which was developed jointly by the United Nations Statistics Division and the Statistical Office of the European Communities.

29. The final draft was revised and approved by the Statistical Commission at its twenty-third session, in February 1985,[16] and a resolution was adopted by the Economic and Social Council on 28 May 1985 which, inter alia, recommended that Member States should report internationally external trade statistics according to the Standard International Trade Classification, Revision 3 (resolution 1985/7).

30. The Harmonized System was adopted by the Customs Cooperation Council in June 1983, and the International Convention on the Harmonized System (HS Convention) entered into force 1 January 1988 (HS88). As of 29 October 1998 there were 95 Contracting Parties, and another 76 countries or territories which were not contracting parties but were using the HS for customs/statistical purposes.

31. The United Nations Statistical Commission, at its twenty-seventh session, held from 22 February to 3 March 1993, recommended that countries "adopt the HS for compilation and dissemination of their international trade statistics"[17].

32. In accordance with the preamble of the HS Convention, which recognized the importance of ensuring that the HS be kept up-to-date in the light of changes in technology or in patterns of international trade, the HS is regularly reviewed and revised. The United Nations Statistical Commission at its twenty-seventh session "recommended that the Customs Cooperation Council take fully into account the statistical implications of any changes proposed for HS and the statistical needs and capacities of developing countries"[18]. Some minor revisions to the HS88, which also resulted in the deletion of one six-digit code, were made in 1992 (HS92). A more comprehensive set of amendments was adopted in 1993 and these amendments entered into force 1 January 1996 (HS96).

33. The Statistical Commission, at its twenty-eighth session, 27 February - 3 March 1995 considered changes that would be required to the SITC, Rev. 3 to bring it into correlation with HS96; the Commission decided that the changes required in SITC, Rev. 3 to make it fully correlated with HS96 were minor in scale. The Commission therefore decided that it would not be necessary to issue a fourth revision of the SITC[19].

INTRODUCTION

1. La quarante sixième édition de l' annuaire statistique du commerce international présente les informations nécessaires à l'étude des échanges de chaque pays, en termes de valeur courante, de volume et de prix ainsi que l'importance des différents pays partenaires et des principaux produits importés et exportés. Cette édition présente des données annuelles pour 168 pays ou zones douanières déclarants. L'annuaire est publié en deux volumes.

VOLUME I

2. Le Volume I fournit des renseignements détaillés sur chaque pays au sujet duquel on trouvera généralement les tableaux suivants:

a) Tableau 1, donnant 10 séries, 5 à l'importation, 5 à l'exportation. Ces cinq séries sont: échanges de marchandises et échanges portant sur l'or (généralement en monnaie nationale mais pour quelques pays, en dollars des Etats-Unis), facteurs pour convertir les monnaies nationales en dollars des Etats-Unis, indices du quantum et de la valeur unitaire pour les importations et exportations totales.

b) Tableau 2, présentant jusqu'aux sept années les plus récentes disponible, les pourcentages par rapport au commerce total des importations par grandes catégories économiques et les exportations par branches d'origine. Les pourcentages pour des années moins récentes ont été publiés dans les éditions précédentes de cet Annuaire. L'analyse pour les importations est basée sur la Classification par grandes catégories économiques;[1/] pour les exportations sur la Classification des marchandises par origine industrielle[2/]. Toute reclassification du commerce extérieur par grandes catégories économiques ou par origine industrielle nécessite le détail au niveau des 5 chiffres de la CTCI, révisée. (Se référer aux pages xxxv à xxxvii pour l'histoire et le fond de la CTCI). Lorsque les statistiques n'étaient pas disponibles à ce niveau on a utilisé les données au niveau des trois chiffres de la CTCI, révisée. En comparant des statistiques du commerce extérieur avec des statistiques de production on se heurte à certaines incohérences qui s'ajoutent aux problèmes de classification. Les exportations de marchandises qui de toute évidence n'ont pas été produites dans les pays exportateurs (exportation de thé et de cacao des Pays-Bas ou du Royaume-Uni) ont été classées dans la branche où elles auraient été classées dans le pays d'origine; dans le cas du thé et du cacao: l'agriculture. La branche dans le pays déclarant est en fait dans ce cas le commerce de gros. Pour obtenir la Classification des marchandises par origine industrielle, les postes de la CTCI, révisée sont regroupés afin de correspondre approximativement aux groupes de la Classification international type, par industrie, de toutes les branches d'activité économique (révisée) (CITI, Révision 1)[3/]. Dans toute la mesure du possible les exportations nationales ou spéciales ont été utilisées.

c) Tableau 3, présentant jusqu'aux cinq années les plus récentes la valeur en dollars des Etats-Unis des importations et des exportations selon les principaux pays ou

zones et régions d'origine et de destination. La distribution géographique est faite selon le Standard Country or Area Codes for Statistical Use[4/] des Nations Unies. Parfois, étant donné la nature des codes géographiques nationaux, la conversion des données selon le code des Nations Unies n'a pu être effectuée que moyennant quelques imprécisions. Dans ces tableaux figurent les 40 pays partenaires les plus importants classés par ordre d'importance selon la somme des valeurs sur les années comprises dans le tableau. Une classification est effectuée séparément pour les importations et les exportations. La ventilation en pourcentage est également indiquée pour les zones d'origine et de destination et pour les 10 premiers pays partenaires pour les dix plus récentes années. Les totaux pour l'union européenne (UE) sont calculés pour toutes les années sur la base des pays membres actuels. Les totaux pour la partie asiatique de l'ancienne URSS (Arménie, Azerbaïdjan, Géorgie, Kazakhstan, Kirghizistan, Tajikistan, Turkménistan, and Ouzbékistan) et pour la partie européenne de l'ancienne URSS (Bélarus, Estonie, Lettonie, Lituanie, République de Moldova, Fédération de Russie and Ukraine) sont calculés sur la base des pays indiqués à partir de l'année 1992. Pour les années avant 1992 cette division n'était pas possible et par consequence les totaux pour la partie européenne de l'ancienne URSS incluent la totalité de l'ancienne URSS pour ces années. L'Europe de l'Est comprend l'Albanie, la Bulgarie, la République tchéque, l'Hongrie, la Pologne, la Roumanie et la Slovaquie. Les totaux régionaux sont calculés seulement si la ventilation des partenaires disponibles dépasse 80% du total rapporté pour les importations et également pour les exportations.

d) Tableaux 4 et 5, présentant les quantités et les valeurs en dollars des Etats-Unis des importations et des exportations par marchandises jusqu'aux quatre plus récentes années. Les chiffres sont publiés pour une marchandise donnée si sa valeur pour une année donnée est égale ou supérieure à 0,3 pour cent de la valeur totale pour ladite année. Les marchandises sont présentées selon les titres de la CTCI (en abrégé); lorsque les descriptions sont précédées d'un astérisque (*) cela indique que les chiffres donnés sont égaux à ceux du niveau de la CTCI immédiatement supérieur qui dans ce cas n'est pas publié.

3. Parfois les données en dollars des tableaux décrits en (c) et (d) ci-dessus peuvent ne pas correspondre à celles en dollars des Etats Unis du tableau décrit en (a) ou à celles en monnaies nationales de ce tableau après l'application des facteurs de conversion. Les différences sont dues pour la plupart à des révisions au niveau du total du commerce qui parfois ne sont pas disponibles à un plus grand niveau de détail par produit et partenaire et qui n'ont donc pas été apportées aux tableaux décrits en (c) et (d).

4. Pour tous les pays, les données présentées aux tableaux 4 et 5 sont fondées sur la Classification type du commerce international (CTCI)[5/], Révision 2. De nombreux pays déclarent leurs données fondées sur la CTCI, Révision 3 ou le Système harmonisé de désignation et de codification des marchandises (SH). Les données ainsi déclarées ont été converties en CTCI, Révision 2. C'est une conversion difficile qui, pour certains codes de la CTCI, Révision 2 produit des données qui ne sont pas comparables avec celles déclarées en termes de CTCI, Révision 2, de façon très substantielle. Dans quelques cas, les données etaient déclarées à partir des nomenclatures nationales rélatives à la CTCI, Révisée; dans ces

cas la conversion en CTCI, Révision 2, est inexacte et certains codes de la CTCI ne couvrent pas exactement les échanges qui devraient leur être imputables. (Les Bahamas 1988 et 1991; Bahreïn 1989 jusqu'a 1993; Belize 1988 jusqu'à 1990; les Bermudes 1988 jusqu'à 1993; Malte 1988 et 1989; Myanmar 1991; les Antilles néerlandaises de 1988 à 1992 et 1995; Soudan 1992 jusqu'à 1994; République-Unie de Tanzanie 1987; et Tonga 1987 jusqu'à 1995).

5. Lorsqu'elles sont disponibles, des données plus détaillées par produit et pays partenaire du commerce extérieur, en SH96, en SH88, en CTCI, Révision 3, en CTCI, Révision 2, ou en CTCI, Révisée sont publiées dans Commodity Trade Statistics[6/] sous forme de microfiches.

6. Des descriptions détaillées des concepts et définitions actuels appliqués par les pays sont disponibles dans le document miméographié des Nations Unies "Pratiques nationales en matière de statistiques du commerce international des marchandises (ST/ESA/STAT/112), publié en février 1996 et disponible auprès de la Division de statistique des Nations Unies.

