National Accounts Statistics: Analysis of Main Aggregates, 2006

United Nations New York, 2008

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. The first 14 editions of this publication were issued without series symbols.

I. Introduction

This is the thirty-seventh issue of the United Nations publication, *National Accounts Statistics: Analysis of Main Aggregates (AMA)*. It is presented as part of a series that also includes the annual principal publication containing detailed national accounts information, *National Accounts Statistics: Main Aggregates and Detailed Tables (MADT)*[i].

The last publication of AMA was prepared and published in 2006 by the Statistics Division of the Department of Economic and Social Affairs of the United Nations Secretariat with the assistance and cooperation of national statistical services. It is issued in accordance with the recommendation of the Statistical Commission at its first session[ii] that the Statistics Division of the United Nations should publish regularly the most recent available data on national accounts for as many countries and areas as possible.

The current publication presents in the form of analytical tables, a summary of the principal national accounting aggregates based on official detailed national accounts data for more than 200 countries and areas of the world. The basic data was extracted from MADT and supplemented by estimates prepared by the Statistics Division of the United Nations when official data are not available.

SCOPE OF PUBLICATION

The present volume consists of two parts: *Introduction (I) and Analytical Tables (II)*.

General information on the methods of data collection, estimation and derivation of analytical measures, the conversion factors used in converting national currency into United States dollars, conceptual references, country nomenclature, fiscal year references and regional groupings are included in the Introduction. Information on analytical measures is further elaborated in a separate section in part II, Analytical Tables, prior to the presentation of the tables.

The tables include analysis of data on gross domestic product (GDP) by different structural components. In general, data presented in the tables are based on GDP definitions as given in the 1993 System of National Accounts (SNA).

The types of analysis presented are classified into four major categories:

(a) Analysis of the level of total and per capita gross domestic product (Tables 1A and 1B);

(b) Analysis of economic structures expressed in terms of percentage shares of gross domestic product by type of expenditure and gross value added by kind of economic activity (Tables 2 and 3);

(c) Analysis of economic development expressed in terms of the real growth of gross domestic product and its components by type of expenditure and kind of economic activity (Tables 4, 5 and 6); and,

(d) Analysis of price development expressed in terms of implicit price deflators of gross domestic product (Table 7).

The analytical presentations are based on a homogeneous data series that were made smooth and consistent from original individual country data series. The use of such homogeneous data series as the basis for the analysis presented in this volume serves to facilitate cross-table analysis concerning one or more countries and/or regions.

Users interested in making alternative analysis across countries or looking for more detailed information may wish to visit the online AMA database, located at http://unstats.un.org/unsd/snaama.

COLLECTION OF DATA

The present AMA database includes GDP estimates by type of expenditure and kind of economic activity expressed in current prices and constant prices of 1990 for some or all of the years 1970 to 2006 for total GDP. These

---

[i] United Nations publication, ST/ESA/STAT/SER.X.

[ii] Official Records of the Economic and Social Council, 1947, Supplement No. 6 (E/264), chap. VIII, para. 42.

were compiled from country replies to the regular national accounts questionnaire of the Statistics Division of the United Nations as well as from estimates prepared by its staff members so to adjust data inconsistencies and fill data gaps. The questionnaire is sent annually to the national statistical offices of all UN member states and areas of the world. Data submitted with the questionnaire are generally supplemented, for the purpose of the Analysis of Main Aggregates, by reliable information obtained from other national and international sources. The recipients of the questionnaire are requested to indicate where the scope and coverage of the country estimates differ, for conceptual or statistical reasons, from the definitions and classifications recommended in the 1993 SNA.

ESTIMATION OF DATA

The methodology employed to arrive at the basic data for computation of global and regional aggregates, growth rates and index numbers is as follows: official data of countries as reported in MADT are supplemented by estimates prepared by the Statistics Division of the United Nations, based on official and unofficial data and proxy economic indicators derived from national and international sources. For a majority of countries, both the official statistics and proxy indicators may be based on different series due to multiple data configurations and/or characteristics. Before merging these into one data file, all inconsistencies in series and coverage are smoothed out by linking the multiple series into one homogeneous set of data from which the analytical measures are derived.

The current price series are converted into a common unit of currency the United States dollars by applying the corresponding exchange rates. (For a more detailed explanation, reference is made to the general notes to Tables 1A and 1B)

The constant price series, principally based on officially reported data from member states and supplemented by estimates prepared by the Statistics Division of the United Nations, are presented in index numbers on country basis for each item and year and re-based to 1990. The indices are then applied to the corresponding 1990 current dollar values per country and item, which serve as weights, and extrapolated by individual growth rates in order to arrive at the regional and world totals for each year. (For a more detailed explanation in the calculation of growth rates and index numbers, reference is made to the general notes for Tables 4, 5, 6 and 7, respectively.)

In preparing estimates to supplement the official data, the sequence or priority of data sources sought is as follows: national publications, internet websites of national statistics offices, central banks or relevant government ministries, economic surveys and estimates prepared by the regional economic commissions of the United Nations; estimates and indicators available from other international organizations such as the International Monetary Fund (IMF), the World Bank and other international institutions, studies prepared by experts under the United Nations technical cooperation programmes; economic reports and studies by regional development banks; For countries that are members of regional affiliate organizations and specialized groups, such as the Asian Development Bank, Eastern Caribbean Central Bank, the Commonwealth of Independent States (CIS), etc., the information available from these organizations are given priority over non-United Nations sources.

DATA CONVERSION TO UNITED STATES DOLLARS

In converting estimates expressed in national currency units into United States dollars, the prevailing annual average of market exchange rates as reported by the IMF has been used. For countries that are non-members of the IMF or where no annual exchange rate is available from IMF, the conversion rate used is usually the annual average of United Nations operational rates of exchange.

It should be noted that the international comparability of data expressed in United States dollars between countries may not be entirely scientific because the exchange rates applied may in practice only be used for the conversion of a limited number of external transactions and may not be relevant for the much larger portion of GDP covering domestic transactions.

Alternative methods of making international comparisons have been developed in recent years. One is the Purchasing Power

Parities (PPPs) which have been developed as part of the International Comparison Project (ICP); another one is the World Bank Atlas method of conversion based on the average of the exchange rates of the current year and the two immediately preceding years that have been adjusted for differences in inflation rates between individual countries and the average of G-5 countries (Germany, France, Japan, the United Kingdom, and the United States); and, the Statistics Division of the United Nations has developed the Price Adjusted Rates of Exchange (PARE)[iv] which, like the Atlas method is designed to adjust exchange rates that do not adequately reflect relative movements of domestic and international inflation. PARE is mainly applied to countries with fixed exchange rate regimes and countries going through a period of high inflation (e.g. transition countries from 1990-1995). See introduction to Tables 1A and 1B for a more detailed explanation.

