Foreword

The 2007 edition of “International Trade Statistics” includes significant changes in the design and content of the publication. The new “International Trade Statistics” provides a more user-friendly presentation of statistical tables, and covers new fields, in particular to satisfy the increasing demand for data on international trade in services. Throughout the publication users are guided by highlighted messages and reference material, including explanations on the data in relation to definitions, methodology, and so on.

More detailed data on individual services sectors have been included. This information, based on balance of payments statistics, is also shown by origin and destination of flows for selected economies. For the first time, information on sales of foreign affiliates relating to trade in services (i.e. GATS mode 3, commercial presence) has also been included. However, users should interpret the available information with some caution. Despite recent improvements in international trade in service statistics, quality and worldwide comparability and availability of disaggregated information still remain a concern for trade statisticians. As part of the process of the continuing improvement of the publication, the Secretariat is cooperating with the international statistical community to resolve methodological issues and build appropriate statistical capacities at national level.

Our special effort in the services field does not reduce the statistical coverage of merchandise trade, which under the new design, remains as comprehensive as in previous years. The publication includes five parts. Chapter I describes world trade trends, and is followed by two Chapters focusing on trade in merchandise and trade in commercial services respectively. Each of these three chapters presents detailed analytical tables, and they are introduced with a small textual description highlighting recent trade developments and issues of particular interest for readers. Chapter IV is dedicated to Metadata (sources and definitions of the data) which help better understand the contents of the trade statistics presented in this publication. Finally detailed time series tables are provided in the Appendix tables. This information is also available online at http://www.wto.org/english/res_e/statis_e/statis_e.htm.

If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the International Trade Statistics Section (statistics@wto.org).

Acknowledgements

This publication has been prepared under the general direction of Hubert Escaith, Chief Statistician. Andreas Maurer was responsible for the coordination of the statistical report, and Vuddha Meach supervised the overall table, chart and map production, with the assistance of Arti Bhatia, Aishah Colautti, Ying Yan, and Amanuel Zerihoun. The statistical research and data compilation were conducted by Barbara d'Andrea-Adrian, Christophe Degain, Joscelyn Magdeleine, Yann Marcus, Coleman Nee, Ninez Piezas-Jerbi and Bekele Tamenu.

Acknowledgements are due to the multilateral and national institutions for providing statistics and the “International Trade Statistics” users for their comments on previous editions. For this special issue, the International Trade Statistics Section wishes to thank colleagues for their comments and suggestions during the redesign of this publication. For detailed statistical sources used in this report, see Chapter IV Metadata.

Thanks are also due to the Information and Media Relations Division and in particular WTO's printing facilities for the production, and the French and Spanish translators in the Language Services and Documentation Division for rendering the report in the WTO's other official languages.

Table of contents

I. WORLD TRADE DEVELOPMENTS – WORLD TRADE IN 2006

Highlights	1
1. Overview.....	7
2. Trade by region.....	8
3. Leading traders.....	12
4. Bilateral trade of leading traders.....	16
5. Regional Trade Agreements.....	23
6. Least-developed countries.....	30
7. Foreign affiliates trade in services.....	34

II. MERCHANDISE TRADE BY PRODUCT

Highlights	37
1. Overview.....	43
2. Agricultural products.....	48
3. Fuels and mining products.....	54
4. Manufactures.....	58
4.1 Iron and steel.....	65
4.2 Chemicals.....	68
4.3 Office and telecom equipment.....	71
4.3.1 EDP equipment.....	77
4.3.2 Telecommunications equipment.....	82
4.3.3 Integrated circuits and electronic components.....	87
4.4 Automotive products.....	92
4.5 Textiles.....	97
4.6 Clothing.....	104

III. TRADE IN COMMERCIAL SERVICES BY CATEGORY

Highlights	111
1. Overview.....	117
2. Transportation services.....	118
3. Travel.....	123
4. Other commercial services.....	128
4.1 Communications services.....	133
4.1.1 Telecommunications services.....	134
4.2 Construction.....	135
4.3 Insurance services.....	137
4.4 Financial services.....	139

4.5	Computer and information services.....	141
4.5.1	Computer services.....	143
4.6	Royalties and licence fees.....	144
4.7	Other business services.....	146
4.8	Personal, cultural and recreational services.....	149
4.8.1	Audiovisual services.....	151

IV. METADATA

1.	Composition of geographical and economic groupings.....	153
2.	Definitions and methods.....	157
2.1	Merchandise trade.....	157
2.1.1	Exports and imports.....	157
2.1.2	Products.....	157
2.1.3	World trade network.....	159
2.1.4	Merchandise trade of selected major traders by product, region and major trading partner (Appendix tables A18 to A28).....	159
2.1.5	Merchandise trade in balance of payments statistics.....	159
2.2	Trade in commercial services.....	160
2.2.1	Trade in commercial services between residents and non residents of an economy....	161
2.2.2	Foreign affiliates trade in services statistics.....	163
2.3	Other definitions and methods.....	163
2.3.1.	Annual changes.....	163
2.3.2	Prices.....	163
2.3.3	World merchandise trade indices.....	163
2.3.4	World production.....	163
2.3.5	World gross domestic product.....	164
2.3.6	Re-exports and reimports.....	164
3.	Specific notes for selected economies.....	165
3.1	Merchandise trade statistics of the European Union.....	165
3.2	Egypt's export processing zone.....	165
3.3	Trade of South Africa with SACU (South African Customs Union).....	165
3.4	Major breaks in data continuity of merchandise trade.....	165
3.5	Trade in insurance services of the United States.....	166
3.6	Travel exports and transportation services exports and imports of Japan.....	166
3.7	Trade in other commercial services of India.....	166
3.8	Trade in commercial services of United Arab Emirates.....	166
4.	Statistical sources.....	167

List of tables and charts

I. WORLD TRADE DEVELOPMENTS – WORLD TRADE IN 2006

Highlights

1. Overview

Table I.1	Growth in the volume of world merchandise exports and production, 2000-2006.....	7
Table I.2	Growth in the volume of world merchandise trade by selected region, 2000-2006.....	7

2. Trade by region

Table I.3	World merchandise trade and trade in commercial services by region, 2006.....	8
Table I.4	Intra- and inter-regional merchandise trade, 2006.....	9
Table I.5	Shares of regional trade flows in world merchandise exports, 2006.....	9
Table I.6	World merchandise exports by region and selected economy, 1948, 1953, 1963, 1973, 1983, 1993, 2003 and 2006.....	10
Table I.7	World merchandise imports by region and selected economy, 1948, 1953, 1963, 1973, 1983, 1993, 2003 and 2006.....	11

3. Leading traders

Table I.8	Leading exporters and importers in world merchandise trade, 2006.....	12
Table I.9	Leading exporters and importers in world merchandise trade (excluding intra-EU (25) trade), 2006.....	13
Table I.10	Leading exporters and importers in world trade in commercial services, 2006.....	14
Table I.11	Leading exporters and importers in world trade in commercial services (excluding intra-EU (25) trade), 2006.....	15

4. Bilateral trade of leading traders

Table I.12	Merchandise trade of Canada by region and economy, 2006.....	16
Table I.13	Merchandise trade of the United States by region and economy, 2006.....	17
Table I.14	Merchandise trade of the European Union (25) by region and economy, 2006.....	18
Table I.15	Merchandise trade of Japan by region and economy, 2006.....	19
Table I.16	Trade in commercial services of selected economies by origin and destination, 2005.....	20

5. Regional Trade Agreements

Table I.17	Merchandise exports of NAFTA countries by destination, 1990-2006.....	23
Table I.18	Merchandise exports of MERCOSUR countries by region, 1990-2006.....	24
Table I.19	Merchandise imports of MERCOSUR countries by region, 1990-2006.....	25
Table I.20	Merchandise exports of Andean Community countries by region, 1990-2006.....	26
Table I.21	Merchandise imports of Andean Community countries by region, 1990-2006.....	27
Table I.22	Merchandise exports of ASEAN countries by region, 1990-2006.....	28
Table I.23	Merchandise imports of ASEAN countries by region, 1990-2006.....	29

6. Least-developed countries

Table I.24	Ratio of exports of goods and commercial services to GDP of least-developed countries, 2005.....	30
Table I.25	Merchandise exports and imports of least-developed countries by selected country grouping, 2006.....	31
Table I.26	Imports of agricultural products, fuels and manufactures of the European Union (25), Asia and North America from least-developed countries, 2006.....	32
Table I.27	Exports of commercial services of least-developed countries by category, 2005.....	33

7. Foreign affiliates trade in services

Table I.28	Sales by foreign affiliates of resident companies – affiliates located abroad primarily engaged in services activities (outward FATS), 2003 and 2004.....	34
Table I.29	Sales by affiliates of foreign companies – resident affiliates primarily engaged in services activities (inward FATS), 2003 and 2004.....	35

II. MERCHANDISE TRADE BY PRODUCT

Highlights

1. Overview

Table II.1	World merchandise exports by product, 2006	43
Table II.2	World merchandise trade by major product group and region, 2006	44
Table II.3	Share of agricultural products in trade in total merchandise and in primary products by region, 2006	45
Table II.4	Share of fuels and mining products in trade in total merchandise and in primary products by region, 2006	45
Table II.5	Share of fuels in trade in total merchandise and in primary products by region, 2006	45
Table II.6	Share of manufactures in total merchandise trade by region, 2006	45
Table II.7	Share of iron and steel in trade in total merchandise and in manufactures by region, 2006	46
Table II.8	Share of chemicals in trade in total merchandise and in manufactures by region, 2006.....	46
Table II.9	Share of office and telecom equipment in trade in total merchandise and in manufactures by region, 2006	46
Table II.10	Share of automotive products in trade in total merchandise and in manufactures by region, 2006.....	46
Table II.11	Share of textiles in trade in total merchandise and in manufactures by region, 2006	47
Table II.12	Share of clothing in trade in total merchandise and in manufactures by region, 2006.....	47

