The Department of Economic and Social Affairs (DESA) of the United Nations Secretariat is a vital interface between the global policies in the economic, social and environmental spheres and national action. The Department work in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which United Nations Member States draw to review common problems and take stock of policy options; (ii) it facilitates the courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Le Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies sert de relais entre les orientations arrêtées au niveau international dans les domaines économiques, sociaux et environnementaux et les politiques exécutées à l'échelon national. Il intervient dans trois grands domaines liés les uns aux autres : i) il compile, produit et analyse une vaste gamme de données et d'éléments d'informations sur des questions économiques, sociales et environnementales dont les Etats Membres de l'Organisation se servent pour examiner des problèmes communs et évaluer les options qui s'offrent à eux; ii) il facilite les négociations entre les Etats Membres dans de nombreux organes intergouvernementaux sur les orientations à suivre de façon collective afin de faire face aux problèmes mondiaux existants ou en voie d'apparition; et iii) il conseille les gouvernements intéressés sur la façon de transposer les orientations politiques arrêtées à l'occasion des conférences et sommets des Nations Unies en programmes exécutables au niveau national et aide à renforcer les capacités nationales au moyen de programmes d'assistance techniques.

ABBREVIATIONS AND COUNTRY NOMENCLATURE

Names of some countries (or areas) or groups of countries (or areas) and of some commodities or groups of commodities have been abbreviated. Exact titles and the composition of groups of countries or commodities will be found in various editions of the following publications referred to in the Introduction (see para 2 and 4):

(i) Standard Country or Area Codes for Statistical Use

(ii) Standard International Trade Classification (SITC)

(iii) Classification by Broad Economic Categories (BEC)

1. Data relating to the People's Republic of China generally include those for Taiwan Province in the field of statistics relating to population, area, natural resources, natural conditions such as climate, etc. In other fields of statistics, they do not include Taiwan Province unless otherwise stated. Therefore, in this publication the data published under the heading China exclude those for Taiwan Province. Figures representing the trade with Taiwan Province, which may have been reported by any reporting country or area, are included in the grouping Asia. Pursuant to a Joint Declaration signed on 19 December 1984, the United Kingdom restored Hong Kong to the People's Republic of China with effect from 1 July 1997; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date. For statistical purposes, the data for China do not include those for Hong Kong Special Administrative Region. Pursuant to a Joint Declaration signed on 13 April 1987, Portugal restored Macao to the People's Republic of China with effect from 20 December 1999; the People's Republic of China resumed the exercise of sovereignty over the territory with effect from that date. For statistical purposes, the data for China do not include those for Macao Special Administrative Region.

2. On 22 May 1990 Democratic Yemen and Yemen merged to form a single State. Since that date they have been represented as one Member with the name "Yemen". All data shown in this publication relating to the period prior to 1990 refer to the former Democratic Yemen and the former Yemen.

3. Through accession of the German Democratic Republic to the Federal Republic of Germany with effect from 3 October 1990, the two German States have united to form one sovereign State. As from the date of unification, the Federal Republic of Germany acts in the United Nations under the designation of "Germany". All data shown which pertain to Germany prior to 3 October 1990 are indicated separately for the Federal Republic of Germany and the former German Democratic Republic based on their respective territories at the time indicated. Where data for united Germany (subsequent to 3 October 1990) are not available, they are shown separately and pertain to the territorial boundaries prior to 3 October 1990.

4. In 1991, the Union of Soviet Socialist Republics formally dissolved into fifteen independent countries (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Republic of Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan). From 1992 onwards data are shown for the individual countries. Prior to 1992 data are shown for the former USSR.

5. Data for the Czech Republic and Slovakia, where available, are shown separately under the appropriate country name. For periods prior to 1 January 1993, where no separate data are available for the Czech Republic and Slovakia, unless otherwise indicated, data for the former Czechoslovakia are shown under the country name "former Czechoslovakia".

6. Beginning 1 January 1997, the overseas departments of France were included in the statistical territory of France for the purposes of international trade statistics. Values on this basis have been provided by France for 1996 also, and values are published on that basis in this publication.

7. Beginning 1 January 1999, Belgium and Luxembourg provide their international trade statistics separately. For periods prior to 1 January 1999, unless otherwise indicated, data are shown for the Economic Union of Belgium and Luxembourg under the name "Belgium-Luxembourg".

8. Beginning 1 January 2000, Botswana, Lesotho, Namibia, South Africa and Swaziland provide their international trade statistics separately. For periods prior to 1 January 2000, unless otherwise indicated, data are shown for the Southern African Customs Union.

9. On 4 February 2003, the official name of the Federal Republic of Yugoslavia has been changed to Serbia and Montenegro. Data provided for Yugoslavia prior to 1 January 1992 refer to the Socialist Federal Republic of Yugoslavia which was composed of six republics. Data referring to the years 1992 and later are attributed to Bosnia and Herzegovina, Croatia, Serbia and Montenegro, Slovenia and the Former Yugoslav Republic of Macedonia.

10. On 3 June 2006, Serbia and Montenegro formally dissolved into 2 independent countries: Montenegro and Serbia.

ABREVIATIONS ET CODES DES PAYS

Les noms de certains pays (ou zones) ou groupes de pays (ou zones) et de certains produits ou groupes de produits ont dû être abrégés. On trouvera les intitulés exacts de ces noms dans des différentes éditions des publications suivantes qui figurent dans l'Introduction (voir aussi para 2 et 4):

(i) Codes standard des pays et des zones à usage statistique

(ii) Classification type pour le commerce international (CTCI)

(iii) Classification par grandes catégories économiques (CGCE)

1. Les données relatives à la République populaire de Chine comprennent en général les données relatives à la province de Taïwan lorsqu'il s'agit de statistiques concernant la population, la superficie, les ressources naturelles, les conditions naturelles tel que le climat, etc. Dans les statistiques relevant d'autres domaines, la province de Taïwan n'est pas comprise, sauf indication contraire. C'est le cas dans cet Annuaire où les données pour la Chine ne comprennent pas celles de la province de Taïwan. Lorsque des pays partenaires ont déclaré des échanges avec Taïwan ceux-ci sont inclus dans Asie. Conformément à une Déclaration commune signée le 19 décembre 1984, le Royaume-Uni a rétrocédé Hong-kong à la République populaire de Chine, avec effet au 1er juillet 1997; la souveraineté de la République populaire de Chine s'exerce à nouveau sur le territoire à compter de cette date. Pour les statistiques, les données de la Chine ne comprennent pas celles de la région administrative spéciale de Hong Kong. Conformément à une Déclaration commune signée le 13 décembre 1987, le Portugal a rétrocédé Macao à la République populaire de Chine, avec effet au 20ième décembre 1999; la souveraineté de la République populaire de Chine s'exerce à nouveau sur le territoire à compter de cette date. Pour les statistiques, les données de la Chine ne comprennent pas celles de la région administrative spéciale de Macao.

2. Le Yémen et le Yémen démocratique ont fusionné le 22 mai 1990 pour ne plus former qu'un seul Etat, qui est depuis lors représenté comme tel à l'Organisation, sous le nom 'Yémen'. Toutes les données présentées dans cet Annuaire qui se rapportent à la période antérieure à l'année 1990 se réfèrent aux anciens Yémen démocratique et Yémen.

3. En vertu de l'adhésion de la République démocratique allemande à la République fédérale d'Allemagne, prenant effet le 3 octobre 1990, les deux Etats allemands se sont unis pour former un seul Etat souverain. A compter de la date de l'unification, la République fédérale d'Allemagne est désignée à l'ONU sous le nom 'Allemagne'. Toutes les données se rapportant à l'Allemagne avant le 3 octobre 1990 figurent dans deux rubriques séparées, basées sur les territoires respectifs de la République fédérale d'Allemagne et l'ancienne République démocratique allemande selon la période indiquée. En l'absence de données pour l'Allemagne unifiée (à compter du 3 octobre 1990), les données sont fournies séparément sous les rubriques

Allemagne (République fédérale d') et Allemagne (ancienne République démocratique) et se rapportent aux limites territoriales antérieures au 3 octobre 1990 lorsqu'elles sont disponibles.

4. En 1991, l'ex Union Soviétique a été scindée officiellement en quinze républiques indépendantes (Arménie, Azerbaïdjan, Bélarus, Estonie, Fédération de Russie, Géorgie, Kazakstan, Kirghizistan, Lettonie, Lituanie, Ouzbékistan, République de Moldova, Tadjikistan, Turkménistan et Ukraine). A partir de 1992 les données sont indiquées pour chaque république individuellement. Avant 1992, les données sont indiquées pour l'ancienne URSS.