NOMENCLATURE

Designations for country or areas, which have changed in recent years, are as follows:

Hong Kong Special Administrative Region (SAR), China - Pursuant to a Joint Declaration signed on 19 December 1994, the United Kingdom re-stored Hong Kong to the People's Republic of China with effect from 1 July 1997; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date.

The data for Hong Kong SAR is shown separately from that of the People's Republic of China.

Macao Special Administrative Region (SAR), China - Pursuant to a Joint Declaration signed on April 13, 1987, the Portugal re-stored Macao to the People's Republic of China with effect from 20 December 1999; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date.

The data for Macao SAR is shown separately from that of the People's Republic of China.

Czech Republic, Slovakia - Data for Czech Republic and Slovakia are shown separately under the appropriate country name. For period prior to 1 January 1993, data for the former Czechoslovakia are shown under the country name Czechoslovakia (Former)

Yugoslavia (Former) – Following the adoption and the promulgation of the Constitutional Charter of Serbia and Montenegro by the Assembly of the Federal Republic of Yugoslavia on 4 February 2003, the name of the State of the Federal Republic of Yugoslavia was changed to Serbia and Montenegro. All data for former Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia that was then composed of six republics. After that date, when available, data for the republics, Bosnia and Herzegovina, Croatia, Slovenia and The Former Yugoslav Republic of Macedonia are shown separately. On 3 June 2006, Serbia and Montenegro formally dissolved into Montenegro and Serbia which are now shown separately from 1990 onwards. Kosovo, formally part of Serbia, is compiling its own National Accounts Statistics and included as a separate territory in this issue, starting with 1990.

USSR (Former) - In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent republics (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). When available, data are shown for the individual republics. All data for the former USSR are shown under the country name USSR (Former)

Ethiopia, Eritrea - Data for Ethiopia and Eritrea are shown separately under the appropriate country name. For the period prior to 1993, data for the former Ethiopia are shown under the country name Ethiopia (Former).

Germany – On October 1990, the Federal Republic of Germany and the German Democratic Republic united to form one sovereign State under the designation Germany. Official data from Germany for the period 1970—1990 is the combined data of the former Federal Republic of Germany and the former German Democratic Republic as published by the Federal Statistical Office of Germany.

[iv] Report of the Committee on Contribution, Sixty-fifth session, General Assembly, Official Records, Sixtieth Session, supplement No. 11 (A/60/11).

Yemen - In May 1990, Yemen and Democratic Yemen united to form a single State. Since that date they have been represented as one country with the name "Yemen".

Standard country or area designations and classification of geographical regions for statistical use are posted on the United Nations website. Interested users could refer to the following web-link for further details:

http://unstats.un.org/unsd/methods/m49/m49.htm

COUNTRY COVERAGE AND GROUPINGS

The SNA 1993 defines the concept of "economic territory" (Chapter XIV, 14.8) as the relevant geographical are to which the concept of residence is applied. As a matter of fact economic territory and geographical territory can be different (Chapter II, 2.22) and the major deviations reported by National Statistical Offices are listed below:

- France: includes French Guiana, Guadeloupe, Martinique and Réunion
- Cyprus: excludes Northern Cyprus
- Serbia: excludes Kosovo and Metoia starting in 1990
- United Republic of Tanzania: excludes Zanzibar
- Morocco: includes Western Sahara
- Indonesia: excludes East Timor starting in 1999
- China: refers to Mainland China and excludes Hong-Kong, Macao and Taiwan.

There are two types of alternative country groupings or aggregations of country data applied in the tables: by geographical region and by grouping based on economic categories, i.e. developed, developing and transition economies. The tables on the level of GDP and growth rates by GDP components (Tables 1A, 1B and 4 through 6) include aggregations of country data by geographical region and economic categories while the tables on percentage distribution of GDP and gross value added as well as implicit price deflators (Tables 2, 3 and 7), present country data only according to geographical regions. Where individual country data are presented, they are generally listed by region and, within the regions, in alphabetical order.

The designations "developed" and "developing" economies used in some tables are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

The geographical coverage for the world, regional and economic development groupings used in the analyses is as follows:

WORLD

Total of developed, developing and transition economies.

DEVELOPED ECONOMIES

Northern America, Europe (excluding Transition Economies in Europe), Japan, Australia and New Zealand

DEVELOPING ECONOMIES

Africa, Americas excluding Canada and the United States in Northern America, Caribbean, Central America, South America, Asia excluding Japan and Transition Economies in Asia, and Oceania excluding Australia and New Zealand.

TRANSITION ECONOMIES

Commonwealth of Independent Countries

Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan

Other Europe

Albania, Bosnia and Herzegovina, Bulgaria, Kosovo, Montenegro, Romania, Serbia, The Former Yugoslav Republic of Macedonia

REGIONAL CLASSIFICATION[v]

AFRICA – comprised of Eastern Africa, Middle Africa, Northern Africa, Southern Africa and Western Africa

[v] Not all countries or territories are included in the regional classification, as the Statistics Division of the United Nations may not have the access to reliable data sources or viable estimation methods to prepare data for all countries or areas.

Eastern Africa – Burundi, Comoros, Djibouti, Eritrea*, Ethiopia*, Kenya, Madagascar, Malawi, Mauritius, Mozambique, Rwanda, Seychelles, Somalia, Uganda, United Republic of Tanzania (mainland), Zambia, Zanzibar, Zimbabwe

Middle Africa – Angola, Cameroon, Central African Republic, Chad, Congo, Democratic Republic of the Congo, Equatorial Guinea, Gabon, Sao Tome and Principe

Northern Africa – Algeria, Egypt, Libyan Arab Jamahiriya, Morocco, Sudan, Tunisia

Southern Africa – Botswana, Lesotho, Namibia, South Africa, Swaziland

Western Africa – Benin, Burkina Faso, Cape Verde, Cote d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone, Togo

AMERICAS – comprised of Caribbean, Central America, South America and Northern America

Caribbean – Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada, Haiti, Jamaica, Montserrat, Netherlands Antilles, Puerto Rico, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands

Central America – Belize, Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama

South America – Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela (Bolivarian Republic of)