VOLUME II

7. Le volume II contient des tableaux présentant le commerce total de certains produits de base, analysé par régions et pays. Les régions aux noms identiques ont la même composition que celles du Volume I.

8. Tableaux par produits. Ces tableaux comprennent les importations et les exportations au niveau du groupe à 3 chiffres de la CTCI, Révision 2. Tous les groupes sont y compris à l'exception de 286, Minerais et concentrés d'uranium et de thorium; les exportations de 333, Huiles brutes de pétrole ou de minéraux bitumineux; 351, Energie électrique; 675, Feuillards en fer ou en acier; 688, Uranium et thorium et leurs alliages; 911, Colis postaux, non classés par catégorie; 961, Monnaies (autres que les pièces d'or) n'ayant pas cours légal et 971, Or, non monétaire (à l'exclusion des minerais et concentrés d'or). Les années couvertes sont les cinq années de 1993 à 1997. Les valeurs sont exprimées en dollars des Etats-Unis et les échanges sont analysés par pays et régions. Dans ces tableaux figurent les 40 pays les plus importants classés selon la somme des valeurs sur les années 1994, 1995 et 1996 inclus dans le tableau. Les quantités ne figurent pas dans ces tableaux.

9. Lors de la préparation de ces tableaux, on a eu recours à des estimations pour les pays dont les données n'étaient pas encore disponibles et ces estimations sont signalées par la lettre 'x'. Dans quelques cas, des estimations ont été faites pour certains pays qui ont été jugées adéquates pour être incluses dans les totaux régionaux et du monde mais non suffisamment élaborées pour être publiées séparément pour ces pays. Elles ont de ce fait été éliminées et remplacées par un 'x' dans les tableaux. Les groupes des produits mentionnés dans paragraphe 8 au-dessus, (286, les exportations de 333, 351, 675, 688, 911, 961 et 971) sont supprimés de la publication parce que ils étaient rapportés insuffisamment et portaient beaucoup d'estimations qui n'étaient pas assez expliquées. A vrai dire, un 'x' devrait signaler que les totaux régionaux et du monde comprennent des estimations.

Cependant, et en général, pratiquement tous les totaux régionaux et du monde comprennent des estimations. La lettre 'x' a été omise pour des raisons d'esthétique.

10. La procédure pour estimer les données du commerce extérieur pour une certaine année et un certain pays attend au départ quelques données declarées ('vraies'). Au moins il faut les totaux pour les importations et les exportations. Parfois des autres informations sur la ventilation des produits sont disponibles et sont utilisées; ça pourrait être des valeurs au niveau de 1-, 2- ou 3- chiffre de la classification des produits, qui sont déclarés par le pays. Ensuite la procédure d'estimation prend les données déclarées disponibles et les estimations initiales, qui comprennent soit (1) les valeurs des produits au niveau 3-chiffre qui étaient declarées par le pays pour une année adjointe, soit (2) les totaux des valeurs au niveau 3- chiffre sur la base des données declarées par les partenaires du pays concerné. Ensuite ces estimations initiales sont récalculées dans la façon que sur tous les niveaux de la classification des produits le total des valeurs estimés plus les valeurs déclarés est égale au valeur déclaré au niveau au-dessus et finalement est égale au valeur total pour les importations et les exportations.

11. Le Volume II aussi fournit des tableaux spéciaux où sont indiqués, entre autres, (a) la contribution des échanges de chaque pays par rapport à sa région et par rapport au monde; (b) le flux du commerce entre pays et régions et (c) les fluctuations des prix sur la base desquels les produits bouchaient au niveau international. Les titres des tableaux spéciaux sont:

A. Importations et exportations totales par régions et pays ou zones;
B. Exportations mondiales p ar classes de marchandises et par régions;
C. Croissance des exportations mondiales par catégories de marchandises et par régions;
D. Structure des exportations mondiales par catégories de marchandises et par régions;
E. Importations et exportations totales: indices par pays ou zones;
F. Exportations et importations totales: indices du quantum, de la valeur unitaire et des termes de l'échange par régions;
G. Exportations des produits manufacturés;
H. Importations des produits énergétiques: pays à économies développées;
I. Quelques indicateurs sur les importations des produits énergétiques: pays à économies développées;
J. Indices des prix des exportations des matières premières et des métaux non-ferreux.

Tableaux spéciaux.

12. Les groupes économiques et géographiques dans tous les tableaux spéciaux sont conformes aux groupes de pays ou zones sont présentés dans le Tableau Spécial A de ce numéro, bien que le Tableau Spécial A comprend quelquefois plus de détails en ce qui concerne les sous-groupes géographiques. (Voir le Tableau Spécial A pour les détails).

(A) Importations et exportations totales par régions et pays ou zones. Les totaux régionaux, économiques et mondiaux, ont été ajustés: a) pour y inclure des estimations pour les données non disponibles; b) pour transformer le cas échéant les importations f.o.b. en importations c.a.f.; c) pour y inclure les pays ou zones pour lesquels il n'existe pas de liste séparée; d) pour ramener les données au commerce spécial; e) pour ramener les données à l'année civile; et f) autant que possible, éliminer les incompatibilités dues à des modifications géographiques pour obtenir des séries comparables par exemple, la union européenne et l'Association européenne de libre-échange. Les données pour chaque pays correspondent aux données en monnaie nationale sont présentés dans le tableau 1 des tableaux par pays. Voir la fin du tableau pour les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

(B) Exportations mondiales par classes de marchandises et par régions. Voir la fin du tableau pour la remarque générale et les notes.

(C) Croissance des exportations mondiales par catégories de marchandises et par régions. Les taux annuels de croissance ont tous été calculés à l'aide de la formule des intérêts composés:

$$r = \left(\sqrt[t]{\frac{Vn}{Vo}} - 1 \right) 100$$

r = Le taux annuel de croissance en pourcentage.
Vn = La valeur des exportations durant la dernière année de la période.
Vo = La valeur des exportations durant la première année de la période.
t = Le nombre d'années.

Voir la fin du Tableau Spécial D pour la remarque générale et les notes.

(D) Structure des exportations mondiales par catégories de marchandises et par régions. Les chiffres publiés sous le titre 'Origine des exportations' se réfèrent aux exportations de la région ou du pays indiqués dans la colonne zone. Il en est de même pour les 'Destinations des exportations'. Voir la fin du tableau pour la remarque générale et les notes.

(E) Importations et exportations totales: indices par pays ou zones. Sauf indication contraire, les indices de la valeur unitaire sont exprimés en monnaie nationale. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

(F) Exportations et importations totales: indices du quantum, de la valeur unitaire et des termes de l'échange par régions. Voir la fin du tableau pour les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(G) Exportations des produits manufacturés. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(H) Importations des produits énergétiques: pays à économies développées. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(I) Quelques indicateurs sur les importations des produits énergétiques: pays à économies développées. Ce tableau indique la part des importations de combustibles dans la valeur totale des importations et des exportations ainsi que le rapport de l'indice de la valeur unitaire des produits manufacturés qu'ils exportent et de l'indice de la valeur unitaire des combustibles qu'ils importent. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données trimestrielles.

(J) Indices des prix des exportations des matières et des métaux non-ferreux: économies de marché. Voir la fin du tableau pour la remarque générale et les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

SOURCE ET PRESENTATION

13. Les données pour les Volumes I et II sont obtenues à partir de publications nationales, d'états soumis par les gouvernements pour cet ouvrage, et d'autres publications des Nations Unies telles que: Bulletin Mensuel de Statistique, et Annuaire Statistique. Des estimations pour quelques données faisant défaut sont préparées par la Division de Statistique des Nations Unies.

14. Les noms de pays et régions utilisés par divers pays pour leurs statistiques du commerce extérieur ne sont pas uniformes. Aussi, lorsque d'anciennes entités géographiques généralement indiquées dans les statistiques nationales ont changé, les pays peuvent avoir introduit les changements correspondants dans leurs statistiques à différentes époques. Dans la mesure du possible toutefois, les pays ou zones ont été désignés par leur nom actuel. Pour satisfaire les demandes des certains utilisateurs d'avoir des données d'un serie des années consécutives la possibilité de reconstruire des anciennes entités géographiques ou politiques était gardée pour, par exemple, les données relatives à l'ancienne URSS.

15. Sauf indication contraire, les groupements de pays sont conformes à ceux du Standard Country or Area Code for Statistical Use[4/] des Nations Unies.

16. En général, les données se réfèrent aux années selon le calendrier; cependant, pour les pays, qui déclarent leurs données selon l'année fiscale, les données sont présentées dans l'année qui couvre la plupart de l'année en référence.

INDICES NATIONAUX

17. Les indices nationaux, exprimés en monnaies nationales, ou en dollars des Etat Unis sont présentés dans le tableau 1. Ils indiquent les modifications dans le quantum et dans les prix (valeur unitaire) des agrégats des importations et des exportations. Chaque indice représente une modification entre la période à laquelle l'indice se réfère, la période courante, et une période fixe, la base de publication pour laquelle l'indice est représenté par 100. Pour faciliter les comparaisons, chaque fois qu'il était possible de le faire, les indices ont été ramenés à la base de publication 1990. Lorsque des modifications sont faites dans la couverture, la formule ou la période de base d'un indice, si cela est techniquement possible les deux séries s'enchaînent.

18. Les indices mensuels et trimestriels sont publiés dans le Bulletin Mensuel de Statistique des Nations Unies. On trouvera également dans le Supplément de 1977 à l'Annuaire Statistique et au Bulletin Mensuel de Statistique[7/] des notes plus détaillées sur les méthodes de calcul des indices nationaux.