5. Les données relatives à la République tchèque, et à la Slovaquie, lorsqu'elles sont disponibles, sont présentées séparément sous le nom de chacun des pays. En ce qui concerne la période antérieure au 1er janvier 1993, pour laquelle on ne possède pas de données séparées pour les deux Républiques, les données relatives à l'ancienne Tchécoslovaquie sont, sauf indication contraire, présentées sous le titre 'ancienne Tchécoslovaquie'.

6. A partir du 1er janvier 1997, pour les statistiques du commerce international, le territoire statistique de la France comprend les départements d'outre-mer. Les valeurs ont été fournies aussi sur cette base par la France pour 1996, et sont publiées dans cet annuaire.

7. A partir du 1er janvier 1999, la Belgique et Luxembourg présentent leurs statistiques du commerce international séparément. En ce qui concerne la période antérieure au 1er janvier 1999, sauf indication contraire, les données relatives à l'Union économique de la Belgique et Luxembourg sont présentées sous le titre 'Belgique-Luxembourg'.

8. A partir du 1er janvier 2000, Botswana, Lesotho, la Namibie, Swaziland et l'Afrique du Sud présentent leurs statistiques du commerce international séparément. En ce qui concerne la période antérieure au 1er janvier 2000, sauf indication contraire, les données sont présentées pour l'Union douanière d'Afrique australe.

9. Le 4 février 2003 la République fédérative de Yougoslavie a changé officiellement son nom en Serbie et Monténégro. Les données fournies pour la Yougoslavie avant le 1er janvier 1992 se rapportent à la République fédérative socialiste de Yougoslavie, qui était composée de six républiques. Les données relatives à l'année 1992 et après sont attribuées à la Bosnie-Herzégovine, la Croatie, la Serbie et Monténégro, la Slovénie et l'ex-République yougoslave de Macédoine.

10. Le 3 juin 2006, la Serbie et Monténégro ont changé officiellement en deux républiques indépendantes: le Monténégro et la Serbie.

INTRODUCTION

1. This fifty-sixth edition of the International Trade Statistics Yearbook (the Yearbook) provides the basic information for individual countries' external trade performances in terms of value, as well as in volume and price, the importance of trading partners and the significance of individual commodities imported and exported. This edition shows annual statistics up to the year 2007 for 180 countries or areas. It is published in two volumes.

2. Similar to the last edition, the commodities in this issue are classified according to the Standard International Trade Classification (SITC) [1/], Revision 3, instead of the SITC, Revision 2, used in earlier editions. The SITC, Revision 3, came into force in 1988 together with the Harmonized Commodity Description and Coding System (HS) and is structured in such a way that a close correlation exists with the headings of HS, which have been more and more used by countries since the early nineties as the primary tool for classifying goods at the Customs offices. By now, time series data are available in HS for almost all countries and areas. These data are converted into SITC, Revision 3, and presented in tables 3 and 4 of Volume I and the Commodity tables of Volume II of this Yearbook. Beginning 2007, many countries and areas started to collect and compile trade data according to HS 2007 classification. To maintain time series, a conversion between HS 2007 and SITC, Revision 3 has been developed and implemented.

3. Regional groupings are shown according to the regions used in the Millennium Development Goal Indicator Database (see http://unstats.un.org/unsd/mdg/default.aspx). The following regional groupings are applied in the Country tables of Volume I of this yearbook as well as in the Commodity tables and in Special Table A, D, E, F and H of Volume II – the category 'Other' applies only to the presentation of data by trading partner and consists of Antarctica, Bunkers, Free Zones, 'Special Categories' (confidential partner) and Areas nes.:

4. Volume I contains detailed data for individual countries or areas. Depending on the availability of data the following tables usually appear for each country or area:

(a) Tables 1 and 2, showing up to the most recent five years available, the value in United States dollars of import and export trade analyzed by the principal countries or areas and regions of origin and destination. The analysis is made according to the United Nations Standard Country or Area Codes for Statistical Use[2]. In some instances, owing to the nature of the national country classification, the conversion to the United Nations country classification could not be done precisely. A maximum of 25 trading partners are shown, in order of magnitude, based on the sum of the values over the years included in the table, with imports and exports ranked separately. Below this table is a second table showing the percentage breakdown of trade by regions for the latest available ten years. Regional totals are calculated only if the available partner detail exceeds 80% of the reported total imports or exports. Furthermore, if the available partner detail is less than 50% for all years, the table will not be shown at all.

(b) Tables 3 and 4, showing up to the most recent four years available, the quantity and the value in United States dollars of imports and exports analyzed by principal commodities. The commodities are shown in terms of the Standard International Trade Classification (SITC)[1], Revision 3 codes and headings (abbreviated). Data for a commodity will appear if the value in any year is greater than or equal to 0.5 per cent of the total trade for that year. Some lines for 2-, 3- or 4-digit commodity codes are omitted in cases where the line of the more detailed commodity code (for instance at 5-digit level) contains exactly the same information in terms of value and quantity for all four years shown.

(c) Table 5, showing up to the most recent seven years available, percentage breakdowns of imports by broad economic categories. The analysis for imports is based on the Classification by Broad Economic Categories[3]. Reclassification of foreign trade according to broad economic categories requires statistical information at the detailed levels of the HS or the SITC, Revision 3.

5. In some instances the figures shown in United States dollars in the tables indicated under 4(a) and 4(b) above may not correspond to those in United States dollars in the Special Table A or to those in national currency in Special Table B after the application of the currency conversion factors in Special Table C. These discrepancies arise in part from revisions to the more recent data at the total level and these revisions were not broken down for the more detailed data by commodity and partner. In some cases the differences may be due to differences in coverage/definitions of the data. It was felt, however, that a partial revision of the tables referred to under 4(a) and 4(b) above to make the totals consistent with those in the Special Tables should not be made. More information on the Special Tables is given in para 14 to 17.

6. For all countries, the data in Tables 3 and 4 are presented according to SITC Revision 3. Most countries report data according to the Harmonized Commodity Description and Coding System (HS). The data so reported for these countries, were converted to SITC Revision 3. Trade data according to HS and SITC, Revision 3, can be found on the web site of the United Nations

Statistics Division at http://comtrade.un.org/. Detailed descriptions of the concepts and definitions applied by countries were previously made available in the United Nations mimeograph "National Reporting Practices in International Merchandise Trade Statistics" (ST/ESA/STAT/112), issued February 1996.

7. In July 2006, a new questionnaire on "National Compilation and Dissemination Practices" was sent out to all national agencies responsible for compiling international merchandise trade statistics. A database containing the detailed results by country, together with an overview of national compilation and dissemination practices and various summary tables were made available on the website of the Trade Statistics Branch of the United Nations Statistics Division at http://unstats.un.org/unsd/tradereport/introduction_MM.asp in July 2008.

8. Given the economic importance of the European Union (EU), separate pages have been added for the external trade of the EU (with its 27 members) as a whole. These pages are given as a memorandum item just after the end of all the country pages.

VOLUME II

9. Volume II contains commodity tables showing the world trade of certain commodities analyzed by regions and countries and the Special Tables A to K. The regional structures used for the Commodity tables and Special Tables A, D, E, F and H are identical to that which is used in Volume I. For Special Tables I, J and K, the structure of the regional groupings is mostly in line with that of the earlier editions of the yearbook.

10. Commodity tables. These tables show imports and exports of commodities at the group (3-digit) level of the SITC, Revision 3. All groups are covered except for 286, Ores and concentrates of uranium and thorium; 345, Coal, water or other producer gases; and 911, Postal packages not classified according to kind (for an explanation, see paragraph 11 below). The years covered are the five years 2003 to 2007. The values are in U.S. dollars and both imports and exports are analyzed by regions and principal trading countries. A maximum of 25 countries are shown in order of magnitude, based on the sum of the values over the years 2003 to 2007, with imports and exports ranked separately. No quantity data are shown.

11. In preparing these tables, in many cases estimates were made for countries whose data were not yet available and these are shown with an 'e'. In some cases, estimates were made for particular countries, and they were considered adequate to include in regional and world totals but not sufficiently explained to be published separately for the country; consequently, they have been suppressed and only an 'e' appears in the table. The commodity groups mentioned in paragraph 10 above, (286, 345 and 911) are suppressed from publication because they were poorly reported and contain many estimates which are not sufficiently explainable. Strictly speaking, a regional or world total that contains estimates should be shown with an 'e'. However, virtually all the regional and world totals include estimates and the 'e' has been omitted for cosmetic purposes.