Northern America - Bermuda, Canada, Greenland and United States of America

ASIA – comprised of Eastern Asia, South-central Asia, South-eastern Asia and Western Asia

Eastern Asia – China, Hong Kong Special Administrative Region of China, Macao Special Administrative Region of China, Democratic People's Republic of Korea, Japan, Mongolia, Republic of Korea

South-central Asia – Afghanistan, Bangladesh, Bhutan, India, Iran (Islamic Republic of) Kazakhstan*, Kyrgyzstan*, Maldives, Nepal, Pakistan, Sri Lanka, Tajikistan*, Turkmenistan*, Uzbekistan*

South-eastern Asia – Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, Viet Nam

Western Asia – Armenia*, Azerbaijan*, Bahrain, Cyprus, Georgia*, Iraq, Israel, Jordan, Kuwait, Lebanon, Occupied Palestinian Territories, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, Turkey, United Arab Emirates, Yemen*

EUROPE – comprised of Eastern Europe, Northern Europe, Southern Europe and Western Europe

Eastern Europe – Belarus*, Bulgaria, Czech Republic*, Hungary, Poland, Republic of Moldova*, Romania, Russian Federation*, Slovakia*, Ukraine*

Northern Europe – Denmark, Estonia*, Finland, Iceland, Ireland, Latvia*, Lithuania*, Norway, Sweden, United Kingdom of Great Britain and Northern Ireland

Southern Europe – Albania, Andorra, Bosnia and Herzegovina*, Croatia*, Greece, Italy, Kosovo*, Malta, Montenegro*, Portugal, San Marino, Serbia*, Slovenia, Spain, The former Yugoslav Republic of Macedonia*

Western Europe – Austria, Belgium, France[vi], Germany, Liechtenstein, Luxembourg, Monaco, Netherlands and Switzerland

OCEANIA – comprised of Australia and New Zealand, Melanesia, Micronesia, and Polynesia

Australia and New Zealand – Australia, New Zealand

Melanesia – Fiji, New Caledonia, Papua New Guinea, Solomon Islands, Vanuatu

Micronesia – Kiribati, Marshall Islands, Micronesia (Federated States of), Nauru, Palau

Polynesia – Cook Islands, French Polynesia, Samoa, Tonga, Tuvalu

---

* since 1990

[vi] French National Accounts include the following Départements d'Outre Mer (DOM): French Guiana, Guadeloupe, Martinique and Réunion.

CONCEPTUAL REFERENCES

The concepts used in the statistical tables in the present volume are the same as those used in Main Aggregates and Detailed Tables. They generally conform to the recommendations in the revised System of National Accounts 1993.

INTERNATIONAL COMPARABILITY OF NATIONAL ACCOUNTS DATA

Every effort has been made to present the estimates of the various countries or areas in a form designed to facilitate international comparability. To this end, some important differences in concept, scope, coverage and classification have been described in respective footnotes for individual countries.

The data contained in the tables relate to the calendar year against which they are shown unless otherwise indicated as the following:

(a) Year beginning 1 July – Australia, Bangladesh, Bhutan, Cameroon, Egypt, Gambia, Pakistan, Puerto Rico and Saudi Arabia.

(b) Year beginning 1 April – Bermuda, India, Myanmar (except 1970-1974, which are ending 30 September) and New Zealand.

(c) Year Beginning 21 March – Afghanistan and Iran (Islamic Republic of)

(d) Year ending 30 June – Botswana, Swaziland and Tonga.

(e) Year ending 7 July – Ethiopia

(f) Year ending 15 July – Nepal

(g) Year ending 30 September – Haiti

CHANGES TO THE DATABASE

- Kosovo and Serbia are identified and published separately the first time from 1990 onwards.
- Greenland is published the first time.

EXPLANATION OF SYMBOLS

The following symbols have been employed:

Data not available	...
Category not applicable	..
Data in units	(u)
Data in thousands	(t)

Decimals and percentages in tables may not add up to totals due to rounding.

GENERAL DISCLAIMER

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the United Nations Secretariat concerning the legal status of any country, territory, or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

All data presented in this publication are prepared from the most recent available data by July 2007. In general, figures for the most recent years are to be regarded as provisional and subject to further revision. For further information, visit the online database at: http://unstats.un.org/unsd/snaama.

Queries about the AMA database and this publication should be sent to the e-mail address: sna@un.org.

II. Analytical Tables

A. Estimates of Main National Accounting Aggregates at Current Prices

Description of Analysis in Table 1A and Table 1B

A. Level of total and per capita gross domestic product.

Table 1A and Table 1B present estimates of total and per capita gross domestic product (GDP) expressed in current United States dollars. The tables are intended to facilitate international comparisons of levels of income generated in production. Countries within regions, country groupings into developed, developing and transition economies as well as global aggregations are shown in rows. The columns list total and per capita GDP in terms of United States dollars for the selected ten years 1970, 1980, 1990 and 2000 through 2006.

Official data and estimates of total and per capita GDP have been converted to United States dollars using prevailing exchange rates. As a rule, the exchange rates used for conversion of national currency data into US dollars are the average market exchange rates (MERs) as published by the International Monetary Fund in the *International Financial Statistics*. These are averages based on the market rates communicated to the IMF by the monetary authority of each member country or end-of-month quotations in the market of the country. MERs generally consist of three types of rates: a) market rates, determined largely by market forces; b) official rates, determined by government authorities; and c) principal rates, for countries maintaining multiple exchange rates arrangements. The preference is always market rates; only when a free market rate is not available is use made of other rates.

For a few countries for which no International Monetary Fund conversion rates were available, the conversion rates used are the average of United Nations operational rates of exchange which were established for accounting purposes and which are applied in official transactions of the United Nations with those countries. These rates are based on official, commercial and/or tourist rates of exchange.

In a number of countries for some of the years, the use of MERs for conversion to US dollars may generate distortions in GDP per capita levels due to a variety of reasons. Among some of them, the use of official rates of exchange reflects government policies that fix conversion factors at unrealistic levels, thus resulting in estimates of GDP in US dollars that are not consonant with the true economic picture. Others suffer from inordinate growth in domestic inflation that movements in exchange rates cannot keep pace with.

Given the reasons mentioned above, the use of MERs may result in excessive fluctuations in the per capita GDP levels in US dollar of a number of countries. Caution is therefore urged when making inter-country comparisons of incomes as expressed in US dollars over time. The comparability over time may be distorted due to excessive fluctuations in exchange rates and domestic inflation movements. In those instances, the present volume uses price-adjusted rates of exchange (PARE) for selected countries and years for which conversion to US dollars led to large distortions in the US dollar levels of per capita GDP when using MERs: including among others Azerbaijan, Democratic People Republic of the Congo, Iraq, Nigeria, Suriname, Syrian Arab Republic, and Vietnam.