2. Agricultural products

Table II.13	Exports of agricultural products by region, 2006.....	48
Table II.14	Imports of agricultural products of selected economies by region and supplier, 2006	49
Table II.15	Leading exporters and importers of agricultural products, 2006	51
Table II.16	Exports of agricultural products of selected economies, 1990-2006	52
Table II.17	Imports of agricultural products of selected economies, 1990-2006....	53

3. Fuels and mining products

Table II.18	Exports of fuels and mining products by region, 2006.....	54
Table II.19	Imports of fuels of selected economies by region and supplier, 2006	55
Table II.20	Imports of fuels of selected economies, 1990-2006	56
Table II.21	Imports of fuels of selected regions and economies from the Middle East, 2000 and 2006	57

4. Manufactures

Table II.22	Exports of manufactures by region, 2006.....	58
Table II.23	Trade in manufactures of the United States, the European Union (25) and China by region, 2006	59
Table II.24	Imports of manufactures of selected economies by region and supplier, 2006	60
Table II.25	Leading exporters and importers of manufactures, 2006.....	62
Table II.26	Exports of manufactures of selected economies, 1990-2006	63
Table II.27	Imports of manufactures of selected economies, 1990-2006	64

4.1 Iron and steel

Table II.28	Exports of iron and steel by principal region, 2006.....	65
Table II.29	Imports of iron and steel of the European Union (25) and the United States by region and supplier, 2006.....	66
Table II.30	Leading exporters and importers of iron and steel, 2006	67

4.2 Chemicals

Table II.31	Exports of chemicals by principal region, 2006.....	68
Table II.32	Leading exporters and importers of chemicals, 2006.....	69
Table II.33	Leading exporters and importers of pharmaceuticals, 2006.....	70

4.3 Office and telecom equipment

Table II.34	Exports of office and telecom equipment by principal region and economy, 2006	71
Table II.35	Imports of office and telecom equipment of selected economies by region and supplier, 2006.....	72
Table II.36	Leading exporters and importers of office and telecom equipment, 2006	74
Table II.37	Exports of office and telecom equipment of selected economies, 1990-2006	75
Table II.38	Imports of office and telecom equipment of selected economies, 1990-2006.. ..	76

4.3.1 EDP equipment

Table II.39	Imports of EDP and office equipment of selected economies by region and supplier, 2006.....	77

I. WORLD TRADE DEVELOPMENTS

►► Merchandise trade and GDP

World real merchandise trade grows faster than output

In 2006, the volume of world merchandise trade grew by 8 per cent while world gross domestic product recorded a 3.5 per cent increase. This confirms the trend of world merchandise trade growing by twice the annual growth rate of output since 2000.

The Highlights

IN THIS CHAPTER:

- Merchandise trade and GDP
- Merchandise trade by region
- Merchandise trade by product
- Regional trade flows
- Trade concentration
- Regional trade patterns in merchandise
- World trade in merchandise and commercial services
- Trade in commercial services by category
- Foreign affiliates trade in services

The strong 2006 increase in the volume of merchandise trade is backed by a robust recovery of European exports, which increased by 3 percentage points to 7 per cent. The real merchandise exports of the United States grew above the world average, at 11 per cent, and China's trade expanded by 22 per cent. Below world average export growth rates were recorded for South and Central America and the Caribbean (2.5 per cent), the Commonwealth of Independent States (6 per cent), and Africa (3 per cent). Exports of the Middle East stagnated in 2006.

►► Merchandise trade by region

Asia and Europe recorded higher merchandise export growth than import growth in 2006

In 2006, merchandise exports in volume terms were sustained by robust demand, although patterns differed among regions. Exports from North America and Asia grew faster than imports to the region. Asia's exports grew by 13 per cent while imports were up 9 per cent. Europe recorded balanced export and import growth of 7 per cent. For South and Central America, the Commonwealth of Independent States, Africa and the Middle East, import growth largely exceeded that of exports. This pattern is linked to more favourable terms of trade due to increases in commodity prices in the past few years.

Since 2000, import growth has been higher than export growth in North America. This trend was shared by the Commonwealth of Independent States (CIS), the Middle East and Africa which all recorded stronger import than export growth. Import growth was particularly strong in the CIS area during the period 2000 to 2006, where on average imports increased annually more than twice as fast as exports (17 per cent and 8 per cent respectively). While South and Central America's import and export growth rates were almost balanced, Europe and Asia are the only regions where export growth has exceeded import growth since 2000, for Asia by almost one fifth.

Chart I.2

Growth in the volume of merchandise trade and GDP by region, 2000-2006

(Annual percentage change)

Merchandise trade by product

Manufactures remain the most dynamic product group in merchandise trade

Manufactures were again the most dynamic product group, increasing by 10 per cent in constant prices in 2006. Trade in agricultural products recorded real growth of 6 per cent. Rising prices and mild weather moderated global demand growth and slowed the expansion of trade in fuels and mining products to 3 per cent in 2006.

Since the early 1950s, the volume of trade in manufactures has largely outperformed primary products, growing at an annual rate of 7.5 per cent, while agriculture, and fuels and mining products grew at 3.5 per cent and 4 per cent respectively.

World merchandise trade volume by major product group, 1950-2006

Chart I.3

(Volume indices, 1950=100)

Log scale

Regional trade flows

World merchandise trade is still characterised by intra-regional flows

Distances are still a barrier. Inter-regional merchandise trade flows between North America, Europe and Asia account for only 23 per cent of world trade. The most prominent growth in 2006 was recorded in Asia's exports to Europe, which increased by 21 per cent. Intra-regional trade flows of the three regions represent 53 per cent of world merchandise trade and almost two thirds of the total merchandise trade of these regions. Europe's intra-trade shows the highest share (31 per cent), followed by Asia (14 per cent) and North America (8 per cent). Intra-regional trade for other regions (South and Central America, CIS, Middle East and Africa) account for only 2.5 per cent of their total exports.

Chart 1.4

Selected intra- and inter-regional merchandise trade flows, 2006

(Billion dollars and percentage)

Trade concentration

Large economies determine merchandise trade but small economies participate actively

The list of major traders appears to be dominated by large economies. In 2006, for example, the smallest 80 per cent of exporters accounted for just 10 per cent of world trade (red line).

However, this calculation does not take into account the population of economies (e.g. China and Tonga are given equal weight.) To better account for differences in population, cumulative shares of economies in world population are plotted against their collective shares in world merchandise exports, after sorting them in ascending order by population (blue line). This second curve is not smooth because economies with similar populations (e.g. Singapore and Eritrea, or Italy and Myanmar) may make very different marginal contributions to world trade, but it does suggest that trade in terms of people rather than countries is more evenly distributed. On a per capita basis, small economies contribute more to world trade than their export values suggest, for example, the smallest economies representing 20 per cent of the world's population account for 39 per cent of the value of world merchandise exports in 2006.

Chart 1.5

Shares in world merchandise exports, 2006

Regional trade patterns in merchandise

Manufactures dominate the merchandise export structures of Asia, Europe and North America

Chart 1.6 Sectoral structure of merchandise exports by region, 2006

Asia has the highest share of manufactures in total exports, with more than 80 per cent of the region's exports stemming from this product group. In contrast, the Middle East, Africa and the CIS are highly dependent on fuels and mining products, with more than two thirds of their export revenues originating from this product group. This pattern of specialization was accentuated with the rise in international commodity prices.

Least-developed countries show a similar structure with almost three quarters of their export revenues originating from primary commodities and only a quarter earned through manufactures (mainly clothing). South and Central America show the highest share of agricultural exports in their total trade.

World trade in merchandise and commercial services

In 2006, trade in merchandise was boosted by commodity prices, growing faster than trade in commercial services

At current prices, 2006 world merchandise trade increased by 16 per cent while trade in commercial services expanded by 12 per cent. High commodity prices explain the higher growth rate of trade in merchandise. Data for trade in commercial services are derived from balance of payments statistics and mainly refer to modes 1 (cross-border), 2 (consumption abroad) and 4 (presence of natural persons). Information on the size of commercial presence (mode 3) is not covered in these «traditional» trade in commercial services statistics. Mode 3 trade can be approximated through the sales of services of foreign affiliates. Available statistics nevertheless indicate that this mode surpasses trade in commercial services in other modes, adding further to the dynamics of world trade in services.

Chart 1.7 World exports of goods and commercial services, 2000-2006

Trade in commercial services by category

The share of travel continues to decline in commercial services trade

The share of travel in world commercial services exports has constantly been declining in recent years, from 31 per cent in 2000 to 26.6 per cent in 2006. Over this period North America's share was reduced by over 5 percentage points (from 23.2 to 17.9) whereas Africa gained almost 1.3 points (from 3.0 to 4.3 per cent).

For the first time since 2003, the growth of transportation services was lower than that for trade in other commercial services, but the share of transportation in total commercial services has remained stable since 2000. Other commercial services, which include business services, were the largest contributor to total trade in commercial services, for the first time representing almost half of this trade in 2006.

Europe was the largest exporter of other commercial services with 54 per cent of world exports of this product group (37.4 if intra-European Union trade is excluded), followed by Asia (21.8 per cent) and North America (17.9 per cent). Although in value terms positive growth was recorded, the share of Europe and North America in world trade in other commercial services declined, mainly in favour of Asia and to a lesser extent the CIS.

Foreign affiliates trade in services

Sales of foreign affiliates in services rise faster than traditional trade in services

Similar conclusions can be drawn from Australia's data in 2002-03. Traditional trade in services was surpassed by sales of foreign affiliates by a margin of \$18 billion, confirming the increasing importance of this mode of delivery.

Actually, data available for the foreign affiliates of OECD countries in services-producing activities suggest that these global sales are approximately 1.5 times larger than conventional cross-border trade flows (mode 1) measured through the balance of payments. These estimates suggest that GATS mode 3 or commercial presence is an important –if not the dominant– mode of delivery for trade in services (see WTO International Trade Statistics, 2005).