PAYS EN TRANSITION

19. Pour la période couverte par l'Annuaire les pays classifiés antérieurement pour des raisons statistiques à économies planifiées centralement avaient un système de taux de change officiel entre leurs monnaies et celles des pays extérieurs consistant avec le taux de 0,90 nouveau roubles pour 1 dollar des Etats-Unis avant le 24 décembre 1971 et 0,829 jusqu'à février 1973; depuis cette date le taux a fluctué. Les pays d'Europe orientale utilisaient généralement ces taux lorsqu'il était nécessaire de convertir des devises en monnaie nationale pour préparer les statistiques du commerce extérieur. Les données qui en résultent permettent davantage une comparaison avec les transactions des autres pays qu'une comparaison avec les transactions monétaires intérieures.

20. Les statistiques du commerce extérieur de ces pays ont des définitions différentes de celles qui peuvent exister dans les autres pays. Les différentes définitions peuvent être la source des divergences observées pour le même flux de marchandise enregistré par deux pays partenaires ayant un système économique différent. Les échanges entre ces pays peuvent être conduits sur une base différente de celle qui régit les échanges entre autres pays. Le concept de la valeur de transaction, par exemple, est basé sur l'existence d'un prix de marché entre l'importateur et l'exportateur sur lequel les variations de l'offre et de la demande ont plus d'influence qu'ils ne peuvent en avoir dans les échanges de ces pays. Faute de données précises sur les valeurs unitaires des produits de base échangés entre ces pays,

il est difficile de connaître les effets possibles de ces différences sur les statistiques du commerce extérieur. De plus en plus, depuis 1992, les pays en transition ont adopté les concepts et définitions pour la statistique du commerce international comparables à celles qui sont en vigueur dans les autres pays.

NOTE GENERALE[8/]

21. Les statistiques dans cet Annuaire ont été compilées par les autorités nationales des statistiques principalement conforme aux recommandations des Nations Unies publiées dans les Statistiques du Commerce international concepts et définitions, révision 1.[8/] En 1998 les Nations Unies ont fait paraître une révision de suite de cette publication; les pays étaient demandées d'introduire ces nouveaux concepts et définitions à partir des données pour l'année 1999. Les éléments principaux de ces concepts et définitions (Révision 1) sont:

1. Territoire. Les statistiques rapportées par un pays s'appliquent en général au territoire douanier de cet état. Généralement territoire douanier et territoire géographique coïncident, le cas contraire étant indiqué dans les notes par pays. Les modifications dans le territoire douanier sont également indiquées dans les notes par pays. Sauf information contraire, l'unification de deux territoires séparés auparavant donne lieu à l'élimination des échanges entre ces deux territoires. Dans le cas d'une séparation d'un territoire en deux, les échanges entre ces deux territoires viennent à apparaître.

2. Système du commerce. Deux systèmes sont généralement utilisés ne différant que par la façon dont le commerce d'entrepôt et les réexportations sont enregistrés.

a) Commerce spécial. Les importations spéciales comprennent les marchandises entrées directement pour la consommation (y compris les transformations et réparations) et les marchandises sorties des entrepôts douaniers ou des zones franches pour être mises à la consommation. Les exportations spéciales comprennent les exportations de produits nationaux, c'est-à-dire les marchandises entièrement ou partiellement produites ou fabriquées dans le pays, ainsi que les exportations nationalisées (ces dernières sont des biens qui ayant été inclus dans les importations spéciales sont réexportés en l'état.)

b) Commerce général. Les importations générales comprennent les importations pour la consommation et les importations en entrepôt douanier ou en zone franche. Les exportations générales comprennent les exportations de produits nationaux et les réexportations. Ces dernières, dans le système du commerce général, comprennent les exportations nationalisées et les marchandises exportées des entrepôts douaniers et des zones franches sans avoir été transformées depuis leur importation.

Le transit direct, c'est-à-dire les marchandises uniquement transbordées ou traversant le pays pour des raisons de transport, est exclu du commerce général aussi bien que du commerce spécial.

Les titres de chaque tableau indiquent le système du commerce auquel se réfèrent les données.

3. Evaluation. Lors de sa quinzième session en 1953, le Conseil Economique et Social, tenant compte du fait que les statistiques du commerce extérieur doivent refléter la réalité économique, a recommandé que les gouvernements des pays membres des Nations Unies utilisent, dans la mesure du possible, les valeurs de transaction en préparant leurs statistiques du commerce international ou qu'ils fournissent des informations supplémentaires basées sur les valeurs de transaction quand les politiques nationales font état d'autres valeurs (Résolution 469 B (XV) du Conseil Economique et Social). La valeur de transaction à l'importation est la valeur à laquelle les marchandises ont été achetées par l'importateur plus le coût de l'assurance et du fret jusqu'à la frontière des pays importateurs (valeur c.a.f.). A l'exportation, la valeur de transaction représente la valeur à laquelle les marchandises ont été vendues par l'exportateur y compris le coût de l'assurance du transport pour amener les marchandises à la frontière des pays exportateurs (valeur f.o.b.).

4. Conversion des monnaies. Pour les données dans cet Annuaire la conversion des valeurs nationales en dollars des Etats-Unis est effectuée au moyen de taux de conversion basés sur les taux de change officiels. Pour les monnaies sujettes à de larges marges de fluctuations par rapport au dollar, dont le nombre s'est accru considérablement depuis 1971, on utilise des moyennes pondérées des taux de change calculées spécialement dans ce but. La moyenne pondérée est le résultat des taux de change mensuels, généralement fournis par le Fonds Monétaire International, pondérés par les valeurs des importations et des exportations correspondantes. Les facteurs de conversion s'appliquent aux totaux des échanges mais pas nécessairement aux importations ou à l'exportation d'une marchandise donnée.

5. Marchandises. Dans la définition du commerce extérieur on entend par marchandises tous les biens dont l'importation ou l'exportation contribue à l'accroissement ou à la diminution du stock des ressources matérielles dans un pays. Sauf information contraire dans les notes par pays, le traitement des catégories de marchandises suit les règles énoncées ci-dessous:

a) Or. L'or dans le commerce international se présente sous trois formes:

i) Pièces d'or et lingots y compris l'or monétaire;
ii) Or non raffiné y compris les minerais et les concentrés;
iii) Or semi-ouvré dont la valeur de l'or représente au moins 80% de la valeur totale, y compris la limaille et les poussières et les formes primaires telles que feuilles et barres et les alliages d'or.

De ces différents types d'or, l'or monétaire est exclu du commerce des marchandises tandis que les autres types sont inclus, à l'exception de ceux indiqués ci-dessous. Tout transfert d'or entre les autorités monétaires doit être traité comme échange d'or monétaire, les autres échanges portant sur l'or sont classés comme or non-monétaire.

b) Minerai d'argent. Concentrés, lingots, pièces non émises, limailles et argent ouvré ou semi-ouvré sont tous inclus dans les échanges de marchandises.

c) Monnaie et titres de propriété. Pièces de monnaie d'argent et de métal, billets de banque et titres en circulation sont exclus du commerce. Les pièces, billets et titres non en circulation sont inclus à la valeur intrinsèque du papier ou du métal frappé.

d) Le commerce pour le compte de l'Etat. Il est inclus dans le commerce des marchandises. Les échanges au titre des programmes d'aide civile et militaire, les réparations de guerre et les équipements militaires[9/] sont donc inclus. Quand les marchandises sont destinées à des institutions nationales (ambassades ou forces armées) stationnées à l'étranger, elles ne sont pas comprises dans les statistiques.

e) Importations et exportations temporaires. Les effets des touristes et des voyageurs (y compris les véhicules) qui n'ont pas été acquis à l'étranger, les objets pour expositions ou études, les animaux pour la course ou la reproduction, les échantillons et les emballages en retour qui sont considérés comme devant être retournés dans un intervalle de temps assez court sont exclus.

f) Trafic de perfectionnement et de réparation. Les pays qui envoient à l'étranger temporairement des marchandises pour réparation ou complément d'ouvraison effectuent un trafic passif de réparation. Les pays recevant des marchandises dans les mêmes conditions effectuent un trafic actif de réparation. Les mouvements d'entrée et de sortie sont généralement exclus des importations et des exportations.

g) Commerce par poste. Il est inclus dans le commerce des marchandises.

h) Poisson. Le poisson et les épaves débarqués dans des ports étrangers par des navires nationaux et ceux débarqués dans des ports du pays par des navires étrangers sont exclus des statistiques.

i) Vente et achat de navires et d'aéronefs. La vente et l'achat de navires et d'aéronefs neufs sont inclus. Les navires et les aéronefs d'occasion inscrits sur le registre d'immatriculation du pays ou radiés de ce registre sont exclus du commerce quand ces mouvements sont dûs à un transfert de propriété.

j) Avitaillement des navires et des avions. Ils doivent être généralement inclus dans les exportations de marchandises.

6. Pays Partenaire. Les pays partenaires peuvent être distingués: a) à l'importation, suivant: l'origine ou la production, la consignation ou la provenance ou il'achat; b) à l'exportation, suivant: la consommation, la dernière destination connue ou la vente.