PARE rates are calculated by applying GDP deflator changes in National Currency Unit (adjusted for USD price changes) to the year closest to the year in question with a realistic GDP per capita US dollar figure. By default the alternative conversion rate is calculated backwards.

Exampie: Nicaragua's GDP per capita 1987 would be 11000 US dollar, while it was 890 in 1982 and 870 in 1990. Between 1984 and 1989 the country suffered from hyperinflation while MERs were not allowed to adjust adequately to market prices. Using 1990 as a base and applying the PARE rates backwards to 1983 will result in a smooth downward slope of the GDP per capita series with a more plausible value of 970 for 1987, the year in question.

The PARE rate is calculated as

$$PARE_t = \frac{x_{t+n}}{\left(\frac{GDP^{adj}_{deflator,\ t}}{GDP^{adj}_{deflator,\ t+n}} \right)}$$

where x_t is the exchange rate of year t (either IMF Market Exchange Rate, Official Exchange rate or UN Operational Rates), and

$$GDP^{adj}_{deflator,t} = \frac{GDP_{deflator,t}}{GDP^{US}_{deflator,t}}$$

being the GDP deflator adjusted for US price changes. $GDP_{deflator,t}$ the GDP deflator is equal to $\frac{GDP_{curr,t}}{GDP_{const,t}}$ for a given year t.

For inter-country comparisons over time, it would be more appropriate to use the growth rate information based on constant price data, presented in Table 4 of the present volume, which are more indicative of inter-country and intra-grouping comparisons of development trends of total GDP.

Table 1.A. Estimates of Gross Domestic Product in US Dollars at Current Prices by Major Area, Region and Country

B. Percentage Distribution of Main National Accounting Aggregates at Current Prices: Individual Countries or Areas

Description of Analysis in Tables 2 and 3

B. Economic structure expressed in terms of percentage shares of gross domestic product and gross value added.

The tables included in this section of the publication disaggregate GDP and gross value added at current market prices into component parts and express these as percentage shares that outline the different economic structures existing in countries. The years of coverage vary: for countries that have officially reported complete data, percentage shares are listed for the years 1970, 1975, 1980, 1985, 1990, and 1995 through 2006; while, for those countries with very limited data and for which estimates have been made by the Statistics Division of United Nations in order to supplement the official data, percentage shares are only shown for selected years.

GDP estimates according to type of expenditure are shown in Table 2 and gross value added by kind of economic activity in Table 3. Differences in the concepts and coverage in classifications used are indicated in the footnotes. Both tables are designed to provide an overview of the structure of the economic system expressed in current prices.

GDP and gross value added estimates of the countries are expressed in millions of the national currency as indicated in the first column of Table 2 and Table 3, respectively. For tabulation purposes, the values of the GDP and gross value added estimates of some countries prior to a high inflation period might be qualified with unit (u) or thousand (t) to reflect the measurement in a single unit or thousand of units of national currency.

Table 2 features the distribution of GDP based on expenditure components. It shows what portion of income is spent by the household sector or by the government on consumption, what is spent on investment, and what revenues are obtained from exports after deducting the expenditures on imports.

It is noted that in some instances the shares for changes in inventories should be used with caution as countries may also include such items in statistical errors. This problem is apparent in the inordinately high shares of changes in inventories as a percentage of GDP for many consecutive years.

Table 3 presents the shares of the components of gross value added by kind of economic activity (in terms of ISIC 3):

- Agriculture, hunting, forestry and fishing (ISIC A-B);
- Mining and quarrying, Manufacturing, Electricity, gas and water supply (ISIC C-E)
- Manufacturing (ISIC D) as a separate activity)
- Construction (ISIC F)
- Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods, Hotels and restaurants (ISIC G-H)
- Transport, storage and communications (ISIC I)
- Other activities which includes Financial intermediation, Real estate, renting and business activities, Public administration and defence; compulsory social security, Education, Health and social work, Other community, social and personal service activities, Private households with employed persons (ISIC J-P)

The distributive shares of gross value added are presented from each industry component based on the classification by tabulation category of the International Standard Industrial Classification of all Economic Activities[iii]. This table reflects the economic structure of production in the country. For example, it identifies the value-added shares from different sources of production, e.g., oil, gas and other minerals. It also illustrates that many developing countries heavily depend on income mainly originating in agriculture, while relatively more developed countries generate a much larger portion of income in the industrial and services sectors.

Note that the breakdown in shares of GDP at current market prices by type of expenditure in Table 2 might not add-up to 100 per cent due to statistical discrepancies.

[iii] Statistical Papers, Series M, No. 4, Rev. 3 (United Nations publication, Sales No. E.90.XVII.11)

Table 2. Gross Domestic Product by Type of Expenditure: Individual Countries or Areas

Exports and imports of merchandise are recorded on the basis of the crossing of frontiers. No data are available on the basis of changes in the ownership of the goods. Imports and exports are recorded on a cash basis and the imports and exports of oil refineries are not included in the estimates.

16/ Paraguay
(a) Gross fixed capital formation
1980-1995
Includes communications equipment.

(b) Changes in inventories
1980-1995
Includes livestock only.

17/ Suriname
Gross Domestic Product
1970-2006
Excludes the informal sector.

18/ Uruguay
Changes in inventories
1970-2005
Refers to increase in stocks of wool and livestock in the private sector, and to stocks held by the public sector.

19/ Venezuela
Exports of goods and services
Imports of goods and services
1990-2002
Estimates valued at market exchange rate.

20/ Cyprus
Gross Domestic Product
2000-2001, 2005
Provisional Data.

21/ India
(a) Household final consumption expenditure
1970-1993
Refers to expenditure in the domestic market only.

(b) Gross fixed capital formation
1970-1993
Calculated based on type of asset.

22/ Myanmar
Government final consumption expenditure
1970-2006
Item "private final consumption expenditure" is included.

23/ Saudi Arabia
(a) Gross fixed capital formation
1974-1987
Iinciudes other not classified capital goods.

(b) Changes in inventories
1970-1987
Includes Statistical discrepancy.

24/ Timor-Leste
Exports of goods and services
1990-1999
Exports less imports.

25/ Vietnam
Exports of goods and services
1970-2006
Exports less imports.