In 2004, the year for which the latest comprehensive data are available, sales of services through foreign affiliates of United States (US) firms on foreign markets (non-bank majority-owned) reached \$490 billion, more than twice as high as conventional services exports which amounted to \$322 billion. From 1996, sales of services of US majority-owned foreign affiliates have consistently exceeded conventional US exports of commercial services according to the US Department of Commerce.

a Figures refer to the Fed. Rep. of Germany from 1948 through 1983

b Figures are significantly affected by i) changes in the country composition of the region and major adjustment in trade conversion factors between 1983 and 1993 and ii) including the mutual trade flows of the Baltic States and the CIS between 1993 and 2003

c Beginning with 1998, figures refer to South Africa only and no longer to the Southern African Customs Union

d Figures refer to the EEC(6) in 1963, EC(9) in 1973, EC(10) in 1983, EU(12) in 1993, EU(25) in 2003 and 2006.

e Membership as of the year stated.

Note: Between 1973 and 1983 and between 1993 and 2003 import shares were significantly influenced by oil price developments

^a Secretariat estimate.

Note: Figures for a number of countries and territories have been estimated by the Secretariat. Annual percentage changes and rankings are affected by continuity breaks in the series for a large number of economies, and by limitations in cross-country comparability. See the Metadata, Section II.2. For annual data 1996-06, see Appendix Tables A8 and A9.

a Secretariat estimate.

Note. Figures for a number of countries and territories have been estimated by the Secretariat. Annual percentage changes and rankings are affected by continuity breaks in the series for a large number of economies, and by limitations in cross-country comparability. See the Metadata, Section II.2. For annual data 1996-06, see Appendix Tables A8 and A9.

4. Bilateral trade of leading traders

a Financial intermediation services are not allocated geographically. In 2005, they represented 2 per cent of exports, and 0.5 per cent of imports.

b The geographical breakdown includes government services n.i.e. In 2005, they represented 2 per cent of services exports, and 1 per cent of imports.

c The following transactions are not allocated geographically: travel exports and imports; financial services exports related to foreign exchange trading; imports of freight transportation services and, insurance on goods imports. Overall, they represent 11 per cent of commercial services exports, and 34 per cent of imports.

d ASEAN countries accounted for 13 per cent of total commercial services exports and imports.

e In 2005 trade in commercial services not allocated geographically accounted for 7 per cent of exports and 11 per cent of imports.

Note: For more information on asymmetries, see the Metadata, Section II.2

Japan <i>g</i>	40.3	...	...	...
Portugal <i>b</i>	5.6	7.1	1	27
United States	521.8	571.8	6	10

Excluding wholesale and retail trade and repair activities. Economies shown in italics exclude most or a large part of financial intermediation activities.

a Refers to fiscal year 2002-03 (July-June).

b Only includes affiliates directly owned.

c Branches are excluded.

d Only the first level of indirect ownership is covered.

e Community, social and personal services are not covered.

f Refers to 2002 value and annual percentage change for 2000-02.

g Real estate activities are also not covered.

Note: Given the recent development of this statistical framework, comparability and coverage of data may not always be complete. The data presented in this table refer to total sales of affiliates primarily engaged in services activities. Data presented in the highlights for Australia (\$ 18 billion for fiscal year 2002-03) and the United States (\$ 490 billion in 2004) refer to sales of services of all affiliates, i.e. whether or not classified as affiliates primarily engaged in services activities. See the Metadata, Section II.2.

II. MERCHANDISE TRADE BY PRODUCT

» Fuels and mining products

Prices boost exports of fuels, non-ferrous metals, and ores and minerals

In 2006, export prices of crude petroleum increased by 21 per cent. This, coupled with the 56 per cent surge in prices of other minerals and non-ferrous metals, boosted the value of exports of fuels and mining products by 27 per cent. For the fourth year in a row, this growth was far ahead that of manufactures and agricultural products, which rose by 13 per cent and 11 per cent respectively.

» Fuels

China and India registered the highest growth of fuel imports while the European Union and the US remain the largest importers

In 2006, the European Union, the United States and Japan accounted for 35 per cent, 19 per cent and 9 per cent of world imports of fuels respectively. China, the Republic of Korea and India together represented 14 per cent. The above economies purchased 77 per cent of the world supply of fuels in 2006. Imports of China and India increased by an impressive 39 per cent and 42 per cent respectively. Fuels claim 11 per cent of China's and 38 per cent of India's total merchandise import bills. Imports of fuels are heavily taxing the foreign-exchange earnings of other developing countries such as Côte d'Ivoire (35 per cent of import spending was on fuels), Senegal and Uruguay (28 per cent), Pakistan (26 per cent) and Tanzania (24 per cent).

China is diversifying considerably its sources of fuels supply. Africa and the CIS now represent 24 per cent and 12 per cent of its import needs respectively, while the combined share of these regions was no more than 22 per cent in 2000.

The Highlights

IN THIS CHAPTER:

- » Fuels and mining products
- » Fuels
- » Agriculture
- » Manufactures
- » Office and telecom equipment
- » Automotive products
- » Textiles and clothing

Fuels and mining account for 19 per cent of world merchandise trade in 2006, the highest share since 1986.

Regional trade structures are strongly affected by these product price developments. Fuels and mining exports of Africa expanded by an average annual rate of 19 per cent from 2000 to 2006. Their share in the region's total exports (68 per cent) gained 10 percentage points during this period. An increasing proportion of Africa's foreign direct investment inflows (\$39bn in 2006) are geared towards the extractive sector. The share of fuels and mining in total exports of South and Central America increased by 8 percentage points (from 35 per cent to 43 per cent). For the Middle East and the CIS, fuels and mining represent respectively 74 per cent and 65 per cent of their total value of merchandise exports.

► Agriculture

Agriculture: sharp increase in the price of cereals

Chart II.3
Agricultural product exports
of selected economies, 2000-2006

Exports of agricultural products increased by 11 per cent in nominal terms, exceeding the 8 per cent rise in 2005. Food, which represents 80 per cent of agricultural exports, expanded by 10 per cent. This was partly due to a surge in the price of cereals by 21 per cent, the highest level since 1996. This price increase is attributed to poor harvests in major producing countries and an increase in demand from emerging economies. The price of rice, however, slowed down with a 6 per cent increase. The price rise of beverages also decelerated (6 per cent) compared to the 21 per cent peak in 2005. With an average price increase of 10 per cent, exports of non-food agricultural raw material increased by 14 per cent.

At the regional level, Europe (accounting for 46 per cent of world exports) expanded its exports of agricultural products by 9 per cent. Asia, which is the second major supplier (19 per cent), increased its exports by 14 per cent. South and Central America and the CIS fared better than the world average, with 13 per cent and 15 per cent growth respectively.

Excluding the intra-trade, the European Union overtook the United States in 2005 as the leading exporter of agricultural products, and retained the top position in 2006. The United States which experienced a below world average performance for the last five years, increased its exports by 12 per cent. Exports of China and Brazil expanded by the same rate (13 per cent) in 2006. Canadian and Australian growth was relatively modest (7 per cent and 5 per cent respectively).

► Manufactures

In 2006 China's manufactured exports surpassed those of the United States for the first time, having exceeded Japan's in 2004

World exports of manufactures expanded by 13 per cent in 2006, a higher rate than that of 2005. The relatively energy-intensive production, combined with continued growth in demand help to explain why iron and steel registered the highest growth rates (18 per cent) among manufactures product groups. Textiles, by contrast, which in 2005 was also a lagging sector, again scored the lowest growth rate (7 per cent) in manufactured exports in 2006.

Machinery and transport equipment, the biggest component of manufactures (53 per cent), expanded by 14 per cent. The major trader in this product category was Europe (44 per cent of world exports), which increased its exports by 12 per cent – double the growth rate of 2005. Asia, which accounts for 36 per cent of world exports, accelerated its exports by 16 per cent. In 2006, North America increased its exports by 13 per cent. But with only 3 per cent average annual growth between 2000 and 2006, its market share declined from 24 per cent to 17 per cent.

Chart II.4
Manufacture exports
of selected economies, 2000-2006

Global manufacturing: the case of office and telecom equipment

Office and telecommunication equipment, which represents 18 per cent of manufactured exports, expanded by 13 per cent in 2006. The European Union, the leading exporter of office and telecom equipment expanded its exports by 12 per cent, but this was entirely due to intra-European Union trade, which surged by a remarkable 19 per cent, while extra-European Union exports declined by 2 per cent. Second to the European Union and supplying nearly 20 per cent of world exports, China has established a strong position in this market. Excluding intra-European Union trade, China ranks as the first exporter.

The European Union accounts for 36 per cent of world imports of office and telecommunication equipment and records a steadily increasing trade deficit. In 2006, China supplied 15 per cent of the European Union's import needs and 37 per cent of those of the United States. The United States, the second major importer, maintains a substantial and increasing trade deficit in this product group. In 2006, 34 per cent of the US trade deficit with China could be attributed to this group.

Office and telecom equipment also represent a substantial share in the exports of a number of South East Asian economies, ranging from 55 per cent for the Philippines to 23 per cent for Thailand. Although still significant, in recent years a declining trend can be observed for a number of economies. In 2000, the share in the Philippines' total exports was 63 per cent. For Malaysia, the share declined from 53 per cent in 2000 to 42 per cent in 2006. The corresponding figures for Chinese Taipei are 39 per cent and 30 per cent.

Chart II.5
Office and telecom equipment exports of selected economies, 2000-2006

Chart II.6

Imports of integrated circuits and exports of office and telecom equipment of China, 2000-2006

In the restructuring process of global manufacturing, China evolved as a leading importer of integrated circuits and electronic components, while becoming a prominent exporter of office and telecommunication equipment. Expanding by an average annual rate of 34 per cent, China's share in world imports of integrated circuits increased from 7 per cent in 2000 to 28 per cent in 2006. Integrated circuits now account for 15 per cent of total Chinese imports. In 2006, China recorded a trade deficit of \$92.5 billion in this product group. On the other hand, between 2000 and 2006, its exports of office and telecom equipment increased by an average annual rate of 37 per cent¹.