12. The procedure for estimating trade data for a given year and a given country takes some reported ('true') data as a starting point. The minimum required reported input data are the import and export totals of a country. Sometimes other aggregated commodity information is also available and is taken into account; this may include some 3-digit or other commodity totals reported by the country. The estimation procedure then takes the available reported data and initial estimates (which may be either (1) the 3-digit commodity totals of the country for an adjacent (reported) year or (2) the 3-digit commodity totals for the country as reported by all its trading partners combined, for the given year) and scales them in such a way that at every level of the commodity classification the total of the commodity estimates and any reported data add up to the reported ('true') totals at the higher level and ultimately to the totals of the imports and exports.

13. Volume II also contains special tables showing, inter alia, (a) the contribution of the trade of each country to the trade of its region and of the world, (b) the flow of trade between countries and regions and (c) the fluctuations of the prices at which goods are traded internationally. The special tables are:

A. Total imports and exports by regions and countries and areas (in US dollars);
B. Total imports and exports by countries and areas (in national currency);
C. Trade Conversion Factors;
D. World exports by commodity classes and by regions;
E. Growth of world exports by commodity classes and by regions;
F. Structure of world exports by commodity classes and by regions;
G. Total imports and exports by countries or areas: volume and unit value indices and terms of trade in US dollars;
H. Total imports and exports by regions; volume and unit value indices, and terms of trade in US dollars;
I. Manufactured goods exports (unit value and volume indices and value);
J. Fuel imports: developed economies (unit value and volume indices and value);
K. Some indicators on fuel imports: developed economies.

16. The special tables can be characterized in the following way:

(A) Total imports and exports by regions and countries and areas (in US dollars). The regional, economic and world totals have been adjusted: (a) to include estimates for countries or areas for which full data are not available; (b) to include countries or areas not listed separately; and (c) where possible, to eliminate incomparability owing to geographical changes, by adjusting the figures for periods before the change to be comparable to those for periods after the change, for example, the European Union and the European Free Trade Association. The figures shown for individual countries correspond to the figures, which appear and are described in Special Table B. For general note and footnotes, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

(B) Total imports and exports by countries and areas (in national currency). The table contains totals of trade by countries reported in terms of national currency. For totals in terms of U.S. dollars for all countries and areas see Special Table A. For general note and footnotes, see the end of the table.

Monthly and quarterly data appear in the Monthly Bulletin of Statistics.

(C) Trade Conversion Factors. The conversion factors shown in the table were used to convert trade data expressed in terms of national currency to U.S. dollars. For general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(D) World exports by commodity classes and by regions. For the general note and footnotes, see the end of the table.

(E) Growth of world exports by commodity classes and by regions. The annual average rates of change in percentage terms given in this table have been uniformly calculated by the use of the compound interest formula:

$$r = \left(\sqrt[t]{\frac{Vn}{Vo}} - 1 \right) * 100$$

r = Annual average rate of change in percentage terms.
Vn = Value of exports during the last year of the period.
Vo = Value of exports during the first year of the period.
t = Number of years in period.

For the general note and footnotes, see the end of Special Table F.

(F) Structure of world exports by commodity classes and by regions. The figures shown under the heading 'Origin of Exports' refer to the exports of the region or country appearing in the 'Area' column; those shown under the heading 'Destination of Exports' refer to the exports of the world to the region or country appearing in the 'Area' column. For the general note and footnotes, see the end of the table.

(G) Total imports and export by countries or areas (volume and unit value indices and terms of trade in US dollars). For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(H) Total imports and exports by regions (volume and unit value indices and terms of trade in US dollars). For the footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

(I) Manufactured goods exports (unit value and volume indices and value). For the general note and footnotes, see the end of Table K.

Quarterly data appear in the Monthly Bulletin of Statistics.

(J) Fuel imports: developed economies (unit value and volume indices and value). For the general note and footnotes, see the end of Table K.

Quarterly data appear in the Monthly Bulletin of Statistics.

(K) Some indicators on fuel imports: developed economies. This table shows the share of fuel imports in the total value of imports and in the total value of exports, and the ratio of unit value indices of manufactured goods exports to those of fuel imports. For the general note and footnotes, see the end of the table.

Quarterly data appear in the Monthly Bulletin of Statistics.

SOURCES AND PRESENTATION

18. The figures for Volumes I and II are obtained from national published sources, from data supplied by the Governments for use in this publication, from data supplied by the International Monetary Fund, the Organization for Economic Co-operation and Development, the Economic Commission for Latin America and the Caribbean, the Economic Community of West African States, The Common Market of Eastern and Southern Africa, the Food and Agriculture Organization of the United Nations. Estimates for some missing data are made by the United Nations Statistics Division.

19. The country and regional names used by various countries are not uniform for their trade statistics. Also, where former geographical entities commonly referred to in national statistics have changed, countries may introduce the corresponding changes in their statistics at different times. Wherever possible, however, parts of the world have been designated by the names they currently bear.

20. Generally, data refer to calendar years; however, for those countries which report according to some other reference year, the data are presented in the year which covers the majority of the reference year used by the country. The countries concerned are India (April-March), Nepal (July-June) and Myanmar (April-March).

NATIONAL INDEX NUMBERS

21. National index numbers of unit value and of volume are shown in Special Table G of Volume II converted to US dollars. They are the official indices which show the changes in the volume, and the average price (unit value index) of the aggregate merchandise imports or exports. Each index number represents a change between the period to which the number refers, called the current period, and a reference period, in which the index is represented by the percentage 100. In order to facilitate comparison, the indices shown have been rebased to 2000, where necessary. When changes are made in the coverage, formula or base period of an index, the two series are linked together if they have an overlapping period and are sufficiently comparable.

22. Annual, quarterly and monthly figures for these index series in national currency appear in the United Nations Monthly Bulletin of Statistics and a more detailed description of their compilation is given in the 1977 Supplement to the Statistical Yearbook and the Monthly Bulletin of Statistics[4]. The publication "National Practices in Compilation and Dissemination of External Trade Index Numbers: A Technical Report"[5] provides detailed information on national practices in compilation and dissemination.

TRANSITION COUNTRIES

23. For the period covered by this Yearbook, countries formerly classified for statistical purposes as centrally planned economies had systems of official rates between their currencies and other currencies, all consistent with rates of 0.90 new roubles to the United States dollar prior to 24 December 1971 and 0.829 new roubles to the United States dollar until February 1973; since then these rates have been fluctuating. They generally used these rates when it was necessary to convert foreign into domestic currencies for the purpose of compiling external trade statistics. The resulting data are for comparison with the external transactions of the rest of the world rather than with domestic monetary transactions.

24. The trade statistics of these countries had definitions somewhat different from those which exist in other countries. Differences in definition contribute to the discrepancies which can be observed between statistical records referring to the same flow of goods but kept by two trading partners having different economic systems. The trade among these countries was carried out on a basis not comparable to that governing trade with other countries. The concept of transaction value, for instance, as applied outside those countries is based on the existence of a market between exporters and importers in which the interaction of supply and demand has more effect than it can be assumed to have had in those countries; in the absence of data on the unit values of specific commodities entering the trade of those countries with one another, it is difficult to assess the possible effects on the trade statistics of this kind of incomparability. Increasingly since 1992, the transition countries have adopted similar concepts and definitions for international trade statistics as are in effect in other countries.

GENERAL STATEMENTS

25. The statistics in this Yearbook have been compiled by national statistical authorities largely consistent with the United Nations recommended International Merchandise Trade Statistics, Concepts and Definitions, Revision 2.[6] The main elements of the concepts and definitions are:

1. Statistical territory. In international merchandise trade statistics, the objective is to record goods entering and leaving the economic territory of a country. In practice, what is recorded is goods that enter or leave the statistical territory, which is the territory with respect to which data are being collected. The statistical territory may coincide with the economic territory of a country or with some part of it. It follows that when the statistical territory of a country and its economic territory differ, international merchandise trade statistics do not provide a complete record of inward and outward flows of goods.

2. System of trade. There are two trade systems in common use by which international merchandise trade statistics are compiled: the general trade system and the special trade system:

(a) General trade: The general trade system is in use when the statistical territory of a country coincides with its economic territory. Consequently, under the general trade system,

imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of a compiling country.

(b) Special trade: The special trade system is in use when the statistical territory comprises only a particular part of the economic territory. The special trade system (strict definition) is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include all goods entering the free circulation area of a compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country. A "relaxed" definition of the special trade system is in use when (a) goods that enter a country for or leave it after inward processing and (b) goods that enter or leave an industrial free zone are also recorded and included in international merchandise trade statistics.

Tables 1 to 4 of Volume I indicate in their headings the system of trade to which the figures relate.