7. Echanges par produits. L'analyse est selon la Classification Type pour le Commerce International.

CLASSIFICATION TYPE POUR LE COMMERCE INTERNATIONAL (CTCI) ET UN SYSTEME HARMONISE DE DESIGNATION ET DE CODIFICATION DES MARCHANDISES (SH)

22. En juillet 1950, le Conseil Economique et Social des Nations Unies, sur avis de la Commission de Statistique, a recommandé aux pays de rassembler leurs statistiques des échanges par produits selon la CTCI originale[5/] afin de disposer au niveau mondial de données comparables pour l'analyse du commerce extérieur. La CTCI originale a été préparée par le Secrétariat des Nations Unies avec l'aide d'experts et en coopération avec les gouvernements et les organisations internationales concernées.

23. En mai 1960 la Commission de Statistique a approuvé une révision de la CTCI appelée la CTCI, révisée, qui tenait compte des modifications dans les courants commerciaux intervenus depuis 1950 et qui permettait un passage plus facile entre la CTCI et les nomenclatures internationales. La CTCI, révisée présentait selon une classification statistique les positions de la nomenclature tarifaire NCCD du Conseil de Coopération Douanière.

24. La CTCI, révisée comprend 625 sous-groupes (identifiés par un code à quatre chiffres) qui correspondent pour l'essentiel aux postes de la CTCI originale. Un certain nombre de sous-groupes ont été subdivisés soit pour obtenir des détails supplémentaires soit pour assurer une concordance exacte avec la NCCD. La CTCI, révisée comporte donc 1312 rubriques de base (niveau des 5 chiffres de la CTCI). Les sous-groupes sont rassemblés en 177 groupes, 56 divisions et 10 sections.

25. Les positions de la CTCI sont individualisées par leur numéro de code. Le contenu précis de chaque code est défini dans la CTCI, révisée. Si l'on compare les données selon la CTCI, révisée avec des données classées selon une nomenclature nationale, il faut tenir compte de ce que la même description, généralement abrégée, peut s'appliquer à des groupes de marchandises légèrement différents.

26. La révision de 1960 représentait par rapport à la CTCI initiale une amélioration considérable. Néanmoins vers la fin des années 1960 on a constaté que, pour l'essentiel, les raisons qui avaient conduit à l'établissement de la CTCI puis à sa première révision, se retrouvaient à nouveau valables. Depuis 1960 le volume des échanges commerciaux s'est accru rapidement tandis que leur répartition géographique et leur composition par produits se modifiaient radicalement. Une nouvelle révision de la CTCI fut donc entreprise. En octobre 1974, la Commission Statistique a approuvé cette révision, la désignation de la nouvelle révision est CTCI, Révision 2[5/]. En mai 1975 le Conseil Economique et Social a recommandé aux Etats membres des Nations Unies de communiquer les données sur les statistiques du commerce extérieur en se conformant autant que possible et le plus tôt possible à la CTCI, Révision 2. A partir des données pour 1976, certains pays ont commencé à communiquer leurs données selon la CTCI, Révision 2.

27. Il y avait entre les titres de base de la Classification type pour le commerce international, Révision 2 et les subdivisions de la Nomenclature du Conseil de Coopération

Douanière une correspondance biunivoque. Toutefois, un certain nombre d'utilisateurs ont estimé que les subdivisions des positions de la NCCD (et par conséquent celles de la CTCI, Révision 2) ne suffisaient pas à leurs besoins[10/]. La nécessité d'une harmonisation des classifications économiques a également été signalée[11/]. En partie pour répondre à ces besoins, le Conseil de coopération douanière a assumé en mai 1973 la responsabilité d'élaborer et de mettre au point un système harmonisé de désignation et de codification des marchandises (SH)[12/].

28. A sa vingt et unième session, en janvier 1981, la Commission de statistique a pris note du fait qu'une troisième révision de la CTCI devait être disponible lorsque la NCCD révisée et le SH entreraient tous deux en vigueur[13/]. En conséquence, dans le courant de la même année, le Secrétariat de l'ONU a commencé à travailler à la révision de la CTCI, Révision 2 en partant du principe que le maximum devait être fait pour en conserver le caractère général et la structure, tout en tenant compte de la nécessité de son harmonisation avec la NCCD révisée, avec la Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI), Révision 3[14/] et avec une Classification des produits centrale (CPC)[15/] dont l'élaboration était menée conjointement par la Division de statistique des Nations Unies et l'Office statistique des Communautés européennes.

29. Le projet final a été révisé et approuvé par la Commission de statistique à sa vingt-troisième session, en février 1985[16/], et une résolution a été adoptée par le Conseil économique et social le 28 mai 1985 (résolution 1985/7) qui, inter-alia, a recommandé aux Etats Membres de communiquer des données sur les statistiques du commerce extérieur aux institutions internationales en se conformant autant que possible et le plus rapidement possible à la Classification type pour le commerce international (troisième version révisée).

30. Le système harmonisé de désignation et de codification des marchandises (appelé système harmonisé) (SH) a été adopté par le Conseil de coopération douanière en juin 1983, tandis que la Convention internationale sur le système harmonisé de désignation et de codification des marchandises (Convention SH) est entré en vigueur le ler janvier 1988 (SH88). Au ler 18 avril 1997, les parties contractantes étaient au nombre de 88 et 64 autres pays ou territoires ne figuraient pas parmi les parties contractantes, mais utilisaient le système harmonisé à des fins douanières/statistiques.

31. Lors de la vingt-septième session, qui s'est tenue à New York du 22 février au 3 mars 1993, la Commission de statistique des Nations Unies a recommandé "que les pays adoptent le SH pour l'établissement et la diffusion de leurs statistiques du commerce international"[17/].

32. Conformément au préambule à la Convention SH, qui reconnaissait l'importance d'une actualisation effective du système harmonisé compte tenu de l'évolution de la technologie ou des courants commerciaux internationaux, le système harmonisé est régulièrement passé en revue et corrigé. Lors de sa vingt-septième session, la Commission de statistique des Nations Unies a "recommendé que le Conseil de coopération douanière tienne pleinement compte des effets que les modifications proposées pourraient avoir sur

le plan statistique et de prendre dûment en considération les besoins et les capacités des pays en développement"[18]. Quelques corrections mineures du système harmonisé de 1988, résultant par ailleurs de la suppression d'un code à 6 chiffres, ont été introduites en 1992 (SH92). Une série plus complète de modifications a été adoptée en 1993 et celles-ci sont entrées en vigueur le ler janvier 1996 (SH96).

33. A sa vingt-huitième session (27 février - 3 mars 1995), la Commission de statistique a examiné les changements qu'il faudrait apporter à la troisième version révisée de la CTCI pour l'adapter au SH96. La Commission a décidé que les changements à apporter à la troisième version révisée de la CTCI pour préserver une parfaite correspondance avec le système harmonisé étaient simplement des modifications mineures. La Commission a donc décidé qu'il serait inutile de publier une quatrième version révisée de la CTCI[19].

1/ Classification par grandes catégories économiques, (selon les définitions de la CTCI, révisée), Etudes statistiques, Série M N° 53, (publication des Nations Unies, numéro de vente 71.XVII.12).

2/ Classification des marchandises par origine industrielle (Relation entre la Classification type pour le commerce international et la Classification internationale type, par industrie, de toutes les branches d'activité économique), Etudes statistiques, Série M N° 43, (publication des Nations Unies, numéro de vente 66.XVII.7).

3/ Classification internationale type, par industrie, de toutes les branches d'activité économique (révisée), Etudes statistiques, Série M N° 4, Rev. 1. (publication des Nations Unies, numéro de vente 58.XVII.7).

Total Imports and Exports by Regions and Countries and Areas

Importations et Exportations Totales par Regions et Pays ou Zones

Imports C.I.F. - Exports F.O.B. - Balance / Importations C.I.F. - Exportations F.O.B. - Balance

(continued / suite)

General Note: System: G=General Trade; S=Special Trade.
World imports and exports are the sum of imports and exports of Developed economies, Developing economies and Other. The regional totals for exports and imports have been adjusted to exclude the re-exports of countries or areas comprising each region. Estimates for certain countries or areas not shown separately as well as for those shown separately but for which no data are yet available are included in the regional and world totals. Regional totals containing estimated data are printed in bold italics.
Export and import values in terms of U.S. dollars are derived by the United Nations Statistics Division (UNSD) from data published in national publications, or from data on the Monthly Bulletin of Statistics Questionnaires for the following countries: American Samoa, Angola, Armenia, Azerbaijan, Belarus, Brunei Darussalam, Bulgaria, Cayman Is., Cook Is., Cuba, Faeroe Is., French Guiana, French Polynesia, Georgia, Greenland, Guadeloupe, Iran, Iraq, Kazakstan, Kiribati, Kyrgyzstan, Lebanon, Macau, Martinique, Montserrat, New Caledonia, Rep. of Moldova, Réunion, Saint Kitts-Nevis, Saint Pierre Miquelon, Tajikistan, TFYR Macedonia, Turkmenistan, Uzbekistan, Viet Nam and Yugoslavia.
Export and import dollar values for all other countries are derived from data published by the International Monetary Fund (IMF) in the International Financial Statistics publication.

[1] United States, Canada, Developed Economies of Europe, Israel, Japan, Australia, New Zealand and South African Customs Union.

[2] This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

[3] Prior to January 1992 includes Eastern Europe and the former USSR. Beginning January 1992, includes Eastern Europe and the European countries of the former USSR.