¹ Chinese data for office and telecom equipment are to be interpreted with caution, as they include the transshipment of products from China to China through Hong Kong, China. The cost reduction motivation of such triangular trade, which amounts to about 9 per cent of China's total imports, is discussed in the 2005 edition of WTO's International Trade Statistics. In 2006 the transshipment of office and telecommunication equipment represented 20 per cent of China's imports of this product category.

►► Automotive products

High commodity prices stimulate a surge in imports of automotive products

Buoyed by commodity price increases, the imports of automotive products in the CIS, South and Central American, and African regions expanded by 63 per cent, 29 per cent and 20 per cent respectively in 2006. The European Union accounted for 53 per cent of world exports and 44 per cent of world imports in 2006, and remained the leading trader in automotive products. Extra-European Union imports increased by a significant 18 per cent.

Exports of transport equipment increased by 13 per cent, more than double the 6 per cent growth registered in 2005. Exports of automotive products, representing nearly 70 per cent of the transport equipment category, accelerated to a growth rate of 10 per cent. While the European Union and the United States expanded their exports by 11 per cent, Japan recorded a 13 per cent increase, double that of its 2005 performance. The fifth major exporter, the Republic of Korea, increased its exports by 14 per cent. With an average annual growth of 45 per cent of exports between 2000 and 2006, China shows strong signs of success in this market as well. Among the major exporters, only Canada, facing structural problems in the sector and a strong currency, registered a decline in its exports.

Chart II.7
Automotive product exports
of selected economies, 2000-2006

►► Textiles and clothing

While China's share in world exports of clothing increases, diversification of its exports reduces the importance of clothing in its total merchandise exports

Chart II.8
Clothing exports of China, 2000-2006

Chart II.9
Clothing exports
of selected economies, 2000-2006

World trade in textiles and clothing rose by 10 per cent. Clothing, which accounts for nearly 60 per cent of the combined trade, fared much better, registering a growth rate of 12 per cent, as compared to 7 per cent for textiles. In spite of the quotas imposed by the European Union and the United States between 2000 and 2006, China has gained an additional 12 per cent of the world clothing market and now accounts for 31 per cent of world exports. In 2006, its exports rose by 29 per cent. China has overtaken the European Union as the major clothing supplier; but the importance of clothing in its total exports is steadily declining, from 14 per cent in 2000 to 10 per cent in 2006.

The European Union increased its exports of textiles by a modest 3 per cent following a 4 per cent decline in 2005. China, on top of the 23 per cent growth recorded in 2005, further expanded its exports by 19 per cent. Between 2000 and 2006 it more than doubled its share in world exports of textiles, from 10 per cent to 22 per cent. The Republic of Korea, on the other hand, lost more than two thirds of its market. With an average annual growth of 9 per cent between 2000 and 2006, Pakistan modestly expanded its market share. The Russian Federation is a growing market for textiles, as growth in imports accelerated by 26 per cent in 2006, following a 25 per cent increase in 2005. With an almost equal position in world exports and imports between 2000 and 2006, Turkey expanded its exports and imports of textiles by 13 per cent and 14 per cent respectively.

III. TRADE IN COMMERCIAL SERVICES BY CATEGORY

» Transportation services

Rising seaborne trade and air traffic contribute to the increase of transportation services trade

In a context of rising energy prices, the value of world transportation services exports rose by 10 per cent to \$630 billion in 2006. With exports valued at more than \$280 billion, the EU (25) was the leading exporter of transportation services. Extra-EU (25) trade accounted for half of this value. The United States ranked second (\$70 billion), followed by Japan (\$38 billion). Overall, the three economies accounted for over 60 per cent of world transportation services exports.

The Highlights

IN THIS CHAPTER:

- » Transportation services
- » Travel
- » Other commercial services
- » Telecommunications services
- » Insurance services
- » Computer services
- » Other business services

Transportation services exports: a highly different pattern

Sea freight transport is the most important component of extra-EU (25) exports of transportation services (\$62 billion in 2005). For the United States, air transport is the dominant category. In 2005, air passenger transportation services reached \$21 billion and freight \$9 billion. Supporting and auxiliary transport services in airports and ports (e.g., cargo handling, storage, maintenance, cleaning, etc.) represented 40 per cent of US transportation services exports. In 2006, their importance increased further, accounting for 43 per cent of the economy's transportation services exports.

Chart III.3

World seaborne trade and international transportation traffic, 2000-2005

World seaborne trade (total goods loaded) has increased significantly since 2000, reaching a record level of 7.1 billion tons in 2005. The number of international air passengers grew by 5 per cent annually between 2000 and 2005, to 704 million, although the repercussions of September 11, 2001, and of the Severe Acute Respiratory Syndrome (SARS) epidemic in 2003 created some difficulties for the air transportation industry.

» Travel

A thriving sector

With 842 million international travellers worldwide (a 5 per cent increase) and their related expenditure¹ representing \$745 billion (an increase of 9 per cent) in 2006, tourism continues to be a flourishing sector. The expansion of low-cost airlines, notably to cover long-distance destinations, is making international travel affordable to a higher number of people. Between 2000 and 2006, travel exports have grown on average by 8 per cent a year, though their share in total commercial services exports has declined steadily (down to 27 per cent in 2006 from 32 per cent in 2000) due to the boom of trade in other services.

In 2006, the EU (25) countries were the leading travel exporters (\$313 billion), although only 30 per cent of receipts involved visitors from outside the EU. The United States ranked second with \$107 billion. Although the number of international tourists visiting the United States has recovered to the level of 2000 (51 million), its share of world travel exports in 2006 is significantly lower.

Travel receipts play an important role for many developing economies. Doubling its travel earnings to \$34 billion in six years, China has become the third largest travel exporter. The number of international visitors to China was estimated at some 50 million in 2006, up by 60 per cent compared to 2000.

Travel export revenues match agriculture exports in Africa

In 2006, travel exports reached \$32 billion in Africa, accounting for half of its total commercial services exports. This share has been constantly rising above the world average rate since 2000. With the number of international tourists boosted in Egypt and Morocco by 70 per cent and 50 per cent respectively in six years, these countries saw their travel exports reach \$8 and \$6 billion in 2006. Earnings from international travellers' expenditure in Sub-Saharan African countries have more than doubled compared to 2000. In Tanzania, travel exports have almost tripled. Cape Verde's emerging tourism sector is enjoying impressive growth, with its travel exports increasing by around 80 per cent in 2006, which is now comparable to the level in the Seychelles.

Chart III.4

Share of travel exports in total commercial services exports – World and Africa, 2000 and 2006

¹ Travel covers all goods and services acquired by international travellers in the host economy, for their own use or to give away, such as accommodation, food, souvenirs, visits to museums, local transportation, etc. It excludes transportation to the host country.

Travel exports' rising contribution to GDP in Africa

The ratio of travel exports to GDP has grown in many African countries since 2000. In leading travel exporters such as Egypt and Morocco, it has increased by 3-4 percentage points. In the Seychelles, where its contribution was already very high, it has attained 30 per cent. In Cape Verde, the ratio has increased from 8 per cent in 2000 to 19 per cent in 2006.

Other commercial services

Other commercial services trade continues its impressive growth in 2006

In 2005, other business services was the largest category (half of world exports of other commercial services), followed by financial services (14 per cent), royalties and licence fees (11 per cent) and computer and information services (9 per cent).

Between 2000 and 2005 the fastest growing sectors were computer and information services (17 per cent growth), insurance (14 per cent) and other business services (13 per cent).

Exports of "other commercial services" reached \$1380 billion in 2006. This category has recorded impressive growth over recent years, doubling in value compared to 2000. At present, other commercial services account for half of total commercial services exported in the world.

In 2006 the EU (25) was the largest exporter of other commercial services (\$684 billion, of which almost half were extra-EU(25) exports). The EU accounted for 50 per cent of world exports in this sector. The United States ranks second with \$212 billion in 2006. However, compared to 2000, its share in world exports has decreased. Other economies are strengthening their positions as exporters of other commercial services. In 2006, India's exports grew by almost 40 per cent and the Russian Federation's increased by over 30 per cent.

► Telecommunications services

A new player in telecommunications services

Almost tripling its exports to \$3.4 billion in 2006, Kuwait became an important telecommunications services provider. The country has specialized in mobile communication services and has recorded rapid growth since 2004. In 2006, Kuwait connected an estimated 27 million mobile subscribers in neighbouring Middle Eastern countries and in Sub-Saharan Africa. In 2006, cellular mobile subscribers in the Middle East were estimated at some 67 million. Their number has quadrupled in just 5 years.

Chart III.8 Kuwait – Exports of telecommunications services, 2004-2006

► Insurance services

Hit by Katrina

After Hurricane Katrina hit the U.S. Gulf Coast region in late August 2005, damage reached at least \$125 billion, making it the worst natural disaster from a single event in US history. Private insurers and reinsurers paid claims of up to \$45 billion for damaged or destroyed buildings and offshore oil and gas platforms. Though a local natural catastrophe, Hurricane Katrina's financial repercussions have spread to a number of economies.

Chart III.9 EU (25) – Exports of insurance services to the United States, 2003-2006

With a high concentration of the leading international insurance and reinsurance companies in the region, Europe made the largest payouts (UK companies alone bearing Katrina's costs to the tune of some \$3.6 billion). This resulted in 2005 services trade statistics showing that world exports of insurance services fell by 13 per cent and in particular that EU(25) insurance exports to the United States dropped by 93 per cent. This is mainly due to the way this item is generally estimated ("premiums less claims"). When large claims occur following catastrophic events this estimate does not reflect the actual value of the insurance services that were rendered².

² The United States, as well as other economies, follow a different methodology. For more details, see the Metadata, Section II.2.

IT services: rising competitors on the horizon

According to estimates, India recorded computer services exports worth \$15.8 billion in 2005, accounting for around 70 per cent of Asia's exports of computer and information services. India is a leading country for information technology (IT) services outsourcing. However, other economies within the region are also emerging as alternative outsourcing destinations.

China's software industry is expanding. By the end of 2005, there were 12000 software development companies employing nearly one million people. China's computer and information services exports are at present still relatively low (\$3.0 billion in 2006) but at a 40 per cent annual average growth rate since 2003, they are increasing rapidly. Recently the Chinese government launched a project aimed at doubling its computer services exports by 2010. In 2006, China became Japan's biggest software outsourcing site.