3. Valuation. At its fifteenth session, in 1953, the Economic and Social Council, taking the view that trade statistics must reflect economic realities, recommended that the Governments of Member States of the United Nations, wherever possible, use transaction values in the compilation of their national statistics of external trade or, when national practices are based on other values, endeavor to provide supplementary statistical data based on transaction values (Economic and Social Council resolution 469 B (XV)). To promote the comparability of international merchandise trade statistics and taking into account the commercial and data reporting practices of the majority of countries, it is recommended that: (a) The statistical value of imported goods be a CIF-type value; (b) The statistical value of exported goods be an FOB-type value. FOB-type values include the transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country. CIF-type values include the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country.

4. Currency conversion. For data in this publication, conversion of values from national currencies into United States dollars is done by means of currency conversion factors based on official exchange rates. Values in currencies subject to fluctuation are converted into United States dollars using weighted average exchange rates specially calculated for this purpose. The weighted average exchange rate for a given currency for a given year is the component monthly factors, mostly furnished by the International Monetary Fund, weighted by the value of the relevant trade in each month; a monthly factor is the exchange rate (or the simple average rate) in effect during that month. These factors are applicable to total imports and exports respectively, but not necessarily to trade in individual commodities or with individual countries.

5. Merchandise. In order that external trade statistics shall be suited to the measurement of the influence of national economies upon one another, international merchandise trade statistics record all goods which add to or subtract from the stock of material resources of a

country by entering (imports) or leaving (exports) its economic territory. Goods simply being transported through a country (goods in transit) or temporarily admitted or withdrawn (except for goods for inward or outward processing) do not add to or subtract from the stock of material resources of a country and are not included in the international merchandise trade statistics. In general the treatment of the classes of goods listed below is as indicated (for details and the complete list of inclusions and exclusions see International Merchandise Trade Statistics, Concepts and Definitions, Revision 2, paragraph 19-63[6]:

(a) Gold: Non-monetary gold such as, for example, gold powder and gold in other unwrought or semi-manufactured forms, gold coins and bars is included in imports and exports. Such gold might be for industrial use, such as in the manufacturing of jewellery or for use in dental work, or as a store of value, and it includes all gold which is not defined as monetary. Monetary gold (gold that is exchanged between national or international monetary authorities or authorized banks) is excluded from international merchandise trade statistics.

(b) Unissued banknotes and securities, and coins not in circulation: These items are regarded as commodities rather than as financial items, and should be included in imports or exports of products of the printing industry, and coin. Issued banknotes and securities and coins in circulation are regarded as financial items and should be excluded.

(c) Trade on government account is included as merchandise trade. Movements under government foreign aid programs (civil and military), war reparations and restitutions and military goods[7] moving internationally are therefore included. When goods are destined for use of national agencies (including embassies and military forces) stationed abroad they are, however, not considered to have moved in external trade and are excluded.

(d) Improvement and repair trade: Countries sending goods abroad for improvement or repair and later returned are said to be engaging in the passive improvement and repair trade; countries receiving goods from other countries for improvement or repair and eventual return engage in the active improvement and repair trade. Inward and outward movement in this trade are generally excluded from imports and exports.

(e) Goods dispatched through postal or courier services are included in merchandise trade.

(f) Fish catch, minerals from the seabed and salvage: Fish catch, minerals from the seabed and salvage when landed from foreign vessels in national ports or acquired by national vessels on the high seas from foreign vessels are to be included in import statistics while these goods when sold from national vessels in foreign ports or from national vessels on the high seas to foreign vessels are to be excluded from export statistics.

(g) Trade in ships, aircraft and other mobile equipment. Ships, aircraft and other mobile equipment bought and sold should be included.

(h) Bunkers and stores for ships and aircraft. In general, bunkers and stores should be included in aggregate merchandise imports and exports when the transactions of these goods are taking place inside the economic territory of a country.

6. Partner country. It is recommended that in the case of imports, the country of origin be recorded; and that in the case of exports, the country of last known destination be recorded. The country of origin of a good (for imports) is determined by rules of origin established by each country. The country of last known destination is the last country - as far as it is known at the time of exportation - to which goods are to be delivered, irrespective of where they have been initially dispatched to and whether or not, on their way to that last country, they are subject to any commercial transactions or other operations which change their legal status.

7. Trade analyzed by commodity. Analysis is according to the Standard International Trade Classification.

THE STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) AND THE HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM (HS)

26. In July 1950, the United Nations Economic and Social Council, on the advice of its Statistical Commission, recommended that Governments compile trade by commodity statistics according to the original SITC[1] in order to have available data in internationally comparable categories suitable for the economic analysis of trade. The original SITC had been prepared by the United Nations Secretariat with the assistance of expert consultants and in co-operation with Member Governments and interested international organizations.

27. In May 1960, the Statistical Commission approved a revision, similarly prepared, of the original SITC, known as the SITC, Revised, designed to take account of the changes in the pattern of trade since 1950 and to simplify the relation between the SITC and internationally agreed customs tariff nomenclatures. The SITC, Revised, is a rearrangement into statistical order of the items of the 1955 Tariff Nomenclature (CCCN) of the Customs Co-operation Council.

28. The SITC, Revised, is based on 625 subgroups (identified by code numbers of four digits), most of which correspond to items of the original SITC. A number of subgroups are further subdivided either to distinguish commodities of statistical importance or to permit exact correspondence with the CCCN; this results in a basic (5-digit code) level for the SITC, Revised, consisting of 1,312 items. The subgroups are combined, progressively, into 177 groups, 56 divisions and 10 sections.

29. The headings of the SITC, Revised, are fully determined by their code numbers. The precise composition of each number is defined in the SITC, Revised, itself. In comparing data according to the SITC, Revised, with data according to a national commodity classification it must be remembered that the same brief description may refer to aggregates differing somewhat in composition.

30. Although the SITC, Revised, of 1960 represented a great improvement on the original SITC, basically the same reasons which led to the creation of the SITC and its first revision were found, in the late nineteen-sixties, to be once more valid. Since 1960 the volume of trade had increased rapidly and its geographic and commodity patterns had changed fundamentally. Consequently, a second revision of the SITC was undertaken. In October 1974 the Statistical Commission approved of this revision, known as SITC, Revision 2[1/], and in May 1975 the Economic and Social Council recommended that Member States of the United Nations should report data on external trade according to the SITC, Revision 2, as far and as soon as possible. Starting with data for 1976, some countries began reporting trade statistics based on the SITC, Revision 2.

31. The basic headings of the SITC, Revision 2 had a one-to-one correspondence with the subdivisions of the Customs Co-operation Council Nomenclature (CCCN). However, there were a number of users who found the subdivisions of CCCN (and thus SITC, Revision 2) insufficient for their needs[8/]. There was also an expressed need for the harmonization of economic classifications[9/]. Partly to satisfy these needs, the Customs Co-operation Council in May 1973 undertook responsibility for the development and completion of the Harmonized Commodity Description and Coding System (HS)[10/].

32. At its twenty-first session, in January 1981, the Statistical Commission had taken note of the fact that a third revision of SITC would have to be made available when both the revised CCCN and HS came into force[11/]. Accordingly, later that year, the United Nations Secretariat commenced work on the revision of SITC, Revision 2, based on the principle that every effort should be made to maintain its general character and structure but taking into account the need for its harmonization with the revised CCCN, the International Standard Industrial Classification (ISIC) Revision 3[12/] and a Central Product Classification[13/] which was developed jointly by the United Nations Statistics Division and the Statistical Office of the European Communities.

33. The final draft was revised and approved by the Statistical Commission at its twenty-third session, in February 1985,[14/] and a resolution was adopted by the Economic and Social Council on 28 May 1985 which, inter alia, recommended that Member States should report internationally external trade statistics according to the Standard International Trade Classification, Revision 3 (resolution 1985/7).

34. The Harmonized System was adopted by the Customs Cooperation Council in June 1983, and the International Convention on the Harmonized System (HS Convention) entered into force 1 January 1988 (HS88). As of 30 June 2003 there were 112 Contracting Parties, and another 65 countries or territories which were not contracting parties but were using the HS for customs/statistical purposes.

35. The United Nations Statistical Commission, at its twenty-seventh session, held from 22 February to 3 March 1993, recommended that countries "adopt the HS for compilation and dissemination of their international trade statistics"[15/].

36. In accordance with the preamble of the HS Convention, which recognized the importance of ensuring that the HS be kept up-to-date in the light of changes in technology or in patterns of

international trade, the HS is regularly reviewed and revised. The United Nations Statistical Commission at its twenty-seventh session "recommended that the Customs Cooperation Council take fully into account the statistical implications of any changes proposed for HS and the statistical needs and capacities of developing countries"[16/]. Some minor revisions to the HS88, which also resulted in the deletion of one six-digit code, were made in 1992 (HS92). A more comprehensive set of amendments was adopted in 1993 and these amendments entered into force 1 January 1996 (HS96). In 1999 yet another set of amendments was adopted and these entered into force 1 January 2002 (HS02). The third major revision of the HS (HS07) entered into force on 1 January 2007.