[4] Including the trade of the U.S. Virgin Islands and Puerto Rico but excluding shipments of merchandise between the United States and its other possessions (Guam, American Samoa, etc.). Data include imports and exports of non-monetary gold.

[5] See footnote in french for "evdd".

[6] Latin American Integration Association. Formerly Latin American Free Trade Association.

[7] Beginning January 1997, imports are f.o.b.

[8] Trade data exclude goods from customs-bonded warehouses. Total exports include revaluation and exports of silver.

[9] Central American Common Market.

[10] Beginning 1990, trade statistics exclude certain oil and chemical products.

[11] Export and import values exclude trade in the processing zone.

[12] Beginning January 1996, trade data for France include the import and export values of French Guiana, Guadeloupe, Martinique, and Reunion.

[13] Prior to 1986 includes Aruba.

[14] Prior to January 1991, includes trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic.

[15] Prior to January 1991, excludes trade conducted in accordance with the supplementary protocol to the treaty on the basis of relations between the Federal Republic of Germany and the former German Democratic Republic. The value of this trade amounted to in million U.S. dollars:

Year:	1980	1985	1989	1990
Imports:	3073	2618	3854	5129
Exports:	2911	2721	4351	13379

[16] European Union. Prior to January 1995, excludes Austria, Finland and Sweden. Total EU re-calculated for all periods shown in the table according to the current composition.

[17] Economic Union of Belgium and Luxembourg. Intertrade between the two countries is excluded.

[18] Data prior to January 1991, pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October, 1990. Also see explanatory notes on data pertaining to Germany on page vi.

[19] European Free Trade Association. Prior to January 1995, includes Austria, Finland and Sweden. Total EFTA re-calculated for all periods shown in the table according to the current composition.

[20] Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia. Beginning 1992, data refer to Bosnia and Herzegovina, Croatia, Slovenia, TFYR Macedonia, and the Federal Republic of Yugoslavia.

[21] Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia. Beginning 1992, data refer to the Federal Republic of Yugoslavia.

[22] Prior to 1992 import values are f.o.b.

[23] Imports f.o.b.

[24] Beginning 1985, data are not comparable to those shown for prior periods due to revisions of the koruna to U.S. dollar exchange rate.

[25] See explanatory notes on data pertaining to Germany on page vi.

[26] Beginning 1989, data are not comparable to those shown for prior periods due to revisions of the mark to the U.S. dollar exchange rate.

[27] Prior to July 1989, foreign trade statistics include re-exports. From July 1989, the data exclude re-exports.

[28] Includes trade with the Czech. Republic.

[29] For 1991, data for the former USSR are converted to U.S. dollars using commercial exchange rate of rouble and are not comparable to those shown for prior periods.

[30] Excluding inter-trade among countries of the region, except for Estonia, Latvia and Lithuania.

[31] Prior to 1994 excludes inter-trade among the Commonwealth of Independent States (CIS).

[32] Prior to 1994 foreign trade statistics include re-exports.

[33] Prior to 1994 the source for trade values is the CIS Yearbook.

[34] Exports include gold exports.

[35] The South African Customs Union comprising Botswana, Lesotho, Namibia, South Africa and Swaziland. Trade between the component countries is excluded.

[36] Import figures exclude petroleum imported without stated value. Exports cover domestic exports.

[37] Central Africa Customs and Economic Union. Inter-trade among members of the Union is excluded.

[38] Economic Community of West African States.

[39] Beginning May 1997, Guinea-Bissau has adopted as the national currency the CFA franc following its membership in the West African Monetary Union and the Central Bank of West African States (BCEAO).

Total Imports and Exports by Regions and Countries and Areas

Importations et Exportations Totales par Regions et Pays ou Zones

Imports C.I.F. - Exports F.O.B. - Balance / Importations C.I.F. - Exportations F.O.B. - Balance

(continued / suite)

40 Beginning February 1995, trade data for Nigeria are valued at an average (unitary) exchange rate of 70.36 naira to the U.S. dollar. This exchange rate is the weighted average of the official rate and the market rate.

41 Beginning January 1996 imports are f.o.b.

42 Prior to January 1992, excludes Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Total Developing Asia re-calculated for all periods shown in the table according to the current composition.

43 Imports exclude military goods.

44 Comprises trade of the former Democratic Yemen and former Yemen Arab Republic including any intertrade between them.

45 Data refer to total exports less petroleum exports of Asia Middle East countries where petroleum, in this case, is the sum of SITC groups 333, 334 and 335.

46 Association of South-East Asian Nations.

47 See explanatory notes on data pertaining to Hong Kong SAR on page vi.

48 Prior to 1981, special trade.

49 Year ending 30 September of the years stated.

50 Andean Common Market. Includes Bolivia, Colombia, Ecuador, Peru and Venezuela.

51 Asia-Pacific Economic Co-operation. Includes Australia, Brunei Darussalam, Canada, Chile, China, Hong Kong, Indonesia, Japan, Malaysia, Mexico, New Zealand, Papua New Guinea, Philippines, Republic of Korea, Singapore, Thailand and the United States of America.

Remarque Generale: Systeme: G=Commerce Generale; S=Commerce Special.

Les importations et les exportations totales pour le monde se composent des importations et exportations des Economies développées, des Economies en voie de développement et des Autres. Les totaux régionaux pour importations et exportations ont été ajustés pour exclure les re-exportations des pays ou zones qui comprennent la région. Les totaux régionaux et mondiaux comprennent des estimations pour certains pays ou zones ne figurant pas séparément mais pour lesquels les données ne sont pas encore disponibles. Les totaux régionaux contenant des données estimées sont imprimés en caractères gras et italique.

Les valeurs en dollars des E.U. des exportations et des importations ont été obtenuées par la Division de statistique des Nations Unies (DSNU) à partir des données publiées dans les publications nationales, ou des données publiées dans les questionnaires du Bulletin Mensuel de Statistique pour les pays suivants: Angola, Arménie, Azerbaïdjan, Bélarus, Brunéi Darussalam, Bulgarie, Cuba, Géorgie, Groënland, Guadeloupe, Guyane française, Iles Caïmanes, Iles Cook, Iles Féroé, Iran Rép. islamique, Iraq, Kazakstan, Kirghizistan, Kiribati, L'ex-Ry de Macédoine, Liban, Macao, Martinique, Montserrat, Nouvelle Calédonie, Ouzbékistan, Polynésie française, République de Moldova, Réunion, Saint Kitts-et-Nevis, Saint Pierre-Miquelon, Samoa américaines, Tadjikistan, Turkménistan, Viet Nam, et Yougoslavie.

Les valeurs en dollars des E.U. des exportations et des importations de tous les autres pays ont été obtenuées à partir des données publiées par le Fonds Monétaire International dans la publication "Statistiques Financières Internationales".

1 Etats-Unis, Canada, pays a économie développés d'Europe, Israël, Japon, Australie, Nouvelle Zélande et l'union douanière de l'Afrique du Sud.

2 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

3 Avant janvier 1992, y compris l'Europe de l'Est et l'ancienne URSS. A partir de janvier 1992 y compris de l'Europe l'Est et les pays européennes de l'ancienne URSS.

4 Y compris le commerce des isles Vierges américaines et de Puerto Rico mais non compris les échanges de marchandise, entre les Etats-Unis et leurs autres possessions (Guam, Samoa americaines, etc.). Les données comprennent les importations et exportations d,or non monétaire.

5 En voie de développement.

6 Association Latino-Américaine d'Intégration. Antérieurement Association Latino-Américaine de Libre-Echange.

7 A partir de janvier 1997, les valeurs des importations sont f.o.b.

8 Les statistiques du commerce extérieur ne comprennent pas les marchandises provenant des entrepôts en douane. Les exportations comprennent la réevaluation et les données sur les exportations d'argent.

9 Marché Commun de l'Amérique Central.

10 A partir de l'année 1990, les statistiques commerciales font exclusion de certains produits pétroliers et chimiques.

11 Les valeurs à l'exportation et à l'importation excluent le commerce de la zone de transformation.

12 A partir de janvier 1996 les valeurs de commerce pour la France comprenent les valeurs des importations et des exportations de la Guyane française, la Guadeloupe, la Martinique, et la Réunion.

13 Avant 1986 y compris Aruba.

14 Avant janvier 1991, y compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République Fédérale d'Allemagne et l'ancienne République Démocratique Allemande.

15 Avant janvier 1991, non compris le commerce effectué en accord avec le protocole additionnel au traité définissant la base des relations entre la République Fédérale d'Allemagne et l'ancienne République Démocratique Allemande. La valeur de ce commerce est la suivante, en millions de dollars des E.U.:

Année:	1980	1985	1989	1990
Importations:	3073	2618	3854	5129
Exportations:	2911	2721	4351	13379

16 Union européenne. Avant janvier 1995 non compris Autriche, Finlande, et Suède. Total UE avait été recalculé pour toutes les périodes données au tableau suivant la composition présente.

17 L'Union économique belgo-luxembourgeoise. Non compris le commerce entre ces pays.

18 Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la Rébublique Fédérale d'Allemagne antérieur au 3 october 1990. Aussi voir les notes explicatives sur les données concernant l'Allemagne à la page vi.

19 Association Européenne de Libre-Echange. Avant janvier 1995 y compris Autriche, Finlande, et Suède. Total AELE avait été recalculé pour toutes les périodes données au tableau suivant la composition présente.