Other Asian economies are also actively involved in promoting their IT services outsourcing potential. Malaysia, for example, is now considered, after India and China, the third most attractive site for low-cost IT services outsourcing. The Malaysian information and Communication Technology (ICT) hub created in 1996 now hosts more than 1100 international companies. The country's computer services exports have more than doubled in 3 years. At the beginning of 2006, Singapore embarked on a similar hub project, which is expected to be operational by 2012.

Other countries outside Asia have also taken up the challenge. Chosen as a base by several European companies, the Russian Federation has seen its computer services exports rise annually by over 60 per cent on average since 2003. In South and Central America, Brazil and Costa Rica are becoming important outsourcing locations for North American firms.

Other business services

"A mixed bag"

Other business services are among the most dynamic services products. Growing on average by 13 per cent per year since 2000, they reached \$595 billion in 2005, accounting for half of the world's other commercial services exports.

The nature of the services actually traded under "other business services" varies significantly among economies. For extra-EU (25) trade, the category miscellaneous business, professional and technical services is the largest contributor (shown in blue in Chart III.11). It accounted for 74 per cent of extra-EU (25) other business services exports in 2005³. A higher share still can be found in Norway (79 per cent). In North America, the United States shows a similar pattern. Business, professional and technical services account for 81 per cent of other business services, where legal, accounting, management, consulting and public relations services is the main category.

Moving to the Far-East Asian economies, merchanting and other trade-related services are the biggest items⁴. The four leading services exporters in Asia, (Japan, China, Hong Kong, China, and Singapore) accounted for 72 per cent of the region's exports of other business services exports in 2005.

³ Architectural and engineering, research and development as well as legal, accounting, and management services are mainly exported to the United States and to Switzerland.

⁴ Merchanting takes place when the resident of an economy (merchant) buys a good from a non-resident and subsequently resells it to another non-resident. The value of merchanting is given by the difference between the value of good when acquired and the value of good when resold.

In the Middle East, Israel has recently become an attractive destination for Research and Development (R&D) services. In 2006, the country invested 4.5 per cent of its GDP in R&D expenditure, a much higher ratio than in other economies. Many international firms have set up R&D centres in Israel to benefit from the country's advanced infrastructure and highly-skilled manpower. Israel's exports of R&D services were estimated at \$1.6 billion in 2004.

Chart III.11

Extra-EU (25) - Structure of exports of other business services, 2005

a Imports of transportation freight services on goods imports are not allocated geographically.

b In 2005, ASEAN countries accounted for 13 per cent of transportation services exports and 7 per cent of imports.

c The geographical breakdown includes government services n.i.e.

d In 2005, trade in transportation services not allocated geographically accounted for 12 per cent of exports and 44 per cent of imports.

Note: For more information on asymmetries, see the Metadata, Section II.2.

a Financial intermediation services are not allocated geographically. In 2005, they accounted for 4 per cent of other commercial services exports and 1 per cent of imports.

b The following transactions are not allocated geographically: financial services exports related to foreign exchange trading and imports of insurance on goods imports.

c In 2005, ASEAN countries accounted for 15 per cent of other commercial services exports and for 5 per cent of imports.

d In 2005, trade in other commercial services not allocated geographically represented 7 per cent of exports and 8 per cent of imports.

Note: For more information on asymmetries, see the Metadata, Section II.2.

IV. METADATA

This Chapter details methods and sources of the statistics used in International Trade Statistics 2007.

1. Composition of geographical and economic groupings

WTO members are frequently referred to as “country”, although some members are not countries in the usual sense of the word but are officially “customs territories”. The definition of geographical and other groupings in this report does not imply an expression of opinion by the Secretariat concerning the status of any country or territory, the delimitation of its frontiers, nor on the rights and obligations of any WTO Member in respect of WTO Agreements. The colours, boundaries, denominations, and classifications in the maps of this publication do not imply, on the part of the WTO, any judgement on the legal or other status of any territory, or any endorsement or acceptance of any boundary.

Throughout this report, South and Central America and the Caribbean is referred to South and Central America; the Bolivian Republic of Venezuela, Hong Kong Special Administrative Region of China, the Republic of Korea and the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu are referenced as Bolivian Rep. of Venezuela; Hong Kong, China; Korea, Republic of; and Taipei, Chinese respectively.

2. Definitions and methods

2.1 Merchandise trade

2.1.1 Exports and imports

Two systems of recording merchandise exports and imports are in common use. They are referred to as *general trade* and *special trade* and differ mainly in the way warehoused and re-exported goods are treated. General trade figures are larger than the corresponding special trade figures because the latter exclude certain trade flows, such as goods shipped through bonded warehouses.

To the extent possible, total merchandise trade is defined in this report according to the general trade definition. It covers all types of inward and outward movement of goods through a country or territory including movements through customs warehouses and free zones. Goods include all merchandise that either add to or subtract from the stock of material resources of a country or territory by entering (imports) or leaving (exports) the country's economic territory. For further explanations, see United Nations *International Trade Statistics, Concepts and Definitions*, Series M, N° 52, Revision 2.

Unless otherwise indicated, exports are valued at transaction value, including the cost of transportation and insurance to bring the merchandise to the frontier of the exporting country or territory (f.o.b. valuation). Imports are valued at transaction value plus the cost of transportation and insurance to the frontier of the importing country or territory (c.i.f. valuation).

2.1.2 Products

All product groups are defined according to Revision 3 of the Standard International Trade Classification (SITC).

Table IV.2
Products
A. Primary products
(i) Agricultural Products (SITC sections 0, 1, 2 and 4 minus divisions 27 and 28)
of which,
- Food (SITC sections 0, 1, 4 and division 22)
of which,
0 - Food and live animals
1 - Beverages and tobacco
22 - Oil seeds and oleaginous fruits
4 - animal and vegetable oils, fats and waxes
- - Fish (SITC division 03)
- - Other food products and live animals (SITC sections 0, 1, 4 and division 22 minus division 03)
- Raw materials (SITC divisions 21, 23, 24, 25, 26, 29)
of which,
21 - Hides, skins and furskins, raw
23 - Crude rubber (including synthetic and reclaimed)
24 - Cork and wood
25 - Pulp and waste paper
26 - Textile fibres (other than wool tops and other combed wool) and their wastes (not manufactured into yarn or fabric)
29 - Crude animal and vegetable materials, n.e.s
(ii) Fuels and mining products (SITC sections 3 and divisions 27, 28, 68)
of which,
- Ores and other minerals (SITC divisions 27, 28)
of which,
27 - Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
28 - Metalliferous ores and metal scrap
- Fuels (SITC section 3)
- Non-ferrous metals (SITC division 68)
B. Manufactures (SITC section 5, 6, 7, 8 minus division 68 and group 891)
(i) Iron and steel (SITC division 67)
(ii) Chemicals (SITC section 5)
of which,
- Pharmaceuticals (SITC divisions 54)
- Other chemicals (SITC divisions 51, 52, 53, 55, 56, 57, 58, 59)
of which,

Products

- 51 - Organic chemicals
- 52 - Inorganic chemicals
- 53 - Dyeing, tanning and colouring materials
- 55 - Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 - Fertilizers (other than those of Group 272, i.e. Fertilizers, crude)
- 57 - Plastics in primary forms
- 58 - Plastics in non-primary forms
- 59 - Chemical materials and products, n.e.s.

(iii) Other semi-manufactures (SITC divisions 61, 62, 63, 64, 66, 69)

of which,

- 61 - Leather, leather manufactures, n.e.s. and dressed furskins
- 62 - Rubber manufactures, n.e.s.
- 63 - Cork and wood manufactures (excluding furniture)
- 64 - Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 66 - Non-metallic mineral manufactures, n.e.s.
- 69 - Manufactures of metals, n.e.s.

(iv) Machinery and transport equipment (SITC section 7)

- Office and telecommunication equipment (SITC divisions 75, 76 and group 776)

of which,

- - Electronic data processing and office equipment (SITC division 75)
- - Telecommunications equipment (SITC division 76)
- - Integrated circuits, and electronic components (SITC group 776)

- Transport equipment (SITC group 713, sub-group 7783 and divisions 78, 79)

of which,

78 - Road vehicles (including air-cushion vehicles)

79 - Other transport equipment

- - Automotive products (SITC groups 781, 782, 783, 784 and subgroups 7132, 7783)

of which,

- 781 - Motor cars and other motor vehicles principally designed for the transport of persons (other than public-transport type vehicles), including station wagons and racing cars
- 782 - Motor vehicles for the transport of goods and special purpose motor vehicles
- 783 - Road motor vehicles, n.e.s.
- 784 - Parts and accessories of the motor vehicles and tractors
- 7132 - Internal combustion piston engines for propelling vehicles listed above

- - Other transport equipment (SITC division 79, groups 713, 785, 786 minus sub-group 7132)

of which,

- 713 - Internal combustion piston engines, and parts thereof, n.e.s.
- 785 - Motorcycles and cycles, motorized and non-motorized
- 786 - Trailers and semi-trailers, other vehicles (not mechanically propelled), and specially designed and equipped transport containers
- 79 - Other transport equipment

- Other machinery (SITC divisions 71, 72, 73, 74, 77 minus groups 713, 776 minus sub-group 7783)

of which,

- - Power generating machinery (SITC division 71 minus group 713)

of which,

- 71 - Power generating machinery and equipment
- minus
- 713 - Internal combustion piston engines, and parts thereof, n.e.s.

- - Non-electrical machinery (SITC divisions 72, 73, 74)

of which,

- 72 - Machinery specialized for particular industries
- 73 - Metal working machinery
- 74 - General industrial machinery and equipment, n.e.s. and machine parts, n.e.s.