26/ Austria
(a) Gross fixed capital formation
1970-1975
Includes value added tax on investments of investors not entitled to deduct invoiced value added tax.

(b) Gross fixed capital formation
1973-1975
Includes special investment tax.

(c) Exports of goods and services
Imports of goods and services
1970-1981
The estimates on transit trade are on a net basis.

Notes for Table 3 - Gross Value Added by Kind of Economic Activity

1/ Angola
Wholesale, retail trade, restaurants and hotels
1970-1991
Restaurants and Hotels are included in "Other activities".

2/ Central African Republic
(a) Manufacturing
1980-1985
Includes diamond cutting.

(b) Wholesale, retail trade, restaurants and hotels
1980-1985
Restaurants and Hotels are included in "Other activities".

3/ Democratic Republic of the Congo
Wholesale, retail trade, restaurants and hotels
1970-1986
Restaurants and Hotels are included in "Other activities".

4/ Djibouti
(a) Agriculture, hunting, forestry and fishing
1990-1998
Excludes hunting.

(b) Mining, manufacturing and utilities
1990-1998
Excludes gas.

5/ Gabon
Manufacturing
1972-1989
Includes repair services.

6/ Lesotho
Manufacturing
1970-2006
Includes handicrafts.

7/ Madagascar
Manufacturing
1970-2006
Includes Manufacturing and Electricity, gas and water supply.

8/ Malawi
Agriculture, hunting, forestry and fishing
1970-1986
Includes all non-monetary output.

9/ Mali
Manufacturing
1970-1992
Includes handicrafts.

10/ Mauritius
Other activities
1970-1975
FISIM is netted out of Financial intermediation, real estate, renting and business activities.

11/ Morocco
Mining, manufacturing and utilities
1970-2006
Petroleum refining is included in Electricity, gas and water supply; Excludes gas

12/ Namibia
Other activities
1970-1992
FISIM is netted out of Financial intermediation, real estate, renting and business activities.

13/ Seychelles
Manufacturing
1980-2006
Includes mining and handicrafts.

14/ Tunisia
(a) Mining, manufacturing and utilities
1970-2005
Excludes gas.

(b) Wholesale, retail trade, restaurants and hotels
1970-2002
Restaurants and Hotels are included in "Other activities".

15/ UR of Tanzania (mainland)
Manufacturing
1970-2006
Includes handicrafts.

16/ Zimbabwe
Mining, manufacturing and utilities
1970-2006
Excludes gas.

17/ Bermuda
Construction
1970-2006
Includes Mining and quarrying.

18/ Aruba
(a) Agriculture, hunting, forestry and fishing
1970-2006
Includes Mining and quarrying.

(b) Manufacturing
1970-2006
Excludes oil refining.

19/ Bahamas
(a) Agriculture, hunting, forestry and fishing
1989-1995
Excludes hunting and forestry.

(b) Mining, manufacturing and utilities
1989-1995
Excludes gas.

20/ Barbados
(a) Mining, manufacturing and utilities
1970-1973
Includes Transport, storage and communications.

(b) Wholesale, retail trade, restaurants and hotels
1970-1973
Restaurants and Hotels are included in "Other activities".

21/ Brazil
Wholesale, retail trade, restaurants and hotels
1992-2006
Restaurants and Hotels are included in "Other activities".

22/ British Virgin Islands
Wholesale, retail trade, restaurants and hotels
1970-1977
Includes boat charter.

23/ Cayman Islands
Other activities
1972, 1983-2006
Excludes banks and insurance companies registered in Cayman Islands but with no physical presence in the Islands.

24/ Dominican Republic
(a) Manufacturing
1970-1993
Includes handicrafts and repair services.

(b) Wholesale, retail trade, restaurants and hotels
1970-1993
Restaurants and Hotels are included in "Other activities".

25/ Ecuador
(a) Mining, manufacturing and utilities
1970-1979
Excludes petroleum refining.

(b) Mining, manufacturing and utilities
1980-2006
Includes petroleum refining.

26/ El Salvador
(a) Wholesale, retail trade, restaurants and hotels
1970-1989
Restaurants and Hotels are included in "Other activities".

(b) Gross value added
1997-2004
Financial intermediation services indirectly measured (FISIM) is distributed to uses.

27/ Guyana
(a) Manufacturing
1970-2001
Includes Electricity, gas and water supply.

(b) Construction
1970-2001
Includes engineering and sewage services.

(c) Wholesale, retail trade, restaurants and hotels
1970-2001
Restaurants and Hotels are included in "Other activities".

28/ Honduras
Wholesale, retail trade, restaurants and hotels
1970-1979
Restaurants and Hotels are included in "Other activities".

29/ Jamaica
Wholesale, retail trade, restaurants and hotels
1995-2005
Does not include repair of motor vehicles and motorcycles. Repairs to personal and household goods are included in "Other activities".

30/ Mexico
Mining, manufacturing and utilities
1970-2006
Basic petroleum manufacturing is included in Mining and quarrying.

31/ Netherlands Antilles
(a) Agriculture, hunting, forestry and fishing
1970-1995
Includes Mining and quarrying.

(b) Manufacturing
1996-2003
Includes Mining and quarrying.

32/ Paraguay
Wholesale, retail trade, restaurants and hotels
1970-1995
Includes Financial intermediation, except insurance and pension funding. Restaurants and Hotels are included in "Other activities".

33/ Puerto Rico
Construction
1970-2002
Refers to contract construction only.

34/ Trinidad and Tobago
Wholesale, retail trade, restaurants and hotels
1980-1999
Hotels and Guest Houses are included in "Other activities".

35/ Urúguay
Mining, manufacturing and utilities
1970-1986
Includes sewage services.

36/ Venezuela
(a) Mining, manufacturing and utilities
1970-2002
Excludes gas.

(b) Manufacturing
1970-2002
Includes petroleum refining.

37/ Iran (Islamic Republic of)
Mining, manufacturing and utilities
1970-2006
Includes oil production.

38/ Israel
Manufacturing
1970-2006
Includes Mining and quarrying.

39/ Kazakhstan
Manufacturing
1990-1996
Includes Mining and quarrying, and Electricity, gas and water supply.

40/ Kuwait
Mining, manufacturing and utilities
1980-1995
Beginning 1980, the cost of fuel (natural gas, crude petroleum and gas-oil) consumed in the production of electricity and water has been taken into account as intermediate consumption in estimating the value added of Electricity, gas and water supply.

41/ Kyrgyzstan
Manufacturing
1990-1999
Includes Mining and quarrying, and Electricity, gas and water supply.