37. The Statistical Commission, at its twenty-eighth session, 27 February - 3 March 1995 considered changes that would be required to the SITC, Rev. 3 to bring it into correlation with HS96; the Commission decided that the changes required in SITC, Rev. 3 to make it fully correlated with HS96 were minor in scale. The Commission therefore decided that it would not be necessary to issue a fourth revision of the SITC[17/].

38. The Statistical Commission, at its thirty-fifth session (2-5 March 2004), agreed with the conclusion of the Task Force on International Merchandise Trade Statistics that the fourth revision of SITC was needed in view of accumulated changes in HS[18/]. Accordingly, in mid-2004, the United Nations Statistics Division began preparation of SITC, Revision 4. The revision process was coordinated with the ongoing revisions of ISIC and CPC with a view to harmonizing these classifications as much as possible.

39. SITC, Revision 4 was accepted by the United Nations Statistical Commission at its thirty-seventh session[19/] (March 2006). The Task Force on International Merchandise Trade Statistics recommends SITC, Rev. 4 for use in the analysis of international merchandise trade by interested countries and international organizations. INTRODUCTION

1. La cinquante-sixième édition de l'annuaire statistique du commerce international (l'Annuaire) présente les informations nécessaires à l'étude des échanges de chaque pays, en termes de valeur et de prix ainsi que l'importance des différents pays partenaires et des principaux produits importés et exportés. Cette édition présente des données annuelles jusqu'à l'année 2007 pour 180 pays ou zones. L'annuaire est publié en deux volumes

2. Comme dans la dernière édition, les produits dans cette édition sont classifiés selon la Classification Type du Commerce International (CTCI)[1/], révision 3, au lieu de la CTCI, révision 2, qui était utilisée dans les éditions précédentes. La CTCI, révision 3, était adoptée en 1988 ensemble avec le Système Harmonisé de Désignation et de Codification des Marchandises (SH) et était construite de façon à ce qu'il existe une étroite correspondance avec les positions du SH, qui était adopté comme outil principal des douanes par de plus en plus de pays depuis les années quatre-vingt dix. Maintenant, de longues séries temporelles des données sont disponibles en SH pour presque tous les pays et zones. Ces données sont converties en CTCI, révision 3, et sont présentées dans les tableaux 3 et 4 du Volume I et dans les tableaux des produits du Volume II de cet annuaire. A partir de 2007, beaucoup de pays et zones ont commencé à collecter et produire des statistiques du commerce international selon la 3ème édition du SH (SH 2007). Afin de maintenir des séries temporelles, une table de conversion entre le SH 2007 and la CTCI, révision 3 a été produite et implémentée.

3. Les groupes régionaux sont présentés selon la structure utilisée dans le cadre des Objectives du Développement du Millénaire (voir http://unstats.un.org/unsd/mdg/default.aspx). Ces groupes sont montrés dans les tableaux par pays du Volume I, dans les tableaux par produits et dans les tableaux spéciaux A, D, E, F et H du Volume II – la catégorie 'Autre' s'applique seulement aux données présentées par partenaire commercial et est composée de l'Antarctique, des Balkans, des Zones Franches, des 'Catégories Spéciales' (partenaire confidentiel) et des Zones non spécifiées ailleurs :

VOLUME I

4. Le Volume I fournit des renseignements détaillés sur chaque pays ou zone au sujet duquel on trouvera généralement les tableaux suivants:

(a) Les Tableaux 1 et 2, présentant jusqu'aux cinq années les plus récentes la valeur en dollars des États-unis des importations et des exportations selon les principaux pays ou zones et régions d'origine et de destination. La distribution géographique est faite selon le Codes standard des pays et des zones à usage statistique[2/] des Nations Unies. Dans ces tableaux figurent les 25 pays partenaires les plus importants classés par ordre d'importance selon la somme des valeurs sur les années comprises dans le tableau. Une classification est effectuée séparément pour les importations et les exportations. La ventilation en pourcentage est également indiquée pour les zones d'origine et de destination pour les dix plus récentes années. Les totaux régionaux sont calculés seulement si la ventilation des partenaires disponibles dépasse 80% du total rapporté pour les importations et également pour les exportations. En outre, si la ventilation des partenaires disponibles ne dépasse pas 50% du total rapporté pour toutes les années le tableau ne sera pas publié.

(b) Les Tableaux 3 et 4, présentant les quantités et les valeurs en dollars des États-unis des importations et des exportations par marchandises principales jusqu'aux quatre plus récentes années. Les chiffres sont publiés pour une marchandise donnée si sa valeur pour une année donnée est égale ou supérieure à 0,5 pour cent de la valeur totale pour ladite année. Les marchandises sont présentées selon les titres de la Classification type du commerce international[1/] (CTCI), révision 3; les lignes pour les 2-, 3- ou 4-chiffre des codes produits, qui contiennent exactement la même information pour tous les 4 années (en terme des valeurs et des quantités) que la ligne du code produit plus détaillé (par exemple le code à 5-chiffre), sont dans la plupart des cas supprimées.

(c) Le Tableau 5, présentant jusqu'aux sept années les plus récentes disponible, les pourcentages par rapport au commerce total des importations selon la Classification par grandes catégories économiques.[3/] Toute re-classification du commerce extérieur par ces grandes catégories économiques nécessite beaucoup de détails au niveau de la classification des produits du SH ou de la CTCI, révision 3.

5. Parfois les données en dollars des tableaux décrits en 4(a) et 4(b) ci-dessus ne peuvent pas correspondre à celles en dollars des Etats Unis du tableau décrit en Tableau Spécial A ou à celles en monnaies nationales du Tableau Spécial B après l'application des facteurs de conversion du Tableau Spécial C. Les différences sont dues pour la plupart à des révisions au niveau du total du commerce qui parfois ne sont pas disponibles à un plus grand niveau de détail par produit et partenaire et qui n'ont donc pas été apportées aux tableaux décrits en 4(a) et 4(b). Plus d'information concernant les Tableaux Spéciaux est donnée dans les paragraphes 14 jusqu'à 17.

6. Pour tous les pays, les données présentées aux tableaux 3 et 4 sont classifiées selon la CTCI, Révision 3. Par contre, presque tous les pays déclarent leurs données fondées sur le SH. Les données ainsi déclarées ont été converties en CTCI, Révision 3. Des données du commerce

extérieur en SH et CTCI, Révision 3, sont disponibles sur l'Internet à l'adresse http://comtrade.un.org/. Une description détaillée des concepts et définitions actuels appliqués par les pays était disponibles dans le document des Nations Unies « Pratiques nationales du rapportage en matière de statistiques du commerce international des marchandises » (ST/ESA/STAT/112), publié en février 1996.

7. En juillet 2006, un nouveau questionnaire sur « les pratiques nationales de compilation et dissémination » était envoyé à toutes les agences nationales qui sont responsables pour la compilation des statistiques du commerce extérieur. Une base de données contenant les résultats détaillés par pays, un survol des pratiques nationales en matière de compilation et de dissémination et divers tableaux statistiques est rendue disponible sur le site internet de la Branche des Statistiques du Commerce de la Division des Statistiques des Nations Unies à l'adresse http://unstats.un.org/unsd/tradereport/introduction_MM.asp en juillet 2008.

8. Etant donné l'importance économique de l'union européenne (UE), des pages séparés ont été ajoutés pour le commerce extérieur de l'UE (avec ses 27 états membres) entière. Ces pages se trouvent comme articles de mémorandum à la fin des pages des pays.

VOLUME II

9. Le volume II contient des tableaux présentant le commerce mondial de certains produits de base, analysé par régions et pays et les Tableaux Spéciaux A à K. Les structures des régions utilisées dans les tableaux par produits et les tableaux spéciaux A, D, E, F et H sont identiques à celle du Volume I. Les tableaux spéciaux I, J et K ont gardé les groups régionaux des éditions antérieures.

10. Tableaux par produits. Ces tableaux comprennent les importations et les exportations au niveau du groupe à 3 chiffres de la CTCI, Révision 3. Tous les groupes sont y compris à l'exception de 286, Minerais et concentrés d'uranium et de thorium; 345, Gaz de houille, gaz à l'eau, gaz pauvre et gaz similaires et 911, Colis postaux, non classés par catégorie. Les années couvertes sont les cinq années de 2003 à 2007. Les valeurs sont exprimées en dollars des Etats-Unis et les échanges sont analysés par pays et régions. Dans ces tableaux figurent les 25 pays les plus importants classés selon la somme des valeurs sur les années 2003 jusqu'à 2007. Les quantités ne figurent pas dans ces tableaux.