- - Electrical machinery (SITC division 77 minus group 776 and subgroup 7783)

of which,

- 77 - Electrical machinery, apparatus and appliances, n.e.s. and electrical parts thereof
- minus
- 776 - Thermionic, cold cathode or photo-cathode valves and tubes
- 7783 - Electrical equipment, n.e.s. for internal combustion engines and vehicles, and parts thereof

(v) Textiles (SITC division 65)

(vi) Clothing (SITC division 84)

(vii) Other manufactures (SITC divisions 81, 82, 83, 85, 87, 88, 89 excluding group 891)

of which,

- Personal and household goods (SITC divisions 82, 83 and 85)

of which

- 82 - Furniture and parts thereof, bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 - Travel goods, handbags and similar containers
- 85 - Footwear

Table IV.2 (continued)

Products

- Scientific and controlling instruments (SITC division 87)

- Miscellaneous manufactures (SITC divisions 81, 88 and 89 minus group 891)

of which,

81 - Prefabricated buildings, sanitary plumbing, heating and lighting fixtures and fittings, n.e.s.

88 - Photographic apparatus, equipment and supplies and optical goods, n.e.s.; watches and clocks

89 - Miscellaneous manufactured articles, n.e.s.

C. Other products: commodities and transactions not classified elsewhere (including gold); arms and ammunition (SITC section 9 and group 891)

891 - Arms and Ammunition

9- Commodities and transactions not classified elsewhere in SITC

Throughout this report, other food products and live animals; beverages and tobacco; animal and vegetable oils, fats and waxes; oilseeds and oleaginous fruit are referred to as other food products; electronic data processing and office equipment is referred to as EDP and office equipment; and integrated circuits and electronic components is referred to as integrated circuits.

2.1.3 World trade network

The world merchandise trade network by region and product from which Appendix tables A2 and A10 are derived is based on export data. The network is constructed in the following way:

First, total merchandise exports from each of the seven regions are aggregated from the individual country or territory figures published in Appendix table A6.

Next, the total merchandise exports of each region are distributed by destination and then by product. The regional and commodity breakdown is based on UNSD *Comtrade database*, EUROSTAT, national statistics and Secretariat estimates.

During this process, the principal adjustments to the figures are as follows:

- (i) Exports of ships to the open registry countries Panama and Liberia are re-allocated from each region's exports to South and Central America and Africa to "unspecified destinations" (a category not shown separately).
- (ii) China's exports are adjusted to approximate their final destination.
- (iii) Exports of non-monetary gold, where known, are included. When they cannot be broken down by destination, they are allocated to "unspecified destinations".
- (iv) South Africa's trade does not include trade with the former Southern African Customs Union members.

2.1.4 Merchandise trade of selected major traders by product, region and major trading partner (Appendix tables A18 to A28)

These tables are derived from UNSD *Comtrade* and EUROSTAT. For trade by product, world totals include shipments which have not been distinguished by origin or destination. For trade by region and partner, world totals include goods which have not been specified by product.

The following adjustment has been made to the figures:

Exports of ships to the open registry countries Panama and Liberia are reallocated from each economy's exports to South and Central America and Africa to "unspecified destinations" (a category not shown separately).

The selection of each economy's major trading partners is based on a ranking of total trade (exports plus imports) of each economy with their trading partners in 2006 (member States of the EU (25) are counted as one trading partner).

2.1.5 Merchandise trade in balance of payments statistics

Merchandise trade statistics together with other basic statistical systems (such as industrial and transport statistics) provide the foundation for the System of National Accounts (SNA) and the balance of payments (BOP). Merchandise trade statistics are

basic to the compilation of the goods account in the balance of payments as structured and defined in the fifth edition of the International Monetary Fund's Balance of Payments Manual (BPM5).

Goods (merchandise) are defined in the SNA as "physical objects for which a demand exists, over which ownership rights can be established and whose ownership can be transferred from one institutional unit to another by engaging in transactions on markets". Thus, for the SNA and BOP statistics the recording of transactions should be based on the change of ownership principle.

However, the compilation of international merchandise trade statistics (IMTS) is usually based on customs records which essentially reflect the physical movement of goods across borders, and follow international guidelines on concepts and definitions which do not fully conform to the principles of the SNA and the BPM5.

A number of adjustments has to be made to international merchandise trade statistics before they match the specific requirements of national accounts and balance of payments statistics. For aggregate exports and imports these adjustments are mainly related to coverage, the system of trade, and valuation.

With respect to the coverage of IMTS, *transactions in which one or both national boundaries are not crossed* (e.g. trade in vessels and aircraft, exports of bunkers, etc.) are not always included in merchandise trade statistics for practical reasons, whereas they should usually be included in BOP statistics.

Also, under BPM5, certain transactions should be excluded from goods and included, at market value, in services; for example, goods under the *improvement and repair trade* regime should be excluded from IMTS, but they are to be included in the goods account at the value of the repair under the BPM5.

Concerning the system of trade, the IMTS guidelines outline the measurement of trade flows on the basis of (1) the special trade system and (2) the general trade system. Under the special trade system, the customs frontier is regarded as the statistical boundary whereas, under the general system of trade, the national frontier is regarded as the statistical boundary. The BPM5 stresses that measurement for BOP compilation should be based on change of ownership rather than on the general trade system or the special trade system. The general trade system appears however to be a better approximation for measuring change of ownership because it provides broader coverage and the date of change of ownership may be closer to the date goods cross the national frontier than to the date goods clear through customs.

As far as valuation is concerned, the issue that affects most data comparability concerns the point of valuation, namely, whether goods are valued at the importer's border - that is at the c.i.f. value - or at the f.o.b. value at the exporter's border. IMTS guidelines recommend the adoption of the c.i.f. valuation for imports whereas BPM5 requires the f.o.b. valuation. Additional adjustments may be made by BOP compilers to conform to the BPM5 requirement for a market price for valuing trade, processing trade, and with respect to currency conversion.

Once adjusted, merchandise trade is recorded in the goods category of the current account, along with services, income, and current transfers. Therefore, within the balance of payments framework transactions in both goods and services are harmonized and provide for comparable statistical series, as in Table I.24. Strictly speaking, it is not correct to aggregate the figures for commercial services and merchandise shown elsewhere in this report.

It should be noted that some economies still apply the concepts of the fourth edition of the Balance of Payments Manual, and thus do not include goods for processing and goods procured in port carriers in the goods account.

2.2 Trade in commercial services

Depending on the location of the supplier and the consumer, the General Agreement on Trade in Services (GATS) defines four modes of supply. In addition to the cross-border supply (mode 1), where both the supplier and the consumer remain in their respective home territories, GATS also covers cases where consumers are outside their home territory to consume services (mode 2 – consumption abroad), or cases where service suppliers are in the territory of the consumers to provide their services, whether by establishing affiliates through direct investment abroad (mode 3 – commercial presence), or through the presence of natural persons (mode 4).

A country's balance of payments, that is the services account, can be used to derive estimates covering trade in commercial services for modes 1, 2 and 4. The Balance of Payments does however not include most of the information on the local deliveries of services through foreign affiliates that is required to estimate the size of mode 3. A framework for collecting these data, the "Foreign Affiliates Trade in Services (FATS) statistics", has been developed and adopted by the international statistical community in 2002. Further information on these "new" statistics is developed below.

2.2.1 Trade in commercial services between residents and non residents of an economy

Exports and imports

Exports (credits or receipts) and imports (debits or payments) of commercial services derived from statistics on international service transactions are included in the balance of payments statistics, in conformity with the concepts, definitions and classification of the fifth (1993) edition of the IMF Balance of Payments Manual.

Definition of commercial services in the balance of payments

In the fifth edition of the Balance of Payments Manual, the current account is subdivided into *goods*, *services* (including *government services, n.i.e.*), *income* (investment income and compensation of employees), and *current transfers*. The *commercial services* category in this report is defined as being equal to *services* minus *government services, n.i.e.* *Commercial services* is further sub-divided into *transportation services*, *travel*, and *other commercial services*.

Transportation services covers sea, air and other including land, internal waterway, space and pipeline transport services that are performed by residents of one economy for those of another, and that involve the carriage of passengers, the movement of goods (freight), rentals (charters) of carriers with crew, and related supporting and auxiliary services.

Travel includes goods and services acquired by personal travellers, for health, education or other purposes, and by business travellers. Unlike other services, travel is not a specific type of service, but an assortment of goods and services consumed by travellers. The most common goods and services covered are lodging, food and beverages, entertainment and transportation (within the economy visited), gifts and souvenirs.

Other commercial services corresponds to the following components defined in BPM5:

- (i) *communications services* includes telecommunications, postal and courier services. Telecommunications services encompasses the transmission of sound, images or other information by telephone, telex, telegram, radio and television cable and broadcasting, satellite, electronic mail, facsimile services etc., including business network services, teleconferencing and support services. It does not include the value of the information transported. Also included are cellular telephone services, Internet backbone services and on-line access services, including provision of access to the Internet;
- (ii) *construction* covers work performed on construction projects and installation by employees of an enterprise in locations outside the territory of the enterprise (the one-year rule to determine residency is to be applied flexibly). In addition goods used by construction companies for their projects are included which implies that the "true" services component tends to be overestimated;
- (iii) *insurance services* covers the provision of various types of insurance to non residents by resident insurance enterprises, and vice versa, for example, freight insurance, direct insurance (e.g. life) and reinsurance;
- (iv) *financial services* covers financial intermediation and auxiliary services provided by banks, stock exchanges, factoring enterprises, credit card enterprises, and other enterprises;
- (v) *computer and information services* is subdivided into computer services (hardware and software related services and data processing services), news agency services (provision of news, photographs, and feature articles to the media), and other information provision services (database services and web search portals);
- (vi) *royalties and licence fees*, covering payments and receipts for the use of intangible non-financial assets and proprietary rights, such as patents, copyrights, trademarks, industrial processes, and franchises;
- (vii) *other business services*, comprising trade-related services, operational leasing (rentals), and miscellaneous business, professional and technical services such as legal, accounting, management consulting, public relations services, advertising, market research and public opinion polling, research and development services, architectural, engineering, and other technical services, agricultural, mining and on-site processing; and
- (viii) *personal, cultural, and recreational services* is subdivided into two categories, (i) audiovisual services and (ii) other cultural and recreational services. The first component includes services and fees related to the production of motion pictures, radio and television programmes, and musical recordings. Other personal, cultural, and recreational services includes services such as those associated with museums, libraries, archives, and other cultural, sporting, and recreational activities.