20 Avant 1992, les données se rapportent à la République Fédérative Socialiste de Yougoslavie. A partir de janvier 1992, les données se rapportent à Bosnie-Herzegovine, Croatie, République Fédérative de Yougoslavie, Slovénie, et TARY Macédonie.

21 A partir de janvier 1992, les données se rapportent à la République Fédérative de Yougoslavie. Avant 1992 les données se rapportent à la République Fédérative Socialiste de Yougoslavie.

22 Avant 1992 les valeurs des importations sont f.o.b.

23 Importations f.o.b.

24 A partir de l'année 1985 les données ne sont pas comparables aux données des périodes antérieures à cause de révisions de taux de change de koruna au dollar des E.U.

25 Voir les notes explicatives sur les données concernant l'Allemagne à la page vi.

26 A partir de l'année 1989 les données ne sont pas comparables aux données des périodes antérieures à cause de révisions de taux de change de mark au dollar des E.U.

27 Avant juillet 1989, les statistiques du commerce extérieur comprennent les réexportations. A partir de juillet 1989 les données non compris les réexportations.

28 Y compris le commerce avec la République tchèque.

29 Les données de 1991 de l'ancienne URSS sont converties en dollar des E.U. en utilisant le taux de change commercial de rouble et ne sont pas comparables aux données des périodes antérieures.

30 Non compris le commerce avec les autres pays de la région, excepté pour Estonie, Lettonie et Lituanie.

31 Avant 1994 non compris le commerce avec les pays de Communauté des états independants (CEI).

Total Imports and Exports by Regions and Countries and Areas
Importations et Exportations Totales par Regions et Pays ou Zones

Imports C.I.F. - Exports F.O.B. - Balance / Importations C.I.F. - Exportations F.O.B. - Balance

(continued / suite)

[32] Avant janvier 1994, les statistiques du commerce exterieur comprenent les réexportations.

[33] Avant 1994, la source des valeurs de commerce est l'annuaire statistique du CEI.

[34] Y compris les exportations d'or.

[35] L'union douaniere de l'afrique meridionale comprend Botswana, Lesotho, Namibie, Afrique du Sud et Swaziland. Non compris le commerce entre ces pays.

[36] Non compris le petrole brut dont la valeur des importations n'sont pas stipulée. Les exportations sont les exportations d'intérieur.

[37] L'union douanière et économique de l'Afrique centrale. Non compris le commerce avec les autres pays membres de l'UDEAC.

[38] Communauté économique des états de l'Afrique de l'Ouest.

[39] A partir de mai 1997, la Guinée-Bissau a adopté le franc CFA comme monnaie nationale après être devenue membre de l'Union monétaire ouest-africaine et la Banque centrale des états de l'Afrique de l'Ouest (BCEAO).

[40] A partir de février 1995 les valeurs de commerce pour la Nigéria sont évaluées au taux de change (unitaire) moyen de 70.36 naira pour 1 dollar E.U. Il s'agit de la moyenne pondérée du taux officiel et du taux du marché.

[41] A partir de janvier 1996 les valeurs des importations sont f.o.b.

[42] Avant janvier 1992 non compris Arménie, Azerbaïdjan, Georgie, Kazakhstan, Kirghizistan, Ouzbékistan, Tadjikistan et Turkménistan. Total Asie en voie de développement avait été recalculé pour toutes les périodes données au tableau suivant la composition présente.

[43] Non compris les importations des economats militaires.

[44] Y compris le commerce de l'ancienne Republique populaire democratique de Yemen, le commerce de l'ancienne republique arabe de Yemen et le commerce entre eux.

[45] Les données se rapportent aux exportations totales moins les exportations pétrolières de moyen-orient d'Asie. Dans ce cas, le pérole est la somme des groupes CTCI 333, 334 et 335.

[46] Association des nations de l'Asie du Sud-Est.

[47] Voir les notes explicatives sur les données concernant Hong Kong RAS à la page vi.

[48] Avant 1981, commerce special.

[49] Année finissant le 30 septembre de l'année indiquée.

[50] Marché commun andin. Y compris Bolivie, Colombie, Equateur, Pérou et Venezuela.

[51] Coopération économique de l'Asie et du Pacifique. Y compris Australie, Brunéi Darussalam, Canada, Chili, Chine, Corée République de, Etats-Unis d' Amérique, Hong-kong, Indonésie, Japon, Malaisie, Mexique, Nouvelle-Zélande, Papouasie-Nouvelle-Guinée, Philippines, Singapour, et Thailande.

[52] Communauté des caraibes et marché commun. Y compris Antigua-et-Barbuda, Bahamas (membre de communauté seul), Barbade, Belize, Dominique, Grenade, Guyane, Jamaique, Monserrat, Sainte-Lucie, Saint-Kitts-et-Nevis, Saint Vincent-et-les-Grenadines, Suriname et Trinité-et-Tobago.

[53] Communauté des Etats indépendants. Y compris Arménie, Azerbaïdjan, Bélarus, Géorgie, Kazakhstan, Kirghizistan, République de Moldova, Fédération de Russie, Tadjikistan, Turkménistan, Ukraine and Ouzbékistan.

[54] Les pays les moins avancés. Y compris Afghanistan, Angola, Bangladesh, Bénin, Bhoutan, Burkina Faso, Burundi, Cambodge, Cap Vert, Comores, Djibouti, Eritrea, Ethiopie, Gambie, Guinée, Guinée Bisssau, Guinée equatoriale, Haiti, Iles Solomon, Kiribati, Lesotho, Libéria, Madagascar, Malawi, Maldives, Mali, Mauritanie, Mozambique, Myanmar, Népal, Niger, Ouganda, Rép. centrafricaine, Rép. dem. pop. lao, Rép.-Unie de Tanzanie, Rwanda, Samoa, Sao Tomé et Principe, Sierra Leone, Somalie, Soudan, Tchad, Togo, Tuvalu, Vanuatu, Yémen, Zaïre et Zambie.

[55] Mercado Comun Sudamericano (Marché commun austral). Y compris Argentine, Brésil, Paraguay et Uruguay.

[56] Association nord-américaine de libre-échange. Y compris Canada, Etats-Unis d'Amérique et Mexique.

[57] Organisation de coopération et de développement économiques. Y compris Allemagne, Australie, Autriche, Belgique, Canada, Corée République de, Danemark, Espagne, Etats-Unis d'Amerique, Finlande, France, Grèce, Hongrie, Irlande, Islande, Italie, Japon, Luxembourg, Mexique, Norvège, Nouvelle-Zélande, Pay-Bas, Pologne, Portugal, République tchéque, Suède, Suisse, Turquie, et Royaume-Uni.

[58] Organisation des pays exportateurs de pétrole. Y compris Algérie, Gabon, Indonésie, Iran (Rép. islamique d'), Iraq, Koweït, Jamahiriya arabe libyenne, Nigéria, Qatar, Arabie saoudite, Emirates arabes unis et Venezuela.

[59] Zone d'échanges préférentiels entre les Etats d'Afrique de l'Est et l'Afrique australe. Y compris Angola, Burundi, Comores, Djibouti, Erythrée, Ethiopie, Kenya, Lesotho, Madagascar, Malawi, Maurice, Mozambique, Namibie, Ouganda, République-Unie de Tanzanie, Rwanda, Seychelles, Somalie, Soudan, Swaziland, Zaïre, Zambie, et Zimbabwe.

SPECIAL TABLE: B

World exports by commodity classes and by regions (continued)

General note

The purpose of this table is to provide data on the network of flows of broad groups of commodities within and between important economic and geographic areas of the world.

The regional analysis in this table is in accordance with that of Special Table A in this issue.

Export data in this table are largely comparable to that shown in Special Table A except that Special Table A contains revised data for total exports which are not incorporated into this table if the corresponding revised data at the commodity/destination level are not available. Also, the regional totals shown in Special Table A have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by commodity and by destination.

The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 3, except for countries which report trade data only in terms of the SITC, Revision 2, or the SITC, Revised.

The data approximate total exports of all countries and areas of the world. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in Table 1 for each country in this volume. Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted

(a) to approximate the commodity groupings of the SITC and

(b) to approximate calendar years.

The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination.

1/ Exports of the former USSR for which country of destination is not available are included in the totals for the World, the 'Developed economies', the 'Developing economies' and 'Eastern Europe and the former USSR' but are excluded from the regional components of these groupings.

2/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

3/ Beginning 1993, data refer to the Federal Republic of Yugoslavia, Croatia, Slovenia, Bosnia and Herzegovina, and the former Yugoslav republic of Macedonia. Prior to 1992, data refer to the Socialist Federal Republic of Yugoslavia.

4/ Section 9 of the SITC, which comprises commodities and transactions not classified elsewhere, is included in the total trade but is not shown separately in this table.

5/ Beginning 1992, includes Eastern Europe and the European countries of the former USSR.

6/ Includes Belarus, Estonia, Latvia, Lithuania, Republic of Moldova, the Russian Federation, and Ukraine. Prior to 1994, data exclude inter-trade among countries of the region, except for Estonia, Latvia and Lithuania.

7/ Beginning 1992, includes Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Prior to 1994, data for these countries exclude inter-trade among countries of the region.

8/ Prior to 1992, data refer to the former USSR. Beginning 1992, data refer to the European countries of the former USSR, and exclude, prior to 1994, inter-trade among countries of region, except for Estonia, Latvia and Lithuania.