42/ Lebanon
(a) Manufacturing
1970-1993, 1996-2006
Includes Mining and quarrying.

(b) Manufacturing
1994-1995
Includes Mining and quarrying, and Electricity, gas and water supply.

(b) Wholesale, retail trade, restaurants and hotels
1997-2004
Restaurants and Hotels are included in "Other activities".

43/ Myanmar
(a) Mining, manufacturing and utilities
1970-1996
Gas and Water are included in "Other activities".

(b) Wholesale, retail trade, restaurants and hotels
1970-1996
Restaurants and Hotels are included in "Other activities".

44/ Pakistan
Other activities
1970-2006
Restaurants and Hotels are included in "Other activities".

45/ Philippines
Wholesale, retail trade, restaurants and hotels
1975-1991
Restaurants and Hotels are included in "Other activities".

46/ Tajikistan
Manufacturing
1990-2006
Includes Mining and quarrying, and Electricity, gas and water supply.

47/ Timor-Leste
Mining, manufacturing and utilities
1993-1997
Refers to non-oil and gas mining only, excludes Quarrying. Excludes gas.

48/ Turkmenistan
Manufacturing
1990-2006
Includes Mining and quarrying, and Electricity, gas and water supply.

49/ Uzbekistan
Manufacturing
1990-2006
Includes Mining and quarrying, and Electricity, gas and water supply.

50/ Albania
Wholesale, retail trade, restaurants and hotels
1970-1995
Refers to Other Services.

51/ Belgium
(a) Manufacturing
1970-1975
Specifically the manufacture of fabricated metal products, machinery and equipment includes garages.

(b) Wholesale, retail trade, restaurants and hotels
1970-1975
Restaurants and Hotels are included in "Other activities".

(c) Wholesale, retail trade, restaurants and hotels
1975-1997
Includes repairs and recovery.

52/ Croatia
Mining, manufacturing and utilities
1990-1994
Excludes electricity and gas.

53/ Lithuania
(a) Manufacturing
1990-1991
Includes Mining and quarrying, and Electricity, gas and water supply.

(b) Manufacturing
1992-1994
Includes Mining and quarrying.

54/ Poland
Gross Value Added
1970-2006
Financial intermediation services indirectly measured (FISIM) is distributed to uses.

55/ Republic of Moldova
Manufacturing
1990-1992
Includes Mining and quarrying, and Electricity, gas and water supply.

56/ Romania
Manufacturing
1970-1988
Includes Mining and quarrying, and Electricity, gas and water supply.

57/ Russian Federation
Manufacturing
1990-2001
Includes Mining and quarrying, and Electricity, gas and water supply.

58/ The former Yugoslav Republic of Macedonia
Manufacturing
1990-2006
Includes Mining and quarrying.

59/ Australia
(a) Mining, manufacturing and utilities
1970-1996
Includes sewage services.

(b) Wholesale, retail trade, restaurants and hotels
1970-1996
Restaurants and Hotels are included in "Other activities".

(c) Gross value added
1970-1992
Financial intermediation services indirectly measured (FISIM) is distributed to uses.

60/ French Polynesia
Manufacturing
1970-1993
Includes manufacturing of energy-generating products.

61/ New Caledonia
Other activities
1970-1996
Restaurants and Hotels are included in "Other activities".

62/ Papua New Guinea
Other activities
1970-1976, 1978-1991
Restaurants and Hotels are included in "Other activities".

63/ Vanuatu
Manufacturing
1970-2006
Includes Mining and quarrying.

C. Growth Rates of Main National Accounting Aggregates at Constant Prices of 1990

Description of Analysis in Tables 4, 5 and 6

C. Economic development expressed in rates of growth in real terms of gross domestic product and its components.

Tables 4 to 6 reflect trends in economic development expressed as rates of real growth of GDP and its components for the world, developed, developing and transition economies, as well as for individual countries or areas during the period 1970-2006, with 1990 as the base year.

The figures shown in these tables are computed as geometric mean of annual rates of growth expressed in percentages for the years and periods of years indicated. The growth rates for the individual countries are based on the estimates of gross domestic product (GDP) at constant 1990 prices and their components by type of expenditure and by kind of economic activity. Table 4 presents growth rates of total GDP during the period 1970-2006, while Tables 5 and 6 show growth rates of its principal components by expenditure and by kind of economic activity, respectively, during the period 1970-2005.

The growth rates presented in the tables, however, may not be fully consistent between countries and regions. Their comparability could be affected by the wide variety of base years that are used by countries in the compilation of GDP at constant prices.

The first column of the three tables lists individual countries and their aggregation into world, regions and level of economic development totals. The next column in each table highlights the base year weights in 1990 of GDP, representing for individual countries' and sub-regions' weights of their GDP as a percentage of the region and those for the regions and economic development groupings, as a percentage of the world. In Tables 5 and 6, an additional third column presents, respectively, the shares of each expenditure and industry components as a percentage of GDP in 1990. The next three columns of the tables contain the growth rates of GDP during the average periods 1970-1979, 1980-1989 and 1990-1999. The remaining columns show the annual rates of growth over the preceding year starting from 2001 through 2006 for Table 4 and 2000 through 2005 for Tables 5 and 6.

Table 5 includes the rates of growth of each expenditure component of GDP as follows: (a) household final consumption expenditure; (b) general government final consumption expenditure; (c) gross fixed capital formation; (d) exports of goods and services; and (e) imports of goods and services.

In deriving the growth rates of the individual expenditure categories by regions and for the three economic groups of the developed, developing and transition economies, expenditures expressed in US dollars for the base year 1990 were used as weights. Global and regional growth rates for each of the expenditure categories were calculated by adding the expenditures of individual countries in US dollars that were derived by extrapolating the 1990 current price figures by the corresponding growth at constant prices. The expenditure totals of countries expressed in 1990 US dollars were first aggregated according to the economic development region that each belongs and then added up to arrive at the global level.

The country indicators utilized in the calculation were derived principally from official estimates, in national currency, of gross domestic product by type of expenditure at constant prices. For some countries, the indicator series were obtained by linking together separate series covering the full period.

Table 6 lists the average rates of growth of each economic activity component of GDP: (a) agriculture, hunting, forestry and fishing, (b) mining, manufacturing and utilities, (c) manufacturing, (d) construction, (e) wholesale and retail trade, restaurants and hotels (f) transport, storage and communication and (g) other activities.