11. Lors de la préparation de ces tableaux, on a eu recours à des estimations pour les pays dont les données n'étaient pas encore disponibles et ces estimations sont signalées par un 'e'. Dans quelques cas, des estimations ont été faites pour certains pays qui ont été jugées adéquates pour être incluses dans les totaux régionaux et du monde mais non suffisamment élaborées pour être publiées séparément pour ces pays. Elles ont de ce fait été éliminées et remplacées par un 'e'. Les groupes des produits mentionnés dans paragraphe 10 au-dessus, (286, 345 et 911) sont supprimés de la publication parce qu'ils étaient rapportés insuffisamment et portaient beaucoup d'estimations qui n'étaient pas assez expliquées. A vrai dire, les totaux régionaux et du monde, qui comprennent des estimations, devraient avoir un 'e'. Cependant, et en général, pratiquement

tous les totaux régionaux et du monde comprennent des estimations et les 'e' ont été omis dans ces cas pour des raisons d'esthétique.

12. La procédure pour estimer les données du commerce extérieur pour une certaine année et un certain pays attend au départ quelques données déclarées ('vraies'). Au moins il faut les totaux pour les importations et les exportations. Parfois des autres informations sur la ventilation des produits sont disponibles et sont utilisées; ça pourrait être des valeurs au niveau de 2- ou 3-chiffre de la classification des produits, qui sont déclarés par le pays. Ensuite la procédure d'estimation prend les données déclarées disponibles et les estimations initiales, qui comprennent soit (1) les valeurs des produits au niveau 3-chiffre qui étaient déclarées par le pays pour une année adjointe, soit (2) les totaux des valeurs au niveau 3- chiffre sur la base des données déclarées par les partenaires du pays concerné. Ensuite ces estimations initiales sont recalculées dans la façon que sur tous les niveaux de la classification des produits le total des valeurs estimés plus les valeurs déclarés est égale au valeur déclaré au niveau au-dessus et finalement est égale au valeur total pour les importations et les exportations.

13. Le Volume II aussi fournit des tableaux spéciaux où sont indiqués, entre autres, (a) la contribution des échanges de chaque pays par rapport à sa région et par rapport au monde; (b) le flux du commerce entre pays et régions et (c) les fluctuations des prix sur la base desquels les produits étaient échangés au niveau international. Les titres des tableaux spéciaux sont:

A. Importations et exportations totales par régions et pays ou zones (en dollars E-U);
B. Importations et exportation totales par pays ou zone (en monnaie nationale);
C. Facteurs de conversion pour le commerce extérieur;
D. Exportations mondiales par classes de marchandises et par régions;
E. Croissance des exportations mondiales par catégories de marchandises et par régions;
F. Structure des exportations mondiales par catégories de marchandises et par régions;
G. Importations et exportations totales par pays ou zones : indices du volume et de la valeur unitaire et termes de l'échange en dollars E-U ;
H. Importations et exportations totales par régions : indices du volume et de la valeur unitaire et termes de l'échange en dollars E-U;

(A) Importations et exportations totales par régions et pays ou zones (en dollars E-U). Les totaux régionaux, économiques et mondiaux, ont été ajustés: a) pour y inclure des estimations pour les données non disponibles; b) pour y inclure les pays ou zones pour lesquels il n'existe pas de liste séparée; c) autant que possible, pour éliminer les incompatibilités dues à des modifications géographiques pour obtenir des séries comparables par exemple, l'Union Européenne et l'Association Européenne de Libre-Echange. Les données ci-dessus pour chaque pays correspondent aux données qui apparaissent et qui sont décrites au Tableau Spécial B. Voir la fin du tableau pour les notes.

Le Bulletin Mensuel de Statistique présente des données mensuelles et trimestrielles.

(B) Importations et exportation totales par pays ou zone (en monnaie nationale). Ce tableau montre les totaux du commerce par pays déclarés en monnaie nationale. Pour les totaux en dollars E-U de tous les pays ou zones veuillez voir Tableau Spécial A. Voir la fin du tableau pour les notes.

r = Le taux annuel de croissance en pourcentage.
Vn = La valeur des exportations durant la dernière année de la période.
Vo = La valeur des exportations durant la première année de la période.
t = Le nombre d'années.

(F) Structure des exportations mondiales par catégories de marchandises et par régions. Les chiffres publiés sous le titre 'Origine des exportations' se réfèrent aux exportations de la région ou du pays indiqués dans la colonne zone. Il en est de même pour les 'Destinations des exportations'. Voir la fin du tableau pour la remarque générale et les notes.

SOURCE ET PRESENTATION

18. Les données pour les Volumes I et II sont obtenues à partir de publications nationales, des données fournies par les gouvernements pour cet ouvrage, par le Fonds Monétaire International, par l'Organisation de Coopération de Développement Economique, par la Commission Economique pour l'Amérique Latine et les Caraïbes, par la Communauté Economique des Etats de l'Afrique de l'Ouest, par le Marché Commun des Etats d'Afrique de l'Est et du Sud et par l'Organisation des Nations Unies pour l'Alimentation et l'Agriculture. Des estimations pour quelques données faisant défaut sont préparées par la Division de Statistique des Nations Unies.

19. Les noms de pays et régions utilisés par divers pays pour leurs statistiques du commerce extérieur ne sont pas uniformes. Aussi, lorsque d'anciennes entités géographiques généralement indiquées dans les statistiques nationales ont changé, les pays peuvent avoir introduit les changements correspondants dans leurs statistiques à différentes époques. Dans la mesure du possible toutefois, les pays ou zones ont été désignés par leur nom actuel.

20. En général, les données se réfèrent aux années selon le calendrier; cependant, pour les pays, qui déclarent leurs données selon l'année fiscale, les données sont présentées dans l'année qui couvre la plupart de l'année en référence. Les pays concernés sont l'Inde (avril – mars), Népal (juillet – juin) et Myanmar (avril – mars).

INDICES NATIONAUX

21. Les indices nationaux de la valeur unitaire et du volume antérieurement présentés dans Tableau Spécial G du Volume II en dollars E-U. Ils indiquent les modifications dans le volume et dans les prix (valeur unitaire) des agrégats des importations et des exportations. Chaque indice représente une modification entre la période à laquelle l'indice se réfère, la période

courante, et une période de référence pour laquelle l'indice est représenté par 100. Pour faciliter les comparaisons, chaque fois qu'il était nécessaire de le faire, les indices ont été ramenés à la base de l'année 2000. Lorsque des modifications sont faites dans la couverture, la formule ou la période de base d'un indice, si cela est techniquement possible les deux séries s'enchaînent.

22. Les indices mensuels, trimestriels et annuels en monnaie nationale sont publiés dans le Bulletin Mensuel de Statistique des Nations Unies. On trouvera également dans l'édition de1977 le Supplément à l'Annuaire Statistique et au Bulletin Mensuel de Statistique[4/] des notes plus détaillées sur les méthodes de calcul des indices nationaux. La publication « Les pratiques nationales de la Compilation et Diffusion des Indices du Commerce Extérieur » [5/] fournit des renseignements additionnels sur le calcul des indices nationaux.

PAYS EN TRANSITION

23. Pour la période couverte par l'Annuaire les pays classifiés antérieurement pour des raisons statistiques à économies planifiées centralement avaient un système de taux de change officiel entre leurs monnaies et celles des pays extérieurs consistant avec le taux de 0,90 nouveau roubles pour 1 dollar des Etats-Unis avant le 24 décembre 1971 et 0,829 jusqu'à février 1973; depuis cette date le taux a fluctué. Ils utilisaient généralement ces taux lorsqu'il était nécessaire de convertir des devises en monnaie nationale pour préparer les statistiques du commerce extérieur. Les données qui en résultent permettent davantage une comparaison avec les transactions des autres pays qu'une comparaison avec les transactions monétaires intérieures.

24. Les statistiques du commerce extérieur de ces pays ont des définitions différentes de celles qui peuvent exister dans les autres pays. Les différentes définitions peuvent être la source des divergences observées pour le même flux de marchandise enregistré par deux pays partenaires ayant un système économique différent. Les échanges entre ces pays peuvent être conduits sur une base différente de celle qui régit les échanges entre autres pays. Le concept de la valeur de transaction, par exemple, est basé sur l'existence d'un prix de marché entre l'importateur et l'exportateur sur lequel les variations de l'offre et de la demande ont plus d'influence qu'ils ne peuvent en avoir dans les échanges de ces pays. Faute de données précises sur les valeurs unitaires des produits de base échangés entre ces pays, il est difficile de connaître les effets possibles de ces différences sur les statistiques du commerce extérieur. De plus en plus, depuis 1992, les pays en transition ont adopté les concepts et définitions pour la statistique du commerce international comparables à celles qui sont en vigueur dans les autres pays.