Coverage and comparability

With the implementation of BPM5, the coverage and comparability of services trade data have improved over time, however, given that these improvements have been made gradually, they also resulted in a number of breaks in series and are subject to significant distortions.

First, some countries do not collect statistics for certain service categories. Second, some service transactions are simply not registered. If central bank records are used, situations where no financial intermediaries are employed are not counted. In the case of surveys, the coverage of trading establishments is often incomplete. A particularly serious problem is that services transmitted electronically are frequently unregistered as well as when the transactions take place within multinational corporations. Third, statistics may be reported on a net rather than on a gross basis, often as a result of compensation arrangements such as in rail transport or in communication services. Fourth some services transactions may be difficult to capture. It is often easier for compilers to collect more complete and reliable information on trade in services exports rather than on imports given the large number and diversity of importers compared to that of exporters, e.g. financial services, computer services. Fifth, some particular service transactions may not be classified to the appropriate BPM5 services classification. Methodologies to build estimates for certain service categories may also differ between economies, notably due to the continuing efforts to improve these statistics. Some economies have made progress in the estimation of insurance services to take into account premium supplements and claim volatility (i.e. in the case of catastrophic events). Sixth, the alternate sources used for countries which are not members of the IMF do not necessarily comply with the IMF concepts and definitions. Seventh, misclassification of transactions may lead to an underestimation of commercial services when service transactions are registered as income, transfers or trade in merchandise rather than trade in services or, conversely, to an overestimation of commercial services when transactions pertaining to income, transfers or official transactions are registered in the private service categories.

These distortions may be particularly significant at the detailed level, i.e., for a detailed service category, and may lead to considerable asymmetries between countries' reported trade flows by origin and destination.

The estimation of world trade by services components has been based on reported economy data as shown in the following table:

Table IV.3

Number of economies reporting Balance of Payments services components for 2005

	Exports	Imports
Total commercial services	161	161
Transportation services	161	161
Travel	161	161
Other commercial services	161	161
Communications services	122	123
Telecommunications services	87	87
Construction	85	100
Insurance services	126	136
Financial services	99	108
Computer and information services	94	106
Computer services	59	65
Royalties and license fees	89	116
Other business services	131	139
Personal, cultural, and recreational services	89	95
Audiovisual and related services	53	58

First, total trade in commercial services from each of the seven regions is aggregated from the individual economy figures published. The breakdown of these data is then applied to missing countries before aggregating regional and world totals. Tables on major traders are based on reported data only.

Intra-trade of the European Union

The principal source for trade in commercial services are the IMF's Balance-of-Payments statistics. Intra-EU trade figures have been estimated from statistics included in the New Cronos database, August 2007.

2.2.2 Foreign affiliates trade in services statistics

The new statistical framework on Foreign Affiliates Trade in Services (FATS) statistics is developed in the Manual on Statistics of International Trade in Services. The acronym FATS is also used for “foreign affiliates statistics”. Both refer to the same statistical framework, the former focusing on services trade. It analyses the universe of foreign affiliates for which foreign investors own more than 50 per cent of the voting power or equity interest. Depending on the compiler’s view, one can distinguish inward FATS, that is, activities of foreign-owned affiliates in the compiling economy, or, outward FATS, that is, foreign affiliates of the compiling economy active abroad. Variables such as sales, value added, number of employees, etc. are used to describe the affiliates’ activities. These variables are broken down by country of origin or destination of investments and also by type of primary activity. Australia and the United States also provide a breakdown of sales into total goods and total services products. FATS statistics are currently available mainly for OECD and a small number of non-OECD economies, however, given the recent development of these statistics, comparability and coverage of individual economy data may not always be complete. Availability of detailed data and long-time series varies considerably between economies. From a GATS perspective, the size of mode 3 in a given country can be approximated through the sales of foreign-owned affiliates.

2.3 Other definitions and methods

2.3.1. Annual changes

Throughout this report, average annual percentage changes are analogous to compound interest rates. In calculating the average annual rate of change between 2000 and 2005, for example, data for calendar year 2000 were taken as the starting point, and data for calendar year 2005 as the end point.

2.3.2 Prices

Commodity price movements are primarily described by indices largely based on spot market prices, and therefore exclude transactions governed by longer-term contracts. Price indices for such commodities as food, beverages, agricultural raw materials, minerals, non-ferrous metals, fertilizers and crude petroleum are obtained from IMF *International Financial Statistics*. Aggregates for all primary commodities and for non-fuel primary commodities are calculated using IMF weights (Appendix table A29).

Export and import prices by commodity group of Germany, Japan and the United States are sourced from national statistics. Aggregates are calculated by weighting the countries’ price indices with the respective export and import values of the previous year (Appendix tables A30 and A31).

2.3.3 World merchandise trade indices

The volume and unit value indices are taken from a range of different international and national sources. The reported volume and unit value indices may not always be available for the most recent years or may differ in product coverage from the corresponding value indices.

Aggregation of the indices to obtain a world total is a two-tier process. *First*, export and import unit values from national and international sources are completed with Secretariat estimates for missing data. They are then aggregated to obtain regional totals. The volume index for each region is obtained by dividing the respective trade value index for each region by the corresponding regional unit value index.

Second, to obtain the total world merchandise volume index, regional unit value indices are aggregated and the world trade value is deflated by the world unit value index. Throughout the aggregation process trade values of the previous year are used as weights.

2.3.4 World production

Production of agriculture (including hunting, forestry and fish), mining and manufacturing is defined according to major Categories A, B, C and D of the International Standard Industrial Classification of all Economic Activities Revision 3 (ISIC). World production in these sectors is estimated by combining production indices published by the FAO, OECD, UNIDO and UNSD. The world index is derived through aggregation of the three sectors by using value added shares in 2000 as weights.

2.3.5 World gross domestic product

World GDP growth is estimated as a weighted average of economies' real GDP growth. The weights used are shares of economies in 2000 world nominal GDP converted to dollars at market exchange rates.

The use of official exchange rates which are not market-based for some major economies, together with the fluctuations of the United States dollar vis-à-vis major currencies can have a significant impact on the weighting pattern. The increasing use of weights based on purchasing power parities (PPP) by other international organizations is meant to attenuate "anomalies" linked to these factors. In a period of widely diverging growth rates among countries and regions, the choice of the weighting pattern can have a marked influence on the global growth estimate. For the 2000-2005 period, global growth estimates based on PPP-weights indicate a significantly faster growth than estimates using weights based on GDP data measured at market exchange rates. This is because of differences in the two weighting patterns. Relative to weights based on GDP at market exchange rates, PPP weights are low for the transition economies - especially the successor States of the former USSR with a poor growth record, and high for major developing countries (in particular China) with above average growth.

2.3.6 Re-exports and reimports

Under the system of **general** trade adopted in this report, re-exports are included in total merchandise trade (see Section II.1).

However, in the case of Hong Kong, China, the magnitude of its re-exports (amounting in 2006 to \$ 300 billion), if included in regional or world **aggregates**, would adversely affect the analytical value of the statistics by introducing a significant element of double counting. Therefore, Hong Kong, China's re-exports are excluded from the world and from Asia aggregates (unless otherwise indicated); only Hong Kong, China's domestic exports and retained imports are included in the totals. For this reason, the figures for world exports and for exports of Asia shown in Appendix tables A2 and A10 are smaller than those in Appendix table A6. When retained imports are not published, an approximation is derived by subtracting the value of re-exports from the value of imports. The resulting figure will, however, under-estimate the value of retained imports by the amount of the re-export margin.

China reports imports from China (reimports), a trade flow which accounted for 9.3 per cent (73.3 billion US dollars) of its total merchandise imports in 2006. These imports consist of products which have been produced in China and thereafter temporarily exported. The product structure of China's imports from China indicates that in absolute terms office and telecom equipment is the largest category (\$ 39.2 billion) in this particular trade flow. The share of re-imports is particularly large in the imports of telecommunications equipment (40.8 per cent), EDP and office equipment (32.6 per cent), electrical machinery (23.6 per cent) and in textiles (19.6 per cent). [Further information on these imports is provided in Box xx of the International Trade Statistics 2006].

3. Specific notes for selected economies

3.1 Merchandise trade statistics of the European Union

Beginning with the 2002 report, EU data compiled according to national statistical practices have been replaced, starting 1993, with data compiled by Eurostat in accordance with EU legislation. The concepts and definitions adopted by the EU are in line with the United Nations' *International Trade Statistics, Concepts and Definitions*, Series M, N° 52, Revision 2. As a result, the conceptual differences between EU member states' data have been substantially reduced. Moreover, for the EU as a whole, Eurostat data are more timely than the previous source, thus reducing substantially the amount of estimation included in the EU aggregate.

Since January 1993, statistics on the trade between the member States of the EU have been collected through the "Intrastat" system (see GATT 1994, *International Trade Trends and Statistics*). The coverage of this system, which relies on reports submitted by firms for transactions above a minimum value, is not as wide as the previous one, which was based on customs declarations. This is particularly noticeable on the import side. For example, prior to the adoption of the Intrastat system, reported intra-EU imports (c.i.f.) closely matched reported intra-EU exports (f.o.b.). However, from 1993 onwards, the reported value of intra-EU imports has been on average around 3 per cent lower than the value of intra-EU exports, indicating a substantial under-reporting of intra-EU imports. As a result of this inconsistency, the Secretariat has substituted intra-EU exports data for intra-EU imports at the aggregate EU level when estimating regional and world totals. However, this adjustment is not allocated *between* EU member countries. Hence, the sum of reported imports of individual EU members does not add to the figure for EU imports as a whole. This adjustment is also reflected in the volume estimates for the EU as a whole.