The calculation of the regional and world growth rates of the separate economic activity categories in table 6 was done in a similar manner as was described above in table 5 for the expenditure components. Value-added data at constant prices for each economic activity group were first compiled from appropriate series of indicators for all countries concerned

and combined to form regional totals after conversion to 1990 United States dollars. These were then combined into separate totals for developed, developing and transition economies.

The country indicators utilized in the calculation were derived from estimates of gross domestic product at constant prices. The basic data were generally absolute figures of product expressed in national currency units; in a limited number of cases, indices computed by the countries themselves were used directly. For some countries, the indicators' series were obtained by linking together separate series covering the full period.

Various methods were utilized to obtain indicators for countries where constant price estimates of gross domestic product by kind of economic activity were not available. For example, the national indices of the quantum of production were employed for agriculture, total industrial activity (mining, manufacturing and utilities), manufacturing and, in some cases, for construction. In the absence of a national series for total industrial activity or manufacturing, use was made of indicators based on the world index of industrial production of the Statistics Division of the United Nations Secretariat. In other economic activities, such as agriculture and construction use was made of indices compiled by the World Bank, Asian Development Bank and other international and regional organizations. In the remaining cases, estimates from unofficial sources were utilized or estimated from indicator series prepared by the Statistics Division, generally by deflating related series at current prices with suitable price indices.

The country and regional weights used in the derivation of growth rates of expenditure and activity components of GDP are based on 1990 values expressed in US dollars of that year. In making the conversion and subsequent aggregation to calculate the growth rates, the same exchange rate for 1990 were used for the derivation of growth rates for total GDP (Table 4) as were used in the derivation of the growth rates of its expenditure and activity components shown in Tables 5 and 6.

Notes for Table 5.A - Household final consumption expenditure

1/ Malawi
1980-1996
Includes Changes in inventories.

2/ Colombia
1970-1994
Excludes direct purchases abroad by resident households and direct purchases in the domestic market by non-resident households.

Notes for Table 5.B - General government final consumption expenditure

1/ Argentina
1980-1986
Included in Household Final Consumption Expenditure.

2/ Czech Republic
1990-1994
Includes consumption expenditure of the private non-profit institutions serving households.

Notes for Table 5.C - Gross fixed capital formation

1/ Paraguay
1980-1996
Includes communications equipment.

2/ Austria
(a) 1970-1976
Includes value added tax on investments of investors not entitled to deduct invoiced value added tax.

(b) 1973-1975
Includes special investment tax.

3/ Australia
1970-1996
Livestock is excluded from Gross Fixed Capital Formation.

Notes for Table 5.D - Exports of goods and services

1/ Botswana
1974-1988
Exports of goods only.

2/ Venezuela
1990-2002
Estimates valued at market exchange rate.

3/ Timor-Leste
1990-2005
Exports less imports.

4/ Vietnam
1970-2005
Exports less imports.

5/ Austria
1970-1976
The estimates on transit trade are on a net basis.

Table 5.E. Average Rates of Growth of Gross Domestic Product by Expenditure - Imports of Goods and Services

Notes for Table 5.E - Imports of goods and services

1/ Botswana
1974-1988
Includes imports of goods plus net imports of services.

2/ Venezuela
1990-2002
Estimates valued at market exchange rate.

3/ Austria
1970-1976
The estimates on transit trade are on a net basis.

Table 6.A. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Agriculture, Hunting, Forestry and Fishing

Notes for Table 6.A - Agriculture, hunting, forestry and fishing

1/ Djibouti
1990-1998
Excludes hunting.

2/ Bahamas
1989-1995
Excludes hunting and forestry.

Table 6.B. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Mining, Manufacturing and Utilities

Notes for Table 6.B - Mining, manufacturing and utilities

1/ Djibouti
1990-1998
Excludes gas.

2/ Zimbabwe
1970-2005
Excludes gas.

3/ Morocco
1970-2005
Petroleum refining is included in Electricity, gas and water supply; Excludes gas.

4/ Tunisia
1970-2005
Excludes gas.

5/ Bahamas
1989-1995
Excludes gas.

6/ Mexico
1970-2005
Basic petroleum manufacturing is included in Mining and quarrying.

7/ Ecuador
(a) 1970-1979
Excludes petroleum refining.

(b) 1980-2005
Includes petroleum refining.

8/ Uruguay
1970-1986
Includes sewage services.

9/ Venezuela
1970-2002
Excludes gas.

10/ Iran (Islamic Republic of)
1970-2005
Includes oil production.

11/ Myanmar
1970-1996
Gas and Water are included in "Other activities".

12/ Timor-Leste
1993-1997
Refers to non-oil and gas mining only, excludes Quarrying; Excludes gas

13/ Kuwait
1980-1989; 1992-1999
Beginning 1980, the cost of fuel (natural gas, crude petroleum and gas-oil) consumed in the production of electricity and water has been taken into account as intermediate consumption in estimating the value added of Electricity, gas and water supply.

14/ Australia
1970-2003
Includes sewage services.

Notes for Table 6.C - Manufacturing

1/ Madagascar
1970-2005
Includes Electricity, gas and water supply.

2/ Seychelles
1980-2005
Includes mining and handicrafts.

3/ United Republic of Tanzania
1970-2005
Includes handicrafts.

4/ Sudan
1970-1998
Includes mining and quarrying.

5/ Lesotho
1970-2005
Includes handicrafts.

6/ Mali
1970-1992
Includes handicrafts.

7/ Dominican Republic
1970; 1980-1993
Includes handicrafts and repair services.

8/ Guyana
1970-2001
Includes Electricity, gas and water supply.

9/ Venezuela
1970-2002
Includes petroleum refining.

10/ Kazakhstan
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

11/ Kyrgyzstan
1990-1999
Includes Mining and quarrying, and Electricity, gas and water supply.

12/ Tajikistan
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

13/ Turkmenistan
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

14/ Uzbekistan
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

15/ Azerbaijan
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

16/ Israel
1970-2005
Includes Mining and quarrying.

17/ Lebanon
1970-2005
Includes Mining and quarrying.

18/ Republic of Moldova
1990-1992
Includes Mining and quarrying, and Electricity, gas and water supply.

19/ Romania
1970-1988
Includes Mining and quarrying, and Electricity, gas and water supply.

20/ Russian Federation
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

21/ Lithuania
1990-1994
Includes Mining and quarrying.

22/ Croatia
1990-2005
Includes Mining and quarrying, and Electricity, gas and water supply.

23/ TFYR Macedonia
1990-2005
Includes Mining and quarrying.