NOTE GENERALE

25. Les statistiques dans cet Annuaire ont été compilées par les autorités nationales des statistiques principalement conforme aux recommandations des Nations Unies publiées dans Statistiques du Commerce international de marchandises : concepts et définitions, révision 2.[6/] En 1998 les Nations Unies ont fait paraître une révision de suite de cette publication; les pays étaient demandées d'introduire ces nouveaux concepts et définitions à partir des données pour l'année 1999. Les éléments principaux de ces concepts et définitions (Révision 2) sont:

1. Territoire statistique. Dans les statistiques du commerce international de marchandises, il s'agit d'enregistrer les biens qui entrent sur le territoire économique d'un pays ou qui le quittent. Concrètement, ce qui est enregistré, ce sont les biens qui pénètrent sur le territoire statistique, qui est le territoire pour lequel les données sont recueillies (ou les biens qui sortent de ce territoire). Le territoire statistique peut coïncider avec le territoire économique ou avec une partie de ce dernier. Par conséquent, lorsque le territoire statistique, ne coïncide pas avec le territoire économique, les statistiques du commerce international de marchandises ne constituent pas un relevé complet des flux de biens entrant et sortant.

2. Les systèmes de commerce. Il existe deux systèmes de commerce qui servent couramment pour les statistiques du commerce international de marchandises: le système de commerce général et le système de commerce spécial. Deux définitions du système du commerce spécial sont examinées ci-après, la définition stricte et la définition assouplie.

a) Commerce général. Le système du commerce général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique. Par conséquent, dans le cadre du système général, les importations comprennent tous les biens admis sur le territoire économique du pays déclarant et les exportations comprennent tous les biens qui le quittent.

b) Commerce spécial. Le système du commerce spécial est utilisé lorsque le territoire statistique ne comprend qu'une portion particulière du territoire économique. Le système spécial de commerce (définition stricte) est appliqué lorsque le territoire statistique ne comprend que la zone de libre circulation, c'est-à-dire la zone à l'intérieur de laquelle les biens « peuvent être écoulés librement sans restriction douanière ». Par conséquent, en pareil cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant c'est-à-dire qui ont été dédouanés pour mise à la consommation, et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant. Une définition « assouplie » du système de commerce spécial est utilisée lorsque a) les biens qui entrent dans le pays en vue de perfectionnement actif ou le quittent après le perfectionnement actif et b) les biens qui entrent dans une zone franche industrielle ou le quittent sont également enregistrés et inclus dans les statistiques du commerce international de marchandises.

Les titres des tableaux 1 à 4 du Volume I indiquent le système du commerce auquel se réfèrent les données.

3. Evaluation. Lors de sa quinzième session en 1953, le Conseil Economique et Social, tenant compte du fait que les statistiques du commerce extérieur doivent refléter la réalité économique, a recommandé que les gouvernements des pays membres des Nations Unies utilisent, dans la mesure du possible, les valeurs de transaction en préparant leurs statistiques du commerce international ou qu'ils fournissent des informations supplémentaires basées sur les valeurs de transaction quand les politiques nationales font état d'autres valeurs (Résolution 469 B (XV) du Conseil Economique et Social). Afin de rendre plus comparables les statistiques du commerce international des marchandises et compte tenu des pratiques commerciales et des pratiques de notification des données en vigueur dans la plupart des pays, il est recommandé : a) d'adopter une valeur de type CIF pour la valeur statistique des biens importés et b) d'adopter une

valeur de type FOB pour la valeur statistique des biens exportés. Les valeurs FOB comprennent la valeur transactionnelle des biens et la valeur des services fournis pour acheminer les biens jusqu'à la frontière du pays exportateur. Les valeurs CIF comprennent la valeur transactionnelle des biens, la valeur des services fournis pour acheminer les biens jusqu'à la frontière du pays exportateur et la valeur des services fournis pour acheminer les biens de la frontière du pays exportateur jusqu'à la frontière du pays importateur.

4. Conversion des monnaies. Pour les données dans cet Annuaire la conversion des valeurs nationales en dollars des Etats-Unis est effectuée au moyen de taux de conversion basés sur les taux de change officiels. Pour les monnaies sujettes à de larges marges de fluctuations par rapport au dollar, on utilise des moyennes pondérées des taux de change calculées spécialement dans ce but. La moyenne pondérée est le résultat des taux de change mensuels, généralement fournis par le Fonds Monétaire International, pondérés par les valeurs des importations et des exportations correspondantes. Les facteurs de conversion s'appliquent aux totaux des échanges mais pas nécessairement aux importations ou à l'exportation d'une marchandise donnée.

5. Marchandise. Afin que les statistiques du commerce extérieur puissent refléter l'influence des économies nationales les unes sur les autres, on enregistre dans les statistiques du commerce international de marchandises tous les biens dont l'entrée (importations) ou la sortie (exportations) du territoire économique fait augmenter ou diminuer le stock des ressources matérielles du territoire économique du pays considéré. Les biens simplement transportés à travers le pays (biens en transit) ou admis ou expédiés temporairement (à l'exception des biens destinés au perfectionnement actif ou passif) ne font ni augmenter ni diminuer le stock de ressources matérielles d'un pays et ne sont donc pas à inclure dans les statistiques du commerce international de marchandises. En général, le traitement des catégories de marchandises listées ci-dessous suit les règles énoncées (pour les détails et la liste complète des inclusions et exclusions, se référer à Statistiques du commerce international des marchandises : concepts et définitions, révision 2, paragraphes 19-63[6]) :

a) Or : L'or non-monétaire comme la poudre d'or, l'or sous d'autres formes brutes ou semi-finies, les pièces d'or et les lingots est inclus dans les importations et exportations. Cet or peut être destiné à l'usage industriel, notamment pour la fabrication de bijoux, servir à des fins dentaires, ou à la thésaurisation, et comprend tout or qui n'est pas défini comme monétaire. L'or monétaire (or échangé entre les autorités monétaires nationales ou internationales ou les banques autorisées) est exclu des statistiques du commerce international des marchandises.

b) Billets de banque et titres non émis et pièces qui ne sont pas en circulation : Ces articles sont considérés comme des produits, et non comme des actifs financiers et sont à incorporer dans les importations ou les exportations de produits d'imprimerie et de pièces. Les billets de banque et les titres émis ainsi que les pièces en circulation sont considérés comme des actifs financiers et doivent être exclus.

c) Le commerce pour le compte de l'Etat : Il est inclus dans le commerce des marchandises. Les échanges au titre des programmes d'aide civile et militaire, les réparations de

guerre et les équipements militaires[7/] sont donc inclus. Quand les marchandises sont destinées à des institutions nationales (ambassades ou forces armées) stationnées à l'étranger, elles ne sont pas comprises dans les statistiques.

d) Trafic de perfectionnement et de réparation : Les pays qui envoient à l'étranger temporairement des marchandises pour réparation ou complément d'ouvraison effectuent un trafic passif de réparation. Les pays recevant des marchandises dans les mêmes conditions effectuent un trafic actif de réparation. Les mouvements d'entrée et de sortie sont généralement exclus des importations et des exportations.

e) Les biens acheminés par la poste ou par courrier sont inclus dans le commerce des marchandises.

f) Produits de la pêche, minéraux extraits des fonds marins et biens de sauvetage : Les produits de la pêche, minéraux extraits des fonds marins et biens de sauvetage débarqués par des navires étrangers dans des ports nationaux ou acquis par des navires nationaux en haute mer auprès de navires étrangers sont à inclure dans les statistiques d'importations. Ces mêmes biens, lorsque vendus à partir de navires nationaux dans des ports étrangers ou en haute mer à des navires étrangers sont à exclure des statistiques des exportations.

g) Vente et achat de navires, d'aéronefs et d'autres équipements mobiles : La vente et l'achat de navires, d'aéronefs et d'autres équipements mobiles sont inclus.

h) Avitaillement des navires et des avions : En général, l'avitaillement des navires et des avions doit être inclus dans les importations et exportations totales de marchandises lorsque les transactions ont lieu à l'intérieur du territoire économique d'un pays.