Exportations mondiales par classes de marchandises et par régions (suite)

Remarque générale

Le but de ce tableau est de fournir un apercu du courant des marchandises entre les régions importantes économiques et géographiques du monde et de leur commerce intérieur.

L'analyse régionale dans ce tableau est conforme à celle du Tableau Spécial A du présent numéro.

Les données des exportations dans ce tableau sont en générale comparables aux chiffres qui sont inclus dans le Tableau Spécial A, exceptées que celles du Tableau Spécial A comportent des revisions aux exportations totales qui ne sont pas inclus dans ce tableau si les revisions des données correspondantes au niveau de marchandise/destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau Spécial A ont été ajustés pour exclure les re-exportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des re-exportations ne sont pas disponibles fréquemment par marchandise et par destination.

La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI), des Nations Unies, Revision 3, en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revision 2, ou la CTCI, Revisée.

Les données approchées des exportations totales de tous pays et régions du monde. Elles sont basées sur les chiffres des exportations officielles nationales convertis en dollars E.-U. selon les facteurs de conversion publiés dans le Tableau 1 pour chaque pays dans ce tome. Quand les chiffres officiels ne sont pas disponibles on a recours a des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées

(a) qu'elles correspondent aux groups des marchandises de la CTCI et

(b) qu'elles correspondent aux années civiles.

Les données comprises les exportations de 'special category' (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination.

1/ Les exportations en provenance de l'ancienne URSS dont les pays de destination ne sont pas disponibles sont comprises dans les totaux du Monde, des 'Economies développées', des 'Economies en voie de développement' et de 'Europe de l'Est et l'ancienne URSS', mais ils ne sont pas comprises dans chaque partie composant ces régions.

2/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

3/ A partir de l'année 1993, les données se rapportent à la République fédérative de Yougoslavie, Croatie, Slovénie, Bosnie-Herzégovine et l'ancienne République yougoslave de Macédoine. Avant l'année 1992, les données se rapportent à la République socialiste fédérative de Yougoslavie.

4/ Section 9 de la CTCI, qui représente les articles et transactions non classes ailleurs est comprise dans le commerce total mais n'est pas présentée séparément dans ce tableau.

5/ A partir de janvier 1992, y compris de l'Europe de l'est et les pays européens de l'ancienne URSS.

6/ Y compris Bélarus, Estonie, Lettonie, Lituanie, République de Moldova, Fédération de Russie, et Ukraine. Avant l'année 1994, les données ne comprennent pas le commerce entre les pays de la région, excepté pour Estonie, Lettonie et Lituanie.

7/ A partir de l'année 1992, y compris Azerbaïdjan, Arménie, Géorgie, Kazakhstan, Kirghizistan, Tadjikistan, Turkménistan, et Ouzbékistan. Avant l'année 1994, les données relatives à ces pays ne comprennent pas le commerce entre les pays de la région.

8/ Avant l'année 1992, les données se rapportent à l'ancienne URSS. A partir de l'année 1992, les données se rapportent aux pays européens de l'ancienne URSS, et ils ne comprennent pas, avant l'année 1994, le commerce entre les pays de la région, excepté pour Estonie, Lettonie et Lituanie.

SPECIAL TABLE: D

Structure of world exports by commodity classes and by regions (continued)
Structure des exportations mondiales par catégories de marchandises et par régions (suite)

General note

The regional analysis in this table and Special Table C is in accordance with Special Table A of this issue.

The figures in this table and table C are derived from the data in Special Table B. For the treatment of data on Germany see the general note on page vi.

The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 3, except for countries which report trade data only in terms of the SITC, Revision 2, or the SITC, Revised.

The data approximate total exports of all countries and areas of the world. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in Table 1 for each country in this volume. Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted

(a) to approximate the commodity groupings of the SITC and
(b) to approximate calendar years.

The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination.

1/ Exports of the former USSR for which country of destination is not available are included in the totals for the World, the 'Developed economies', the 'Developing economies' and 'Eastern Europe and the former USSR' but are excluded from the regional components of these groupings.

2/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

3/ Section 9 of the SITC, which comprises commodities and transactions not classified elsewhere, is included in the total trade but is not shown separately in this table.

4/ Beginning 1992, includes Eastern Europe and the European countries of the former USSR.

5/ Prior to 1992, data refer to the former USSR. Beginning 1992, data refer to the European countries of the former USSR - Belarus, Estonia, Latvia, Lithuania, Republic of Moldova, the Russian Federation, and Ukraine.

6/ Beginning 1992, includes Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan.

Remarque générale

L'analyse régionale dans ce tableau et le Tableau Spécial C est conforme au Tableau Spécial A de ce numéro.

Les données de ce tableau et le tableau C sont derivées de celles publiées dans le Tableau Spécial B. Pour le traitement des données de l'Allemagne voir la remarque générale à la page vi.

La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI), Revision 3, en dehors des pays qui rapportent exclusivement les données du commerce en accord avec la CTCI, Revision 2, ou la CTCI, Revisée.

Les données approchées des exportations totales de tous pays et régions du monde. Elles sont basées sur les chiffres des exportations officielles nationales convertis en dollars E.-U. selon les facteurs de conversion publiés dans le Tableau 1 pour chaque pays dans ce tome. Quand les chiffres officiels ne sont pas disponibles on a recours à des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées

(a) qu'elles correspondent aux groups des marchandises de la CTCI et
(b) qu'elles correspondent aux années civiles.

Les données comprises les exportations de 'special category' (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination.

1/ Les exportations en provenance de l'ancienne URSS dont les pays de destination ne sont pas disponibles sont comprises dans les totaux du Monde, des 'Economies développées', des 'Economies en voie de développement' et de 'Europe de l'Est et l'ancienne URSS', mais ils ne sont pas comprises dans chaque partie composant ces régions.

2/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

3/ Section 9 de la CTCI, qui représente les articles et transactions non classes ailleurs est comprise dans le commerce total mais n'est pas présentée séparément dans ce tableau.

4/ A partir de janvier 1992, y compris de l'Europe de l'est et les pays européens de l'ancienne URSS.

5/ Avant l'année 1992, les données se rapportent à l'ancienne URSS. A partir de l'année 1992, les données se rapportent aux pays européens de l'ancienne URSS - Bélarus, Estonie, Lettonie, Lituanie, République de Moldova, Fédération de Russie, et Ukraine.

6/ A partir de l'année 1992, y compris Azerbaïdjan, Arménie, Géorgie, Kazakhstan, Kirghizistan, Tadjikistan, Turkménistan, et Ouzbékistan.

General note: These index numbers show the changes in the volume (quantum index) and the average price (unit value index) of total imports and exports. The terms of trade figures are calculated by dividing export unit value indices by the corresponding import unit value indices. The product of the net terms of trade and the quantum index of exports is called the index of the purchasing power of exports. The footnotes to countries appearing in Special Table A of this volume also apply to the index numbers in this table.

[1] Calculated in terms of U. S. dollars.
[2] Price index numbers: For Australia beginning 1981, for the United States, beginning 1989.
[3] Excludes military exports.
[4] Excluding ships.
[5] Index numbers cannot yet be rebased because of the unavailability of data for 1990.
[6] Data prior to January 1991 pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October 1990 (See explanatory notes on data pertaining to Germany on page v).
[7] Beginning January 1992, data refer to the Federal Republic of Yugoslavia. Prior to that date, data refer to Socialist Federal Republic of Yugoslavia.

Remarque generale: Ces indices indiquent les variations des quantités (indice du quantum) et des prix moyens (indice de la valeur unitaire) des importations ou exportations totales. Les indices des termes de l'échange sont obtenus en divisant les indices de la valeur unitaire à l'exportation par ceux à l'importation. L'indice du pouvoir d'achat des exportations est obtenu en multipliant l'indice des termes de l'échange par l'indice du quantum des exportations. Les notes se rapportant aux pays qui apparaissent dans le Tableau Special:A de ce tome s'appliquent aussi aux indices de ce tableau.

[1] Calculés en dollars des Etats–unis.
[2] Indices des prix: Pour l'Australie à partir de 1981, pour les Etats–unis à partir de 1989.
[3] Non compris les exportations militaires.
[4] Non compris les navires.
[5] Les indices ne peuvent pas encore être rebasés du fait que les renseignements de 1990 ne sont pas encore disponibles.
[6] Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République fédérale d'Allemagne et l'ancienne République démocratique allemande antérieur au 3 octobre 1990. (Voir les notes explicatives sur les données concernant l'Allemagne à la page vii).
[7] A partir de janvier 1992, les données se rapportent à la République fédérative de Yugoslavie. Avant cette date les données se rapportent à la République fédérative Socialiste de Yugoslavie.

1/ For the composition of the regions, see Special Table A of this issue.

2/ Quantum indices are derived from value data and unit value indices. They are base period weighted.

3/ This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

4/ South African Customs Union.

5/ Beginning 1 January 1992 data refer to the Federal Republic Yugoslavia. Prior to that date, data refer to the Socialist Fede Republic of Yugoslavia.

6/ Regional aggregates are current period weighted.

7/ Indices, except those for Europe, are based on estimates prepar by the International Monetary Fund.

8/ Unit value index of exports divided by unit value index of import

Exportations et importations totales: Indices du quantum, de la valeur unitaire et des termes de l'échange par régions

99	90	98	99	99	...	...	...	...	...	...	...	Europe

1/ Pour la composition des régions, voir tableau special A du présent numéro.