24/ Belgium
1970-1975
Specifically the manufacture of fabricated metal products, machinery and equipment includes garages.

25/ Vanuatu
1970-2005
Includes Mining and quarrying.

26/ French Polynesia
1976-1979
Includes manufacturing of energy-generating products.

Notes for Table 6.D - Construction

1/ Bermuda
1970-2005
Includes Mining and quarrying.

2/ Puerto Rico
1970-2002
Refers to contract construction only.

3/ Guyana
1970-2001
Includes engineering and sewage services.

Table 6.E. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Wholesale and Retail Trade, Restaurants and Hotels

Notes for Table 6.E - Wholesale, retail trade, restaurants and hotels

1/ Angola
1970-1991
Restaurants and Hotels are included in "Other activities".

2/ Democratic Republic of the Congo
1970-1986
Restaurants and Hotels are included in "Other activities".

3/ Tunisia
1970-2002
Restaurants and Hotels are included in "Other activities".

4/ Botswana
1974-1980
Import duties is included in Wholesale and retail trade.

5/ Cuba
1985-1986
Includes import duties.

6/ Dominican Republic
1970-1993
Restaurants and Hotels are included in "Other activities".

7/ Jamaica
1995-2005
Repairs to personal and household goods are included in "Other activities".

8/ Trinidad and Tobago
1987-1997
Hotels and Guest Houses are included in "Other activities".

9/ El Salvador
1970-1979
Restaurants and Hotels are included in "Other activities".

10/ Honduras
1970-1979
Restaurants and Hotels are included in "Other activities".

11/ Guyana
1970-2001
Restaurants and Hotels are included in "Other activities".

12/ Paraguay
1970-1995
Includes Financial intermediation, except insurance and pension funding. Restaurants and Hotels are included in "Other activities".

13/ Myanmar
1970-1996
Restaurants and Hotels are included in "Other activities".

14/ Philippines
1980-1991
Restaurants and Hotels are included in "Other activities".

15/ Belgium

(a) 1970-1975

Includes import duties.

(b) 1980-1997

Includes repairs and recovery.

Table 6.F. Average Rates of Growth of Gross Domestic Product by Kind of Economic Activity - Transport, Storage and Communication

Notes for Table 6.G - Other activities

1/ Mauritius
1970-1991
FISIM is netted out of Financial intermediation, real estate, renting and business activities.

2/ Namibia
1970-1989
FISIM is netted out of Financial intermediation, real estate, renting and business activities.

3/ Cayman Islands
1972, 1983-2005
Excludes banks and insurance companies registered in Cayman Islands but with no physical presence in the Islands.

4/ Pakistan
1970-2005
Includes restaurants and hotels.

5/ Papua New Guinea
1986-1991
Includes restaurants and hotels.

D. Implicit Price Deflators of Gross Domestic Product: Individual Countries or Areas (Index Numbers 1990 = 100)

Description of Analysis In Table 7

D. Price development expressed in terms of indices of implicit price deflators of gross domestic product

In this final section of the publication, an attempt is made to present a disaggregation of economic development by analyzing the movements of prices and exchange rates in relation to overall economic growth. The period coverage includes the years 1970, 1975, 1980, 1985, and 1990 through 2006.

In Table 7, GDP indices based on current prices expressed in US dollars and national currencies are shown in columns 1 and 2. The annual changes of GDP in volume terms are reflected in column 3, where the indices are based on the movement of GDP at constant prices. Column 4 presents indices of price changes of GDP expressed in national currency and column 5 includes indices of price changes of GDP in US dollars. The price indices in columns 4 and 5 are obtained by dividing, respectively, the indices of GDP at current prices in national currencies and in US dollars shown in columns 1 and 2, by the volume indices presented in column 3. Column 6 provides an implied development in exchange rates derived either by dividing the GDP deflators in national currency (column 5) by the GDP deflators converted in United States dollar listed in column 4, or by dividing the GDP indices expressed in national currencies by the United States dollar indices listed in column 2 and 1, respectively.

Although column 6 of the table reflects an implied movement of domestic exchange rates vis-à-vis the US dollar from the base year 1990, it does not illustrate the extent to which these changes have affected economic growth. For this effect, it is necessary to relate exchange rate movements in column 6 with price changes in columns 4 and 5 in order to determine whether adjustments in exchange rates have been sufficient to reflect inflationary pressures in the economy.

The data as presented in the table reflect situations in four groups of countries. In the first group, the movement of exchange rates as calculated in column 6 is exactly the same as the movement of domestic prices reflected in the price indices presented in column 5. For these countries, there is no movement over time of the price index in terms of US dollars that is presented in column 4. Thus, the price index in the latter column is always close to 100 for those countries. In this case the growth of GDP in US dollars is not affected by domestic price changes as all domestic price changes have been eliminated through the movement of the exchange rate .

A second group of countries are those having fixed exchange rates. There is no movement of the exchange rates in column 6 i.e., the index always remains 100. In this case all domestic inflation is reflected in the growth of GDP in US dollar terms.

In a third group of countries, the exchange rate index in column 6 is not fixed but lags behind the movement of domestic prices as reflected in the price indices presented in column 5. For this group of countries, the price index in terms of US dollars as presented in column 4 is higher than 100 and the countries' domestic inflation thus affects the growth of GDP in US dollars, though not to the extent that this was the case for countries with a fixed exchange rate. Only some of the domestic inflation is eliminated from the growth of GDP in US dollars through the movement of the exchange rates.

There is a fourth group of countries where the exchange rates overreact to the movements of prices in the domestic economy. For these countries, the index of exchange rates in column 6 is much higher than the price index in terms of national currency in column 5. This case implies that the price index in terms of US dollars as shown in column 4 is lower than 100 and this has the effect that the growth of GDP in terms of US dollars is lower when compared in terms of national currency.

Again, a note of caution is advised when using the price index information presented in the table. For one, the deflators shown may not be fully comparable between countries because a wide variety of methods had been applied to obtain the data on price movements. To cite an example, for some countries, explicit price indices were used directly in the calculations

while for other countries implicit price indices were derived by dividing volume indices into indices of current price development of GDP. Likewise, even as the index numbers are shown for a common base year 1990 = 100, GDP data at constant prices used in the calculations actually have been compiled according to different original weight base periods.

Please be noted that the "-" symbol has been employed due to the very small magnitude of the data.

Table 7. Implicit Price Deflators of Gross Domestic Product in US Dollars and in National Currency

(Index numbers 1990 = 100)