3.2 Egypt's export processing zone

Egypt's merchandise trade statistics are based on the special trade system, and exclude processing zone exchanges with the rest of the world. These have increased markedly in recent years. In 2005, processing zone imports from and exports to the rest of the world amounted to \$ 5.1 billion and \$ 3.8 billion respectively. If Egypt's merchandise trade data were adjusted accordingly, the size of its exports of manufactures (in particular clothing) would be significantly higher.

3.3 Trade of South Africa with SACU (South African Customs Union)

South Africa's merchandise exports (and imports) exclude shipments to (from) other SACU members (Botswana, Lesotho, Namibia and Swaziland). Partner statistics indicate that South African shipments amount to 80 percent of these countries total merchandise imports in 2002. This share -most likely - increased thereafter and represents an important trade flow for the African region. If South Africa's exports would be adjusted for these shipments to SACU members, its total exports would increase by about \$7.5 billion in 2006 and intra-African trade would be one fifth higher with intra-SACU trade being the largest intra trade flow for regional trade agreements in Africa.

3.4 Major breaks in data continuity of merchandise trade

Between 1997 and 1998 for the Russian Federation due to the use of Balance of Payments methodology by GOSKOMSTAT starting 1998.

Beginning 2003, Singapore includes merchandise trade with Indonesia.

Between 1994 and 1995 for Ukraine, due to a change in data collection procedures.

Between 1996 and 1997 for the Slovak Republic, and between 1997 and 1998 for Poland, due to the introduction of new arrangements in customs procedures to harmonize with the standards of the European Union.

With respect to the Russian Federation, considerable uncertainty remains about the accuracy of foreign trade statistics, especially as regards imports. A large proportion of the reported data on imports consists of official estimates of inflows of goods which enter the economy without being registered by the customs authorities. Such adjustments to import data accounted for 16 per cent of the officially reported totals in 2006; and, on the export side, for about 1 per cent of total reported exports.

3.5 Trade in insurance services of the United States

In 2003, the United States has revised its methodology for estimating trade in insurance services. The new methodology measures insurance services as premiums less normal claims. Normal claims comprise two components: "regularly occurring claims" that are calculated as an average of all claims paid during the previous 6 years, and a share of "catastrophic claims" that is added-on to "regularly occurring claims" in equal increments over the two decades following their event.

As comprehensive data collection on insurance services started in 1986, the first 6-year average of "regularly occurring claims" could only be calculated for 1992. As a result, time series on U.S. trade in insurance services, and consequently on other commercial services, have been revised back to 1992. To complete the 2003 revision, in 2004 the United States added to insurance services an estimate of premium supplements (or income earned on technical reserves of insurance companies). Insurance companies provide financial protection to policy holders through the pooling of risk and provide financial intermediation services through the investment of reserves. The income is treated as accruing to the policy holders who pay it back to the insurers as supplements to premiums to cover the full cost of insurance. The investment income of insurance companies is not output in and of itself; it is used to impute the value of the implicit component of insurance services attributable to financial intermediation.

3.6 Travel exports and transportation services exports and imports of Japan

In order to enhance the coverage of estimates of travel exports and imports, the Bank of Japan and the Japanese Ministry of Finance reviewed their compilation methodology, notably by including results from a new expenditure survey of foreign travellers as of 2003. This revision had a major impact on the estimates for travel exports. In order to maintain consistent growth rates, data shown in this report for Japanese 1995-2002 travel exports and exports of commercial services include provisional Secretariat estimates referring to the new compilation methodology (i.e. after January 2003) applied by the Japanese authorities and therefore they differ from 1995-2002 figures available elsewhere.

Data shown for transportation services in this report are consistent with revised 1996-2004 data published in 2006 by the Bank of Japan (based on a new methodology for measuring sea freight fares).

3.7 Trade in other commercial services of India

In the course of 2004, the Reserve Bank of India released new data following the introduction of a new reporting system to improve the coverage of Indian trade in services statistics (mainly affecting the item other business services).

3.8 Trade in commercial services of United Arab Emirates

Commercial services trade statistics of United Arab Emirates only cover transportation and travel.

4. Statistical sources

Most frequently used sources for statistics are:

EUROSTAT, *Comext and New Cronos databases*

FAO, *FAOSTAT Agriculture database*

FAO, *Production Yearbook*

IMF, *Balance of Payments Statistics*

IMF, *International Financial Statistics*

IMF, *World Economic Outlook database*

OECD, *Main Economic Indicators*

OECD, *Measuring Globalisation: The Role of Multinationals in OECD Economies*

OECD, *Monthly Statistics of International Trade*

OECD, *National Accounts*

OECD, *Statistics on International Trade in Services*

OECD/IEA, *Energy Prices & Taxes*

UNECE, *Economic Survey of Europe*

UNECLAC, *Overview of the Economies of Latin America and the Caribbean*

UNIDO, *National Accounts Statistics Database*

UNSD, *Comtrade database (for OECD members the UNSD-OECD Joint Trade Data Collection and Processign system)*

UNSD, *International Trade Statistics Yearbook*

UNSD, *Monthly Bulletin of Statistics*

World Bank, *World Development Indicators*

These sources are supplemented by national publications and other international databases such as the Global Trade Atlas of Global Trade Information Services, Inc. and Secretariat estimates.

Figures for total merchandise trade are largely derived from IMF, *International Financial Statistics*. Data on merchandise trade by origin, destination and product are mainly obtained from Eurostat's Comext database and UNSD's *Comtrade database*. Some inconsistencies in the aggregate export and import data for the same country or territory between sources are inevitable. These can be attributed to the use of different systems of recording trade, to the way in which for example IMF and UNSD have converted data expressed in national currencies into dollars, and revisions which can be more readily incorporated in the IMF data.

Statistics on trade in commercial services are mainly drawn from the IMF *Balance of Payments Statistics*. For economies that do not report to the IMF (e.g., Chinese Taipei) data are drawn from national sources. Estimations for missing data are mainly based on national statistics. Statistics on trade in commercial services by origin and destination are also derived from national statistics.

GDP series in current dollars are mainly derived from the World Bank *World Development Indicators*, supplemented in some cases with statistics from the IMF *World Economic Outlook database*.

Acknowledgements are due to the Food and Agriculture Organization, the International Monetary Fund, the Organisation for Economic Co-operation and Development, the Statistical Office of the European Communities, the United Nations Economic Commission for Europe, the United Nations Economic Commission for Latin America and the Caribbean, the United Nations Statistics Division, the United Nations Industrial Development Organization and the World Bank whose assistance in supplying advance information has greatly facilitated the work of the Secretariat. Acknowledgements are also due to national institutions for providing advance statistics.

Appendix

Table A1

World merchandise exports, production and gross domestic product, 1950-2006

(Index, 2000=100)

	Value				Volume								
	Exports				Exports				Production				GDP

^a Includes significant re-exports.^b Prior to 2004, European Union (25) individual country data do not add up to the reported aggregate due to Eurostat's use of different methodologies for Cyprus, Estonia and Lithuania.^c Beginning with 1998, figures refer to South Africa only and no longer to the South African Customs Union.

Note: Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an "...". They result mainly from changes in the methods of collecting and reporting merchandise trade statistics.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes re-exports. Recent figures for a number of countries and territories have been estimated by the Secretariat.

a Includes significant imports for re-export.

b Imports are valued f.o.b. See the Metadata on f.o.b. valuation of other economies.

c Beginning with 1998, figures refer to South Africa only and no longer to the South African Customs Union.

Note: Breaks in the continuity of the value series for particular countries and regional groupings are indicated by an 'I'. They result mainly from changes in the methods of collecting and reporting merchandise trade statistics.

It should be noted that the World and Asia totals contain a significant element of double counting due to the use of the general system of recording merchandise trade statistics which includes re-exports. Recent figures for a number of countries and territories have been estimated by the Secretariat.

a See the Metadata for estimation of intra and extra-EU trade

b Secretariat estimates for exports from 1995 to 2002 are based on the new methodology applied by the Bank of Japan. See the Metadata

Note: Due to frequent revisions to the services data, there are numerous breaks in the continuity of the data series at the country and regional levels. See the Metadata.

a Includes unspecified products.

b Includes unspecified destinations and origins.

Note: The figures are affected by the "INTRASTAT" system of recording trade between EU member States. Unspecified products account for 1.4 per cent of total intra-EU trade, and intra-EU imports are under-recorded. To compensate for this under-recording, intra-EU exports have been used to obtain total (World) imports. Major trading partners were selected on the basis of 2006 data. For sources and methods, see the Meta data.

Table A22

Merchandise trade by product, region and major trading partner, 2005-2006 - China

(Billion dollars)

a Includes unspecified products.

b Includes unspecified destinations and origins.

Note: It should be noted that China Customs Statistics record the country of origin for imports and the country of final destination for exports. However, if the country of final destination cannot be ascertained, exports are attributed to the last known country of dispatch (see China's Customs Statistics, December 2003). For sources and methods, see the Metadata.

Charts

Chart 1

Volume of world merchandise exports and gross domestic product, 1950-2006

Chart 2

Volume of world merchandise trade by selected region, 2000-2006

Chart 3

World merchandise trade volume by major product group, 1950-2006

(Volume indices, 1950=100)

Log. scale

(Average annual percentage change)

■ Agricultural products
 ■ Fuels and mining products
 ■ Manufactures

Chart 4

Value of world merchandise trade by region, 2000-2006

(Annual percentage change in value)

Chart 5

Value of world trade in commercial services by region, 2000-2006

(Annual percentage change in value)

Exports Imports

Chart 6

Regional shares in world merchandise exports, 1996 and 2006

(Percentage)

WTO Members share in world merchandise trade, 2006

(Percentage)

Chart 8

WTO Members share in world merchandise trade, excluding intra-EU (25), 2006

(Percentage)

Chart 9

WTO Members share in world commercial services trade, 2006

(Percentage)

Chart 10

WTO Members share in world commercial services trade, excluding intra-EU (25), 2006

(Percentage)

Chart 11

Merchandise exports of least-developed countries by major product, 2005

(Percentage of total value)

Map 1

Composition of geographical regions

North America
South/Central America
Europe
C.I.S.
Africa
Middle East
Asia