2/ Les indices du quantun sont calculés à partir de chiffres de la valeur et des indices de la valeur unitaire. Ils sont à coéfficients de pondération correspondant à la période en base.

3/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

4/ L'Union Douanière d'Afrique Méridionale.

5/ A partir de 1er janvier 1992 les données se rapportent à la République fédérative de Yougoslavie. Avant cette date les données se rapportent à la République socialiste fédérative de Yougosalvie.

6/ Les totaux régionaux sont à coéfficients de pondération correspondant à la période en cours.

7/ Le calcul des indices, sauf ceux pour l'Europe, sont basés sur les estimations preparées par le Fonds monétaire international.

8/ Indice de la valeur unitaire des exportations divisé par l'indice de la valeur unitaire des importations.

SPECIAL TABLE: I

Some indicators on fuel imports
Developed economies

General note: Manufactured goods are here defined to comprise sections 5 through 8 of the Standard International Trade Classification (SITC). These sections are: chemicals and related products, manufactured goods classified chiefly by material, machinery and transport equipment and miscellaneous manufactured articles. Fuels are here defined to comprise all the products in section 3 of the SITC. These products are: coal, coke and briquettes, petroleum, petroleum products and related materials, gas and electric current. The economic and geographic groupings in this table are in accordance with those of Special Table A in this issue, although Special Table A includes more detailed geographic sub-groups which make up the groupings 'Other developed economies' and 'Developing economies' of this table. In 1990 the exports of manufactured goods by all 'Developed' and 'Developing' economies accounted for approximately 96 per cent of world exports of manufactured goods. The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistics Division compiles using their quantity and value figures. For countries that do not compile indices for manufactured goods exports and fuel imports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC sections 5-8 and SITC section 3 respectively. Unit value indices obtained from national indices are rebased, where necessary, so that 1990=100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted. The indices in SDRs are calculated by multiplying the equivalent aggregate indices in U.S. dollars by conversion factors obtained by dividing the SDR/$US exchange rate in the current period by the rate in the base period. The quantum indices are derived from the value data and the unit value indices. All aggregate quantum indices are base period weighted. The figures in Special Table I are calculated from those prepared for Special Tables G and H. Total imports and exports used in the calculations are, in general, those published in the United Nations 'Commodity Trade Statistics', Series D.

[1] Excludes trade of the countries of Eastern Europe and the former USSR.
[2] Beginning 1989, derived from price indices; national unit value index is discontinued.
[3] Series linked at 1988 by a factor calculated by the United Nations Statistics Division.
[4] For the years beginning 1981, indices are caluclated by the United Nations Statistics Division; for Belgium and Netherlands beginning 1988 and for Switzerland beginning 1987.
[5] Data prior to January 1991, pertain to the territorial boundaries of the Federal Republic of Germany and the former German Democratic Republic prior to 3 October, 1990 (see explanatory notes on data pertaining to Germany on page vi).
[6] Derived from sub-indices using current weights.
[7] Industrial product.

Quelques indicateurs sur les importations des produits énergétiques
Pays à économies développées

Remarque générale. Les produits manufacturés comprennent les sections 5 à 8 de la Classification type pour le commerce international (CTCI). Ces sections sont: produits chimiques et produits connexes, articles manufacturés classés principalement d'après la matière primière, machines et matérial de transport et articles manufacturés divers. Les produits énergétiques comprennent tous les produits appartenant à la section 3 de la CTCI. Ces produits sont: huiles, cokes et briquettes, pétrole, produits dérives du pétrole et produits connexes, gaz et énergie électrique. Les groupes économiques et géographiques de ce tableau sont conformes aux groupes des pays ou zones qui paraissent dans le tableau special A de ce numéro, bien que le tableau special A comprend plus de détails en ce qui concerne les sous-groupes des 'Autres economies développés' et 'Economies en view de développement' de ce tableau. En 1990, les exportations des produits manufacturés par tous les 'Economies développées' et les 'Economies en voie de développement' representaient approximativement 96 pourcent de l'ensemble des exportations mondials des produits manufacturés. Les indices de la valeur unitaire sont obtenus de sources nationales, a l'exception de quelque pays pour lesquels la Division de Statistique des Nations Unies calcule ces indices en utilisant le chiffres de la valeur et du volume fournis par ces pays. Pour les pays ne calculant pas leurs indices des exportations des produits manufacturés et importations des produits énergétiques selon la definition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche les sections 5 à 8 de la CTCI et la section 3 de la CTCI respectivement. Les indices en monnaie nationale sont convertis en dollars des E.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérés, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire, sont à coéfficients de pondération correspondant à la période indiquée. Les indices en DTS sont calculés en multipliant les indices totaux equivalents en dollars E.-U. par un facteur de conversion obtenu en divisant le taux de change courrat du DTS/$E-U d'une monnaie donnée par celui de la période de base. Les indices du quantum sont calculés à partir de chiffres de la valeur et lés indices de la valeur unitaire. Tous les agrégés des indices du quantum sont à coéfficients de pondération correspondant à la période en base. Les chiffres dans tableau special I sont calculés selon des données preparées pour les tableaux spéciaux G et H. Les totales des importations et exportations utilisées dans les calculs sont, en générale, celles publiées dans les documents des Natons Unies intitulés 'Commodity Trade Statistics', Series D.

[1] Non compris le commerce des pays de l'Europe de l'Est et l'ancienne URSS.

[2] A partir de 1989, calculés à partir des indices des prix; l'indice de la valeur unitaire national est discontinué.

[3] Les series sont enchainées à 1988 par un facteur calculé par la Division de Statistique des Nations Unies.

[4] Pour les années à partir 1981, les indices sont calculés par la Division de Statistique des Nations Unies; pour la Belgique et les Pays-Bas à partir de 1988 et pour la Suisse à partir de 1987.

[5] Les données relatives à la période précédant janvier 1991 correspondent aux limites territoriales de la République Fédérale d'Allemagne antérieur au 3 octobre 1990. (Aussi voir les notes explicatives sur les données concernant l'Allemagne à la page vi).

[6] Calculés à partir de sous-indices à coéfficients de pondération correspondant à la période en cours.

[7] Produit industriel.

SPECIAL TABLE: J

Export price index numbers of primary commodities and non-ferrous base metals
Indices des prix des exportations des matières premières et des métaux non-ferreux

1980 = 100

General note

The indexes for primary commodities and non-ferrous base metals and their sub-indexes are weighted averages of price indexes of individual commodities, each of which is based on specific price quotations for representative grades of that commodity in countries that are major traders of the commodity. The weights are determined by the patterns of primary commodities exports in the base year 1980. All indexes are calculated in terms of United States dollars. The indexes are computed using various categories of prices such as export prices f.o.b., import prices c.i.f., wholesale prices, commodity exchange prices, producer's prices and auction prices. For more details and comparable historical series see the United Nations' "Methods Used in Compiling the United Nations Price Indexes for External Trade", Volume 1, Statistical Papers Series M No. 82.

This table does not cover trade of countries of Eastern Europe and the former USSR.

1/ This classification is intended for statistical convenience and does not necessarily express a judgement about the stage reached by a particular country in the development process.

Remarque générale

Les indices des matières premières et des métaux communs non ferreux ainsi que les indices de groupes et de sous-groupes représentent les moyennes pondérées des indices des prix individuels, l'indice de chaque marchandise étant fondé sur des cotations déterminées pour des variétés ou qualités représentatives de la marchandise en question dans les pays qui jouent un rôle important dans le commerce mondial de la dite marchandise. Les coéfficients de pondération sont déterminés par la structure des exportations de produits primaires dans l'année de référence 1980. Tous les indices sont calculés par rapport au dollars des Etats-Unis. Les indices sont calculés à partir de diverses catégories de prix: prix à l'exportation f.a.b., prix à l'importation c.a.f., prix de gros, prix pratiqués par les bourses de marchandises, prix à la production et prix des ventes aux enchères. Pour de plus amples détails et les séries historiques comparables, voir le document du Nations Unies intitulé "Méthodes Utilisées par les Nations Unis pour Etablir les Indices des Prix des Produits de Base Entrant dans le Commerce International", Tome 1, Etudes Statistiques Série M No. 82.

Ce tableau ne concerne pas le commerce des pays de l'Europe de l'Est et de l'ancienne URSS.

1/ Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays donné.

TOTAL TRADE

351 "Energie électrique", 675 "Feuillards en fer ou en acier",
688 "Uranium et thorium et leurs alliages",
911 "Colis postaux, non classés par catégorie",
961 "Monnaies (autres que les pièces d'or) n'ayant pas cours légal" et
971 "Or, non monétaire (à l'exclusion des minerais et concentrés d'or)"

NOTES SUR LES ESTIMATIONS

Pour la préparation de ces tableaux, des estimations ont été effectuées pour les pays dont les données n'étaient pas disponibles. Ces estimations au niveau des pays apparaissent avec le signe 'x'. Elles sont comprises dans les totaux régionaux et le total du monde. Certaines estimations sont supprimées (voir L'introduction, paragraphe 9) et apparaissent seulement avec le signe 'x'.

[1/] These codes are suppressed from publication because they were poorly reported and contain many estimates which are not sufficiently explainable.

[1/] Ces groupes sont supprimés de la publication parce que ils étaient rapportés insuffisamment et portaient beaucoup d'estimations qui n'étaient par assez expliquées.