6. Pays Partenaire. Il est recommandé que dans le cas des importations, le pays d'origine soit enregistré et dans le cas des exportations, le pays de dernière destination connue. Le pays d'origine d'une marchandise (pour les importations) est déterminé selon les règles d'origine établies par chaque pays. Le pays de dernière destination connue dans le cas des exportations est le dernier pays – dans la mesure ou on le sait au moment de l'exportation – auquel les biens doivent être livrés, qu'ils aient ou non été d'abord expédiés ailleurs, et qu'ils aient ou non, durant l'acheminement vers ce dernier pays, fait l'objet de transactions commerciales ou opérations qui en modifient le statut juridique.

7. Echanges par produits. L'analyse est selon la Classification Type pour le Commerce International.

CLASSIFICATION TYPE POUR LE COMMERCE INTERNATIONAL (CTCI) ET UN SYSTEME HARMONISE DE DESIGNATION ET DE CODIFICATION DES MARCHANDISES (SH)

26. En juillet 1950, le Conseil Economique et Social des Nations Unies, sur avis de la Commission de Statistique, a recommandé aux pays de rassembler leurs statistiques des

échanges par produits selon la CTCI originale[1/] afin de disposer au niveau mondial de données comparables pour l'analyse du commerce extérieur. La CTCI originale a été préparée par le Secrétariat des Nations Unies avec l'aide d'experts et en coopération avec les gouvernements et les organisations internationales concernées.

27. En mai 1960 la Commission de Statistique a approuvé une révision de la CTCI appelée la CTCI, révisée, qui tenait compte des modifications dans les courants commerciaux intervenus depuis 1950 et qui permettait un passage plus facile entre la CTCI et les nomenclatures internationales. La CTCI, révisée présentait selon une classification statistique les positions de la nomenclature tarifaire NCCD du Conseil de Coopération Douanière.

28. La CTCI, révisée comprend 625 sous-groupes (identifiés par un code à quatre chiffres) qui correspondent pour l'essentiel aux postes de la CTCI originale. Un certain nombre de sous-groupes ont été subdivisés soit pour obtenir des détails supplémentaires soit pour assurer une concordance exacte avec la NCCD. La CTCI, révisée comporte donc 1312 rubriques de base (niveau des 5 chiffres de la CTCI). Les sous-groupes sont rassemblés en 177 groupes, 56 divisions et 10 sections.

29. Les positions de la CTCI sont individualisées par leur numéro de code. Le contenu précis de chaque code est défini dans la CTCI, révisée. Si l'on compare les données selon la CTCI, révisée avec des données classées selon une nomenclature nationale, il faut tenir compte de ce que la même description, généralement abrégée, peut s'appliquer à des groupes de marchandises légèrement différents.

30. La révision de 1960 représentait par rapport à la CTCI initiale une amélioration considérable. Néanmoins vers la fin des années 1960 on a constaté que, pour l'essentiel, les raisons qui avaient conduit à l'établissement de la CTCI puis à sa première révision, se retrouvaient à nouveau valables. Depuis 1960 le volume des échanges commerciaux s'est accru rapidement tandis que leur répartition géographique et leur composition par produits se modifiaient radicalement. Une nouvelle révision de la CTCI fut donc entreprise. En octobre 1974, la Commission Statistique a approuvé cette révision, la désignation de la nouvelle révision est CTCI, Révision 2[1/]. En mai 1975 le Conseil Economique et Social a recommandé aux Etats membres des Nations Unies de communiquer les données sur les statistiques du commerce extérieur en se conformant autant que possible et le plus tôt possible à la CTCI, Révision 2. A partir des données pour 1976, certains pays ont commencé à communiquer leurs données selon la CTCI, Révision 2.

31. Il y avait entre les titres de base de la Classification type pour le commerce international, Révision 2 et les subdivisions de la Nomenclature du Conseil de Coopération Douanière une correspondance biunivoque. Toutefois, un certain nombre d'utilisateurs ont estimé que les subdivisions des positions de la NCCD (et par conséquent celles de la CTCI, Révision 2) ne suffisaient pas à leurs besoins[8/]. La nécessité d'une harmonisation des classifications économiques a également été signalée[9/]. En partie pour répondre à ces besoins, le Conseil de coopération douanière a assumé en mai 1973 la responsabilité d'élaborer et de mettre au point un système harmonisé de désignation et de codification des marchandises (SH)[10/].

32. A sa vingt et unième session, en janvier 1981, la Commission de statistique a pris note du fait qu'une troisième révision de la CTCI devait être disponible lorsque la NCCD révisée et le SH entreraient tous deux en vigueur[11/]. En conséquence, dans le courant de la même année, le Secrétariat de l'ONU a commencé à travailler à la révision de la CTCI, Révision 2 en partant du principe que le maximum devait être fait pour en conserver le caractère général et la structure, tout en tenant compte de la nécessité de son harmonisation avec la NCCD révisée, avec la Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI), Révision 3[12/] et avec une Classification des produits centrale (CPC)[13/] dont l'élaboration était menée conjointement par la Division de statistique des Nations Unies et l'Office statistique des Communautés européennes.

33. Le projet final a été révisé et approuvé par la Commission de statistique à sa vingt-troisième session, en février 1985[14/], et une résolution a été adoptée par le Conseil économique et social le 28 mai 1985 (résolution 1985/7) qui, inter-alia, a recommandé aux Etats Membres de communiquer des données sur les statistiques du commerce extérieur aux institutions internationales en se conformant autant que possible et le plus rapidement possible à la Classification type pour le commerce international (troisième version révisée).

34. Le système harmonisé de désignation et de codification des marchandises (appelé système harmonisé) (SH) a été adopté par le Conseil de coopération douanière en juin 1983, tandis que la Convention internationale sur le système harmonisé de désignation et de codification des marchandises (Convention SH) est entré en vigueur le ler janvier 1988 (SH88). Dès le 30 juin 2003, les parties contractantes étaient au nombre de 112 et 65 autres pays ou territoires ne figuraient pas parmi les parties contractantes, mais utilisaient le système harmonisé à des fins douanières/statistiques.

35. Lors de la vingt-septième session, qui s'est tenue à New York du 22 février au 3 mars 1993, la Commission de statistique des Nations Unies a recommandé "que les pays adoptent le SH pour l'établissement et la diffusion de leurs statistiques du commerce international"[15/].

36. Conformément au préambule à la Convention SH, qui reconnaissait l'importance d'une actualisation effective du système harmonisé compte tenu de l'évolution de la technologie ou des courants commerciaux internationaux, le système harmonisé est régulièrement passé en revue et corrigé. Lors de sa vingt-septième session, la Commission de statistique des Nations Unies a "recommandé que le Conseil de coopération douanière tienne pleinement compte des effets que les modifications proposées pourraient avoir sur le plan statistique et de prendre dûment en considération les besoins et les capacités des pays en développement"[16/]. Quelques corrections mineures du système harmonisé de 1988, résultant par ailleurs de la suppression d'un code à 6 chiffres, ont été introduites en 1992 (SH92). Une série plus complète de modifications a été adoptée en 1993 et celles-ci sont entrées en vigueur le 1er janvier 1996 (SH96). En 1999 encore une autre série de modifications a été adoptée et celles-ci sont entrées en vigueur le 1er janvier 2002 (SH02). La troisième révision majeure du SH (SH07) est entrée en vigueur le 1er janvier 2007.

37. A sa vingt-huitième session (27 février - 3 mars 1995), la Commission de statistique a examiné les changements qu'il faudrait apporter à la troisième version révisée de la CTCI pour

l'adapter au SH96. La Commission a décidé que les changements à apporter à la troisième version révisée de la CTCI pour préserver une parfaite correspondance avec le système harmonisé étaient simplement des modifications mineures. La Commission a donc décidé qu'il serait inutile de publier une quatrième version révisée de la CTCI[17/].

38. A sa trente-cinquième session (2-5 mars 2004), la Commission Statistique a entériné la conclusion du Groupe de Travail sur les Statistiques du Commerce International des Marchandises selon laquelle la quatrième révision du CTCI était nécessaire vu les changements cumulés au niveau du SH[18/]. Par conséquent, mi-2004, la Division des Statistiques des Nations Unies a commencé la préparation de la CTCI, révision 4. Le processus de révision était coordonné avec les révisions en cours de la CITI et de la CPC en vue de les harmoniser autant que possible.

39. La CTCI, révision 4 est adoptée par la Commission Statistique à sa trente-septième session[19/] (mars 2006). Le Groupe de Travail sur les Statistiques du Commerce International des Marchandises recommande aux pays intéressés et organisations internationales l'utilisation de la CTCI, révision 4 dans l'analyse du commerce international des marchandises. Plus d'informations sur la CTCI, révision 4 peut être trouvée à l'adresse : http://unstats.un.org/unsd/trade/sitcrev4.htm.
